2. Basis of presentation (continued)

(a) Statement of compliance (continued)

The accounting policies and critical estimates applied by the Company in the condensed consolidated interim financial statements are the same as those applied in the Company's annual consolidated financial statements for the year ended December 31, 2024. Accordingly, these condensed consolidated interim financial statements should be read in conjunction with the annual consolidated financial statements as at and for the year ended December 31, 2024, as filed on SEDAR+ at www.sedarplus.ca.

The condensed consolidated interim financial statements were approved and authorized for issue by the Board of Directors (the "Board") of the Company on November 18, 2025.

(b) Basis of measurement

The condensed consolidated interim financial statements have been prepared on a historical cost basis except for biological assets and cash-settled share-based instruments which are measured at fair value.

(c) Functional currency and presentation of foreign currency

The functional currency of the Company and all of its subsidiaries is Canadian dollars. These condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise noted.

(d) Basis of consolidation

Directly and indirectly controlled entities are treated as subsidiaries of the Company and are included in the condensed consolidated interim financial statements. Control exists when the Company has the power to govern the financial and operating policies of an entity and be exposed to the variable returns achieved by the entity. All significant intercompany balances and transactions are eliminated on consolidation.

(e) Discontinued operations

In April 2024, the Company completed the sale of its Prairie Records retail asset to Fire and Flower Inc., a wholly owned subsidiary of 2759054 Ontario Inc., operating as FIKA. The accompanying notes to the condensed consolidated interim financial statements have been updated to reflect the impact of the sale, with prior year balances revised to present only the continuing operations. For further details on the assets held for sale and discontinued operations, refer to Note 7.

3. Accounts receivable

The Company's account receivable consists of the following:

	September 30, 2025	December 31, 2024
Accounts receivable	19,396	11,695
Receiver general	1,237	91
Balance, end of period	20,633	11,786

4. Biological assets

	September 30, 2025	December 31, 2024
Balance, beginning of year	1,541	1,891
Unrealized gain on changes in fair value of biological assets	14,142	10,792
Capitalized costs during biological transformation	9,600	9,740
Transferred to inventory upon harvest	(23,372)	(20,882)
Balance, end of period	1,911	1,541

The Company measures its biological assets at their fair value less costs to sell and costs to complete. Fair value less costs to sell and costs to complete is determined using a model which estimates the expected harvest yield per plant applied to the estimated price per gram less costs to sell and complete.

The following estimates and assumptions all of which are classified as level 3 on the fair value hierarchy, were used by management as part of this model:

- Average selling price per gram - determined wholesale fair market value selling price of dry flower and trim, net of excise taxes.
- Stage of growth - represents the weighted average number of weeks out of the 16-week growing cycle that biological assets have reached as of the measurement date.
- Average yield per plant - represents the expected number of grams of finished cannabis inventory which are expected to be obtained from each harvested cannabis plant.
- Post-harvest costs - the costs are based on actual processing costs incurred by drying, trimming, testing, and packaging activities incurred in the period, including overhead allocations for these activities.

The following table quantifies each estimate and assumption, and also provides the dollar value impact on a 10% increase/decrease each input change would have on the fair value of biological assets.

	September 30, 2025	December 31, 2024	10% change 2025	10% change 2024
Average selling price per gram	\$3.17	\$2.66	154,927	127,520
Stage of growth	33%	37%	88,865	28,642
Average yield per plant (grams)	66.97	71.49	88,865	28,642
Post-harvest cost per gram	\$0.19	\$0.20	29,693	18,618

The Company accretes fair value on a straight-line basis according to stage of growth. As a result, a cannabis plant that is 33% through its 16 weeks growing cycle would be ascribed approximately 33% of its harvest date expected fair value less remaining processing and selling costs.

During the nine months ended September 30, 2025, the Company harvested 5,868 kilograms of dried cannabis and trim (2024 – 4,506 kilograms). As of September 30, 2025, it was expected the Company's biological assets would yield approximately 1,519 kilograms of dried cannabis and trim if harvested on the reporting date (September 30, 2024 – 511 kilograms).

17. Financial instruments and risk management

Fair value of financial instruments

The Company's financial instruments consist of cash, deposits included in other assets, accounts receivable (except amounts receivable from the Receiver General), accounts payable and accrued liabilities, long-term debt, and cash-settled share-based instruments. Management estimates that the fair value of its cash, accounts receivable (except amounts receivable from the Receiver General) accounts payable and accrued liabilities approximates their carrying values as of September 30, 2025, due to the relatively short maturity periods of these instruments. Long-term debt (except mortgage facilities) utilize floating rates and therefore fair value approximates carrying value. Cash-settled share-based instruments are re-measured at each reporting date, with changes in fair value recognized in the condensed consolidated interim statements of loss (income) and comprehensive loss (income).

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the significance of the inputs to fair value measurements. The three levels of hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; and
- Level 3 – Inputs for the asset or liability that are not based on observable market data.

There have been no transfers between fair value levels during the year.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board mitigates these risks by assessing, monitoring, and approving the Company's risk management processes.

Credit risk

Credit risk is the risk of a potential loss to the Company if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk from its cash, accounts receivable and investments. The maximum credit exposure is limited to their carrying amounts at the statement of financial position date. For the nine-months ended September 30, 2025, the maximum credit exposure is \$26.9 million (2024 - \$15.9 million).

The risk for cash is mitigated by holding these instruments with highly rated Canadian financial institutions.

The Company evaluates the credit worthiness of the customer counterparties before credit is granted.

The following table summarizes the Company's aging of trade receivables as at September 30, 2025, and December 31, 2024, net of expected credit losses.
