2. BASIS OF PRESENTATION

Statement of compliance

These condensed consolidated interim financial statements for the three months and nine months ended May 31, 2018 and May 31, 2017 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). They have been prepared in accordance with IAS 34, "Interim Financial Reporting" and do not contain all necessary annual disclosures in accordance with IFRS.

The unaudited condensed consolidated interim financial statements of the Company for the nine months ended May 31, 2018 were authorized for issue in accordance with a resolution of the directors on July 17, 2018.

Principles of consolidation

These condensed consolidated interim financial statements include the financial statements of Titan Logix Corp. and its wholly owned subsidiary, Titan Logix USA Corp. The financial statements for the subsidiary are prepared for the same reporting period as the parent company using consistent accounting policies. All intercompany transactions and balances have been eliminated in the preparation of these condensed consolidated interim financial statements.

Functional and presentation currency

These condensed consolidated interim financial statements are presented in Canadian dollars which is the functional currency of Titan Logix Corp. and its subsidiary.

3. SIGNIFICANT ACCOUNTING POLICIES

These condensed consolidated interim financial statements, in all material respects, follow the same accounting policies and method of application as the annual audited consolidated financial statements of the preceding fiscal year except as noted below. Accordingly, these condensed consolidated interim financial statements should be read in conjunction with the annual consolidated financial statements for the year ended August 31, 2017.

The Financial Instruments significant accounting policy note was updated in the first, second and third quarter of fiscal 2018 to include the Company's investments in marketable securities and its investment in a secured note.

Financial instruments

The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the financial instrument. The Company classifies its financial instruments at initial recognition in the following categories depending on the purpose for which the instruments were acquired.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the three and nine months ended May 31, 2018 and 2017

(unaudited)

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

Financial assets and financial liabilities at fair value through profit or loss:

The Company classified its investment in marketable securities at "fair value through profit or loss".

The Company's investments in marketable securities are initially recognized at fair value. Subsequently, they are measured at fair value with gains and losses arising from changes in the fair value included in the profit or loss in the period in which they arise. 'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When available, the Company measures the fair value of an instrument using the quoted price in an active market for its investments. A market is regarded as active if transactions for the assets take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Dividends earned from such investments are recognized in profit or loss, unless the dividend clearly represents a repayment of part of the cost of the investment.

Loans and receivables:

In addition to its cash, cash equivalents, short term investments and accounts receivable the Company classified its investment in the secured note as "loans and receivables".

These financial instruments are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Company's investment in the secured loan was recognized when the cash was advanced and recognized at fair value less transaction costs. Subsequently, the loan is measured at amortized cost using the effective interest method, less any impairment. Any changes in value are recognized in the profit or loss. Interest income is recognized by applying the effective interest rate.

Impairment of financial assets

At each reporting date the Company assesses whether there is objective evidence that its investments are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact on the future cash flows on the asset than can be estimated reliably. Objective evidence that financial assets, which include its investments in marketable securities and its secured loan, are impaired can include:

- default or delinquency by a borrower;
- indications that the borrower will enter bankruptcy;
- the disappearance of an active market for a security; or
- other observable data such as adverse changes in the payment status of the borrower.

Impairment losses on investment in the secured loan carried at amortised cost are measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective interest rate. Losses are recognised in profit or loss.

New standards and interpretations not yet adopted

The following new accounting pronouncements have been issued but are not effective and may have an impact on the Company's consolidated financial statements in the future:

IFRS 9 - Financial Instruments will replace IAS 39 Financial Instruments: Recognition and Measurement. The new standard includes guidance on recognition and de-recognition of financial assets and financial liabilities, extensive changes to IAS 39's guidance on the classification and measurement of financial assets, impairment and hedge accounting. IFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. The Company is considering the implications of the standard, the impact on the Company and the timing of its adoption by the Company. The full extent of the impact has not yet been determined

IFRS 15 – Revenue from Contracts with Customers replaces IAS 11 Construction Contracts, IAS 18 Revenue and IFRIC 13 Customer Loyalty Programmes. This standard outlines a single comprehensive model for entities to account for revenue arising from contracts with customers. IFRS 15 becomes effective for annual periods beginning on or after January 1, 2018, with early adoption permitted and is to be applied retrospectively. The Company is considering the implications of the standard, the impact on the Company and the timing of its adoption by the Company. Management is evaluating its revenue streams in the context of the new standard.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the three and nine months ended May 31, 2018 and 2017

(unaudited)

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

New standards and interpretations not yet adopted (cont'd)

IFRS 16 – Leases will replace IAS 17 - Leases. IFRS 16 specifies how to recognize, measure, present and disclose leases effective for annual periods beginning on or after January 1, 2019. The standard provides a single lessee accounting model, requiring the recognition of assets and liabilities for all leases, unless the lease term is 12 months or less or the underlying asset has a low value. Lessor accounting however remains largely unchanged from IAS 17 and the distinction between operating and finance leases is retained. The Company is considering the implications of the standard, the impact on the Company and the timing of its adoption by the Company. Management is evaluating the impact the standard will have on its operating leases.

4. CASH AND CASH EQUIVALENTS

5. INVESTMENTS (cont'd)

Investment in secured loan

As at	\$
August 31, 2017	-
Addition to investment in secured loan	4,925,000
Principal repayments	(190,981)
May 31, 2018	4,734,019

As at	May 31, 2018 \$	August 31, 2017 \$
Current portion of investment in secured loan	384,395	-
Long-term portion of investment in secured loan	4,349,624	-
	4,734,019	-

On November 6, 2017 the Company entered into a loan participation agreement with Greypoint Capital Inc. (as administrative agent) and Greypoint Capital L.P. (as co-lender). Pursuant to the loan participation agreement, the Company has co-invested \$5 million of a \$10 million five-year secured loan to a company in the energy services industry (the "Borrower"). The loan is secured by a first priority security interest in the Borrower's real estate and equipment and a second priority security interest on the working capital assets of the Borrower. The loan is for a 60-month term and bears interest at the 30-day bankers' acceptance rate plus 7.5%, with a payment of \$33,333 principal plus interest paid monthly. The Borrower may prepay the loan at any time subject to set terms. Principal repayments amounted to \$96,009 in the three-month period ended May 31, 2018 and \$190,981 for the nine-month period ended May 31, 2018. The principal payment due May 31, 2018 was received June 1, 2018 and included in the current portion of the secured loan. The terms of the agreement included an upfront commitment fee from the Borrower of \$75,000 and therefore the Company recorded the initial value of the investment in secured loan at an amortized cost of \$4,925,000. The \$75,000 commitment fee is amortized over the term of the loan and included in interest income.

During the nine months ended May 31, 2018, the Company's investment in the secured loan to Greypoint Capital Inc. generated finance income of \$259,122 (May 31, 2017 - \$nil) at an effective interest rate is 9.28% (note 8).

6. DISPOSAL OF ASSETS HELD FOR SALE

In September 2016 the Company sold assets related to its TPZ 3310 and 3500 Controller product lines. These products were level measurement gauges and alarm systems for the oilfield storage and control industry. Under the terms of the sale agreement of the Company received proceeds of \$450,294 prior to a holdback of \$23,940. The carrying value of assets sold included inventory of \$156,016 and property, plant and equipment of \$10,943. The sale of the assets resulted in a gain on disposal of \$307,275 for the year ended August 31, 2017 after an adjustment to the gain of \$310,963 recorded in the nine months ended May 31, 2017. In conjunction with this divestiture the Company closed its branch in Lampman, SK. The Company continues to offer other level measurement solutions for the oilfield storage industry.

7. SHARE CAPITAL

a) Authorized

The Company has authorized an unlimited number of common shares without par value.

b) Issued

The Company has 28,536,132 issued common shares (August 31, 2017 – 28,536,132).

During the nine months ended May 31, 2018 and 2017, there were no long-term employee benefits, post-employment benefits or termination benefits recognized. Short-term employee benefits consist of salaries, bonuses, director fees, and all other short-term benefits.

13. CAPITAL MANAGEMENT

The Company manages its capital to safeguard the Company's ability to continue as a going concern, to provide an adequate return to shareholders, and to preserve the financial flexibility in order to fund growth and expansionary opportunities that may arise. The Company's capital management practices are focused on preserving a solid capital base and a strong statement of financial position. The Company's capital consists of its finance lease obligations (less current portion) and its shareholders' equity which is comprised of issued shares, contributed surplus and retained earnings. The Company is not subject to any externally imposed capital requirements. The Company manages and maintains its capital structure based on current economic conditions. In order to maintain or adjust its capital structure, the Company may attempt to raise additional funds by issuing additional equity securities or assuming additional indebtedness. There were no changes to management's capital management objectives, practices or policies in the period.

14. FINANCIAL INSTRUMENTS – FAIR VALUE MEASUREMENT

The following methods and assumptions were used to estimate the fair values of each class of financial instruments:

Cash and cash equivalents, short term investments, accounts receivables, accounts payable and accrued liabilities - The carrying value approximate fair value due to the short-term nature and limited credit risk of these assets and liabilities.

Investment in marketable securities – The fair value measurement of investments in marketable securities is based on the quoted market prices.

Investment in secured loan – Using the effective interest rate method, the fair value of the secured loan approximates its carrying value as the effective interest rate approximates the market interest rate.

15. FINANCIAL RISK MANAGEMENT

The Company is exposed to a number of risks as a result of holding financial instruments. These risks include credit risk, liquidity risk and market risk. The nature of the financial risks and the Company's strategy for managing these risks has not changed significantly from the prior period. The Company does not use financial derivatives.

a) Credit risk

Credit risk arises from the possibility that the entities to which the Company provides services may experience financial difficulty and be unable to fulfill their obligations. Financial instruments that potentially subject the Company to credit risk include cash and cash equivalents, accounts receivable and loans receivable. The Company's cash on deposit and short-term investments are held with reputable financial institutions, from which management believes the risk of loss is low. The Company's maximum exposure to credit risk is as indicated by the carrying amount of its cash, cash equivalents, accounts receivable and investment in secured loan. The Company has a credit policy and regularly monitors its credit risk exposure and takes steps to mitigate the likelihood of these exposures resulting in actual loss. The Company carries out credit evaluations of its customers who receive credit and carries adequate provisions for possible losses arising from credit risk associated with financial assets.

The Company's maximum exposure to credit risk for accounts receivable is the carrying value of its accounts receivable balance at May 31, 2018 of \$698,207 (August 31, 2017 - \$579,943). The Company's allowance for doubtful accounts as at May 31, 2018 amounted to \$11,884 (August 31, 2017 - \$17,908). As at May 31, 2018, the percentages of past due trade accounts receivable were as follows: 5% past due 61 to 90 days (August 31, 2017– 1%) and 7% past due greater than 90 days (August 31, 2017 – 3%) prior to including the allowance for doubtful accounts. It is management's view that these balances, net of the allowance for doubtful accounts, have a low risk of not being collected.

The Company's maximum exposure to credit risk for its investment in secured loan is the carrying value of the investment in secured loan's balance at May 31, 2018 of \$4,734,019. In investing in the secured loan, the Company considered the Company's future liquidity requirements and evaluated whether the Company had plans to sell the investment in the secured loan before recovery. The Company considered general industry conditions, the credit worthiness and credit history of the Borrower. The Company also considered specific conditions related to the financial health of and business outlook for the Borrower, including business outlook, industry and sector performance, changes in technology, and operational and financing cash flow factors. The Company also took into consideration security interest issued as collateral. The Company's investment in secured loan is subject to compliance with reasonable and customary positive and negative covenants for loans of its nature. As at May 31, 2018 the Borrower is in compliance with all terms of the loan agreement.

b) Equity price risk

The cost of equity investments which are subject to equity price risk at May 31, 2018 was \$nil (August 31, 2017 - \$nil), as the Company liquidated its equity investments in the second quarter of fiscal 2018. The Company is exposed to equity price risk as the result of changes in market conditions. Fluctuations in market prices may affect the market value of its portfolios of securities mainly for exchange traded funds. These securities are classified and accounted for as financial assets at fair value through profit and loss.

The primary investment objective is to optimize the return on surplus cash while preserving the Company's capital. The Board of Directors is responsible for the management and oversight of its investment portfolio. As part of the Company's risk management strategy, extensive corporate governance policies and practices have been applied. Each individual investment is evaluated separately, and trading guidelines specified. Economic and sector research influences the overall investment weighting. Limits are also established for the portfolio value at risk.

15. FINANCIAL RISK MANAGEMENT (cont'd)

c) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due or to fund the programs and commitments that the Company has planned. The Company manages liquidity risk through management of its capital structure in conjunction with cash flow forecasting including anticipated investing and financing activities. The Company believes that internally generated cash flows and current cash balances will be sufficient to cover its normal operating and capital expenditures for the current fiscal year.

d) Market risk

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company is exposed to interest rate risk arising from fluctuations in interest rates received on its cash and cash equivalents and its investment in secured loan. The Company manages interest rate risk by maximizing the interest earned in excess funds while maintaining the liquidity necessary to maintain day-to-day operating cash flow requirements.

At May 31, 2018, based on management's interest rate risk sensitivity analysis, a one-half percent change in market interest rates would have had an impact of approximately \$15,161 (nine months ended May 31, 2017 - \$45,596) on the Company's net earnings.

Currency risk

Foreign currency risk arises from fluctuations in the value of foreign currencies and the degree of volatility of these currencies relative to the Canadian dollar. The Company is subject to foreign currency risk in that it has both current assets and liabilities denominated in foreign currencies. It is management's opinion that a change in foreign currency exchange rates could affect the Company's results of operations and cash flows, but would not materially impair or enhance its ability to pay its foreign exchange obligations. The Company does not use hedging tools to reduce its exposure to foreign currency risk.

At May 31, 2018, the Company held net financial assets of US\$682,874 (May 31, 2017 - US\$792,331) that were exposed to foreign exchange risk. Based on the Company's foreign currency exposures, with other variables unchanged, a five percent appreciation/ depreciation in the Canadian dollar would have impacted net earnings by approximately \$44,209 (nine months ended May 31, 2017 - \$53,482).

16. SEGMENTED REPORTING

The Company operates substantially all of its activities in one reportable segment, technology fluid management solutions, which include the developing, manufacturing and marketing of innovative fluid measurement and management solutions. The ultimate solution will consist of the Company's products integrated with best-in-class third party solutions to enable complete fluid management throughout each stage of the customers' fluid handling processes. Operating segments are defined as components of the Company for which separate financial information is available that is evaluated regularly by the chief operating decision makers in allocating resources and assessing performance. The chief operating decision makers of the Company are the Chief Executive Officer and the Chief Technology Officer.

Segmented information is provided on the basis of geographic segments as the Company sells into two primary geographic regions: Canada and the United States.
