

CONSOLIDATED FINANCIAL STATEMENTS OF

MONUMENT MINING LIMITED

(Expressed in thousands of United States dollars)

For the years ended June 30, 2017 and 2016

MANAGEMENT'S RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Monument Mining Limited have been prepared by management in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS). The financial information contained in the Management Discussion and Analysis has been reviewed to ensure consistency with the consolidated financial statements.

Management maintains systems of internal controls designed to provide reasonable assurance that the assets are safeguarded, all transactions are authorized and duly recorded, and financial records are properly maintained to facilitate the preparation of financial statements in a timely manner. The Board of Directors is responsible for ensuring that management fulfills its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the financial statements. The Board carries out this responsibility principally through its Audit Committee.

The Audit Committee of the Board of Directors has approved the consolidated financial statements.

The external auditors have full and unrestricted access to the Audit Committee to discuss the scope of their audit, the adequacy of the system of internal controls and review financial reporting issues. The consolidated financial statements have been audited by Grant Thornton LLP, the independent public accounting firm, in accordance with Canadian Auditing Standards.

To the Shareholders of
Monument Mining Limited

We have audited the accompanying consolidated financial statements of Monument Mining Limited, which comprise the consolidated statement of financial position as at June 30, 2017 and June 30, 2016, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audit is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Monument Mining Limited as at June 30, 2017 and June 30, 2016, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

1. Corporate Information and Nature of Operations

Monument Mining Limited (“Monument” or “the Company”) is a Vancouver based gold producer, engaged in the operation of gold mines and acquisition, exploration and development of precious metals and other base metals mineral properties with a focus on gold. The Company is incorporated and domiciled under the Canada Business Corporations Act and listed on the Toronto Stock Venture Exchange (“TSX-V: MMY”) and Frankfurt Stock Exchange (“FSE: D7Q1”) with the head office located at 1100 Melville Street, Suite 1580, Vancouver, British Columbia, Canada V6E 4A6.

The Company’s 100% owned Selinsing Gold Mine is located in Pahang State, Malaysia, and has been in commercial production since September 2010. The Company’s exploration and development mineral assets are 100% owned through its subsidiaries, including the Selinsing gold portfolio in Pahang State, Malaysia comprised of the Selinsing, Buffalo Reef, Felda Land and Famehub projects (together “Selinsing”), and Murchison gold portfolio in Western Australia (“WA”) comprised of the Burnakura, Tuckanarra and Gabanintha projects; and the Mengapur Polymetallic Project (“Mengapur”) in Pahang State, Malaysia.

The consolidated financial statements of the Company for the financial year ended June 30, 2017, comprising the Company and its subsidiaries, were authorized for issue in accordance with a resolution of the directors on September 29, 2017. These consolidated financial statements are presented in thousands of United States (US) dollars and all values are rounded to the nearest thousand dollar except per share amounts or where otherwise indicated.

2. Basis of Preparation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”). These consolidated financial statements were prepared on a going concern basis under the historical cost method except for certain derivatives which are measured at fair value. A summary of significant accounting policies are presented in Note 3 and have been consistently applied in each of the periods presented. Significant accounting estimates, judgments and assumptions used or exercised by management in the preparation of these consolidated financial statements are presented in Note 3 (r).

3. Significant Accounting Policies

a) Basis of consolidation

These consolidated financial statements incorporate the financial statements of the Company and the entities controlled by the Company (its subsidiaries) as of June 30, 2017 from their respective date of acquisition. Control exists over an investee when the Company is exposed, or has rights, to variable returns from its investee and has the ability to affect those returns through its power over the investee. Subsidiaries are included in the consolidated financial results of the Company from the effective date of acquisition up to the effective date of disposition or loss of control.

All intra-group balances and transactions are eliminated on consolidation, including unrealised gains and losses on transactions. Where unrealised losses on intra-group asset sales are reversed on consolidation, the underlying asset is also tested for impairment from a group perspective. Amounts reported in the financial statements of subsidiaries have been adjusted where necessary to ensure consistency with the accounting policies adopted by the Company. Profit or loss and other comprehensive income of subsidiaries acquired or disposed of during the year are recognised from the effective date of acquisition, or up to the effective date of disposal, as applicable.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

The consolidated financial statements include the financial statements of Monument and its subsidiaries. The subsidiaries and percentage of ownership are listed in the following table:

Entity	Location	Interests holding as at	
		June 30, 2017	June 30, 2016
Polar Potential Sdn. Bhd.	Malaysia	100%	100%
Able Return Sdn. Bhd.	Malaysia	100%	100%
Selinsing Gold Mine Manager Sdn. Bhd.	Malaysia	100%	100%
Damar Consolidated Exploration Sdn. Bhd.	Malaysia	100%	100%
Famehub Venture Sdn. Bhd.	Malaysia	100%	100%
Monument Mengapur Sdn. Bhd.	Malaysia	100%	100%
Cermat Aman Sdn. Bhd.	Malaysia	100%	100%
Star Destiny Sdn. Bhd.	Malaysia	100%	100%
Primary Mining Sdn. Bhd.	Malaysia	100%	100%
Monument Australia Pty Ltd.	Australia	100%	100%
Monument Murchison Pty Ltd.	Australia	100%	100%
Monument Gold Operations Pty Ltd.	Australia	100%	100%

b) Foreign currencies

The Company's consolidated financial statements are presented in US dollars which is also the functional currency of the parent company and all of its subsidiaries.

Foreign currency transactions for the Company's subsidiaries are translated into the functional currency using the exchange rate at the dates of the transactions or the prevailing average rates during the transaction periods. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

Non-monetary items that are measured at historical cost in a foreign currency are translated at the historical rates. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The exchange differences on translation of these foreign operations are recognized in profit or loss as foreign exchange gains or losses.

c) Property, plant and equipment

Property, plant and equipment are recorded at cost less accumulated depreciation and accumulated impairment losses. The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation and, where applicable, the initial estimation of any asset retirement obligation. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset. The amortization begins when the asset is available for use.

Mineral properties in production are depreciated on a unit-of-production ("UOP") basis over the productive life of the mine based on the economically recoverable proven and probable reserves. Gold processing plant is amortized on a UOP basis over the total tonnages of mill feed over the estimated life of mine. Depreciation of various components of the gold processing plant and other capital assets are calculated on a straight-line basis over the assets' estimated useful lives over the following periods:

Buildings	10 years
Machinery, heavy equipment and components of plant	2-20 years
Administrative furniture and equipment	5-10 years
Computers	2-5 years
Vehicles	5-8 years

Depreciation expenses from production property and plant are inventoried; depreciation from equipment used for exploration is capitalized under associated exploration and evaluation mineral properties; depreciation from administrative capital assets is charged against operations.

The Company conducts an annual assessment of the residual balances, useful lives and depreciation methods being used for property, plant and equipment items and any changes arising from the assessment are applied by the Company prospectively.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

d) Mineral properties

Mineral property and development costs represent capitalized expenditures related to the acquisition, exploration and development of mineral properties and related equipment. Mineral property interest acquisition costs include the cash consideration, option payment under an earn-in arrangement, the fair value of common shares issued for mineral property interests and the fair value of warrants issued determined using the Black-Scholes option pricing model.

Exploration and evaluation expenditures

Exploration and evaluation expenditure relates to the initial acquisition costs of mineral properties and costs incurred for investigation and evaluation of potential mineral reserves and resources, including trenching, exploratory drilling, sampling, mapping and other activities in searching for ore bodies under the properties, and to evaluate the technical and commercial viability of developing mineral properties identified through exploration. Exploration and evaluation expenditures, net of any recoveries, are recorded on a property-by-property basis and deferred until the property is placed into production, sold or abandoned or determined to be impaired. The carrying values of capitalized amounts are reviewed annually, or when indicators of impairment are present.

Exploration and evaluation expenditure to any particular property are reclassified to mineral properties and mine development expenditures when technical and commercial viability for that property is established, or otherwise expensed when that property is abandoned or impaired. Exploration and evaluation expenditure for investigation over mineral properties prior to acquiring underlined mining rights are recorded as deferred cost and expensed when decision does not result in such acquisition. Exploration and evaluation expenditure that do not relate to any specific property are expensed as incurred.

The establishment of technical and commercial viability is assessed based on technical studies carried out in compliance with industry standards and regulatory requirements and is deemed to be achieved when the Company determines that the project will provide a satisfactory return relative to its perceived risks. Ore reserves and resources may be declared for undeveloped mining projects before its commercial viability has been fully determined. Evaluation costs may continue to be capitalized during the period between declaration of reserves and resources, and approval to mine as further work is undertaken in order to refine the development case to maximize the project's returns.

Mine development expenditures

A mineral property is under the development stage once the development of the property becomes commercially and technically viable. The costs incurred to design and engineer an open pit, to build access roads, camps and other infrastructure for mining, and to remove overburden and other mine waste materials in order to access the ore body at open pit operations ("stripping costs") prior to the commencement of commercial production are categorized as mine development expenditures. Development expenditures to this point including depreciation of related plant and equipment, and net of proceeds from incidental sale of ore extracted during the development stage are capitalized to the related property. The mine development expenditures are reclassified to Property, Plant and Equipment following commencement of commercial production in the manner intended by management.

Mine development expenditure are depreciated on a UOP basis over the productive life of the mine based on proven and probable reserves, and portion of measured, indicated, or inferred resources that are reasonably expected to be converted to proven and probable reserves.

Stripping costs incurred during the production phase of a mine are considered production costs and are included in the cost of inventory produced during the period in which stripping costs are incurred. Stripping costs incurred to prepare the ore body for extraction or to provide access to orebody that will be extracted in future periods and would not otherwise have been accessible are capitalized as mine development expenditure and depreciated on a UOP basis over the reserves and resource that directly benefit from the stripping activity. New infrastructure costs incurred during the production phase for future probable economic benefit are also capitalized to the related mineral property subject to depreciation on a UOP basis.

e) Impairment of non-financial assets

The carrying amounts of non-financial assets are reviewed for impairment whenever facts and circumstances suggest that the carrying amounts may not be recoverable. If there are indicators of impairment, the recoverable amount of the asset is estimated in order to determine the extent of any impairment. Where the asset does not generate cash flows that are independent from other assets, the recoverable amount of the cash generating unit ("CGU") to which the asset belongs is determined. The recoverable amount of an asset or CGU is determined as the higher of its fair value less costs of disposal and its value in use. An

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

impairment loss exists if the asset's or CGU's carrying amount exceeds the recoverable amount and is recorded as an expense immediately.

Tangible assets that have been impaired in prior periods are tested for possible reversal of impairment whenever events or changes in circumstances indicate that the impairment has reversed. If the impairment has reversed, the carrying amount of the asset is increased to its recoverable amount but not beyond the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior periods. A reversal of an impairment loss is recognized in profit or loss immediately.

f) Cash and cash equivalents

Cash and cash equivalents consist of cash at banks and on hand and short-term deposits with an original maturity of three months or less. Restricted cash consists of cash held on hand which shall not be released until certain conditions are met under contractual obligations or a court order.

g) Inventories

Inventories include supplies, stockpiled ore, work in progress and finished goods. Gold bullion and ore stockpiles are physically measured or estimated and valued at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and costs of selling final product. Cost is determined by the weighted average method, except for supplies inventory by first-in-first-out method, and comprises direct purchase costs and an appropriate portion of fixed and variable overhead costs, including depreciation and amortization, incurred in converting materials into finished goods. Separately identifiable costs of conversion are specifically allocated.

Supplies inventory consists of consumables used in mining and processing operations and are valued at the lower of cost and net realizable value using the first-in-first-out method. Supplies used in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Any provision for obsolescence is determined by reference to specific items of stock. A regular review is undertaken to determine the extent of any provision.

Stockpiled ore represents ore that has been extracted from the mine that is ready for further processing. Stockpiled ore is measured by estimating the number of tonnes added and removed from the stockpile and is verified based on periodic surveys. Stockpiled ore is valued based on the current mining costs incurred up to the point of stockpiling the ore using the weighted average cost method. Costs include mining, mine-site overhead and associated depreciation and depletion. Costs are removed from stockpiled ore and added to work in process inventory when stockpiled ore is crushed based on the average cost per tonne stockpiled.

Work in progress represents gold in the process of being converted to a saleable product from crushed ore to gold doré. Work in progress is recorded at weighted average cost. Costs comprise mining and processing to produce gold doré including costs of stockpiled ore crushed, crushing, leaching, smelting and associated depreciation and depletion. Costs are removed from work in process inventory as gold doré and is produced based on the weighted average cost per contained recoverable ounce of gold.

Finished goods represent metal available for sale and are valued at the lower of weighted average production cost and net realizable value. The cost of finished goods inventory includes the weighted average cost of work in process inventories incurred prior to refining plus applicable refining costs.

h) Intangible asset

Intangible assets are assessed for legal, regulatory, contractual, competitive or other factors to determine if the useful life is definite. Intangible assets with definite useful lives are measured at cost less accumulated amortization and accumulated impairment losses, and are amortized on a straight-line basis through the life of underlined intangible assets. Included in Intangible assets as at June 30, 2017 is an interim license of the Intec Technology ("Intec"). Intec is patented technology with limited useful life. It allows the Company exploit its technology in dissolving sulphide material at certain sites owned by the Company. Upon success, the full license would be then granted to the Company for designated region including Australia, South East Asia countries.

i) Asset retirement obligation ("ARO")

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of property, plant and equipment, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future rehabilitation cost estimates is capitalized to the corresponding asset along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The capitalized rehabilitation cost is depreciated on the same basis as the related asset of plant or mining property.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

The Company's estimates are reviewed quarterly for changes in regulatory requirements, effects of inflation and changes in estimates. The discounted liability is increased for the passage of time and adjusted for changes to the current discount rate, and the amount or timing of the underlying cash flows needed to settle the obligation. The periodic unwinding of the discount is recognized in profit or loss as a finance cost. The liability to settle the obligation is recognized on an undiscounted basis where management is unable to estimate a timeline for the related project and estimates the discounting effect as not material.

Additional disturbances or changes in rehabilitation cost will be recognized as additions or charges to the corresponding assets and asset retirement obligation when they occur.

j) Leases

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Leases are classified at their inception as either operating or finance lease based on the economic substance of the agreement so as to reflect the risks and benefits incidental to ownership.

Operating leases

The minimum lease payments of operating leases, where the lessor effectively retains substantially all of the risks and benefits of ownership of the leased item, are recognized as an expense in profit or loss on a straight-line basis over the lease term. Contingent rentals are recognized as an expense when they are incurred.

Finance leases

Leases which effectively transfer substantially all the risks and benefits incidental to ownership of the leased item to the Company are capitalized at the inception of the lease at the fair value of the leased item or, if lower, at the present value of the minimum lease payments.

Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recorded in profit or loss.

k) Financial instruments

The Company's financial instruments are classified as loans and receivables (cash and cash equivalents and trade and other receivables), financial assets at fair value through profit or loss (FVTPL) (marketable securities), other financial liabilities (trade and other payables) and financial liabilities at fair value through profit or loss (FVTPL) (derivative financial instruments).

Fair value of financial instruments

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments which are measured at fair value by valuation technique:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: Other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and

Level 3: Techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

Impairment of financial assets

The Company assesses at each reporting date whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if there is objective evidence of impairment as a result of one or more events that occurred since the initial recognition of the asset (an incurred loss event) and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtor or a group of debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults. If such evidence exists, the estimated recoverable amount of the financial asset is determined and an impairment loss is recognized for the difference between the recoverable amount and the carrying amount.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

l) Taxes

Current tax

Current tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the reporting date in the countries where the Company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to tax authorities.

Deferred tax

Deferred tax is recognized on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities or deferred tax assets that are probable of being realized are recognized for all taxable temporary differences, except:

- On initial recognition of goodwill;
- Where the deferred tax liability or asset arises from initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction affects neither the accounting nor taxable profit or loss; or
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interest in joint ventures, where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred tax asset is utilized or the deferred tax liability is settled.

Deferred tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilized.

The Company recognizes the deferred tax asset regarding the temporary differences on the rehabilitation liability and the corresponding deferred tax liability regarding the temporary difference on the rehabilitation asset.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Royalties and revenue based taxes

Royalties and revenue based taxes are accounted for under IAS 12 Income Taxes ("IAS 12") when they have the characteristics of income tax. This is considered the case when they are imposed under government authority and the amount payable is based on taxable income – rather than based on quantity produced or as a percentage of revenue – after adjustment for temporary differences. Obligations arising from royalty arrangements that do not satisfy these criteria are recognized as current provision and included in production costs. The royalties payable by the Company are not considered meeting the criteria to be treated as part of income tax.

m) Share-based payments

The Company measures all equity-settled share – based awards made to employees, including stock options and restricted share units, based on the fair value of the options or the units on the date of grant. The grant date fair value of options or units is estimated using an option pricing model and is recognized as compensation expense over the vesting period, based on the number of options or units that are expected to vest. The corresponding increase is recognized in capital reserves. When options are exercised or units are redeemed, the costs are transferred out of capital reserves where they were initially recorded and credited to share capital.

n) Share capital

Common shares are classified as equity. Incremental cost directly attributable to the issuance of common shares is recognized as a deduction from equity.

Share purchase warrants that are issued for goods and services are initially accounted for under IFRS 2 Share-based Payment ("IFRS 2") as equity instruments (their initial fair value would be recognized as share issuance costs). Subsequent to their issuance, share

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

purchase warrants issued for goods and services are considered as equity for their entire life. The fair value of such share purchase warrants is not re-measured unless there is a change to the terms of the warrants which cause an increase in value. When these share purchase warrants are exercised, the cash proceeds received and the applicable amounts of share purchase warrants are credited to share capital.

o) Loss per share

Loss per share is calculated based on the weighted average number of common shares issued and outstanding during the year. Diluted loss per common share is calculated using the treasury stock method for outstanding stock options, warrants and convertible notes. Under the treasury stock method, the weighted average number of shares outstanding used in the calculation of diluted earnings per share assumes that the deemed proceeds received from the exercise of stock options, share purchase warrants and similar instruments that are “in the money” would be used to repurchase common shares of the Company at the average market price during the year. Shares held in escrow, other than where their release is subject to the passage of time, are not included in the calculation of the weighted average number of common shares outstanding.

The incremental common shares issuable upon the exercise of stock options and warrants and redemption of restricted share units are excluded from the computation if their effect is anti-dilutive.

p) Revenue recognition

The Company’s operations produce gold in doré form, which is refined to pure gold bullion as final product prior to sale primarily in the London spot market or under gold sale contracts. Revenue from the sale of metals is recognized in the financial statements when the following conditions have been satisfied:

- the significant risks and rewards of ownership have been transferred;
- neither continuing managerial involvement to the degree usually associated with ownership, nor effective control over the goods sold, has been retained;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Insignificant amounts of revenue generated from by-product such as silver is credited to the cost of goods sold when its percentage of revenue is less than 5% of total revenue.

q) Segmented reporting

In identifying its operating segments, management generally follows the Company’s activities. An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company’s other components. The activities are undertaken by the mine operating segment and the exploration and evaluation segment and are supported by the corporate segment, each segment is managed separately. The operating results of the segments are reviewed regularly by the Company’s Chief Executive Officer (who is considered the chief operating decision maker) to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

r) Critical accounting estimates and judgments

The preparation of financial statements in conformity with IFRS as issued by the IASB requires management to make estimates and judgments that affect the amount reported in the financial statements. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances, and subject to measurement uncertainty. The effect on the financial statements of changes in such estimates in future reporting periods could be significant.

Significant estimates and areas where judgment is applied that have significant effect on the amount recognized in the financial statements are described below. Changes in these estimates and judgments may materially affect the financial position or financial results reported in future periods.

Purchase price allocation and valuation of deferred consideration assets

Measuring asset acquisition transactions requires each identifiable asset and liability to be measured at its acquisition-date relative fair value. The determination of the acquisition-date relative fair values often requires management to make assumptions and estimates about future events. The assumptions and estimates with respect to determining the fair value of mineral properties

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

and plant and equipment acquired generally require a high degree of judgment and include estimates of mineral reserves acquired, future metal prices and discount rates. Changes in any of the assumptions or estimates used in determining the relative fair value of acquired assets and liabilities could impact the amounts assigned to assets, liabilities and non-controlling interests in the purchase price allocation.

Ore reserves and mineral resource estimates

Proven and probable reserves are the economically mineable parts of the Company's measured and indicated mineral resources demonstrated by at least a preliminary economic assessment study or through continued production. The Company estimates its proven and probable reserves, measured, indicated and inferred mineral resources based on information compiled by appropriately qualified persons. The estimation of future cash flows related to proven and probable reserves is based upon factors such as estimates of foreign exchange rates, commodity prices, future capital requirements and production costs along with geological assumptions and judgments made in estimating the size and grade of the ore body. Changes in the proven and probable reserves estimates may impact the carrying value of property, plant and equipment, reclamation and remediation obligations, recognition of deferred tax amounts and depletion, depreciation and amortization, as well as the cost base of ore inventory.

The Company conducts an annual review of its reserves and mineral resources. On April 1, 2017 the review resulted in a change in accounting estimate in relation to the economically recoverable reserves for Selinsing and Buffalo Reef based on the NI43-101 Technical Report dated December 14, 2016. The change in estimate resulted in an increase in mineral property depletion and decrease in plant depletion ("April 2017 Estimation Adjustment").

Ore reserves and mineral resource estimates include non-leachable sulphide material that cannot be processed through the plant in its current configuration. Recovery of gold from the non-leachable sulphide material is expected to be achieved through the successful implementation of a bio-leach circuit as outlined in the current Selinsing and Buffalo Reef NI43-101 Technical Report.

Depreciation and amortization and determining useful lives

Mineral properties in production are depreciated on a unit-of-production basis ("UOP") over the productive life of the mine based on the economically recoverable proven and probable reserves. Mobile and other equipment is depreciated, net of residual value, on a straight-line basis, over the useful life of the equipment but does not exceed the related estimated productive life of the mine. The calculation of the UOP rate, and therefore the annual depreciation expense could be materially affected by changes of estimates of ore reserves and mineral resources of the underlying mineral properties. Changes in estimates can be the result of actual future production differing from current forecasts of future production, expansion of mineral reserves and resources through exploration activities, differences between estimated and actual costs of mining and differences in gold price used in the estimation of mineral reserves. Significant judgment is involved in the determination of useful life and residual values for the computation of depreciation and no assurance can be given that actual useful lives and residual values will not differ significantly from current assumptions.

In fiscal 2017, the April 2017 Estimation Adjustment resulted in an increase in depreciation and amortization of \$0.01 million for mineral properties and decrease in depreciation and amortization of \$0.05 million for plant with both changes recorded in ore inventory.

Inventory valuation

Expenditures incurred including depreciation and amortization of assets used in mining and processing activities are deferred and accumulated as the cost of ore in stockpiles, work in process, and finished metal inventories. These deferred amounts are carried at the lower of average cost and net realizable value ("NRV"). Write-downs of ore in stockpiles, in-process and finished metal inventories resulting from NRV impairments are reported as a component of current period costs. The primary factors that influence the need to record write-downs include prevailing and long-term metal prices and prevailing costs for production inputs such as labour, fuel and energy, materials and supplies, as well as realized ore grades and actual production levels. The allocation of costs to ore in stockpiles, gold in processing circuits and the determination of NRV involve the use of estimates. There is a high degree of judgment in estimating future costs, future production levels, reserves estimates, gold and silver prices, and the ultimate estimated recovery of ore from processing circuits. There can be no assurance that actual results will not differ significantly from estimates used in the determination of the carrying value of inventories.

In fiscal 2017 the impact of the April 2017 Estimation Adjustment resulted from reserves and resources estimate review on inventory caused a net decrease of the ore inventory in the amount of \$0.03 million

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

Exploration and evaluation expenditures

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment to determine whether it is likely that future economic benefits are likely, from either future exploitation or sale, or whether activities have not reached a stage that permits a reasonable assessment of the existence of reserves. The determination of a compliant resource is itself an estimation process that involves varying degrees of uncertainty depending on how the resources are classified (i.e., measured, indicated or inferred).

Estimates and assumptions may change if new information becomes available. If, after expenditures are capitalized, information becomes available suggesting that the recovery of such expenditures are unlikely, the amount capitalized is written off in profit or loss in the period when the new information becomes available.

Impairment of non-current assets

The Company assesses each asset or CGU at each reporting period to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made, which is considered to be the higher of the fair value less costs of disposal and value in use. These assessments require the use of estimates and assumptions such as long-term commodity prices (considering current and historical prices, price trends and related factors), discount rates, operating costs, future capital requirements, closure and rehabilitation costs, exploration potential, reserves and operating performance. These estimates and assumptions are subject to risk and uncertainty and therefore, there is a possibility that changes in circumstances will impact these projections, which may impact the recoverable amount of assets and/or CGUs. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. Fair value for mineral assets is generally determined as the present value of estimated future cash flows arising from the continued use of the asset, which includes estimates such as the cost of future expansion plans and eventual disposal, using assumptions that an independent market participant may take into account. Cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset/CGU. Management has assessed its CGUs as being an individual mine site, which is the lowest level for which cash inflows are largely independent of those of other assets/CGUs.

Provision for reclamation and remediation obligations

The Company assesses its provision for asset retirement obligations on an annual basis or when new material information becomes available. Accounting for reclamation and remediation obligations requires management to make estimates of the timing and amount of future costs the Company will incur to complete the reclamation and remediation work required to comply with existing laws and regulations at each mining operation. Actual costs and timing incurred may differ from those estimated. Also, future changes to environmental laws and regulations could increase the extent of reclamation and remediation work required to be performed by the Company. Increases in future costs and timing of those costs could materially impact the amounts charged to operations for reclamation and remediation.

Deferred taxes

The Company recognizes a deferred tax asset to the extent recovery is probable. Assessing the recoverability of deferred tax assets requires management to make significant estimates of future taxable profit. To the extent that future cash flows and taxable profit differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the reporting date could be impacted. In addition, future changes in tax laws could limit the ability of the Company to obtain tax deductions in future periods.

Share-based payments

The computation amount of share-based compensation is not based on historical cost, but is derived based on subjective assumptions input into appropriate option pricing model to determine fair value at granting and the reporting dates. The model requires management to make forecasts as to future events, including estimates of: expected price volatility, the average future hold period of options and units, and the appropriate risk-free rate of interest. Changes in these input assumptions can significantly affect the fair value estimate.

Share-based compensation incorporates an expected forfeiture rate, which is estimated based on historical forfeiture rates, and is adjusted if the actual forfeiture rate differs from the expected rate. The resulting value calculated is not necessarily the value that the holder of the instrument could receive in an arm's length transaction, given that there is no market for these instruments and they are not transferable.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

Derivative assets and liabilities

Management is required to determine assumptions used in financial fair value models to estimate derivatives liabilities raised from share purchase warrants, and gold forward contracts where contractually applicable. The assumptions may be adjusted at each reporting period and the actual value of the derivative liability may differ from the amount currently provided.

Title to mineral properties

Although the Company has taken steps to verify the title to its mineral properties, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to administrative delays common in Malaysia, unregistered prior agreements or transfers and title may be affected by undetected defect.

Realization of assets

The investment in and expenditures on mineral properties comprise a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent upon the establishment of legal ownership, the attainment of successful production from the properties or from the proceeds of their disposal.

Mineral exploration and development is highly speculative and involves inherent risks. While the rewards, if an ore body is discovered can be substantial, few properties that are explored are ultimately developed into producing mines. There can be no assurance that current exploration programs will result in the discovery of economically viable quantities of ore.

Functional currency

The Company is involved in the exploration, development and production of gold and base metal resources with continued operations that are heavily reliant on international economics such as the price and demand of gold and other commodities. The Company's resources, future sales and competitive forces are measured in USD and based on these factors the Company has determined the functional currency of all its entities to be USD.

s) New and amended standards and interpretations

Effective for future annual periods

IFRS 9 – Financial Instruments (“IFRS 9”)

IFRS 9 will replace IAS 39 “Financial Instruments: Recognition and Measurement” (IAS 39). IFRS 9 utilizes a single approach to determine whether a financial asset is measured at amortized cost or fair value and a new mixed measurement model for debt instruments having only two categories: amortized cost and fair value. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. It also introduces a new expected loss impairment model and limited changes to the classification and measurement requirements for financial assets. Application of the standard is mandatory for annual periods beginning on or after January 1, 2018, with early application permitted. The Company is evaluating any potential impact of this standard.

IFRS 15 – Revenue from Contracts with Customers (“IFRS 15”)

IFRS 15 will replace IAS 18, “Revenue”, IAS 11, “Construction Contracts”, and related interpretations on revenue. IFRS 15 establishes a single five-step model framework for determining the nature, amount, timing and uncertainty of revenue and cash flows arising from a contract with a customer. Application of the standard is mandatory for annual periods beginning on or after January 1, 2018, with early application permitted. The Company is evaluating any potential impact of this standard.

IFRS 16 – Leases (“IFRS 16”)

IFRS 16 will replace IAS 17, “Leases”. The objective of IFRS 16 is to bring all leases on-balance sheet for lessees. IFRS 16 requires lessees to recognize a “right of use” asset and liability calculated using a prescribed methodology. Application of the standard is mandatory for annual periods beginning on or after January 1, 2019, with early application permitted. The Company is evaluating any potential impact of this standard.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

4. Cash and Cash Equivalents

	June 30, 2017	June 30, 2016
	\$	\$
Cash and cash equivalents	4,062	11,279
Restricted cash	9,636	9,634
	13,698	20,913

Cash at banks earns interest at floating rates based on daily bank deposit rates.

As at June 30, 2017, the Company has restricted cash of \$9.64 million (June 30, 2016: \$9.63 million), which represents \$0.20 million (June 30, 2016: \$0.19 million) issued letters of credit as guarantees for custom duties and certain equipment, and \$9.44 million (June 30, 2016: \$9.44 million) set aside in a custodian bank account pursuant to a Shah Alam High Court Order, issued in relation to the litigation "SMSB vs Monument". The restricted cash is the subject of an interlocutory relief pending determination of the full trial; it is not an indicative settlement of legal liability, neither in nature nor in quantity.

On October 10, 2012, Selinsing Mining Sdn. Bhd. ("SMSB") filed a Writ and Statement of Claim against Monument and its wholly-owned subsidiaries, Selinsing Gold Mine Manager Sdn. Bhd. ("SGMM") and Able Return Sdn. Bhd. ("Able") (together "Monument"), claiming, among other things, a "5% Participating Joint Venture interest" from two of the tenements of Monument's Selinsing Gold Mine. SMSB was the previous sub-lease holder and operator that sold the Selinsing Gold Mine to Monument and its subsidiaries free and clear of any encumbrances. The transaction was closed on June 25, 2007 and SMSB was paid in full. SMSB did not make its claim in relation to the purported "Participating Joint Venture Interest" until October 2012. Monument denies that SMSB has any joint venture interest in the Selinsing Gold Mine and intends to continue to vigorously defend this claim which has no merit.

Monument and its Malaysian subsidiary has filed suit in Kuantan High Court against Kesit Pty Ltd. and Peter Steven Kestel, claiming for ownership of the 100% issued shares of SMSB by virtue of the "Able/Selinsing Purchase Agreement" dated May 31, 2007. The entire 100% of SMSB issued shares are now held by Kesit Pty Ltd., a company owned and controlled by Peter Steven Kestel. Peter Steven Kestel is also one of the Directors of SMSB.

5. Investment in Marketable Securities

On September 4, 2014, the Company invested \$0.94 million (AUD \$1.00 million) in Gascoyne Resource Limited ("Gascoyne") for 4 million Gascoyne ordinary shares at a price of AUD\$0.25 per share upon entering in to a Head Agreement with intention to acquire certain Gascoyne gold properties. On December 22, 2014 both parties mutually agreed to terminate the Heads of Agreement due to certain conditions precedent to the completion of the Proposed Transaction not being met. There was no further obligation for Monument to participate any further placements of Gascoyne shares. On April 12, 2016 the Company sold the 4 million Gascoyne ordinary shares for net proceeds of \$1.36 million (AUD \$1.79 million).

Marketable securities are fair valued at the end of each reporting period. The carrying values are marked to the market, the gain or loss resulted from marketable securities and corresponding foreign currency exchanges are recorded against earnings as follows:

	June 30, 2017	June 30, 2016
	\$	\$
Opening balance	-	247
Investment in marketable securities	-	-
Gain/(loss) on fair value of marketable securities	-	574
Foreign currency exchange loss	-	(12)
Realized gain on sale of marketable securities	-	554
Proceeds on sale of marketable securities	-	(1,363)
Closing balance	-	-

MONUMENT MINING LIMITED

Foreign currency exchange loss	-	(12)
	-	562

6. Trade and Other Receivables

	June 30, 2017	June 30, 2016
	\$	\$
Interest receivable	29	25
Goods and services tax receivable	301	326
Third Parties receivable (Note 10(c))	943	1,032
Other receivables	61	141
	1,334	1,524
Impairment provision	-	(63)
	1,334	1,461

Trade and other receivables are non-interest bearing. Third Parties receivable of \$0.94 million (June 30, 2016: \$1.03 million) are in relation to top soil iron production pursuant to the Harmonization Agreement (Note 10 (c)).

7. Income Tax Receivable

The Company paid income tax of \$2.41 million including income tax payable of \$0.33 million and income tax instalments of \$2.08 million, subject to a ruling application for change of mining allowance computation. Subsequently, a favourable ruling was obtained from the Malaysia tax authority and as a result, the amounts became income tax receivable.

As of June 30, 2017, the income tax receivable balance of \$2.12 million (June 30, 2016: \$1.76 million) comprised of \$1.76 million (June 30, 2016: \$1.76 million) from fiscal 2015 and fiscal 2016, and \$0.36 million (June 30, 2016: \$nil) from fiscal 2017, which is net of tax instalments paid for the current year of \$0.89 million and current tax expense of \$0.53 million (Note 18).

8. Inventories

	June 30, 2017	June 30, 2016
	\$	\$
Current assets		
Mine operating supplies	1,164	1,347

As at June 30, 2017	6,575	24,647	3,326	34,548

- a) Included under mineral properties is the Selinsing Gold Mine in Pahang State, Malaysia, which is subject to depletion on a unit of production basis.

For the year ended June 30, 2017, the Company undertook a review of ore reserves and mineral resources which form the basis for depreciation of mine property, plant and equipment utilising the UOP method. The review resulted in a change in accounting estimate in relation to the economically recoverable reserves and the total tonnages to be mined and processed over the estimated life of mine (Note 3(s)).

- b) Included under Construction in Progress are the Selinsing Phase IV plant upgrades at Selinsing Gold Mine in Malaysia. Construction expenditures are not subject to depreciation until it is available for use.

As of June 30, 2017 total expenditures were \$3.33 million, comprised of \$1.79 million (June 30, 2016: \$1.78 million) for the Selinsing Phase IV plant upgrades with \$0.83 million incurred in the current fiscal year and \$1.53 million (June 30, 2016: \$1.19 million) for the Burnakura heap leach facility and crushing plant upgrade with \$0.35 million incurred in the current fiscal year.

The Company has determined that a bio-leach sulphide treatment technology can deliver the best overall performance and economic recoveries in relation to Selinsing and Buffalo Reef ore characteristics. As a result, an impairment charge of \$0.82 million has been recognized for Intec costs (Note 23).

a) Selinsing Gold Portfolio

The Company has a 100% interest in the Selinsing Gold Exploration and Evaluation Portfolio including Selinsing Deep, a part of Buffalo Reef, Felda Land and Famehub, which lie continuously and contiguously along the gold trend upon which the Selinsing Gold Mine is located. As of June 30, 2017 the Selinsing Gold Portfolio totalled \$27.52 million that was comprised of \$2.08 million for Selinsing Deep, \$17.27 million for Buffalo Reef, \$3.12 million for Felda Land and \$5.05 million for Famehub.

Selinsing Deep

The Company acquired a 100% interest in the Selinsing Gold Project in 2007 through its 100% owned subsidiary Able Return Sdn. Bhd. and since then some deposits across those projects have been developed into a production and have been classified to property, plant and equipment (Note 9(a)). Continuing expenditure underneath these deposits ("Selinsing Deep") is recorded against exploration and evaluation with expenditures of \$0.27 million incurred in the current fiscal year.

Buffalo Reef

On June 25, 2007, the Company acquired 100% of the common shares of Damar Consolidated Exploration Sdn. Bhd., a company incorporated under the laws of Malaysia, thereby effectively acquiring 100% of the Buffalo Reef tenement property interests. Some deposits at Buffalo Reef have been placed into production and are recorded within property, plant and equipment (Note 9(a)). Exploration and evaluation expenditures of \$1.13 million were incurred in the current fiscal year for Buffalo Reef.

Felda Land

The Company acquired exclusive irrevocable exploration licenses over 896 acres of Felda Land through a subsidiary Able Return Sdn Bhd from settlers – individual owners of blocks on the Felda Land, with consent from Federal Land Development Authority ("FELDA"). The Felda Land is located east and south adjacent to Selinsing and Buffalo Reef, gazetted as a group settlement area

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

covering 3,920 acres of land. Exploration and evaluation expenditures of \$0.39 million were incurred in the current fiscal year at Felda Land (2016: \$0.98 million).

Pursuant to these agreements with settlers, certain portions of Felda Land shall be converted to mining leases upon exploration success at the Company's discretion, subject to regulatory approval. The exclusive mining permits will be automatically assigned for mining to the Company in event of approval of the mining leases obtained by those settlers.

On October 31 2016, the Company acknowledged the approval from the Pahang State authority to grant Proprietary Mining Leases (the "PML") to the underlying land owners (previous Settlers) at Block 7 including a total 39 acres of Felda Land.

The administrative process has progressed for land re-registration to convert Felda Land to privately free hold land and issuance of a PML. Upon completion of re-registration, a cost of \$3.04 million will be transferred to mineral properties and mining development and production will commence.

Famehub

On August 13, 2010, the Company acquired a 100% interest in Famehub Venture Sdn. Bhd. ("Famehub"), a company incorporated in Malaysia to purchase a land package consisting of approximately 32,000 acres of prospective exploration land as well as the associated data base. This land is located to the east of the Selinsing Gold project and the Buffalo Reef prospect. No exploration and evaluation expenditures were incurred in the current fiscal year for Famehub.

b) Murchison Gold Portfolio

The Company has a 100% interest in the Murchison Gold Portfolio which consists of the Burnakura, Gabanintha, and Tuckanarra gold properties, located in the Murchison Mineral Field, a highly prospective historical gold province within the Murchison District of Western Australia. Burnakura and Gabanintha are located 40 km southeast of Meekatharra, WA and 765 km northeast of Perth, WA. Tuckanarra is located approximately 40 km south west of Burnakura. As of June 30, 2017 the Murchison Gold Portfolio totalled \$27.32 million that was comprised of \$20.94 million (\$8.41 million for acquisition and \$12.53 million for exploration and development) for Burnakura, \$3.06 million (\$2.92 million for acquisition and \$0.14 million for exploration) for Gabanintha and \$3.31 million (\$3.06 million for acquisition and \$0.25 million for exploration) for Tuckanarra.

Burnakura

In February 2014, Monument acquired the Burnakura Gold Project and Gabanintha Gold Project that includes a number of mining and exploration tenements and lease applications and a fully operational gold processing plant, a newly developed camp site and all necessary infrastructure.

Exploration and evaluation expenditures of \$1.72 million were incurred in the current fiscal year for Burnakura including \$0.19 million for plant maintenance, \$0.39 million for continuous resource definition and economic study, \$0.18 million for early stage production mine development, \$0.18 million property fees and \$0.77 million for camp maintenance.

Gabanintha

Gabanintha Gold Project was acquired in conjunction with Burnakura, containing a number of prospective tenements located 20 km to the east of Burnakura. Exploration and evaluation expenditures of \$0.02 million were incurred in the current fiscal year for Gabanintha.

Tuckanarra

In November 2014, Monument acquired, free and clear of any encumbrances, a 100% interest in Tuckanarra consisting of two exploration licenses, six prospecting licenses and a mining lease covering a total of 416 square km and containing approximately 100,000 historical indicated and inferred Joint Ore Reserves Committee (JORC) compliant ounces of gold. Exploration and evaluation expenditures of \$0.04 million were incurred in the current fiscal year for Tuckanarra.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

c) Mengapur Polymetallic Portfolio

As of June 30, 2017 the Mengapur Polymetallic Portfolio totalled \$119.87 million that was comprised of \$108.14 million (\$93.23 million for acquisition and \$14.91 million for exploration and development) for Mengapur and \$10.99 million for Star Destiny (\$3.64 million for acquisition and \$7.35 million for exploration).

Mengapur

The Mengapur Project is located in Pahang State, Malaysia, approximately 130 kilometers from Monument's wholly-owned Selinsing Gold Mine near Sri Jaya, 12 kilometers from a highway and 75 kilometers from the Malaysian port of Kuantan.

In February and December 2012 the Company acquired a 100% interest in Cermat Aman Sdn. Bhd. ("CASB"), a Malaysian company, through Monument Mengapur Sdn. Bhd. ("MMSB"), its wholly-owned Malaysian subsidiary. As a result, the Company now holds a 100% interest in the Mengapur Polymetallic project ("Mengapur Project"). In February 2014, the Company acquired additional rights to oxide magnetite material contained in the top soil at the Area C, Mengapur Project.

The previous owner of the Mengapur Polymetallic Project, Malaco Mining Sdn. Bhd. and its group of companies and shareholders (collectively, "Malaco") held the rights to oxide magnetite material contained in top soil overburden at the Mengapur Project, including Areas A and B of the Mengapur Project (Note 15).

The Mengapur Project has been placed into care and maintenance with intention to apply Intec Technology in testing sulphide copper metal recovery on site (Note 29). Exploration and evaluation expenditures of \$0.73 million were incurred in the current fiscal year for Mengapur care and maintenance, which includes \$0.32 million of amortization.

MMSB is the exclusive operator of the Mengapur Project. It entered into a Harmonization Agreement with Phoenix Lake Sdn. Bhd. ("PLSB") and ZCM Minerals Sdn. Bhd. ("ZCM") (together the "Third Parties"). Pursuant to the Harmonization Agreement, the Third Parties have exclusive rights to mine near-surface oxide iron ores contained in top soil overburden at Area A and Area B under certain conditions, and to purchase the mined oxide iron ore material from MMSB for RM28 per tonne; MMSB has full right to protect its other mineral assets in the same top soil and continue developing access to sulfide and transitional resources. The Company carried out grade control and supervision over the mining operation, including collecting proceeds from Iron Ore sales on behalf of Malaco, with all operating costs incurred by MMSB to maintain iron ore operation site to be recovered in full.

The Third Parties have discontinued Iron Ore production since January 2015. The balance of \$0.94 million is overdue by the Third Parties to the Operator (Note 6).

Star Destiny

On November 21, 2011, the Company acquired a 100% interest in Star Destiny Sdn. Bhd. ("Star Destiny") through its wholly owned Malaysian subsidiary; Monument Mengapur Sdn. Bhd. Star Destiny holds an exploration permit covering a 750 hectare property in Pahang State, Malaysia, adjacent to the Mengapur Polymetallic project.

The prospecting exploration permit for the Star Destiny prospect expired on September 23, 2012. No activities were carried at the operation site since. The Company submitted an application of renewal in November 2011 to the Pahang State authority; it also submitted two applications for mining licenses in 2009 and 2010 over sections of the same area. Another application for a mining lease over the prospecting land was also submitted in August 2012. The Company has yet to receive an official notification from the Pahang State authority in response to its applications and several inquiries regarding the title status. According to the Malaysia Mining Enactment 2007, the Company has considered its status quo for the Star Destiny tenement title remaining intact.

No exploration and evaluation expenditures were incurred in the current fiscal year for Star Destiny.

11. Intangible Asset

On February 6, 2015, pursuant to the Heads of Agreement entered by Monument and Intec International Projects Pty Ltd ("Intec"), the Company was granted an interim license to exploit the Intec patented technology at the Company's alpha sites in Malaysia. Subject to success of the trial commercialization testwork and certain conditions, Monument will obtain a full license to treat sulphide gold or copper materials using Intec technology across designated territories.

The cost of acquisition and conversion of the interim license to a full license, should testwork be successful, are recorded in intangible assets with impairment testing at each reporting date. Once the full license is granted, the cost will be amortized over the life of the license on a straight-line basis. If the Company decides not to use Intec technology, the balance of intangible asset would be removed against earnings.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

The consideration of 14 million fully paid Monument common shares was issued to Intec at CAD\$0.25 per share for aggregated deemed value of CAD\$3.50 million, which has been valued according to IFRS 2 "Share-based Payments" at the closing date market price of CAD\$0.10 per share for aggregate cost of \$1.12 million (CAD\$1.40 million).

The following table includes total transaction costs including \$0.15 million incurred in due diligence that was recorded in intangible asset:

	Total
	\$
Shares issued for Intec License	1,118
Due diligence costs	154
	1,272

The first interim license expired on January 16, 2017, and has been extended immediately until January 16, 2022 subject to signing of the Deed of Variation Agreement (Note 24, Note 29).

12. Deferred Costs

Deferred costs include potential mineral property acquisitions, financing, and associated due diligence expenditure that have been incurred however, have not been capitalized against underlying assets, or not been charged to earnings until later reporting periods when the underlying transactions are closed or abandoned. At the year ended June 30, 2017, total deferred cost of \$0.10 million related to project financing costs (June 30, 2016: \$0.03 million). All business development costs incurred were expensed to property investigations during the year (June 30, 2016: \$0.09 million).

	June 30, 2017	June 30, 2016
	\$	\$
Business development	-	89
Project financing	103	28
	103	117

13. Capital Management

The Company manages its capital to ensure that it will be able to continue to meet its financial and operational strategies and obligations, while maximizing the return to shareholders through the optimization of equity financing. Management continuously monitors its capital position and periodically reports to the Board of Directors.

The Company is sensitive to changes in commodity prices and foreign exchange. The Company's policy is to not hedge gold sales. The Company's capital management policy has not changed in the 2017 fiscal year.

The Company's objectives when managing capital are to:

- Ensure the Company has sufficient cash available to support the mining, exploration, and other areas of the business in any gold price environment;
- Ensure the Company has the capital and capacity to support a long-term growth strategy; and
- Minimize counterparty credit risk.

Other than restricted cash (Note 4) the Company is not subject to any externally imposed capital restrictions. Monument has the ability to adjust its capital structure by issuing new equity, issuing new debt, and by selling or acquiring assets. The Company can also control how much capital is returned to shareholders through dividends and share buybacks.

The capital of the Company consists of items included in equity and debt, net of cash and cash equivalents.

	June 30, 2017	June 30, 2016
	\$	\$
Total equity attributable to shareholders	232,059	238,611
Total borrowings	-	-
	232,059	238,611
Less: cash and cash equivalents	(13,698)	(20,913)
Total capital	218,361	217,698

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

14. Financial Instruments and Financial Risk

The Company's financial instruments are classified as loans and receivables (cash and cash equivalents, restricted cash and trade and other receivables and other financial liabilities (accounts payable and accrued liabilities)).

a) Fair value measurement

The carrying amounts of cash and cash equivalents, restricted cash, trade and other receivables and other financial liabilities – accounts payable and accrued liabilities are considered reasonable approximations of their fair values due to the short-term nature of these instruments.

The Company does not have any financial assets or financial liabilities measured for fair value on a recurring basis.

b) Risk exposures and responses

The Company's financial instruments are exposed to market risk, credit risk, and liquidity risk.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk is comprised of three types of risk: foreign currency risk, price risk and interest rate risk.

Foreign currency risk

The Company is exposed to foreign currency risk to the extent financial instruments held by the Company are not denominated in US dollars.

At the reporting date, the Company is exposed to foreign currency risk through the following assets and liabilities denominated in Malaysian ringgit (RM), Australian dollar (AUD) and Canadian dollar (CAD):

	June 30, 2017			June 30, 2016		
	\$	\$	\$	\$	\$	\$
(in 000's, US dollar equivalent)	AUD	RM	CAD	AUD	RM	CAD
Financial instrument – assets						
Cash and cash equivalents	114	370	97	335	286	1,894
Restricted cash	-	194	-	-	192	-
Trade and other receivable	1	1,017	15	31	1,100	19
Financial instruments – liabilities						
Accounts payable and accrued liabilities	(150)	(4,671)	(149)	(1,288)	(4,632)	(209)

The Company has not hedged any of its foreign currency risks. The derivative components associated with foreign currency fluctuation are fair valued at each reporting date and gains or losses are recorded in profit or loss.

Based on the above net exposures as at June 30, 2017 and assuming that all other variables remain constant, a 5% depreciation or appreciation of the RM against the US dollar would result in an increase/decrease of approximately \$0.15 million (June 30, 2016 – \$0.15 million) in the Company's net income, a 5% depreciation or appreciation of the CAD against US dollar would result in an increase/decrease of approximately \$nil (June 30, 2016 – increase/decrease \$0.09 million) in net income and a 5% depreciation or appreciation of the AUD against the US dollar would result in an increase/decrease of approximately \$nil (June 30, 2016 – increase/decrease \$0.05 million) in net income.

Price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices other than those arising from interest rate risk or foreign currency risk. The Company has not hedged any of its commodity price risks.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Generally, the Company's interest income will be reduced during sustained periods of lower interest rates as higher yielding cash equivalents and short-term investments mature and the proceeds are reinvested at lower interest rates. The converse situation will have a positive impact on interest income.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

To limit interest rate risk, the Company uses a restrictive investment policy. The fair value of the investments of financial instruments included in cash and cash equivalents is relatively unaffected by changes in short-term interest rates. The investments are generally held to maturity and changes in short-term interest rates do not have a material effect on the Company's operations.

Credit risk

The Company's credit risk on trade receivables is negligible and the balances were collected subsequent to end of reporting period.

The Company is exposed to concentration of credit risk with respect to cash and cash equivalents (Note 4). The maximum exposure to credit risk is the carrying amounts at June 30, 2017. The amount of \$10.06 million (June 30, 2016: \$10.68 million) is held with a Malaysian financial institution, \$0.11 million with an Australian financial institution (June 30, 2016: \$0.33 million) and \$3.52 million (June 30, 2016: \$9.90 million) is held with Canadian financial institutions.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through budgeting and forecasting cash flows to ensure it has sufficient cash to meet its short-term requirements for operations, business development and other contractual obligations. The Company's cash and cash equivalents are highly liquid and immediately available on demand for the Company's use. The table below summarizes the maturity profile of the Company's non-derivative and derivative financial liabilities as at June 30, 2017.

	June 30, 2017		June 30, 2016	
	\$	\$	\$	\$
	Current	Non-Current	Current	Non-Current
	<1 year	1-3 years	<1 year	1-3 years
Non derivative liabilities				
Accounts payable and accrued liabilities	4,970	-	6,100	-
Finance lease obligations	-	-	138	-
	4,970	-	6,238	-

15. Accounts Payable and Accrued Liabilities

	June 30, 2017	June 30, 2016
	\$	\$
Trade payables	3,770	4,598
Salaries and withholding tax payable	51	205
Accrued vacation	181	246
Third Party payable (Note 10(c))	968	1,034
Other payable	-	17
	4,970	6,100

Terms and conditions of the above financial liabilities:

- Trade payables are non-interest-bearing and are normally settled on 30-day terms.
- Third Party payable in the amount of \$0.97 million (June 30, 2016: \$1.03 million) is pending receipt of the Third Parties payment in relation to the third parties' iron ore operations at the Mengapur (Note 10(c)).

16. Finance Lease Obligations

	June 30, 2017	June 30, 2016
	\$	\$
Current liabilities		
Finance lease	-	138
	-	138

Included in finance lease is an on-site SGS laboratory at the Mengapur site with a term of three years from February 1, 2014 to January 31, 2017 at a monthly flat rate. The title of all laboratory facilities and equipment provided by SGS Malaysia will be transferred to the Company at the end of the lease term, which is pending final payments and inspection of equipment at June 30, 2017. The lab has been used for all exploration assay work and metallurgical testwork across Monument's Malaysian operations.

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

17. Asset Retirement Obligations

The Company's asset retirement obligations ("ARO") as of June 30, 2017 consist of reclamation and closure costs for mine development and exploration activities. Although the ultimate amount of reclamation costs to be incurred cannot be predicted with certainty, the total cash flows required to settle the Company's obligations before discount is estimated to be \$11.12 million (June 30, 2016: \$11.78 million), comprised of \$9.92 million for Malaysia projects (June 30, 2016: \$10.62 million) and \$1.20 million for the Australia Projects (June 30, 2016: \$1.16 million).

As at June 30, 2017 the present value of the Company's ARO was \$9.79 million (June 30, 2016: \$10.23 million), comprised of \$4.64 million for Selinsing gold portfolio (June 30, 2016: \$4.86 million) using a pre-tax risk-free rate of 3.98% (June 30, 2016: 3.75%) and an inflation rate of 3.60% (June 30, 2016: 2.00%); \$1.13 million (June 30, 2016: \$1.07 million) for the Murchison gold portfolio using a pre-tax risk-free rate of 1.50% (June 30, 2016: 1.75%) and an inflation rate of 2.10% (June 30, 2016: 1.30%); and \$4.02 million for Mengapur recorded at cost.

Significant reclamation and closure activities include land rehabilitation, slope stabilization, decommissioning of tailing storage facilities, mined waste dump, road bridges, buildings and mine facilities.

The following is an analysis of the asset retirement obligations:

	June 30, 2017	June 30, 2016
	\$	\$
Opening balance	10,232	10,087
Accretion expense	196	337
Reassessment of liabilities	(95)	306
Foreign currency exchange gain	(543)	(498)
Closing balance	9,790	10,232

18. Income Tax

The reconciliation of income tax provision computed at statutory rates to the reported income tax provision is as follows:

	June 30, 2017	June 30, 2016
	\$	\$
Income tax expense computed at statutory rates	1,797	(234)
Lower effective rate attributable to Malaysian income	(88)	123
Non-deductible expenses	(1,746)	(1,932)
Change in unrecognized deferred tax assets	302	2,643
Unutilized tax losses	(34)	(3,693)
Non-taxable income	(9)	429
Non-business income	(7)	(28)
Income tax recovery/(expense)	215	(2,692)

Income tax expense consists of the following:

Current income tax provision	(531)	(229)
Deferred income tax provision	746	(2,463)
Income tax recovery/(expense)	215	(2,692)

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

Deferred tax assets and liabilities have been calculated using the following enacted corporate income tax rates: Canada at 26% (2016: 26%), Malaysia at 24% (2016: 24%) and Australia at 27.5% (2016: 27.5%). Significant components of recognized deferred tax assets and liabilities, after applying enacted corporate income tax rates, are as follows:

	June 30, 2017	June 30, 2016
	\$	\$
Deferred tax liabilities:		
Mineral property interests	(4,029)	(5,018)
Property, plant and equipment	(1,505)	(1,103)
	(5,534)	(6,121)
Deferred tax assets:		
Property, plant and equipment	54	47
Mineral property interests	2,497	2,101
	2,551	2,148
Net deferred tax liabilities	(2,983)	(3,973)

Unrecognized deferred tax assets are as follows:

	June 30, 2017	June 30, 2016
	\$	\$
Unrecognized deferred tax assets:		
Loss carry forwards	15,231	13,039
Other deductible temporary differences	-	303
	15,231	13,342

Deferred tax assets and liabilities, which are probable to be utilized, are offset if they relate to the same taxable entity and the same taxation authority. No deferred tax liabilities have been recognized on temporary differences when the timing of their reversal can be controlled. Other deductible temporary differences primarily comprise of cumulative eligible capital expenditures that are tax deductible according to relevant tax law in Malaysia. No deferred tax asset has been recognized because the amount of future taxable profit that will be available to realize such assets is unpredictable and not probable.

At June 30, 2017, the Company has non-capital loss carryforwards for tax purposes that are available to reduce future taxable income in Canada of \$37.74 million (2016: \$34.47million). The losses expire as follows:

	Total
	\$
2031	2,780
2032	3,232
2033	9,779
2034	12,242
2035	-
2036	6,440
2037	3,269
	37,742

Balance, June 30, 2016 and June 30, 2017	322,718,030	117,172

- i. On September 12, 2011 the Company acquired 49% interest in the Mersing Gold Project (Tenement MC1221) from Zackry Mohamed Iwaz and Kesit Pty Ltd, a company controlled by Peter Steven Kestel (together the "Vendor Group"), subject to MC1221 being transferred by the Vendor Group to a joint venture Company Himpunan Suci Sdn. Bhd. ("HSSB"), the sole and primary company that owns MC 1221. The Company paid CAD 0.50 million in cash and issued 1.5 million fully paid Monument common shares to the Vendor Group (together the "Vendor Group") in relation to the Mersing Gold Project. Due to the Vendor Group's failure of the registration of MC 1221 under HSSB, the Company recorded an impairment charge of \$1.39 million on the Mersing project in fiscal 2013 and commenced legal action to recover its costs.

In March 2016, the Company obtained a Judgment from the Shah Alam High Court in Malaysia, which ordered the Vendor Group to refund a sum of Malaysia Ringgit 1,790,299 and return 1.5 million fully paid Monument common shares to the Company by April 10, 2016. The cash was received in full, equivalent to \$0.49 million (CAD\$0.58 million including acquisition cost of CAD\$0.50 million plus interest of CAD\$0.08 million) in March 2016; the 1.5 million fully paid common shares at a cost of \$0.84 million were received from the Vendor Group and returned to treasury in June 2016.

20. Capital Reserves

	June 30, 2017 \$	June 30, 2016 \$
Warrants (a)	2,612	2,612
Options (b)	10,303	10,303
Restricted share units (c)	653	-
	13,568	12,915

a) Share purchase warrants

As at June 30, 2017 and 2016 there were no warrants outstanding.

b) Stock options

At the Annual General Meeting of Shareholders ("AGM") held on December 15, 2016, the Company's shareholders approved an Amended 5% Fixed Stock Option Plan (the "2016 Stock Option Plan") to replace the Company's 2015 15% Fixed Stock Option Plan. The total number of shares reserved for issuance under the 2016 Stock Option Plan is 16,210,905.

At June 30, 2017, there were 11,940,406 common shares available for future grant under the 2016 Stock Option Plan, comprised of 16,210,905 reserved for issuance, less 4,070,499 stock options exercised to date and 200,000 stock options outstanding.

During the year ended June 30, 2017, 250,000 stock options expired and 13,043,666 stock options were voluntarily forfeited by Management.

The general terms of stock options granted under the 2016 Stock Option Plan include a life of stock options up to ten years and a vesting period up to two years.

c) Restricted share units

At the Annual General Meeting of Shareholders ("AGM") held on December 15, 2016, the Company's shareholders approved a fixed 10% restricted Share unit plan (the "RSU Plan"). Under the RSU Plan, a total number of shares reserved for grant are 32,421,800. At June 30, 2017, there were 11,378,134 common shares available for future grant.

Restricted share units outstanding	Number of common shares
Balance, June 30, 2016	-
Granted	21,043,666
Balance, June 30, 2017	21,043,666

During the year, 21,043,666 were granted under the RSU Plan measured at fair value equal to the market price at grant date for a total \$1.10 million. Of which 13,043,666 units for \$0.62 million was vested immediately, the remaining 8,000,000 units for \$0.48 million will be vested over a three year period equally from the granting date, the underlying fair value is amortized over the corresponding periods as compensation expenses against capital reserves. Once vested and units being redeemed, the costs of issuance of shares will then be credited to share capital against capital reserves. As of June 30, 2017, \$0.65 million (2016: \$nil) has been expensed and allocated to production expense and exploration expenditure against capital reserves.

23. Impairment Recovery/(Loss)

The Company assessed potential impairment on assets as at the period end and determined the following impairment recovery/(loss):

	For the year ended June 30,	
	2017	2016
	\$	\$
Impairment loss on Intec (a)	(817)	-
Impairment loss on exploration and evaluation	(77)	-
Impairment recovery on Mersing Gold Project (b)	-	1,328
Impairment loss on spare ball mill (c)	-	(470)
Impairment loss on other receivable	-	(63)
	(894)	795

- (a) The Company has determined that a bio-leach sulphide treatment technology can deliver the best overall performance and economic recoveries. As a result, an impairment charge of \$0.82 million has been recognized for Intec sulphide gold testwork previously recorded against construction in progress in property, plant and equipment (Note 9).
- (b) On September 12, 2011 the Company acquired 49% interest in the Mersing Gold Project (Tenement MC1221) from Zackry Mohamed Iwaz and Kesit Pty Ltd, a company controlled by Peter Steven Kestel (together the "Vendor Group"), subject to MC1221 being transferred by the Vendor Group to a joint venture Company Himpunan Suci Sdn. Bhd. ("HSSB"), the sole and primary company that owns MC 1221. The Company paid CAD 0.50 million in cash and issued 1.5 million fully paid Monument common shares to the Vendor Group (together the "Vendor Group") in relation to the Mersing Gold Project. Due to the

MONUMENT MINING LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended June 30, 2017 and 2016

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

Vendor Group's failure of the registration of MC 1221 under HSSB, the Company recorded an impairment charge of \$1.39 million on the Mersing project in fiscal 2013 and commenced legal action to recover its costs.

In March 2016, the Company obtained a Judgment from the Shah Alam High Court in Malaysia, which ordered the Vendor Group to refund a sum of Malaysia Ringgit 1,790,299 and return 1.5 million fully paid Monument common shares to the Company by April 10, 2016. The cash was received in full, equivalent to \$0.49 million (CAD\$0.58 million including acquisition cost of CAD\$0.50 million plus interest of CAD\$0.08 million) in March 2016; the 1.5 million fully paid common shares at a cost of \$0.84 million were received from the Vendor Group and returned to treasury in June 2016. A total recovery of \$1.33 million was recorded against impairment.

- (c) The Company has assessed plant and equipment and determined the partial carrying value of the spare ball mill was subject to an impairment loss.

24. Loss Per Share

The calculation of basic and diluted earnings per share for the relevant periods is based on the following:

	For the year ended June 30,	
	2017	2016
Net loss for the year	\$ (7,205)	\$ (1,680)
Basic weighted average number of common shares outstanding	308,718,030	310,119,669
Diluted weighted average number of common share outstanding	308,718,030	310,119,669
Basic loss per share	\$ (0.02)	\$ (0.01)
Diluted loss per share	\$ (0.02)	\$ (0.01)

All warrants and options are potentially dilutive in the year ended June 30, 2017 and 2016, but excluded from the calculation of diluted earnings per share are those for which the average market prices below the exercise price.

As at June 30, 2017, 14,000,000 shares outstanding have been excluded from the weighted average number of shares outstanding because these shares are to be earned subject to success of the trial commercialization testwork and certain milestones and unearned shares upon termination will be returned to treasury (Note 11).

Under the "Deed of Variation" to the "Heads of Agreement" executed on February 14, 2015, the terms of escrow period have been extended to January 16, 2022 and the Company agreed to release 7,000,000 million shares from escrow (Note 29). The remaining 7,000,000 shares remain in escrow with Intec earning shares by achieving certain milestones based on Intec trial testwork. Should Monument make an election not to proceed with the testwork, any earned shares will be released to Intec and the remaining escrow shares will be returned to Monument for cancellation.

25. Related Party Transactions

Key management personnel

The Company's related parties include key management, who have authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly: five directors (executive and non-executive), the Chief Executive Officer ("CEO"), the Chief Financial Officer and the Vice President of Business Development who directly reports to the CEO.

The remuneration of the key management of the Company as defined above including salaries and director fees is as follows:

	For the year ended June 30,	
	2017	2016
	\$	\$
Salaries	1,051	1,064
Directors' fees	189	253
Share-based payments	647	-
	1,887	1,317

There were no amounts due to related parties at June 30, 2017 (June 30, 2016: \$0.06 million).

26. Commitments and Contingencies

	2018	2019	2020	2021	2022	Total
	\$	\$	\$	\$	\$	\$
Operating leases	121	110	114	120	116	581
Mineral property obligations	829	1,027	766	1,223	786	4,631
Purchase commitments	1,226	-	-	-	-	1,226
	2,176	1,137	880	1,343	902	6,438

Operating leases relate to premises leases. Purchase commitments are mainly for Selinsing mine operations in Malaysia and mineral property obligations are mainly for the Murchison Gold Portfolio in Western Australia.

Commitments relating to mineral property obligations are included in exploration and evaluation expenditure. This expenditure is required to keep tenements in good standing with relevant government authorities.

27. Supplemental Cash Flow Information

	For the year ended June 30,	
	2017	2016
	\$	\$
Interest received	35	113
Income taxes paid	1,288	1,934
Non-cash working capital, financing and investing activities:		
Share-based compensation charged to mineral properties	89	-
Amortization charged to mineral properties	521	625
Amortization inherent in inventory	11,143	10,811
Expenditures on mineral properties in accounts payable	203	933
Plant and equipment costs included in accounts payable	84	530

28. Segment Disclosures

The Company operates primarily in the gold mining industry and its major product is gold. Its activities include gold production, acquisition, exploration and development of gold and other base metal properties. The Company's mining operations are in Malaysia. Other than the exploration area segment, no operating segments have been aggregated to form reportable operating segments.

The Company's reportable operating segments reflect the Company's individual mining interests and are reported in a manner consistent with the internal reporting used by the Company's management to assess the Company's performance.

Non-mining, corporate and other operations are reported in "Corporate".

29. Subsequent Events

Intec Deed of Variation

On August 29, 2017, subsequent to year-end, the Company announced it has signed a Deed of Variation Agreement with Intec to the Heads of Agreement dated January 2015 to exploit the Intec Technology for their sulphide copper process. By signing this agreement, Monument has released 7,000,000 common shares from escrow (Note 11) to Intec. The terms of escrow period have been extended to January 16, 2022 for the remaining 7,000,000 common shares.

Felda Block 7

In September 2017, subsequent to year-end, the Proprietary Mining Leases (the "PML") were issued to the Block 7 owners. Pursuant to the Contract to Mine Agreement, the Company is in transit of paying consideration in aggregate of \$1.39 million in cash to the Block 7 owners to close the acquisition of exclusive mining rights for all PMLs at Block 7, covering a total 39.12 acres adjacent to east of the Buffalo Reef property.
