

Form 51-102F3
Material Change Report

Item 1 Name and Address of Company

Patriot One Technologies Inc.
750 – 1095 West Pender Street
Vancouver, BC V6E 2M6
(the “Company”)

Item 2 Date of Material Change

October 2, 2017

Item 3 News Release

A news release was issued by the Company on October 2, 2017 and distributed via Marketwired.

Item 4 Summary of Material Change

The Company announced that its award-winning PATSCAN CMR™ (Cognitive Microwave Radar) concealed weapons detection system has achieved Federal Communications Commission (FCC) Declaration of Conformity certification, a copy of which can be found here: <https://fccid.io/2ALZTCMR>.

PATSCAN CMR sales efforts currently focus on markets encompassing houses of worship, academic institutions, event centres, casinos, commercial offices, hotel properties, government agencies and other locations at high risk of terrorist attack or random violence. Interest and orders have been received from around the globe and today’s announcement will trigger a number of sales, marketing and support initiatives in major markets including the United Kingdom, Eurozone and Asia-Pacific regions.

Item 5 Full Description of Material Change

See attached news release.

Item 6 Reliance on subsection 7.1(2) of National Instrument 51-102

Not Applicable

Item 7 Omitted Information

None

Item 8 Executive Officer

For more information, please contact Martin Cronin, CEO and Director
Telephone: 888-728-1832

DATED: October 13, 2017

Patriot One Receives FCC Approval for PATSCAN CMR Paving Way for Commercial Roll-Out

- Major Milestone Achieved in Less than a Year by Concealed Weapons Detection System Developer

TORONTO, ON (MARKETWIRED – October 2, 2017) – Patriot One Technologies Inc. (TSX.V: PAT) (OTCQB: PTOTF) (FRANKFURT: OPL) (“Patriot One” or the “Company”), is extremely pleased to announce that its award-winning PATSCAN CMR™ (Cognitive Microwave Radar) concealed weapons detection system has achieved Federal Communications Commission (FCC) Declaration of Conformity certification, a copy of which can be found here: <https://fccid.io/2ALZTCMR>.

“This is a momentous occasion for us,” states Patriot One Technologies CTO Dinesh Kandanchatha. “We now hold both FCC and Industry Canada (IC) certification allowing us to move into commercial roll-out across North America, with other countries soon to follow. The next stage of this exciting journey now begins with select deployments with key early adopters. Our system, which relies on machine learning algorithms, has graduated from the lab and is about to enter the arena of commercial distribution. Our strategy involves deployment through the remainder of the year to meet our backlog of commitments, and to immerse our engineering teams into an in-depth analysis of real-world threat scenarios in order to ensure that Patriot One offers the leading world-class solution for global threat detection.

"This is an important milestone for the Patriot One team for which they should be proud," said Governor Tom Ridge, first U.S. Secretary of Homeland Security and a member of the Patriot One Advisory Board. "I very much look forward to seeing the rollout of this game-changing technology across the United States and to supporting their efforts to improve public safety."

“We have used the waiting period for regulatory approval to assemble a team capable of meeting the go-to market challenges ahead.” Kandanchatha continues, “I anticipate a phased rollout, and like any new technology we will advance carefully and deliberately, recognizing progress will come quickly as we learn from each installation. We have worked hard to ensure that our system would pass this rigorous hurdle and to have achieved it in less than a year is a testament to our team of dedicated engineers, researchers and support staff who have put in the huge effort to achieve today’s news.”

PATSCAN CMR sales efforts currently focus on markets encompassing houses of worship, academic institutions, event centres, casinos, commercial offices, hotel properties, government agencies and other locations at high risk of terrorist attack or random violence. Interest and orders have been received from around the globe and today’s announcement will trigger a number of sales, marketing and support initiatives in major markets including the United Kingdom, Eurozone and Asia-Pacific regions.

“This is wonderful news for our company, our stakeholders and shareholders alike.” states Company CEO Martin Cronin. “We well understand that there are hurdles with any new technology, especially when it is revolutionary. We are also very clear regarding the role that the investment community has played in getting us to where we are today, and we will redouble our commitment as we move ahead to build shareholder value and to earn capital market support. Today we celebrate meeting a significant building block in our strategy for public safety through threat detection and our ongoing mission to make the world a safer place.”

ON BEHALF OF THE BOARD

“Martin Cronin”
CEO & Director

About Patriot One Technologies, Inc. (TSX.V:PAT) (OTCQB: PTOTF) (FRA: 0PL):

Patriot One has developed PATSCAN CMR™ the next generation of its award-winning radar device and software solution. PATSCAN CMR is a first-of-its-kind Cognitive Microwave Radar concealed weapons detection system, designed as an effective tool to combat active shooter threats before they occur. Built for cost-effective deployment in weapon-restricted buildings and facilities, the Patriot One software solution and related hardware can be installed in hallways and doorways to covertly identify weapons and to alert security of an active threat entering the premises. Owner/operators of private and certain public facilities can now prominently post anti-weapons policies with compliance assured. The Company's motto Deter, Detect and Defend is based on the belief that widespread use of its technology will act as an effective deterrent, thereby diminishing the epidemic phenomena of active shooters across the globe. For more information, visit: www.patriot1tech.com. Patriot One Technologies are proud winners of the 2017 Anti-Terrorism / Force Protection category of the [Security Industry Association's](#) New Product Showcase at [ISC West](#).
