4. FINANCIAL INSTRUMENTS – FAIR VALUE MEASUREMENT

The Company's financial instruments consist of cash and cash equivalents, short term investments, accounts receivable, marketable securities, limited recourse capital notes (LCRN), accounts payable and accrued liabilities and lease liabilities. The carrying amounts of the current financial assets and current financial liabilities recognized in the Company's consolidated financial statements at the end of the reporting period approximate their fair value due to their short period to maturity, except in the case of marketable securities where the carrying value has been adjusted to its fair value based on quoted prices in the market at that date. Using the effective interest rate method, the fair value of the lease liability approximates its carrying value as the effective interest rates approximates the market interest rates. The fair value of the LRCNs is determined with reference to quoted market bids provided by a third-party independent dealer in the secondary market, as the LRCNs are not listed on any securities exchange. It has been determined that broker pricing is appropriate for these investments as there is sufficient trading volume to demonstrate that the fair values quotes are appropriate.
