The Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to provide returns for shareholders and to maintain a flexible capital structure that optimizes the costs of capital within a framework of acceptable risk. In the management of capital, the Company includes the components of shareholders' equity as well as cash. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash. The Company is dependent on the capital markets as its primary source of operating working capital and the Company's capital resources are largely determined by its ability to compete for investor support of its projects.

The Company's financial statements have been prepared assuming the Company will continue as a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. At February 28, 2023, the Company had accumulated losses of \$101,026 since its inception and expects to incur further losses in the development of its business. The Company's ability to continue as a going concern is dependent upon raising additional capital to complete the acquisition of an asset or business and the achievement of profitable operations. Significant accounting estimates

- i. the measurement of deferred income tax assets and liabilities
- ii. the determination of fair value for share-based payments related to incentive stock options and compensation warrants granted, modified or settled

Significant accounting judgments

- i. the evaluation of the Company's ability to continue as a going concern
