

Resverlogix Announces Filing of Quarterly Financial Statements and Management's Discussion & Analysis

CALGARY, Alberta, Dec. 14, 2017 -- Resverlogix Corp. ("Resverlogix" or the "Company") (TSX:RVX) announced today that it has filed its unaudited interim Consolidated Financial Statements and Management's Discussion & Analysis for the quarter ended October 31, 2017 with Canadian securities regulatory authorities.

Copies of these documents may be obtained online at www.sedar.com, or the Company's website, www.resverlogix.com, or by emailing ir@resverlogix.com

About Resverlogix

Resverlogix is developing apabetalone (RVX-208), a first-in-class, small molecule that is a selective BET (bromodomain and extra-terminal) inhibitor. BET bromodomain inhibition is an epigenetic mechanism that can regulate disease-causing genes. Apabetalone is the first and only BET inhibitor selective for the second bromodomain (BD2) within the BET protein called BRD4. This selective inhibition of apabetalone on BD2 produces a specific set of biological effects with potentially important benefits for patients with high-risk cardiovascular disease (CVD), diabetes mellitus (DM), chronic kidney disease, end-stage renal disease treated with hemodialysis, neurodegenerative disease, Fabry disease, peripheral artery disease and other orphan diseases, while maintaining a well described safety profile. Apabetalone is the only selective BET bromodomain inhibitor in human clinical trials. Apabetalone is currently being studied in a Phase 3 trial, BETonMACE, in high-risk CVD patients with type 2 DM and low high-density lipoprotein (HDL), and is expected to be initiated in a Phase 2a kidney dialysis trial designed to evaluate biomarker changes and safety parameters in up to 30 patients with end-stage renal disease treated with hemodialysis.

Resverlogix common shares trade on the Toronto Stock Exchange (TSX:RVX).
