GIYANI METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements

September 30, 2025 and 2024

(Unaudited- expressed in Canadian dollars unless otherwise stated)

1. Nature of operations and going concern

Giyani Metals Corp., formerly Giyani Gold Corp. ("**Giyani**", or "**the Company**"), was incorporated under the Canada Business Corporations Act on July 26, 2007, and continued under the Business Corporations Act of British Columbia on August 4, 2010.

Giyani is focused on becoming the preferred western-world producer of sustainable, low-carbon, high-purity battery-grade manganese for the electric vehicle ("**EV**") and energy storage system ("**ESS**") industry. The Company has developed a bespoke hydrometallurgical process to produce battery-grade manganese products for cathode precursor materials, critical to the EV and ESS industries, directly from ore supplied by the Company's own manganese oxide ("**MnO**") deposits. These include the K.Hill Battery-Grade Manganese Project ("**K.Hill Project**"), the Otse MnO prospect ("**Otse**"), and the Lobatse MnO prospect ("**Lobatse**"), which have all seen historical mining activities as well as other named assets, and targets within Giyani's 1,900 km² licence holding in Botswana. They are in the Kanye Basin of south-eastern Botswana (the "**Kanye Basin Prospects**") and held through Menzi Battery Metals (Pty) Limited ("**Menzi**"), a wholly owned subsidiary of Giyani.

The Company's registered address is Suite 1700, Park Place, 666 Burrard Street, Vancouver, BC, V6C 2X8. The Company is a reporting issuer in British Columbia, Alberta and Ontario and trades on the TSX Venture Exchange ("**TSXV**") under the symbol EMM.

These unaudited condensed interim consolidated financial Statements ("**Interim Financial Statements**") have been prepared using IFRS[®] Accounting Standards as issued by the International Accounting Standards Board ("**IASB**") applicable to a "going concern", which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. These Interim Financial Statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern. For the three and nine months period ended September 30, 2025, the Company reported net loss of \$2,448,167 and net loss of \$3,960,142 (three and nine months ended September 30, 2024: net loss of \$2,905,530 and \$7,449,026) and had an accumulated deficit of \$64,265,925 at September 30, 2025 (December 31, 2024 - \$60,305,783). The Company had negative working capital at September 30, 2025, of \$3,679,263 (December 31, 2024 – positive working capital \$4,588,643). The Company's continuing operations depend on its ability to generate future cash flows or obtain additional financing. Management believes that additional funds will be obtained from external financing to meet the Company's liabilities and commitments as they become due. However, there is a risk that funding will not be available on a timely basis or on terms acceptable to the Company. These factors indicate the existence of material uncertainties that may cast significant doubt as to the Company's ability to continue as a going concern and accordingly use accounting principles applicable to a going concern.

2. Basis of preparation

(a) Statement of compliance

These Interim Financial Statements as at and for the three and nine months ended September 30, 2025, and 2024 have been prepared in accordance with International Accounting Standard (**IAS**) 34 "**Interim Financial Reporting**", using accounting policies consistent with IFRS[®] as issued by the International Accounting Standards Board ("**IASB**") and interpretations issued by the IFRS Interpretations Committee. The Board of Directors approved these Interim Financial Statements on November 26, 2025.

(b) Subsidiaries

These Interim Financial Statements incorporate the financial statements of the Company and its wholly controlled subsidiaries. Subsidiaries are consolidated where the Company can exercise control. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity to obtain benefits from its activities. All intercompany transactions and balances have been eliminated.

During the nine months ended September 30, 2025, the Company incorporated a new wholly-owned

GIYANI METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements

(Unaudited- expressed in Canadian dollars unless otherwise stated)

subsidiary, Giyani (UK) Management Services Limited, on January 21, 2025, which has been included in the consolidated Interim Financial Statements from that date.

(c) Material accounting policies

The accounting policies and methods of computation applied by the Company in these Interim Financial Statements are the same as those applied in the Company's audited annual consolidated financial statements for the year ended December 31, 2024.

(d) Use of judgements and estimates

The preparation of the Interim Financial Statements in conformity with IFRS® requires management to make estimates, judgments and assumptions that affect the reported amount of assets, liabilities, income and expenses. Actual results could differ from these estimates, judgments and assumptions. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The significant estimates and judgments applied in the preparation of these Interim Financial Statements are consistent with those applied and disclosed in Note 2(f) to the Company's audited consolidated financial statements for the year ended December 31, 2024.

Ending balance	\$ 21,044,612	\$ 19,539,969

South Africa

Rock Island Gold Project

The Company previously entered into a joint operation agreement for the Rock Island assets with Corridor Mining Resources ("CMR"). The joint operation was conducted through Rock Island, a company incorporated in South Africa, of which Giyani had a 28.8% effective ownership. For accounting purposes, an impairment of the full carrying amount of the Rock Island Gold Project was recorded in previous periods.

During the year ended December 31, 2019, the Company entered into a share sale agreement with CMR to sell the Company's effective interest of 28.8% or 45 shares in Rock Island (the "**Rock Island Agreement**") held through Lexshell 837 Investments (Pty) Ltd. ("**Lexshell**").

Also, during the year ended December 31, 2019, the Company entered into a share purchase agreement with Malungani Resources (Pty) Ltd ("**Malungani**") to acquire the remaining 36% of Lexshell it did not already own (the "**Lexshell Agreement**"). Under the original terms, one-third of the agreed consideration was paid in Giyani shares at closing, with the remaining two-thirds payable in Giyani shares upon receipt of the Rock Island sale proceeds. In 2021, the parties amended the Lexshell Agreement, cancelling the remaining share issuance obligation and settling it for cash consideration of \$45,000, which was paid in full.

During the nine months ended September 30, 2025, the Company received the outstanding principal payments from CMR related to the Rock Island Agreement of R1,580,031 (\$121,868). As at September 30, 2025, the Company is working with CMR to complete and close the Rock Island Agreement.

6. Accounts payable and accrued liabilities

	September 30 2025	December 31 2024
Trade payables	\$ 2,202,792	\$ 263,132
Accrued liabilities	629,918	1,734,508
Total	\$ 2,832,710	\$ 1,997,640

7. Related party transactions

Key management personnel include those persons who have authority and responsibility for planning, directing, and controlling the Company's activities. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers. All related party transactions have occurred on an arm's length basis.

Related party transactions for the three and nine months periods ended September 30, 2025, and 2024 are as follows:

Non-current portion of lease liabilities	271,588	-
Total	\$ 671,763	\$ 1,122,835

The Company has entered into leases with interest rates ranging between 8% and 14% per annum. For certain leases, the Company is obligated to purchase the equipment at the end of the lease term. The present value of applicable lease payments has been recognized as an ROU asset, included as a non-cash addition to property, plant and equipment, with a corresponding amount recognized as a lease liability.

9. Convertible loan

On November 30, 2023, the Company announced the signing of definitive agreements for funding of the equivalent of US\$16 million (\$22.5 million) up to ZAR 300,000,000 with the IDC in the form of convertible loan facilities (collectively the “**IDC Facility**”). The proceeds from the IDC Facility have been utilized for the construction and operation of the K.Hill Project demonstration plant and other K.Hill Project development activities. The IDC Facility was available for drawdown until March 31, 2025.

IDC Facility:

ZAR300,000,000 (\$22.5 million).

ZAR234,375,000 (\$17.6 million) is available to Giyani Metals South Africa Proprietary Limited (“**GMSA**”), a wholly owned subsidiary of Menzi, (the “**GMSA Facility**”).

ZAR65,625,000 (\$4.9 million) is available to Menzi (the “**Menzi Facility**”).

As at September 30, 2025, the GMSA Facility and Menzi Facility were fully drawn.

Interest Rate:

Interest accrues and is capitalized in ZAR on drawn amounts on a daily basis from the drawdown date at the

GIYANI METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements

September 30, 2025 and 2024

(Unaudited- expressed in Canadian dollars unless otherwise stated)

South African Prime Rate at September 30, 2025 – 10.50% (at December 31, 2024 - 11.25%) plus 3% compounded monthly in arrears. The interest on the GMSA Facility will be capitalized to construction in progress, and the interest on the Menzi Facility will be recorded in the statement of loss and comprehensive loss.

Conversion Options:

The IDC has an option to convert the outstanding loan amount and capitalized interest into the shares and shareholder loan of Thabatala Holding (Pty) Ltd (“**Project HoldCo**”), a wholly owned subsidiary of Giyani, at a 20% discount to the prevailing 30-day volume-weighted average price of the Company’s shares in accordance with the terms of the IDC Facility. The IDC has a further option to convert Project HoldCo’s shares and shareholder loan to the Company’s shares upon the achievement of sustained commercial production at the prevailing 30-day volume-weighted average price of the Company’s shares in accordance with the terms of the IDC Facility. The maximum permissible shareholding percentage for the IDC post-conversion is 19.9% in Project HoldCo’s and Giyani’s share capital, or such higher percentage as approved by Giyani’s board and shareholders up to a maximum of 25%.

While the IDC Facility matures in 2028 and is designated at fair value, a portion (\$8,567,263) of the total liability has been presented as a current liability to reflect the IDC’s right to initiate a first conversion and settlement of the convertible loan into shares and shareholder loan of Project Holdco (up to 19.9% and as described above) within 12 months based on the current K.Hill Project schedule.

Maturity Date:

The IDC Facility matures on the last day of the fourth anniversary of the first drawdown date, i.e., April 23, 2028, for the GMSA Facility and May 2, 2028, for the Menzi Facility.

Security:

The Company has provided a guarantee on behalf of GMSA and Menzi in favour of the IDC, guaranteeing the obligations under the IDC Facility.

Breach of covenants:

An amendment to the IDC Facility was executed by the Company and the IDC on September 1, 2025, to extend the Demonstration Plant Completion Deadline Date from April 23, 2025, to September 30, 2025, and other milestone dates related to the definitive feasibility study and future K.Hill financings.

The IDC and the Company are in discussions to, among other things, extend the Demonstration Plant Completion Date to June 30, 2026, with an option to further extend to September 30, 2026. As of the date of filing of these Interim Financial Statements, the finalization and execution of this amendment is pending.

There have been no other breaches of covenants in the GMSA Facility and Menzi Facility triggering breach or cure provisions. The principal drawn and interest accrued are payable only at the maturity dates if the IDC does not exercise its conversion option.

Reconciliation of movement in IDC Facility

	September 30	December 31
	2025	2024
Convertible Loan Facility, beginning of period	\$ 21,679,558	\$ -
Proceeds from draw-downs/borrowings	5,408,450	17,241,706
Interest capitalized	1,949,648	1,138,748
Interest expensed	554,690	279,761
Fair value changes	635,305	958,994
Foreign currency translation	(770,511)	2,060,349
Convertible loan, end of the period	\$ 29,457,140	\$ 21,679,558
Convertible loan - current liability	8,567,263	6,295,414
Convertible loan - non-current liability	20,889,877	15,384,144
Convertible loan - total liability	\$ 29,457,140	\$ 21,679,558

The IDC Facility contains both a host loan liability and embedded derivatives for the conversion option, which

GIYANI METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements

September 30, 2025 and 2024

(Unaudited- expressed in Canadian dollars unless otherwise stated)

must be separated from the host debt. All the conversion options are exposed to the same risk, i.e., the equity price risk of Giyani shares. Furthermore, the options are highly interdependent.

The process of conversion involves first converting the outstanding IDC Facility amounts into Project HoldCo's shares at the 30-day volume-weighted average price, at the option of the IDC, based on the Giyani share price on the date of the first conversion, at a 20% discount. At the option of the IDC, and if specific criteria as per the agreement are met, Project HoldCo's shares are then converted to the Company's shares based on the Company share price on the second conversion date at the 30-day volume-weighted average price. This implies that the conversion to Project HoldCo's shares is a prerequisite to the delivery of the Company's shares under the second conversion option. Accordingly, the conversion options will be treated as a single compound embedded derivative.

The Company has elected to designate the entire hybrid IDC Facility at FVTPL. The fair value was calculated using a Monte Carlo Simulation using the following assumptions:

- The value of the Project Holdco shares is equal to the value of the publicly traded Company's shares
- A volatility of 95% and 93% was used in the valuation on December 31, 2024, and at September 30, 2025, respectively, which represents the historical volatility of the Company's share price commensurate with the term to maturity of the GMSA Facility and Menzi Facility.
- The risk-free rates of 2.88% and 2.47% used in the share price simulation were based on the Bank of Canada bond yield for a term commensurate with the remaining life of the IDC Facility as at December 31, 2024. and September 30, 2025, respectively.
- CAD / ZAR foreign exchange forward curves were used since the IDC Facility is ZAR-denominated.
- A credit spread over the ZAR risk-free rate of 3.83% was determined at September 30, 2025 (4.35% on December 31, 2024), based on the ICE High Yield South African Issuers Index.
- Drawdown and conversion dates were based on management assumptions of progress on the K.Hill Project, market conditions, and the strategic intentions of the IDC.

10. RSU liability

The Company has adopted a Restricted Share Unit Plan (the "**RSU Plan**"), in accordance with the policies of the TSXV, under which the Board of Directors of the Company may grant to directors, officers, employees and consultants of the Company, non-transferable restricted share units ("**RSUs**") to acquire common shares or their cash equivalent at the end of the vesting period. The aggregate number of shares that may be issued under the RSU Plan, together with the number of shares reserved for issuance under the stock option plan, shall not exceed 10% of the issued and outstanding common shares.

As at December 31, 2024, 441,000 RSUs were outstanding. During the nine months ended September 30, 2025, 220,500 RSUs vested and were redeemed for their cash equivalent, and the remaining 220,500 RSUs were forfeited and cancelled.

11. Financial liability

The Company received \$13,440,236 (US\$10 million) from ARCH ("**ARCH Funding**") on February 20, 2024. The ARCH Funding consists of:

- \$6,415,722 (US\$4.8 million) from a unit offering ("**ARCH Offering**") of 54,835,235 units for \$0.117 per unit, with each unit consisting of one common share and one common share purchase warrant exercisable for \$0.225 per warrant for five years (subject to acceleration); and
- \$7,024,514 (US\$5.2 million) for a 2% gross revenue royalty, which includes a 1% buy-back provision and an automatic step-down by 0.5% after 20 years or 2.5Mt of battery-grade manganese production.

Key terms and conditions from the ARCH royalty agreement are as follows:

GIYANI METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements

September 30, 2025 and 2024

(Unaudited- expressed in Canadian dollars unless otherwise stated)

- The royalty is payable as a percentage of gross revenues, which include income from the sale of products, licensing, and other related activities.
- Royalty payments are to be made quarterly, contingent upon the receipt of gross revenues by the Company. Detailed statements are required to support payment calculations.
- Payments are to be made in US\$, with provisions for adjustments related to provisional sales and taxes.
- A "Buy Back Right" allows the Company to reduce the initial royalty percentage upon meeting specific conditions including written notification to ARCH before the "Buy Back Option End Date" of June 30, 2025. "Payment of the Buy Back Payment Amount" is due within nine months of the "Buy Back Exercise Date". The Company did not exercise the Buy-Back Right.

The ARCH royalty was initially recorded as a financial liability and measured using an effective interest rate method of 22.0%.

During the nine months ended September 30, 2025, the Company revised the Project schedule, extending the expected timing of future royalty payments. This change in estimated cash flows exceeded the 10% threshold for a substantial modification under IFRS 9. As a result, the Company derecognized the original financial liability and recognized a new one, measured at the present value of the revised cash flows, discounted at the Company's effective interest rate of 22.26% at the modification date.

The Company recognized a gain on the extinguishment of the original financial liability of \$2,306,012 in the statement of loss for the nine months ended September 30, 2025.

The activity for the period ended September 30, 2025, is as follows:

	September 30	December 31
	2025	2024
Financial liability, beginning of the period	\$ 8,849,494	\$ -

Balance, September 30, 2025		333,807,025	\$ 60,372,961

(i) During the year ended December 31, 2024, the Company received \$13,440,236 (US\$10 million) from ARCH. The ARCH Funding consists of: (i) a \$6,415,722 (US\$4.8 million) unit offering of 54,835,235 units for \$0.117

GIYANI METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements

September 30, 2025 and 2024

(Unaudited- expressed in Canadian dollars unless otherwise stated)

per unit, with each unit consisting of one common share and one common share purchase warrant exercisable for \$0.225 per warrant for five years (subject to acceleration); and (ii) \$7,024,514 (US\$5.2 million) for a 2% gross revenue royalty which includes a 1% buy-back provision and an automatic step-down by 0.5% after 20 years or 2.5Mt of battery-grade manganese production. Following completion of the ARCH Offering, ARCH held approximately 19.99% of the Company's issued shares. In conjunction with the subscription agreement, \$226,580 was capitalized as share issuance cost.

The warrant exercise period may be accelerated, subject to the terms of the share purchase warrant, if the Company's common shares trade at a volume weighted average price ("VWAP") on the TSXV of at least \$0.31 on 10 consecutive trading days. If the Company exercises its acceleration right, the expiry date of the share purchase warrants will be set to a date within 30 days of the date of the acceleration notice.

The 54,835,235 share purchase warrants were assigned a fair value of \$2,857,515. Fair value was determined using the Black-Scholes option pricing model using the following weighted average assumptions: share price \$0.13, dividend yield of 0%; expected volatility (based on historical price data of the Company's common share) of 124%; risk-free interest rate of 3.58%; and an expected life of five years.

(ii) On August 18, 2025, the Company completed a non-brokered private placement for gross proceeds of \$3,569,622 through the issuance of 59,493,695 units for \$0.06 per unit, with each unit consisting of one common share and one-half of one common share purchase warrant. This includes units that were issued to settle certain outstanding obligations.

Each whole common share purchase warrant entitles the holder to acquire one common share for \$0.085 per share for a period of three years, expiring August 18, 2028. The 29,746,845 share purchase warrants issued in connection with the placement were assigned a fair value of \$835,772. Fair value was determined using the Black-Scholes option pricing model with the following weighted average assumptions: share price \$0.07, dividend yield of 0%; expected volatility of 102.44%; risk-free interest rate of 2.74%; and an expected life of three years.

In connection with the placement, the Company also issued 569,000 non-transferable finder's warrants. Each finder's warrant entitles the holder to acquire one common share for \$0.06 per share for a period of three years from the closing date. The finder's warrants were assigned a fair value of \$26,600, estimated using the same Black-Scholes model and assumptions as above, except for an exercise price of \$0.06. The fair value of these warrants was included in total share issuance costs.

Share issuance costs totaled \$129,954, including the fair value of finder's warrants, of which \$103,354 was paid in cash.

13. Stock Options

The Company has adopted an omnibus long-term incentive plan on November 15, 2024 which replaced the previous stock option plan ("SOP") in accordance with the policies of the TSXV, under which the Board of Directors of the Company may grant to directors, officers, employees and consultants of the Company, non-transferable options to purchase common shares provided the number of shares reserved for issuance under the stock option plan shall not exceed 10% of the issued and outstanding common shares, exercisable for a period of up to five years from the date of grant. The Board of Directors determines the price per common share and the number of common shares, which may be allotted to directors, officers, employees and consultants, and all other terms and conditions of the option, subject to the rules of the TSXV.

Stock option transactions are summarized as follows:

		2.35	5,366,667	4,600,000

(i) During the year ended December 31, 2024, 1,500,000 stock options were granted to non-executive directors of the Company in accordance with the Company's SOP. Each stock option vested immediately upon grant and is exercisable into one common share of the Company at a price of \$0.115 per common share for a period of five years from the date of grant. A fair value of \$154,884 was determined using the Black Scholes option pricing model and the following assumptions: share price of \$0.12, dividend yield of 0%; expected volatility (based on historical price data of the Company's common share) of 127%; risk-free interest rate of 3.58%; and an expected life of five years.

(ii) During the year ended December 31, 2024, the Company granted 5,200,000 stock options to certain directors, officers, and management of the Company in accordance with the Company's SOP. Of the total, 1,850,000 stock options were granted to officers, 3,150,000 stock options were granted to management and 200,000 stock options were granted to directors of the Company's subsidiary company in Botswana. Each option is exercisable into one common share of the Company at a price of \$0.11 per common share for a period of five years from the date of grant. Stock options granted to directors of the Company's subsidiary vested immediately with the remaining 5,000,000 stock options vesting one-third immediately and a further one-third on each of the first and second anniversaries of the date of the grant. A fair value of \$582,850 was determined using the Black Scholes option pricing model and the following assumptions: share price of \$0.13, dividend yield of 0%; expected volatility (based on historical price data of the Company's common share) of 124%; risk-free interest rate of 3.58%; and an expected life of five years.

(iii) During the year ended December 31, 2024, 2,850,001 stock options with exercise prices between \$0.15 and \$0.53 expired unexercised and 3,233,333 stock options with exercise prices between \$0.11 and \$0.20 were forfeited.

(iv) During the nine months ended September 30, 2025, 283,333 stock options with an exercise price of \$0.11 were forfeited and 6,716,667 stock options with exercise prices between \$0.11 and \$0.48 expired unexercised.

(v) During the nine months ended September 30, 2025, the Company recorded stock-based compensation in connection with the vesting of options totaling \$34,807 (September 30, 2024 - \$413,143). The allocation of this charge is as follows:

17. Capital management

The Company's policy is to maintain a strong capital base to maintain investor, creditor and market confidence and sustain future development of the business. The Company considers capital to include equity, the IDC Facility and funding from royalty arrangements.

The Company manages its capital structure and makes adjustments in light of the changes in its economic environment and the risk characteristics of the Company's assets. To effectively manage the Company's capital requirements, the Company has in place planning, budgeting and forecasting processes to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than Policy 2.5 of the TSXV which requires adequate working capital or financial resources of the greater of (i) \$50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of nine months. As at September 30, 2025, the Company is compliant with known requirements including Policy 2.5 of the TSXV.

18. Financial instruments and risk management

The Company's risk exposure and the impact on the financial instruments are summarized below:

Credit Risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's exposure to credit risk includes cash.

The Company has assessed the credit risk on its cash as low as the majority of its funds are held in large Canadian and African financial institutions.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet its liabilities when they come due. The Company manages its liquidity risk by forecasting operations' required cash flows and anticipated investing and financing activities. The Company's current financial obligations, which represents cash-settled liabilities due in the near term, consist of accounts payable and accrued liabilities, and lease liabilities.

The Company had cash at September 30, 2025, of \$7,457,612 (December 31, 2024 \$13,183,551). As at September 30, 2025, the Company had total liabilities of \$40,221,584 (December 31, 2024 \$33,675,991).

Market Risk

GIYANI METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements

September 30, 2025 and 2024

(Unaudited- expressed in Canadian dollars unless otherwise stated)

Market risk is the risk that a financial instrument's fair value or future cash flows will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

a) Interest Rate Risk

Interest rate risk is the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has interest-bearing cash in savings accounts at fixed interest rates. The Company's significant financial instruments valued using fluctuating risk-free interest rates are the components of the convertible loan (Note 9). The Company has not used any financial instrument to hedge potential fluctuations in interest rates and the exposure to interest rates for the Company is considered minimal.

b) Foreign Currency Risk

The Company is exposed to foreign currency risk of the South African rand, British pound, Botswana pula and United States dollar. Based on the net exposure at September 30, 2025, a 10% depreciation or appreciation of the South African rand, Botswana pula and United States dollar against the Canadian dollar would be approximately \$858,230.

c) Other Price Risk

Other price risk is the risk that the fair or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is not exposed to any other price risk.

d) Fair value:

The fair value of the convertible loan is \$ 29,457,140. A 5% increase or decrease in assumptions would change the fair value by approximately \$1.5 million.

The financial liability is payable as a percentage of gross revenues, which includes income from the sale of products, licensing, and other related activities. The fair value of the financial liability is most sensitive to changes in HPMSM product pricing, as it directly impacts gross revenue. A +/- 10% change in HPMSM product pricing would result an insignificant difference when compared with the balance as at September 30, 2025.

19. Segmented information

Operating segments are reported in a manner consistent with internal reporting provided to the chief operating decision maker, who has been identified as the company's CEO and is responsible for allocating resources and assessing the operating segments' performance.

The Company has two operating segments: (1) Botswana Battery Metals Project for the exploration, evaluation and development of its battery-grade manganese assets located in Botswana and the demonstration plant under construction in South Africa and (2) Corporate, which includes all other entities within the Company.

	Botswana Battery Metals Project	Corporate	Total
September 30, 2025			
Total assets	\$ 52,775,415	\$ 6,745,722	\$ 59,521,137
Total liabilities	32,350,796	7,870,788	40,221,584
Net loss	2,330,341	1,629,801	3,960,142
December 31, 2024			
Total assets	\$ 47,001,235	\$ 8,573,677	\$ 55,574,912
Total liabilities	23,513,999	10,161,992	33,675,991
Net loss	2,400,699	6,746,951	9,147,650

20. Commitments

	Within one year	Two-five years	Total
Construction in progress	\$ 1,419,195	\$ -	\$ 1,419,195
Minimum lease payments	400,175	271,588	671,763
	\$ 1,819,370	\$ 271,588	\$ 2,090,958

A contingent payment of R1 million (approximately \$76,000 each) is scheduled for October 2026, subject to a vendor complying with the terms of an agreement. As compliance has not yet been confirmed, it remains uncertain whether the obligation will be triggered.
