Rockcliff Metals Corp.	RCLF:CSE	\$ 4,715,379	\$ 0.067
Minera Alamos Inc.	MAI:TSXv	\$ 1,820,190	\$ 0.026
Great Bear Royalties Corp.	GBRR:TSXv	\$ 381,452	\$ 0.005

Samuel Pelaez, the Company's President, CEO, CIO and Director stated: "*Global liquidity continued to tighten in September on mounting concerns over credit defaults. This dynamic led to higher yield on debt instruments and a higher US dollar value. Gold and copper prices declined in that environment, leading to weaker stock prices for Norvista's holdings. This weakness was offset by gains on the Company's smaller uranium equity positions and the appreciation of its position in Great Bear Royalties.*"

Derek Macpherson, Executive Chairman stated: "*While weaker share prices impacted our month-end NAV, management remains focused on expanding Norvista's asset base and closing the share price's discount to NAV. We expect October to be a busy month on this front and we look forward to updating the market on these initiatives in the near term.*"

Use of Non-GAAP Financial Measures:

This press release contains references to NAV or "net asset value per share" which is a non-GAAP financial measure. NAV is calculated as the value of total assets less the value of total liabilities divided by the total number of common shares outstanding as at a specific date. The term NAV does not have any standardized meaning according to GAAP and therefore may not be comparable to similar measures presented by other companies. There is no comparable GAAP financial measure presented in the Company's consolidated financial statements and thus no applicable quantitative reconciliation for such non-GAAP financial measure. The Company believes that the measure provides information useful to its shareholders in understanding the Company's performance, and may assist in the evaluation of the Company's business relative to that of its peers. This data is furnished to provide additional information and does not have any standardized meaning prescribed by GAAP. Accordingly, it should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP, and is not necessarily indicative of other metrics presented in accordance with GAAP. Existing NAV of the Company is not necessarily predictive of the Company's future performance or the NAV of the Company as at any future date.
