Alto Ventures Ltd.
(An Exploration Stage Company)
Notes to the Condensed Interim Financial Statements
For the Three Months Ended September 30, 2018 and 2017
(Canadian Funds)

1. Going concern and nature of operations

Alto Ventures Ltd. (“the Company”) is engaged in the acquisition, exploration and evaluation of Canadian gold projects. The head office is located at Suite 615, 800 West Pender Street, Vancouver, British Columbia, V6C 2V6 and the registered and records office of the Company is located at Suite 1500, 1055 West Georgia Street, Vancouver, British Columbia V6E 4N7.

The Company presently has no proven or probable reserves and on the basis of information to date, it has not yet determined whether its properties contain economically recoverable ore reserves. The Company has not generated any revenues from its operations to date and consequently is considered to be in the exploration stage. The amounts shown as exploration and evaluation assets represent acquisition costs incurred to date, less amounts written down or written off, and do not necessarily represent present or future values. The recoverability of the carrying amounts for exploration and evaluation assets is dependent upon raising financing, the sale or joint venturing of the exploration and evaluation assets, and/or the attainment of profitable operations.

These financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. The Company continues to incur operating losses, has limited financial resources, no source of operating cash flow, and no assurances that sufficient funding, including adequate financing, will be available to conduct further exploration and development of its exploration and evaluation projects. The Company’s ability to continue as a going concern is dependent upon its ability to obtain the financing necessary to complete the exploration of its mineral interests by the issuance of share capital or through joint ventures, and to realize future profitable production or proceeds from the disposition of its mineral interests. These material uncertainties may cast significant doubt about the Company’s ability to continue as a going concern. During the period ended September 30, 2018, the Company incurred a loss of \$63,424, and at September 30, 2018, had working capital \$1,505,814 and an accumulated deficit of \$20,831,197.

Management plans to continue to seek the necessary financing through a combination of issuance of new equity instruments, entering into joint venture or debt financing arrangements; however, there is no assurance that the Company will be successful in these actions. These financial statements do not give effect to adjustments to the carrying values and classification of assets and liabilities that would be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

2. Basis of preparation

Statement of Compliance

These interim financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting and interpretations of the IFRS Interpretations Committee (“IFRIC”). They have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit or loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The significant accounting policies, as disclosed, have been applied consistently to all periods presented in these financial statements. Except as noted below under Changes in Accounting Policies, these condensed interim financial statements follow the same accounting policies and methods of application as the annual financial statements of the Company for the year ended June 30, 2018. These condensed interim financial statements do not contain all disclosures required by

(Canadian Funds)

International Financial Reporting Standards (“IFRS”) and accordingly should be read in conjunction with the annual financial statements for the year ended June 30, 2018 and the notes thereto.

The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the condensed interim financial statements are disclosed in the notes of the annual financial statements for the year ended June 30, 2018.

Changes in accounting policies

a) Adoption of new IFRS pronouncements

The adoption of the following IFRS standards and amendments to existing standards effective July 1, 2017 did not have an effect on the Company’s financial statements:

- i) IFRS 2, “Share-based Payments” is effective for annual periods beginning on or after January 1, 2018.
- ii) IFRS 7, “Financial Instruments: Disclosure” is effective for annual periods beginning on or after January 1, 2018.
- iii) IFRS 9, “Financial Instruments: Classification and Measurement” is effective for annual periods beginning on or after January 1, 2018. The Company adopted IFRS 9 without restatement of prior year financial statements. IFRS 9 replaces the provisions of IAS 39, Financial Instruments: Recognition and Measurement (“IAS 39”) that relate to the recognition, classification, and measurements of financial assets and financial liabilities, derecognition of financial instruments and impairment of financial assets. IFRS 9 uses a single approach to determine whether a financial asset is classified and measured at amortized cost or fair value. The approach in IFRS 9 is based on how the Company manages its financial instruments and the contractual cash flow characteristics of the financial asset. The Company has elected to classify its marketable securities as Fair Value Through Profit or Loss (“FVTPL”) which will impact the statement of income (loss) by value changes of these assets.
- iv) IFRS 15, “Revenue from Contracts with Customer” is effective for annual periods beginning on or after January 1, 2018.

b) New accounting standards not yet adopted

- i) IFRS 16, “Leases” is effective for annual periods beginning on or after January 1, 2019.

The Company has initially assessed that there will be no material impact on the statements of financial position or results of operations as a result of adopting the new standards above; however, enhanced disclosure requirements are expected.

3. Management of financial risk

The Company’s financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company’s financial instruments are summarized below.

Interest rate risk

The Company has no material exposure at September 30, 2018 to interest rate risk through its financial instruments.

Sensitivity analysis

Based on management’s knowledge and experience of the financial markets, the Company believes the following movements are “reasonably possible” over a three month period. Sensitivity to a plus or minus 1% change in cash interest rates would affect net loss by \$12,703 annually. The Company does not hold any balances in foreign currencies to give rise to exposure to foreign exchange risk.

Alto Ventures Ltd.
(An Exploration Stage Company)
Notes to the Condensed Interim Financial Statements
For the Three Months Ended September 30, 2018 and 2017
(Canadian Funds)

Currency risk

As at September 30, 2018, all of the Company's cash was held in Canadian dollars, the Company's reporting currency. The Company has no operations in foreign jurisdictions at this time and as such has no currency risk associated with its operations.

Credit risk

The Company has some cash balances and no interest-bearing debt. The Company has no significant concentrations of credit risk arising from operations. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by Canadian financial institutions with which it keeps its bank accounts and management believes the risk of loss to be remote.

Receivables consist of goods and services tax ("GST") due from the Federal Government of Canada and sales taxes ("QST") due from the Government of Québec.

Liquidity risk

The Company manages liquidity risk by maintaining sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short-term obligations. As at September 30, 2018, the Company had a cash balance of \$1,270,328 (June 30, 2018: \$1,372,471) to settle current liabilities of \$82,376 (June 30, 2018: \$123,251).

4. Receivables

Current accounts receivable balance includes \$21,251 (June 30, 2018: \$20,343) in GST due from the Federal Government, \$1,077 (June 30, 2018: \$1,077) in QST from the Government of Quebec.

Oxford Lake	17	-	100	subject to underlying NSR
Oxford Lake MELs	3	-	100	Nil

⁽¹⁾ On April 30, 2018, the Government of Ontario amended its method for claims acquisitions from ground staking to an electronic lands management system, pursuant to which the historical claims were converted to cell claim units.

a) **Destiny, Quebec**

The Company owns a 100% interest in the project, subject to underlying royalties on certain claims. On May 15, 2018, the Company entered into an agreement ("Hinterland Agreement") with Hinterland Metals Inc. ("Hinterland") pursuant to which Hinterland could earn up to a 75% interest in the Company's Destiny property (the "Destiny Property"), by making the following cash and share payments to the Company, and incur exploration expenditures on the Destiny:

			Cash (\$)	Shares of Hinterland (#)	Minimum exploration expenditures (\$)

			100,000	2,000,000	4,000,000
			200,000	4,000,000	8,000,000
Total			350,000	8,000,000	16,000,000

⁽¹⁾ To maintain the agreement in good standing, Hinterland is required to close a minimum financing of \$750,000 on or before June 30, 2018 (the "Hinterland Private Financing").

Should Hinterland elect not to earn the Additional 25% Interest or failed to complete the Second Option, Hinterland and the Company would form a joint venture with initial respective participating interests of 50% each. In either case, the joint venture would be funded by each partner according to their respective interest subject to the terms and conditions of a joint venture agreement. Hinterland was unable to complete the Hinterland Private Financing, pursuant to which the Hinterland Agreement terminated prior to June 30, 2018.

b) **Empress, Ontario**

The Company has a 100% interest in the Empress property. On February 3, 2017, the Company entered into an agreement (the "Sanatana Agreement") to option 100% of its interest in the Empress project to Sanatana Resources Inc. ("Sanatana"), pursuant to which Sanatana is required to make certain cash and share payments to the Company, and incur exploration expenditures on

Stock options:

The Company has established a share purchase option plan whereby the Board of Directors may, from time to time, grant options to directors, officers, employees or consultants to a maximum of 10% of the issued and outstanding share capital amount. Options granted must be exercised no later than five years from date of grant or such lesser period as determined by the Company's Board of Directors. The exercise price of an option is not less than the closing price on the TSX-Venture Exchange (the "Exchange") on the last trading day preceding the grant date. The options vest immediately, except for investor relations employees which vest quarterly over a one year period, and share-based compensation is expensed based upon the relative fair values and vesting conditions of the options granted. Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

On September 19, 2018, the Company issued incentive options allowing for the purchase of up to, in the aggregate, 2,000,000 common shares at \$0.05 per share until September 19, 2023, pursuant to which the Company recorded \$44,284 as share-based compensation expense based upon the relative fair values and vesting conditions of the options granted. The estimated fair value of the stock options granted during the period ended September 30, 2018 was determined using a Black-Scholes option pricing model with the following assumptions:

Expected dividend yield	0%
Expected stock price volatility	154.12%
Risk free rate	1.50%
Expected life of options	5 years

Stock option transactions were as follows:

	Number of options (#)	Weighted Average Exercise Price (\$)
