Stria Lithium Inc.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the three and nine months ended June 30, 2017

(in Canadian dollars)

1. NATURE OF OPERATIONS

Stria Lithium Inc. (the “Company” or “Stria”) was incorporated on May 24, 2011 under the Canada Business Corporations Act. The Company’s shares are listed on the TSX Venture Exchange under the symbol SRA. The head office of the Company is located at 945 Princess Street, Kingston, Ontario.

The Company is engaged in the acquisition, exploration and development of mineral properties in Quebec, Canada, as well as the development of processes to purify and recover lithium metal directly from ore and from brine liquids.

2. GOING CONCERN ASSUMPTION

These condensed consolidated interim financial statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards (“IFRS”). The going concern basis of presentation assumes the Company will continue to operate for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. The Company is in the exploration stage and has not earned revenue from operations. During the nine months ended June 30, 2017, the Company incurred a net loss of \$274,301 and negative cash flows from operating activities of \$405,975. In addition, the Company has a working capital deficiency of \$223,372 and a deficit of \$2,605,381.

The above factors indicate material uncertainties, which may cast significant doubt about the Company’s ability to continue as a going concern. In assessing whether the going concern assumption is appropriate, Management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. This assessment is based upon planned actions that may or may not occur for a number of reasons including the Company’s own resources and external market conditions.

The Company’s ability to continue as a going concern, realize its assets and discharge its liabilities in the normal course of business, meet its corporate administrative expenses and continue its exploration and research activities, is dependent upon Management’s ability to obtain additional financing, through various means including but not limited to equity financing. No assurance can be given that any such additional financing will be available or that it can be obtained on terms favourable to the Company.

These financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern basis was not appropriate for these financial statements, then adjustments would be necessary to the carrying amount of assets and liabilities, the reported expenses, and the statement of financial position classifications used.

3. SIGNIFICANT ACCOUNTING POLICIES

a) Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting (“IAS 34”).

These condensed consolidated interim financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Company’s annual consolidated financial statements for the years ended September 30, 2016 and 2015, which have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

These condensed consolidated interim financial statements were authorized for issue by the Board of Directors on August 29, 2017.

b) Basis of presentation

These condensed consolidated interim financial statements have been prepared on a historical cost basis and are expressed in Canadian dollars, which is also the Company's functional currency.

These condensed consolidated interim financial statements have been prepared using accounting policies that are consistent with those used in the preparation of the Company's audited annual consolidated statements for the years ended September 30, 2016 and 2015.

c) Judgments, estimates and assumptions

When preparing the financial statements, Management makes a number of judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses.

Significant management judgment

The following are significant management judgments in applying the accounting policies of the Company that have the most significant effect on the financial statements.

Recognition of deferred income tax assets and measurement of income tax expense

Management continually evaluates the likelihood that its deferred tax assets could be realized. This requires Management to assess whether it is probable that sufficient taxable income will exist in the future to utilize these losses within the carry-forward period. By its nature, this assessment requires significant judgment. To date, Management has not recognized any deferred tax assets in excess of existing taxable temporary differences expected to reverse within the carry-forward period.

Going concern

The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay for its ongoing operating expenditures, meet its liabilities for the ensuing year, and to fund planned and contractual exploration programs, involves significant judgment based on historical experience and other factors including expectation of future events that are believed to be reasonable under the circumstances. See Note 2 for more information.

Estimation uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be substantially different.

Impairment of mineral exploration properties and exploration and evaluation assets

Determining if there are any facts and circumstances indicating impairment or reversal of impairment losses is a subjective process involving judgment and a number of estimates and interpretations in many cases.

Determining whether to test for impairment of mineral exploration properties and exploration and evaluation assets requires Management's judgment, among others, regarding the following: the period for which the entity has the right to explore in the specific area has expired or will expire in the near future, and is not expected to be renewed; substantive expenditure on further exploration and evaluation of mineral resources in a specific area is neither budgeted nor planned; exploration for and evaluation of mineral resources in a specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; or sufficient data exists to indicate that, although a development in a specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

Stria Lithium Inc.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the three and nine months ended June 30, 2017

(in Canadian dollars)

When an indication of impairment or a reversal of an impairment loss exists, the recoverable amount of the individual asset or cash-generating units must be estimated.

Share based payments

The estimation of stock-based compensation and warrants requires the selection of an appropriate valuation model and consideration as to the inputs necessary for the valuation model chosen. The Company has made estimates as to the volatility of its own shares, the estimated life of stock options and warrants granted and the time of exercise of those stock options and warrants. The valuation model used by the Company is the Black-Scholes model.

The Company allocates values to share capital and to warrants on the residual basis when the two are issued together as a unit. As this allocation is based upon the share price at the time of issuance and the stock is thinly-traded, the actual value of the components may differ from this allocation.

Risk management

The Company examines the various financial risks to which it is exposed and assesses the impact and likelihood of those risks. These risks include credit risk and liquidity risk. Where material, these risks are reviewed and monitored by the Board of Directors.

Credit risk

Credit risk is the risk of an unexpected loss if a party to its financial instruments fails to meet its contractual obligations. The Company's only significant financial asset exposed to credit risk is cash and maximum exposure is equal to the carrying value of this asset. The Company's cash is held at a Canadian chartered bank. It is Management's opinion that the Company is not exposed to significant credit risk. There has been no change to Management's assessment of credit risk compared with the prior year.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages its liquidity needs by carefully monitoring cash outflows due in day-to-day business as well as any anticipated transactions. The Company has a working capital deficiency of \$223,372 at June 30, 2017, including \$5,064 in cash and current liabilities totalling \$270,902, due within the next 12 months. There has been no change to Management's assessment of liquidity risk compared with the prior year.

Capital management

The Company manages its capital to ensure its ability to continue as a going concern and to provide an adequate return to its shareholders. In the management of capital, the Company includes the components of shareholders' equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or acquire or dispose of assets. The Company is not subject to any external capital requirements, neither regulatory nor contractual. In order to facilitate the management of its capital requirements, the Company prepares annual budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

7. FLOW-THROUGH INTEREST AND TAX EXPENSE

The Company is permitted, under Canadian income tax legislation, to renounce flow-through related resources expenditures to investors in advance of the Company incurring all of the expenditures. In accordance with this legislation, the Company has twelve months following the effective date of renunciation to incur the remaining expenditures. The Company begins incurring interest charges for unspent funds after two months following renunciation.

On April 13, 2016, the Company completed a flow-through private placement for gross proceeds of \$250,000. In February 2017, the related tax deductions were renounced to investors with an effective date of December 31, 2016. As at June 30, 2017, the Company has incurred \$3,071 of the required flow-through expenditures and has until December 31, 2017 to incur the remaining expenditures of \$246,929.

- (1) On October 23, 2015, the Company completed a private placement for gross proceeds of \$94,500. The private placement was comprised of 1,890,000 units at a price of \$0.05 per unit. Each unit consists of one common share and one common share purchase warrant. Each warrant entitles the holder to purchase one additional common share of the Company at a price of \$0.07 until October 23, 2019. The proceeds from the financing (\$94,500) were allocated between share capital (\$56,700) and warrants (\$37,800) using the residual method. The fair value of the shares was determined based on the trading price of the Company's shares on the TSX-V. Other share issuance costs total \$19,728 and were presented as a reduction of share capital. An Officer of the Company participated in the private placement for an amount of \$50,000.
- (2) On April 13, 2016, the Company completed a private placement for gross proceeds of \$250,000. The private placement was comprised of 5,000,000 units at a price of \$0.05 per unit. Each unit consists of one common share and one common share purchase warrant. Each warrant entitles the holder to purchase one additional common share of the Company at a price of \$0.05 until April 13, 2021. In connection with the financing, the Company paid cash finders' fees of \$10,608 and issued, as additional consideration, 212,160 non-transferable broker warrants, each broker warrant entitling the holder to acquire one common share of the Company at a price of \$0.05 until April 13, 2021. The proceeds from the financing (\$250,000) were allocated between share capital (\$250,000) and warrants (\$Nil) using the residual method. The fair value of the shares was determined based on the trading price of the Company's shares on the TSX-V. The warrants issued as commissions have been recorded at a value of \$26,394 based on the Black-Scholes option pricing model, using the following assumptions: stock price of \$0.145, risk-free interest rate of 0.73%, expected life of warrants of 5 years, annualized volatility of 100% and dividend rate of 0%. The underlying expected stock price volatility is based on historical data of similar companies, as the Company has limited historical data itself on which it could be based. The risk-free interest rate is based on the yield of a Government of Canada benchmark bond in effect at the time of grant with an expiry commensurate with the expected life of the warrants. Other share issuance costs total \$12,712 and were presented as a reduction of share capital. Directors and officers of the Company, including immediate family members, participated in the private placement for an aggregate amount of \$73,900.
- (3) On April 13, 2016, the Company completed a flow-through private placement for gross proceeds of \$250,000. The private placement was comprised of 5,000,000 flow-through units at a price of \$0.05 per

unit. Each flow-through unit consists of one flow-through common share and one half of a common share purchase warrant. Each full warrant entitles the holder to purchase one additional common share of the Company at a price of \$0.05 until April 13, 2021. In connection with the financing, the Company paid cash finders' fees of \$8,240 and issued, as additional consideration, 164,800 non-transferable broker warrants, each broker warrant entitling the holder to acquire one common share of the Company at a price of \$0.05 until April 13, 2021. The proceeds from the financing (\$250,000) were allocated between share capital (\$250,000) and warrants (\$Nil), after which there existed no residual to allocate to the flow-through liability. The fair value of the shares was determined based on the trading price of the Company's shares on the TSX-V. The warrants issued as commissions have been recorded at a value of \$20,503 based on the Black-Scholes option pricing model, using the following assumptions: stock price of \$0.145, risk-free interest rate of 0.73%, expected life of warrants of 5 years, annualized volatility of 100% and dividend rate of 0%. - (4) On January 27, 2017, the Company completed a private placement for gross proceeds of \$444,000. The private placement was comprised of 8,880,000 units at a price of \$0.05 per unit. Each unit consists of one common share and one common share purchase warrant. Each warrant entitles the holder to purchase one additional common share of the Company at a price of \$0.05 until January 27, 2022. In connection with the financing, the Company paid cash finders' fees of \$32,000 and issued, as additional consideration, 640,000 non-transferable broker warrants, each broker warrant entitling the holder to acquire one common share of the Company at a price of \$0.05 until January 27, 2022. The proceeds from the financing (\$440,000) were allocated between share capital (\$444,000) and warrants (\$Nil) using the residual method. The fair value of the shares was determined based on the trading price of the Company's shares on the TSX-V. The warrants issued as commissions have been recorded at a value of \$32,307 based on the Black-Scholes option pricing model, using the following assumptions: stock price of \$0.065, risk-free interest rate of 1.14%, expected life of warrants of 5 years, annualized volatility of 100% and dividend rate of 0%. The underlying expected stock price volatility is based on historical data of similar companies, as the Company has limited historical data itself on which it could be based. Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the three and nine months ended June 30, 2017

(in Canadian dollars)

The following table reflects the weighted-average fair value of stock options granted between October 1, 2015 and June 30, 2017 and the related Black-Scholes option pricing model inputs that were used in the calculations:

	Nine months ended June 30, 2017	Year ended September 30, 2016
Stock options granted	250,000	300,000
Weighted average grant-date fair value	0.03	0.02
Weighted-average exercise price	\$0.05	\$0.05
Weighted-average market price at date of grant	\$0.05	\$0.03
Expected life of stock options (years)	5.00	5.00
Expected stock price volatility	100%	100%
Risk-free interest rate	0.78%	0.60%
Expected dividend yield	-	-

The underlying expected stock price volatility is based on historical data of similar companies, as the Company has limited historical data itself on which it could be based.

The risk-free interest rate is based on the yield of a Government of Canada benchmark bond in effect at the time of grant with an expiry commensurate with the expected life of the options.

In total, \$7,695 of stock-based payments (all of which relate to equity-settled stock-based payment transactions) were included in profit or loss for the nine months ended June 30, 2017 (2016 - \$6,023) and credited to contributed surplus.
