News Release dated November 24, 2017 disseminated via Newsfile Corp.

**Item 4: Summary of Material Change**

On November 24, 2017, the Company announced that the Minister of Mines of Burkina Faso has made a decision to temporarily suspend access to the Company's Hantoukoura permit until the border with Niger is physically demarcated.

**Item 5: Full Description of Material Change**

On November 24, 2017, the Company announced that the Minister of Mines of Burkina Faso has made a decision to temporarily suspend access to the Company's Hantoukoura permit until the border with Niger is physically demarcated. The Minister's current position is that no exploration work will be allowed on the permit during the suspension period. The Minister has agreed that the permit will remain in good standing through the suspension period and that the length of the suspension period will be added back onto the length of the permit. The Hantoukoura permit was granted in May of this year for up to 9 years and covers the Company's original Kodyel permit.

In June 2017, the Company reacquired the full original Kodyel permit area via the granting of the new Hantoukoura permit from the Minister of Mines of Burkina Faso. The Hantoukoura permit, covering 238 square kilometres, is valid for three years and renewable for up to 6 additional years. The Kodyel permit was the Company's flagship permit located near the Niger border but the Company had been denied access to the full area of the permit due to a border dispute, which has since been resolved. The restricted access through the term of the Kodyel permit justified a new permit.

The Company believes that the government of Burkina Faso is motivated to complete the border marking as expeditiously as possible so as not to delay investments and development in the region, to avoid lost opportunities for employment, an increased tax base and additional revenues on a local, regional and national level. The Company has

re-emphasized to the Minister the Company's intentions to complete a sizable work program, once access is re-instated. Management will continue to actively monitor the progress of the demarcation of the border.
