Fortune Minerals Limited

NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

[unaudited]

September 30, 2018

1. CORPORATE INFORMATION

Fortune Minerals Limited's business activity is the exploration and development of mineral properties in Canada. Fortune Minerals Limited is incorporated under the laws of Ontario and domiciled in London, Ontario, Canada, whose shares are publicly traded on the Toronto Stock Exchange and the OTCQX in the United States.

The unaudited interim condensed consolidated financial statements of Fortune Minerals Limited ["the Company"] for the nine months ended September 30, 2018 were authorized for issuance by the Board of Directors on November 14, 2018.

2. BASIS OF PRESENTATION

i. Statement of Compliance

These unaudited interim condensed consolidated financial statements of the Company have been prepared by management in accordance with International Financial Reporting Standards ["IFRS"] as issued by the International Accounting Standards Board ["IASB"] and in accordance with International Accounting Standard ["IAS"] 34, *Interim Financial Reporting*.

ii. Going Concern of Operations

These unaudited interim condensed consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of the Company's assets and discharge of its liabilities and commitments in the normal course of business. With the existing working capital of \$4,422,263 at September 30, 2018, the Company has sufficient cash to conduct certain critical path activities for the remainder of 2018 and into 2019. However, the NICO project requires further funding to advance the project through to production. This results in the existence of a material uncertainty that casts significant doubt about the Company's ability to continue as a going concern. Management is actively working to achieve positive cash flows beyond 2018 and is continually pursuing and considering various financing opportunities. The Company has historically been successful in financing its activities, however, there can be no assurances that the Company will be able to obtain continued support from existing lenders or obtain sufficient financing on terms acceptable to management to be able to meet its current liabilities as they come due. These financial statements do not include adjustments, which may be material, to the amounts and classification of assets and liabilities that would be necessary should the going concern principle not be appropriate.

iii. Basis of Measurement

These unaudited interim condensed consolidated financial statements are presented in Canadian dollars ["CDN"], which is also the Company's and its subsidiary's functional currency.

These unaudited interim condensed consolidated financial statements reflect the financial position and results of operations of the Company and its wholly owned subsidiaries Fortune Minerals NWT Inc. ["FMNWT"], Fortune Minerals Saskatchewan Inc. ["FMSI"], Fortune Coal Limited ["FCL"], and Fortune Minerals Mining Limited ["FMML"]. The Arctos Anthracite Joint Venture

[‘Arctos JV’] is accounted for as a joint operation and FCL recognizes its 50% interest in the assets, liabilities, income, loss and expenses. All intercompany transactions and balances have been eliminated upon consolidation.

The accounting policies have been applied consistently to all years presented in these consolidated financial statements, unless otherwise indicated.

iv. Judgment and Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities. The reported amounts and note disclosures are determined using management’s best estimates based on assumptions that reflect the most probable set of economic conditions and planned courses of action. Actual results, however, may differ from the estimates used in the unaudited interim condensed consolidated financial statements.

The estimates and underlying assumptions are reviewed on an ongoing basis.

Judgments and estimates made by management in the application of IFRS that have a significant risk of resulting in a material adjustment on the unaudited interim condensed consolidated financial statements in the current fiscal year are as follows:

[a] *Impairment of non-financial assets*

The Company undertakes an impairment assessment at the end of each reporting period and uses its judgment when identifying impairment indicators. Significant inputs into this model included estimates of commodity values, discount rates, useful life of a mine and future operating costs.

[b] *Fair values*

The fair values of derivatives, warrants, stock options, retirement obligations and other instruments requires the use of estimates of such factors as market rates of return, market volatility, interest rates, future operating results all of which are subject to measurement uncertainty. Changes in any of these factors could have an impact on the amount recorded for debentures, warrant values, derivatives, share based compensation, asset retirement obligation, interest expense and accretion.

Fortune Minerals Limited

NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

[unaudited]

September 30, 2018

[c] *Exploration and evaluation expenditures*

The Company uses its judgment when identifying which costs can be capitalized as exploration and evaluation expenditures.

[d] *Income taxes*

Income taxes requires judgments of future activities of the Company and income tax authorities. Changes in future operating results or changes in income tax legislation can have significant impacts on the amount of tax assets or liabilities that are reported by the Company.

[e] *Amortization of capital assets*

The amortization rates used by the Company to amortize its assets are based on estimates made by management of the expected life of the asset. These estimates are reviewed periodically based on expected usage and adjusted as needed on a prospective basis.

In addition, in preparing the unaudited interim condensed consolidated financial statements, the notes to the unaudited interim condensed consolidated financial statements were ordered such that the most relevant information was presented earlier in the notes and the disclosures that management deemed to be immaterial were excluded from the notes to the unaudited interim condensed consolidated financial statements. The determination of the relevance and materiality of disclosures involves significant judgment.

3. MINING PROPERTIES

As at September 30, 2018, the Company's mining properties are categorized in the exploration and evaluation stage since the necessary financing has not yet been obtained and a construction decision has not yet been approved by the Board of Directors. For management purposes, the group is organized into cash generating units based on the significant mining properties that the Company is currently exploring and evaluating or developing. Management monitors the monthly expenditures of its operating segments separately for the purpose of making decisions about resource allocation and financing requirements.

Interests in mining properties consist of the following:

	September 30, 2018			
	Capital Assets \$	Property Costs \$	Exploration and Evaluation Expenditures \$	Total Mining Properties \$

***i.* NICO Project, Northwest Territories [“NICO”]**

The NICO project and the related claims in the Marian River Area, Northwest Territories are wholly owned by the Company. The Company plans to locate the hydrometallurgical processing plant for NICO at a site in Saskatchewan, Canada. In December 2012, the Company purchased lands near Saskatoon, Saskatchewan on which it proposes to construct the Saskatchewan Metals Processing Plant [“SMPP”]. The net costs of design, development, construction and related costs incurred for the SMPP have been accumulated and capitalized as surface facilities under construction until such time as the physical assets are completed and available for use, at which time they will be classified as appropriate. No amortization has been charged against these assets as they are not yet available for use.

***ii.* Arctos Anthracite Project, British Columbia [“Arctos”]**

On May 1, 2015 the Company, FCL, Posco Canada Ltd. [“POSCAN”] and POSCO Klappan Coal Ltd. [“POSCO Klappan”] entered into an agreement [the “Arctos Sale Agreement”] with Her Majesty the Queen in Right of the Province of British Columbia [the “Province”] and British Columbia Railway Company [“BC Rail”] pursuant to which the Arctos JV sold its interests of the coal licenses comprising the Arctos project to BC Rail.

The Company, FCL, POSCAN and POSCO Klappan also entered into an Amendment to Exploration, Development and Mine Operating Joint Venture Agreement [“Amended Agreement”] to restructure the Arctos JV and share the proceeds from the sale of the Arctos coal licenses on an equal basis after purchasing the royalty held by the previous owner of the property. Pursuant to the Amended Agreement, FCL transferred 30% of its interest in the Arctos JV to POSCO Klappan, thereby reducing its interest from 80% to 50%, in exchange for the elimination of the future capital contribution to be made by FCL. The Company was made solely responsible for reclamation of the Arctos property except for the access road for which the Province will be responsible. The Company was entitled to receive the cash provided as security for its reclamation obligations once the reclamation is complete.

Going forward, under the Arctos Sale Agreement, the Arctos JV partners maintain the exclusive right to purchase back the coal licenses at the same price for a 10-year option period. If both partners do not wish to exercise the repurchase option, each of them may do so individually. No value was attributed to the option at the time of the agreement or as at the nine months ended September 30, 2018.

4. ASSET IMPAIRMENT

The Company’s tangible and intangible assets are reviewed for an indication of impairment at each unaudited interim condensed consolidated statement of financial position reporting date.

At September 30, 2018, the Company considered whether there had been any significant changes to impairment indicators from its previous impairment assessment completed at December 31, 2017 and whether any new indicators were present. Management determined that as a result of

Fortune Minerals Limited

NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

[unaudited]

September 30, 2018

not obtaining financing during the period, substantive expenditure on further exploration for and evaluation of mineral resources of the NICO project cannot be budgeted or planned and completed an impairment assessment of the NICO project. As a result of that analysis, management has determined that the carrying value of its projects is not impaired or does not require a reversal of a prior impairment charge.

The model used by management to evaluate the NICO property for impairment is based on management's intention to develop and produce gold, cobalt, bismuth and copper simultaneously. For the purposes of assessing the impairment of the project, the financial model used a discounted cash flow model using the best estimates for items such as plant capital, operating costs, commodity prices, transportation costs, discount rates and expected margins. Should the intention of management change with respect to the development of how this project may proceed, the economic model may result in significantly different results. It also does not reflect how any other organization would develop the project.

Assumptions underlying the estimate of the recoverable amount included expected commodity prices based on forecasted averages of US\$1,250/oz for gold, US\$35/lb for cobalt and US\$5/lb for bismuth and an exchange rate of US\$0.78:C\$1.00. A discount rate of 8% was used in the cash flow analysis. These factors resulted in a recoverable amount in excess of book value of NICO. Accordingly, no impairment was recognized on the NICO project.

Asset impairment testing is subject to numerous assumptions, inherent risks and uncertainties, and the risk that these assumptions may not be realized.

5. SHARE CAPITAL AND RESERVES

i. Common Shares

The Company is authorized to issue an unlimited number of common shares without par value. As at September 30, 2018, the weighted average number of common shares outstanding for the three and nine month periods was 338,603,220 and 338,237,511, respectively [December 31, 2017 - 297,385,408].

The Company did not enter into any agreements to issue shares during the nine months ended September 30, 2018, however additional share issuance costs of \$35,269 incurred in the nine months ended September 30, 2018 related to a subscription agreement entered into December 2017.

The following is a summary of changes in shares for the nine months ended September 30, 2018:

Shares outstanding, end of period	8,484,296	51,718,040	14,140,493	50,365,661

The exercise price for Class A and Class B warrants were \$0.133 [2017 - \$0.133] and \$0.208 [2017 - \$0.214], respectively, at September 30, 2018 and 2017.

In January 2018, 3,709,901 Class A warrants were exercised with an exercise price of \$0.133 raising gross proceeds of \$493,417.

The determination of the fair value of the resulting derivative requires the Company to make a number of assumptions and estimates regarding the inputs into the model used to

Fortune Minerals Limited

determine the value of the warrants. These assumptions will change from time to time and the impact on the resulting change will be reflected in the Consolidated Statements of Loss and Comprehensive Loss. Small changes to the inputs into the model can have a substantial impact on the value of the warrants. A change in the warrant unit value of approximately 10%, or approximately \$0.01, will result in the value of the derivative changing by approximately \$388,731.

[b] Subsequent to September 30, 2018, 165,000 warrants with an exercise price of \$0.146 expired unexercised.

iii. Nature and Purpose of Equity and Reserves

The reserves recorded in equity on the Company's Consolidated Statements of Financial Position include 'Other Reserves', 'Accumulated Deficit' and 'Accumulated Other Comprehensive Income'.

'Other Reserves' is used to recognize the value of stock option grants and amendments and expiration of share purchase warrants.

'Accumulated Deficit' is used to record the Company's change in deficit from earnings from year to year.

'Accumulated Other Comprehensive Income' is used to record foreign currency translation.

6. STOCK-BASED COMPENSATION

The other reserves balance was increased by \$164,140, representing the fair value of the options granted and options previously granted and vested during the nine months ended September 30, 2018. The options granted during the nine months ended September 30, 2018 have a maximum term of between three and five years and 1,025,000 vested immediately and 25,000 vest on March 22, 2019. The value of the options were estimated using the Black-Scholes option pricing model with the following weighted average assumptions used for grants as follows: dividend yield of 0%, expected volatility of between 217% and 223.61%, risk free interest rate of between 2.04% and 2.10% and expected life of between 2.51 and 4.28 years.

A summary of the status of the Company's stock option plan as at September 30, 2018 and December 31, 2017, and changes during the periods ended on those dates are presented below:

10. CASH AND CASH EQUIVALENTS

The Company's investment policy is to invest its cash in highly liquid, short-term, interest bearing investments in order to have funds available on a short-term basis. Where cash is not expected to be required in the short-term, the policy is to invest in investments with an intermediate to long-term horizon that still allows for conversion to cash, if required.

11. LONG-TERM DEBT

The Company has \$8.75 million unsecured debentures outstanding as of September 30, 2018. The debentures have a term of seven years maturing on August 12, 2022, bear interest at 5% per annum, compounding semi-annually and both principal and interest are payable at maturity.

The long-term debt is summarized as follows:

	September 30, 2018	December 31, 2017
Debentures at maturity	\$ 8,750,000	\$ 8,750,000
Loan discount	(3,068,547)	(3,487,402)
Accrued interest on debentures	1,482,572	1,111,232
	\$ 7,164,025	\$ 6,373,830

While the debentures are outstanding, the Company cannot take the following actions without the prior written approval of its creditors:

- The merger, amalgamation, combination, consolidation, tender for the shares of or similar business transaction whereby its creditors are not the holders, directly or indirectly, of a majority of the voting securities or its ultimate controlling person immediately after such closing;
- The sale of all or substantially all of its assets, other than to a wholly-owned subsidiary or to a NICO Joint Venture;
- The creation, incurrence, assumption or suffering to exist, or otherwise becoming liable for any indebtedness on terms that are less advantageous to the Company or causing any material asset of the Company to be posted as collateral or security, unless all net proceeds of such indebtedness are applied to explore, develop, construct, operate or otherwise advance the NICO project;
- The repurchase of equity or the declaration of dividends or distributions of any kind; and
- The settlement of any litigation, arbitration, or administrative proceeding in relation to the NICO project for an amount in excess of \$125,000.

The loan balances have been recorded at their net present value at an effective interest rate of 18%. For the period ended September 30, 2018, \$418,855 of loan discount was amortized using the effective interest rate method.

12. FINANCIAL INSTRUMENTS

The Company is exposed to risks through its operations that arise from its use of financial instruments, which include credit risk, interest rate risk, market price risk, liquidity risk and foreign exchange risk. The Company's management believes that these risks are minimal due to the nature of the financial instruments. The principal financial instruments used by the Company, from which financial instrument risk arises, are cash and cash equivalents, reclamation security deposits, accounts receivables, accounts payable and accrued liabilities, provision for environmental rehabilitation, long-term debt and derivatives.

Due to their short-term nature, the carrying value of cash and cash equivalents, reclamation security deposits, accounts receivable and accounts payable and accrued liability approximates their fair value.

iii. Financial instruments measured at fair value

The fair value hierarchy of financial instruments measured at fair value is provided below:

	Level 3	
	September 30, 2018	December 31, 2017
Derivatives	<u>3,887,879</u>	<u>14,931,779</u>

There were no transfers between levels during the period. The change in fair value of level 3 financial instruments of \$11,043,900 is attributed to the change in fair value calculated on the derivative at the reporting date and has been recognized in the consolidated statements of income (loss) and comprehensive income (loss).

iv. Contractual maturities of financial liabilities

The following table details the Company's contractual maturities for its financial liabilities as at September 30, 2018. Payments due by year are as follows:

14. INCOME TAXES

The Company has non-capital loss carryforwards totaling \$46,374,000, net capital loss carryforwards of \$18,052,000, un-deducted debt and share issuance costs of \$693,000 and unused investment tax credits on pre-production mining costs of \$1,975,000. The non-capital losses will begin to expire in 2026. The Company has completed feasibility studies for its principal project and undertaken related permitting and financing activities. The benefit of certain non-capital losses and undeducted share issuance costs has been recorded in the consolidated financial statements only to the extent of existing taxable temporary differences. The potential benefits of these carry-forward non-capital losses, capital losses, and other deductible temporary differences have not been recognized in these financial statements as it is not considered probable that sufficient future taxable profit will allow the deferred tax asset to be recovered. A valuation allowance of \$15,784,000 has been recognized related to the uncertainty of realizing the benefit of deferred income tax assets in future years.

Significant components of the Company's deferred income tax assets and liabilities are as follows:

15. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are: [i] to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and provide returns for shareholders, and [ii] to maintain a flexible capital structure that optimizes the cost of capital at an acceptable risk. The Company includes the components of shareholders' equity, long-term debt, cash and cash equivalents and short-term investments, if any, in the management of capital.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents and short-term investments.

To facilitate the management of its capital requirements, the Company prepares forecasts or expenditure budgets for its activities that are used to monitor performance. Variances to plan will result in adjustments to capital deployment subject to various factors and industry conditions. The Company's activities and associated forecasts or budgets are approved by the Board of Directors.

The Company is not subject to any externally imposed capital requirements limiting or restricting the use of its capital. In order to maximize ongoing development efforts, the Company does not pay out dividends at this time.

i. New accounting standards

- IFRS 9 Financial Instruments – effective for the December 31, 2018 year end. This standard has been adopted by the Company and there was no significant impact on the Company's interim condensed consolidated financial statements. Additional disclosure has been provided in Note 12 – Financial Instruments.
- IFRS 15 Revenue from Contracts with Customers – effective for the December 31, 2018 year end. The Company currently has no revenue stream as it is still in the exploration and evaluation stage. As it evolves out of that stage, the Company will have a closer look at how this standard will impact how it recognizes revenue.

ii. Future accounting standards

The Company has not yet determined the full extent of the impact of the following new standard, interpretations and amendments, which have not been applied in these consolidated financial statements:
