Copper Equivalent (CuEq) values represent the combined value of copper and gold in one tonne of rock divided by the value of copper in one tonne of rock grading 1.0% copper, using metal prices of US\$5.00/lbs. for copper and US\$4,100 oz for gold, without consideration for metallurgical recoveries.

A full summary of all Zymo drill intercepts and corresponding assay data can be accessed at: <https://eastfieldresources.com/news/eastfield-resources-ltd-reviews-corporate-and-project-developments/>

These results reinforce the scale and continuity of porphyry-style copper-gold mineralization at Zymo and support the Company's view that significant targets remain untested within the broader IP anomaly.
