
MINFOCUS EXPLORATION CORP.
CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED FEBRUARY 28, 2018 AND 2017
(EXPRESSED IN CANADIAN DOLLARS)

Management's Responsibility for Financial Statements

The accompanying consolidated financial statements of Minfocus Exploration Corp. (the "Company") are the responsibility of the Directors.

The consolidated financial statements have been prepared by management, on behalf of the Board of Directors, in accordance with the accounting policies disclosed in the notes to the consolidated financial statements. Where necessary, management has made informed judgments and estimates in accounting for transactions which were not complete at the statement of financial position date. In the opinion of management, the consolidated financial statements have been prepared within acceptable limits of materiality and are in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board appropriate in the circumstances.

Management has established processes, which are in place to provide sufficient knowledge to support management representations that it has exercised reasonable diligence that (i) the financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of, and for the periods presented by, the financial statements and (ii) the financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the years presented by the consolidated financial statements.

The Board of Directors is responsible for reviewing and approving the consolidated financial statements together with other financial information of the Company and for ensuring that management fulfills its financial reporting responsibilities. An Audit Committee assists the Board of Directors in fulfilling this responsibility. The Audit Committee meets with management to review the financial reporting process and the financial statements together with other financial information of the Company. The Audit Committee reports its findings to the Board of Directors for its consideration in approving the consolidated financial statements together with other financial information of the Company for issuance to the shareholders.

Management recognizes its responsibility for conducting the Company's affairs in compliance with established financial standards, and applicable laws and regulations, and for maintaining proper standards of conduct for its activities.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Minfocus Exploration Corp.,

We have audited the accompanying consolidated financial statements of Minfocus Exploration Corp. which comprise the consolidated statement of financial position as at February 28, 2018 and the consolidated statements of operations and comprehensive loss, cash flows, and changes in equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Minfocus Exploration Corp. as at February 28, 2018, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Emphasis of Matter

Without modifying our opinion, we draw attention to Note 1 in the financial statements which indicates that the Company has limited working capital and is also dependent upon its ability to secure new sources of financing to fund on-going operations. These conditions, along with other matters as set forth in Note 1, indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

Other Matter

The financial statements of Minfocus Exploration Corp. for the year ended February 28, 2017, were audited by another auditor who expressed an unmodified opinion on those statements in their report to the shareholders dated June 26, 2017.

Minfocus Exploration Corp.

Notes to Consolidated Financial Statements

(Expressed in Canadian Dollars)

February 28, 2018 and 2017

1. Nature of operations and going concern

Minfocus Exploration Corp. ("Minfocus Exploration" or the "Company") was incorporated under the British Columbia Business Corporations Act on May 6, 2010. The Company completed its Initial Public Offering ("IPO") on October 19, 2010 and its shares were listed on the TSX Venture Exchange (the "TSXV") on October 21, 2010. The Company is principally engaged in the business of exploring and developing base and precious metal mineral properties. Substantially all of the efforts of the Company are devoted to these business activities and to date the Company has not earned significant revenues. The head office of the Company is located at Suite 488 - 625 Howe Street, Vancouver, British Columbia, V6C 2T6.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration and development programs will result in profitable mining operations. The recoverability of the carrying value of exploration and evaluation properties and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise additional financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to social and government licensing requirements or regulations, unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and restrictions and political uncertainty.

These consolidated financial statements were prepared on a going concern basis of presentation, which assumes that the Company will continue operations for the foreseeable future and be able to realize the carrying value of its assets and discharge its liabilities and commitments in the normal course of business.

As at February 28, 2018 the Company has not earned revenue and has an accumulated deficit of \$5,667,965 (2017 - \$5,189,729), had cash of \$14,098 (2017 - \$7,129) and a working capital deficit of \$140,043 (2017 - \$567,508). The Company's ability to continue as a going concern is dependent upon its ability to obtain additional financing and/or achieve profitable operations in the future. Management is aware, in making its assessment, of material uncertainties related to events or conditions that cast significant doubt upon the Company's ability to continue as a going concern. These consolidated financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. These adjustments could be material.

Minfocus Exploration Corp.
Notes to Consolidated Financial Statements
(Expressed in Canadian Dollars)
February 28, 2018 and 2017

2. Summary of significant accounting policies

(a) Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”), effective for the Company’s reporting for the year ended February 28, 2018. The policies set out below have been consistently applied to all periods presented.

(b) Basis of presentation and consolidation

The consolidated financial statements have been prepared on the historical cost basis, except for cash equivalents which are reflected at fair value as set out in the accounting policies below. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The consolidated financial statements include the financial statements of the Company and its wholly owned Canadian subsidiaries Minfocus International Inc. (“Minfocus International”) and 2244223 Ontario Inc. Subsidiaries consist of entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company and are de-consolidated from the date control ceases. The financial statements include all the assets, liabilities, revenues, expenses and cash flows of the Company and its subsidiaries after eliminating inter-entity balances and transactions.

(c) Presentation and functional currency

These consolidated financial statements are presented in the Canadian dollar functional currency, the currency of the primary economic environment in which the Company and its subsidiaries operate.

(d) Financial instruments

The Company does not have any derivative financial instruments. Financial assets are initially recorded at fair value and designated upon inception into one of the following categories: held to maturity, available for sale, loans and receivables or at fair value through profit or loss (“FVTPL”). Loans and receivables are recognized on the date of origination. All other financial assets are recognized on the trade date at which the Company becomes party to the contractual provisions of the instrument.

Amounts receivable are classified as loans and receivables and are measured at amortized cost using the effective interest method, less provision for impairment. Amounts receivable are assessed at each statement of financial position date as to whether there is objective evidence that a financial asset or a group of financial assets is impaired. Cash and amounts receivable are classified as loans and receivables.

A financial asset is classified as FVTPL if it is classified as held for trading or is designated as such upon initial recognition. Realized and unrealized gains and losses are reflected in the statement of loss. Transaction costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

Financial assets are no longer recognized when the rights to receive cash flows from the investments have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership to another entity. The Company assesses at each financial reporting date whether there is objective evidence that a financial asset or a group of financial assets is impaired.

2. Summary of significant accounting policies (Continued)

(d) Financial instruments (continued)

Financial liabilities are initially recorded at fair value and designated upon inception as fair value through profit or loss or other financial liabilities. Trade and other payables and loan are recognized on the trade date at which the Company becomes a party to the contractual provisions of the instrument. Trade and other payables and loan are classified as other financial liabilities and are initially recognized at fair value. After initial recognition, other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. Financial liabilities are derecognized when the contractual obligations are discharged, cancelled or expire.

Financial instruments recorded at fair value on the consolidated statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels: Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities; Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

As at February 28, 2018 and 2017, the Company had no financial instruments recorded at fair value.

Cash and cash equivalents

Cash and cash equivalents in the statements of financial position comprise cash at banks and on hand, and short-term deposits with an original maturity of three months or less, and which are readily convertible into a known amount of cash. The Company's cash and cash equivalents are invested with major financial institutions in business accounts and higher yield investment and savings accounts that are available on demand by the Company for its programs.

(e) Equipment

Equipment is stated at cost, less accumulated depreciation and accumulated impairment losses. Cost comprises the fair value of consideration given to acquire or construct an asset and includes the direct charges associated with bringing the asset to the location and condition necessary for putting it into use. When parts of an item of equipment have different useful lives, they are accounted for as separate items (major components) of equipment. Equipment is depreciated over the estimate useful lives of the assets on the declining balance basis using an annual rate of 20% for exploration and evaluation equipment.

(f) Interest in exploration properties and exploration and evaluation expenditures

All direct costs related to the acquisition of exploration property interests are capitalized into intangible assets on a property by property basis pending determination of the technical feasibility and commercial viability of the project. Exploration and evaluation expenditures are recorded at cost at the date of acquisition. All direct costs related to the acquisition, exploration and development of exploration properties are capitalized until the properties to which they relate are placed into production, sold, abandoned or management has determined there to be impairment. If economically recoverable ore reserves are developed, capitalized costs of the related property are reclassified as mining assets and amortized using the unit-of-production method following commencement of production. Costs incurred before the Company has obtained the legal rights to explore an area are recognized in profit or loss in the statement of loss.

2. Summary of significant accounting policies (Continued)

(g) Decommissioning, restoration and similar liabilities

A legal or constructive obligation to incur restoration, rehabilitation and environmental costs may arise when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset as soon as the obligation to incur such costs arises. The timing of the actual expenditure is dependent on a number of factors such as the life and nature of the asset, the operating license conditions and, when applicable, the environment in which the mine operates. Discount rates using a pretax rate that reflect the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either a unit-of-production or the straight-line method as appropriate. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount or timing of the underlying cash flows needed to settle the obligation. Changes in estimates of decommissioning costs are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capitalized cost of the related assets, in which case the capitalized cost is reduced to nil and the remaining adjustment is recognized in profit and loss. Costs for restoration of subsequent site damage which is created on an ongoing basis during production are provided for at their net present values and charged against profits as extraction progresses. The Company had no material restoration, rehabilitation and environmental obligations as at February 28, 2018 and 2017.

(h) Provisions

A provision is recognized in the statement of financial position when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and the amount can be reliably estimated. If the effect is material, provisions are determined by discounting the expected future cash flows at a pretax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in provision due to passage of time is recognized as interest expense.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. At the end of each financial position reporting date provisions are reviewed and adjusted to reflect the current best estimate of the expenditure required to settle the present obligation. The Company had no material provisions as at February 28, 2018 and 2017.

(i) Share-based payments

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date and recognized over the period during which the options vest. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in the share-based payment note.

The fair value of share options granted to employees are recognized as an expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee, including directors of the Company.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the Company obtains the goods or the counterparty renders the service.

2. Summary of significant accounting policies (Continued)

(i) Share-based payments (continued)

The fair value of share options granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. Non-market vesting conditions are included in assumptions about the number of options that are expected to vest at each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest. No expense is recognized for awards that do not ultimately vest.

Consideration received on the exercise of share options and warrants is recorded as share capital and the equity reserve is transferred to share capital. Upon expiry, the recorded value of share options and warrants is transferred to deficit.

(j) Impairment of non-financial assets

At each financial position reporting date, the carrying amounts of the Company's assets are reviewed to determine whether there is an indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss in the statement of loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

At the end of each reporting date, the Company assesses whether there is any indication that previously recognized impairment losses no longer exist. If such an indication exists, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss in the statement of loss.

Impairment indicators for exploration and evaluation assets include the ending of rights to explore, abandoning plans to explore an exploration property, a lack of discovery of economically recoverable reserves on completion of exploration and evaluation activities and on future production or proceeds of disposition.

(k) Flow-through shares

Flow-through shares are a unique Canadian tax incentive. The Company has adopted a policy whereby flow-through proceeds are allocated between the offering of the common shares and the sale of tax benefits when the common shares are offered. The allocation is made based on the difference between the quoted market price of the common shares and the amount the investor pays for the flow-through shares. A flow-through share premium liability is recognized for the premium paid by the investors and is then reversed through the consolidated statement of loss in the period of renunciation.

Minfocus Exploration Corp.
Notes to Consolidated Financial Statements
(Expressed in Canadian Dollars)
February 28, 2018 and 2017

2. Summary of significant accounting policies (Continued)

(l) Income taxes

Income tax on the loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is provided using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the financial position reporting date applicable to the period of expected realization or settlement. Deferred income tax liabilities and assets are not recognized for taxable temporary differences that arise from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, it is not recognized.

(m) Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share is determined by adjusting the loss attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive potential common shares.

(n) Segment reporting

The Company operates in a single reportable operating segment, the acquisition, exploration and development of base and precious metals with an emphasis on zinc, platinum and nickel projects in Canada. As operations comprise a single reporting segment, amounts disclosed in the financial statements also represent segment amounts.

(o) Share capital

Common shares and warrants are classified as equity. Incremental costs directly attributable to the issue of new shares or warrants are shown in equity as a deduction, net of tax, from the proceeds.

(p) Interest income

Interest income from financial assets is accrued on a timely basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

2. Summary of significant accounting policies (Continued)

(q) New standards not yet adopted and interpretations issued but not yet effective

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods on or after March 1, 2017 or later periods. Many are not applicable or do not have a significant impact to the Company and have been excluded. The following have not yet been adopted and are being evaluated to determine their impact on the Company.

IFRS 9 – Financial Instruments (“IFRS 9”) was issued by the IASB in November 2009 with additions in October 2010 and May 2013 and will replace IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity’s own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

3. Critical judgements and estimation uncertainties

The preparation of consolidated financial statements in conformity with IFRS requires the Company’s management to make judgments, estimates and assumptions about future events that affect the amounts reported in the consolidated financial statements and related notes to the financial statements. Although these estimates are based on management’s best knowledge of the amount, event or actions, actual results may differ from those estimates.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

Capitalization of exploration and evaluation expenditures

Management has determined that exploration and evaluation expenditures incurred during the year have future economic benefits and are economically recoverable. In making this judgement, management has assessed various sources of information including but not limited to the geologic and metallurgic information, history of conversion of mineral deposits to proven and probable mineral reserves, scoping and feasibility studies, proximity of operating facilities, operating management expertise and existing permits. See Note 7 for details of capitalized exploration and evaluation expenditures.

Impairment of exploration and evaluation assets

While assessing whether any indications of impairment exist for exploration and evaluation assets, consideration is given to both external and internal sources of information. Information the Company considers include changes in the market, economic and legal environment in which the Company operates that are not within its control and affect the recoverable amount of exploration and evaluation assets. Internal sources of information include the manner in which exploration and evaluation assets are being used or are expected to be used and indications of expected economic performance of the assets. Reductions in metal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Company’s exploration and evaluation assets.

3. Critical judgements and estimation uncertainties (Continued)

Share-based payments

Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based non-vested share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviors and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

4. Capital management

When managing capital, the Company's objective is to ensure the entity continues as a going concern as well as to achieve optimal returns to shareholders and benefits for other stakeholders. Management adjusts the capital structure as necessary in order to support the acquisition, exploration and development of metallic resource assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management team to sustain the future development of the business. The Company considers its capital to be equity, which comprises issued capital, equity reserve and accumulated deficit, which totaled \$1,637,440 at February 28, 2018 (2017 - \$1,324,068).

The Company invests all capital not required for its immediate needs in short-term, liquid and highly rated financial instruments, such as cash and other short-term guaranteed deposits, all held with select major Canadian financial institutions.

The Company is currently attempting to identify economic base and precious metal resources with an emphasis on zinc, platinum and nickel and as such, the Company is dependent on external financing to fund its activities. In order to carry out the planned acquisitions and exploration, as well as pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed.

Management has chosen to mitigate the risk and uncertainty associated with raising additional capital in current economic conditions by:

- (i) maintaining a liquidity cushion in order to address any potential disruptions or industry downturns;
- (ii) minimizing discretionary disbursements; and
- (iii) exploring alternative sources of liquidity.

In light of the above, the Company will continue to assess new properties if the Company believes there is sufficient potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is appropriate.

The Company's capital management objectives, policies and processes have remained unchanged during the years ended February 28, 2018 and 2017.

The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than of the TSXV which requires adequate working capital or financial resources of the greater of (i) \$50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of 6 months.

As of February 28, 2018, the Company may not be compliant with the policies of the TSXV. The impact of this violation is not known and is ultimately dependent on the discretion of the TSXV.

Minfocus Exploration Corp.
Notes to Consolidated Financial Statements
(Expressed in Canadian Dollars)
February 28, 2018 and 2017

5. Financial risk factors

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, foreign exchange rate, and metals price risk).

Risk management is carried out by the Company's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management. There were no changes in the risks, objectives, policies and procedures from the previous year.

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or related to matters specific to the Company. The Company generates cash flow primarily from its financing activities. As at February 28, 2018, the Company had a cash balance of \$14,098 (2017 - \$7,129) to settle current liabilities of \$157,463 (2017 - \$597,112). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. The Company regularly evaluates its cash position to ensure preservation and security of capital as well as maintenance of liquidity. The Company has no other contractual obligations other than trade and other payables. As discussed in Note 1, the Company's ability to meet its obligations and carry out its planned exploration activities is uncertain and dependent upon the continued financial support of its shareholders and securing additional financing.

Market risk

(a) Interest rate risk

The Company has cash balances and no interest-bearing debt, other than the loan described in Note 10(d). The Company's current policy is to invest excess cash in guaranteed investment certificates or interest bearing accounts of select major Canadian chartered banks. The Company regularly monitors compliance to its cash management policy.

(b) Foreign currency risk

The Company's functional and reporting currency is the Canadian dollar and all expenditures are transacted in Canadian dollars. As a result, the Company's exposure to the foreign currency risk is minimal.

(c) Commodity price risk

The Company is exposed to price risk with respect to base (copper, nickel and zinc) and platinum-group element (PGE) metal prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to price movements and volatilities. The Company closely monitors prices to determine the appropriate course of action to be taken by the Company.

(d) Credit risk

Credit risk is the risk of an unexpected loss if a third party to a financial instrument fails to meet its contractual obligations. Credit risk for the Company is primarily associated with amounts receivable, which is comprised primarily of GST/HST receivable due from the Federal Government of Canada. The Company has no significant concentration of credit risk arising from its operations. Management believes that the credit risk concentration with respect to amounts receivable is low.

Notes to Consolidated Financial Statements
(Expressed in Canadian Dollars)
February 28, 2018 and 2017

5. Financial risk factors (Continued)

Sensitivity analysis

As of February 28, 2018 and 2017, both the carrying and fair value amounts of the Company's financial instruments are approximately equivalent due to their short-term nature.

Based on management's knowledge and experience of the financial markets, the Company believes that there would be no material movements for the year ended February 28, 2018 as a result of changes in interest and foreign exchange rates.

Commodity price risk could adversely affect the Company. In particular, the Company's future profitability and viability of development depends upon the world market price of base (copper, nickel and zinc) and platinum-group element (PGE) metals. The prices of these metals have fluctuated significantly in recent years. There is no assurance that, even as commercial quantities of base and precious metals with an emphasis on base (copper, nickel and zinc) and platinum-group element (PGE) metal may be produced in the future, a profitable market will exist for them. As of February 28, 2018 and 2017, the Company was not a producer of any metals. As a result, base and precious metals with an emphasis on zinc, platinum and nickel price risk may affect the completion of future equity transactions such as equity offerings and the exercise of stock options and warrants. This may also affect the Company's liquidity and its ability to meet its ongoing obligations.

7. Interest in exploration properties and exploration and evaluation expenditures (Continued)

Nipigon Reefs Property, Ontario

The Nipigon Reefs Property is an exploration project in the Thunder Bay Mining Division of Northwestern Ontario. The property comprises the claims previously referred to as the Springlet Lake Prospect which were staked by the Company, plus the Seagull North Prospect, which was optioned. The staked claims of the Springlet Lake Prospect, valued at \$171,853, have been impaired during the year ended February 28, 2018. The optioned claims are subject to work and payment commitments to the vendors (Canadian International Pharma Corp., Rainy Mountain Royalty Corp. and White Metal Resources) as shown in the table below in order to earn the initial 55% interest in the mineral rights.

February 22, 2011	Contract signed.	Completed
by February 28, 2011	Aggregate cash payments of \$55,000 (paid) and issuance of 50,000 common shares (issued and valued at \$20,000).	Completed
by February 22, 2012 (amended below)	Consideration that is the equivalent to \$25,000 in cash and/or shares of the Company (paid in shares); and incur an aggregate of \$250,000 of expenditures (amended below).	Completed
by April 30, 2012	Minimum commitment to incur \$250,000 of aggregate expenditures per above extended from February 22, 2012 to April 30, 2012 (incurred).	Completed
by February 22, 2013	Consideration that is the equivalent of \$25,000 cash and/or shares (paid \$12,500 and issued 416,667 shares) of the Company; and incur an additional \$250,000 of expenditures (incurred).	Completed
by February 22, 2014 (amended below)	Consideration that is the equivalent of \$25,000 cash and/or shares of the Company (paid in shares); and incur an additional \$250,000 of expenditures (amended below).	Completed
by August 31, 2014	Commitment to incur an additional \$250,000 of expenditures per above extended from February 22, 2014 to August 31, 2014 (incurred).	Completed
by February 22, 2015 (amended below)	Commitment to incur an additional \$250,000 of expenditures by February 22, 2015 extended to September 30, 2015. As consideration for the extension, the Company issued 1,000,000 common shares to the optionors.	Common shares issued
by September 30, 2015 (amended below)	Commitment to incur an additional \$250,000 of expenditures by September 30, 2015 extended to September 30, 2017. As consideration for the extension, the Company issued 500,000 common shares to the optionors.	Common shares issued
by September 30, 2017 (amended below)	Commitment to incur an additional \$250,000 of expenditures by September 30, 2017 extended to September 30, 2018. As consideration for the extension, the Company issued 600,000 common shares to the optionors.	Common shares issued
by September 30, 2018	Incur an additional \$250,000 of expenditures as extended from September 30, 2017 above.	Pending

If the Company incurs a cumulative expenditure balance of \$3,000,000 and issues an additional 1,000,000 shares to the optionors before September 30, 2019, it may earn a 70% undivided interest in the mineral rights. Thereafter each optioner has the right to contribute its proportion of ongoing expenditures or forfeit its proportionate interest and convert to a one percent royalty, which may be purchased by the Company under certain conditions.

Minfocus Exploration Corp.
Notes to Consolidated Financial Statements
(Expressed in Canadian Dollars)
February 28, 2018 and 2017

7. Interest in exploration properties and exploration and evaluation expenditures (Continued)

Coral Zinc Project, British Columbia

In January 2015, the Company entered into an agreement under the terms of which it has an option to earn up to an initial 60% interest in the Coral Zinc Project, a zinc project situated in northern British Columbia. The optioned claims are also subject to work and payment commitments to the vendors as shown in the table below in order to earn the initial 60% interest in the mineral rights. The Coral tenures are in good standing with the BC Ministry of Energy & Mines until September 2024. Of the optionors, one is a director and officer of the Company (See Note 10(e)).

January 19, 2015	Contract signed.	Completed
by September 30, 2015	Commitment to incur \$50,000 of expenditures.	Completed
by September 30, 2016	Commitment to incur an additional \$100,000 of expenditures.	Completed
by September 30, 2017	Commitment to incur an additional \$300,000 of expenditures and pay the optionors consideration that is the equivalent of \$20,000 cash and/or shares, at which stage the Company will be deemed to have earned a 20% interest (400,000 shares issued).	Completed
by September 30, 2018	Commitment to incur an additional \$550,000 of expenditures and pay the optionors consideration that is the equivalent of \$40,000 cash and/or shares, at which stage the Company will be deemed to have earned a 40% interest.	Pending
by September 30, 2019	Commitment to incur an additional \$1,000,000 of expenditures and pay the optionors consideration that is the equivalent of \$100,000 cash and/or shares, at which stage the Company will be deemed to have earned a 60% interest.	Pending

After the Company has earned the initial 60% interest, should the optionors not contribute their full pro-rata share of any work program expenditures, the Company can earn an additional 10% interest by expending an additional \$1,000,000 within two years thereafter. The project is subject to a 3% net smelter royalty ("NSR") of which 2% can be bought for \$4,000,000. During the year ended February 28, 2017, the Company allowed certain claims to lapse and as compensation, issued 100,000 shares to the vendors, valued at \$5,000. In August 2017, the Company issued 400,000 shares to acquire an initial 20% of the property.

The Company has pledged a \$10,000 GIC as security under a safekeeping agreement with the Ministry of Finance, British Columbia relating to the application for permits on the Coral Zinc Project. This amount is included in cash on the statement of financial position.

Myst Metals Nickel Property, British Columbia

In October 2014, the Company entered into a letter of agreement under the terms of which it has an option to earn a 100% interest in the Myst Metals Nickel Property, a nickel project situated in northern British Columbia. To earn the interest, the Company is required to make cash payments of \$7,000 and issue 400,000 shares to the optionor over a period of two years. The Company has made the payments and has issued the required shares and has therefore earned the interest in the property. During the year, the claims were allowed to lapse and the carrying value of the property amounting to \$37,779 was written off.

Peregrine Zinc Project, British Columbia

The project comprises optioned claims supplemented by claims staked by the Company. In January 2017, the Company entered an option earn-in agreement on the Peregrine Project, in southeastern British Columbia. Minfocus can earn a 100% interest over a period of two years by making optional staged payments totaling \$10,000 cash (paid) and issuing 1,000,000 shares (350,000 issued at February 28, 2018) plus the grant of a 2% NSR. The Company has the option to repurchase up to 1% of the NSR for \$1,000,000 after commercial production. The Peregrine tenures remain in good standing until September 2021.

Shares issued for debt (v)	9,246,895	462,344
Balance, February 28, 2018	73,237,487	\$ 6,951,782

(i) The Company issued 900,000 shares for interests in exploration and evaluation properties during the year ended February 28, 2017 – 100,000 shares were issued in connection with the Coral option agreement, 500,000 in connection with the Nipigon Reefs option agreement, 200,000 in connection with the Myst Metals option agreement and 100,000 in connection with the Peregrine option agreement. The value of shares issued was based on the price of the shares issued in arm's length private placement financings or at the quoted trading values of the Company's shares at the date of issue.

(ii) In June and July 2016, the Company raised \$250,000 by way of a private placement through the issuance of 10,000,000 units at \$0.025 per unit, comprising 4,240,000 flow-through units and 5,760,000 non flow-through units. Each flow-through and non flow-through unit comprised one share and one common share purchase warrant. Each whole warrant entitles the holder to purchase one additional common share of the Company at a price of \$0.10 per share for a period of two years from the date of closing of the private placement, subject to certain acceleration provisions. The Company paid a finder's fee of \$10,360 and issued 382,400 finders' warrants in relation to the financing. The finder's warrants were issued at an exercise price of \$0.025 per unit, which are exercisable for a period of two years, subject to certain acceleration provisions. The grant date fair value of the warrants was estimated at \$88,225 using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 105% based on the historical volatility of the Company's stock; risk-free interest rate of between 0.49% and 0.51% and an expected average life of two years. Pursuant to this financing, the Company renounced a total of \$106,000 of qualifying Canadian exploration expenses with an effective date of December 31, 2016. The Company has fulfilled its spending commitment under this obligation.

(iii) The Company issued 1,550,000 shares for interests in exploration and evaluation properties during the year ended February 28, 2018 – 400,000 shares were issued in connection with the Coral option agreement, 600,000 in connection with the Nipigon Reefs option agreement and 550,000 in connection with the Peregrine option agreement. The value of shares issued was based on the quoted trading values of the Company's shares at the date of issue.

Minfocus Exploration Corp.
Notes to Consolidated Financial Statements
(Expressed in Canadian Dollars)
February 28, 2018 and 2017

8. Share capital (Continued)

Common Shares (Continued)

(iv) In June 2017 the Company raised \$77,500 by way of a private placement through the issuance of 3,100,000 units at \$0.025 per unit, comprising 1,600,000 flow-through units and 1,500,000 non flow-through units. Each flow-through and non flow-through unit comprised one common share and one common share purchase warrant. Each whole warrant entitles the holder to purchase one additional common share of the Company at a price of \$0.10 per share for a period of two years from the date of closing of the private placement, subject to certain acceleration provisions. The Company paid a finder's fee of \$3,800 and issued 32,000 finders' warrants in relation to the financing. The finder's warrants were issued at an exercise price of \$0.025 per unit, which are exercisable for a period of two years, subject to certain acceleration provisions. The grant date fair value of the warrants was estimated at \$21,226 using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 105% based on the historical volatility of the Company's stock; risk-free interest rate of 1.109% and an expected average life of two years.

(v) In May 2017, the Company completed agreements for the settlement of outstanding related party debt held by its directors and officers and companies controlled by directors and officers totaling \$462,344 in exchange for the issuance of 9,246,895 common shares of the Company at a deemed value of \$0.05 per share. The completion of the debt settlement transactions contemplated in these agreements was approved by the TSXV and the shares issued in June 2017 (Notes 10(b) and (d)).

Stock Options

On June 30, 2010, the directors of the Company consented to adopt a share option plan (the "Plan"). The Plan provides that the Board of Directors of the Company may from time to time, at its discretion, and in accordance with the TSXV requirements, grant to directors, officers, employees and consultants to the Company, non-transferable options to purchase common shares, provided that the number of common shares reserved for issuance will not exceed 10% of the common shares outstanding at any time. Such options may be exercisable for a period of up to 10 years from the date of grant. In connection with the foregoing, the number of common shares reserved for issuance to any individual director or officer will not exceed 5% of the issued and outstanding common shares and the number of common shares reserved for issuance to all technical consultants will not exceed 2% of the issued and outstanding common shares. Options may be exercised no later than 90 days following cessation of the optionee's position with the Company, provided that if the cessation of office, directorship, or consulting arrangement was by reason of death, the option may be exercised within a maximum period of one year after such death, subject to the expiry date of such option. The approval of the plan is subject to approval by the TSXV and the Company's shareholders.

Stock option transactions are summarized as follows:

	Number of Options	Weighted Average Exercise Price
Outstanding at February 29, 2016	2,950,000	\$0.19
Expired	(1,850,000)	0.25
Granted	1,700,000	0.10
Outstanding at February 28, 2017	2,800,000	\$0.10
Granted	4,500,000	0.05
Outstanding at February 28, 2018	7,300,000	\$0.07

February 28, 2018 and 2017

9. Basic and diluted net loss per share

The calculation of basic and diluted loss per share for the year ended February 28, 2018 was based on the loss attributable to common shareholders of \$366,454 (2017 - \$159,579) and the weighted average number of common shares outstanding of 68,727,724 (2017 – 55,371,660). Outstanding warrants and stock options have been excluded from the calculation of diluted loss per share for the periods presented as their effect would be anti-dilutive.

10. Related party balances and transactions

Related parties include the Board of Directors, Officers, and close family members of members of the Board of Directors and Officers and enterprises that are controlled by these individuals as well as certain persons performing similar functions.

The Company entered into the following transactions with related parties during the year ended February 28, 2018:

(a) During the year ended February 28, 2018, private corporations controlled by directors who are also officers of the Company charged the Company \$15,875 (2017 - \$28,500) in management fees related to the provision of office space and administrative support and other consulting.

(b) Officers and directors of the Company and companies controlled by such individuals were owed \$67,138 as at February 28, 2018 (2017 – \$333,741) for services rendered and for expenses incurred in the ordinary course of business. This amount is unsecured, non-interest bearing with no fixed terms of repayment. In June 2017, the Company wrote off \$20,783 and issued 6,445,871 common shares to settle \$322,294 of amounts due to officers and directors.

(c) Pursuant to the private placement described in Note 8(b)(iv), directors and officers subscribed for a total of 1,000,000 units for gross proceeds of \$25,000 (2017 - 3,820,000 units for gross proceeds of \$95,500).

(d) The Company entered into a loan agreement with a director and officer on November 13, 2015. The balance owing under the agreement at February 28, 2018 amounted to \$Nil (2017- \$106,975). Interest of \$2,227 was paid on the loan for the year ended February 28, 2018 (2017 - \$4,244). In June 2017, the Company issued 2,801,024 common shares to settle the balance of \$140,051 due under the agreement.

(e) In January 2015, the Company entered into an option agreement allowing it to acquire up to a 70% interest in the Coral Zinc Project as discussed in Note 7. Two of the optionors, who together have a 50% interest in the claims ownership, are (or were) directors and officers of the Company at that time. At this time, there is only one optionor who is a director and officer of the Company who holds a 5% interest in the claim ownership. In August 2017, the Company issued 200,000 shares to those directors and officers as part of the shares issued to acquire a 20% direct ownership in the mineral tenures comprising the project.

(f) In January 2017, the Company entered into an option agreement allowing it to acquire a 100% interest in the Peregrine Zinc Project as discussed in Note 7. The optionor, who has 100% interest in the claims, became a director of the Company in February 2018. During the year ended February 28, 2018, the Company issued 550,000 shares and paid \$10,000 to the director as per the option agreement.

(g) In accordance with IAS 24, key management personnel are those having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company. The remuneration of directors and key management of the Company was as follows.

For the years ended February 28, 2018 and 2017	2018	2017
Aggregate compensation - cash	\$ 40,625	\$ 97,570
Aggregate compensation – options	111,782	18,354
Total aggregate compensation	\$ 152,407	\$ 115,924

February 28, 2018 and 2017

11. Segmented information

The Company's operations comprise a single reporting operating segment engaged in mineral exploration in Canada. All of the operating costs for the years ended February 28, 2018 and 2017 were incurred in Canada and all of the assets as at February 28, 2018 and 2017 were located in Canada.

12. Income taxes

(a) Provision for income taxes

Major items causing the Company's income tax rate to differ from the federal statutory rate of 26.0% (2017 - 26.5%) were as follows:

	2018	2017
Net loss before taxes	\$ (366,454)	\$ (159,579)
Expected income tax recovery based on statutory rate	(95,000)	(42,000)
Adjustments to expected income tax benefit:		
Share based compensation	29,000	5,000
Other	54,000	8,000
Flow through renunciation	-	28,000
Change in benefit of tax assets not recognized	12,000	1,000
Deferred income tax (recovery)	\$ -	\$ -

(b) Deductible temporary differences

Deferred tax assets have not been recognized in respect of the following deductible temporary differences:

	February 28 2018	February 28 2017
Interest in exploration properties	\$ 2,595,000	\$ 2,431,000
Non-capital loss carry-forwards	1,005,000	1,010,000
Other temporary differences	25,000	19,000
	\$ 3,625,000	\$ 3,460,000

Deferred tax assets have not been recognized in respect of these items because it is not probable that the temporary difference will reverse in the foreseeable future and that taxable profit will be available against which the tax benefits can be utilized.

Minifocus Exploration Corp.

(Expressed in Canadian Dollars)
February 28, 2018 and 2017

12. Income taxes (Continued)**(b) Deductible temporary differences (Continued)**

The Company has approximately \$4,360,000 of Canadian eligible exploration and development expenditures which can be carried forward indefinitely to be utilized against future taxable income. Also, the Company has approximately \$1,005,000 (2016 - \$1,010,000) of non-capital loss carry-forwards in Canada. These losses expire as follows:

Year	Amount
2029	\$ 2,000
2030	65,000
2031	155,000
2032	345,000
2033	89,000
2034	92,000
2035	59,000
2036	67,000
2037	88,000
2038	43,000
<u>Total</u>	<u>\$ 1,005,000</u>

13. Commitments and contingencies**Environmental contingencies**

The Company's exploration activities are subject to various federal and provincial laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

Flow through financing

The Company entered into flow-through share subscription agreements during the year ended February 28, 2017, whereby it renounced to investors a total of \$106,000 of qualifying Canadian exploration expenses as described in the Income Tax Act of Canada, with an effective date of December 31, 2016. The Company has fulfilled its spending commitment under this obligation. In June 2017, the Company entered into additional flow-through share subscription agreements whereby it will be renouncing to investors a total of \$40,000 of qualifying Canadian exploration expenses, with an effective date of December 31, 2017.

The Company has indemnified the subscribers of flow-through share offerings against any tax related amounts that become payable by the shareholder as a result of the Company not meeting its expenditure commitments.

Management and consulting contracts

The Company is party to certain management and consulting contracts. During the current and prior fiscal periods, certain parties under the management and consulting contracts agreed to reduced salaries and to not receive salaries until further significant financing is obtained, with future salaries and other amounts to be negotiated at that stage. Minimum commitments under management and consulting contracts are approximately \$105,000 payable within one year. The contracts also require that additional payments of up to \$360,000 be made, based on the contract amounts, upon the occurrence of certain events such as change of control. As a determinable triggering event has not taken place, the contingent payments have not been reflected in these financial statements.

14. Subsequent events

- i. On March 18, 2018, 1,100,000 stock options priced at \$0.10 expired unexercised.
- ii. On March 27, 2018, 300,000 stock options priced at \$0.05 and expiring in 5 years, were granted to a consultant.
- iii. On April 9, 2018, 600,000 stock options priced at \$0.10 expired unexercised.
- iv. Subsequent to February 28, 2018, the Company settled outstanding debt of \$101,397, \$48,931 of which was due to related parties, in exchange for the issuance of 2,027,937 shares at a deemed value of \$0.05 per share. The fair value of the shares on the settlement date was \$0.015 per share.
- v. On April 4, 2018, the Company issued 350,000 shares with a fair value of \$5,250 in connection with the Peregrine Project.
- vi. In March 2018, the Company entered into an agreement to acquire a 100% interest in the Round Pond Zinc Project, comprising 30 claims (750 hectares), located in Western Newfoundland for total consideration of up to 5,250,000 shares of the Company. A 2.0% Net Smelter Return ("NSR") royalty was granted in which \$1.5 million can be paid to reduce the royalty to a 0.75% NSR interest.
- vii. On April 11, 2018, the Company entered into an agreement to acquire a 100% interest in a mineral claim contiguous to the Company's Peregrine Zinc Project. Total consideration for the claim is 200,000 shares upon TSX Venture Exchange approval (issued May 11, 2018 with a fair value of \$3,000), plus a payment of \$2,500 or 350,000 shares within 3 months of approval, at the discretion of the Company. A 2.0% Net Smelter Return ("NSR") royalty was granted to the seller, of which \$500,000 can be paid to reduce the royalty to a 1.0% NSR interest.
- viii. On April 13, 2018, the Company issued 750,000 shares with a fair value of \$11,250 in connection with the Round Pond Zinc Project.
- ix. On May 6, 2018, 200,000 options issued on December 19, 2016, priced at \$0.10, were cancelled due the resignation of the holder of the options.
