INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Eastfield Resources Ltd.

Opinion

We have audited the accompanying financial statements of Eastfield Resources Ltd. (the "Company"), which comprise the statements of financial position as at February 28, 2025 and February 29, 2024, and the statements of loss and comprehensive loss, changes in shareholders' equity, and cash flows for the years then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Company as at February 28, 2025 and February 29, 2024, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained in our audit is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 1 of the financial statements, which indicates that the ability of the Company to fund its potential future operations and commitments is dependent upon the ability of the Company to obtain additional financing. As stated in Note 1, these conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined that there are no key audit matters to communicate in our auditor's report.

Assessment of Impairment Indicators of Exploration and Evaluation Assets ("E&E Assets")

As described in Note 5 to the financial statements, the carrying amount of the Company's E&E Assets was \$1,049,961 as of February 28, 2025. As more fully described in Note 3 to the financial statements, management assesses E&E Assets for indicators of impairment at each reporting period.

The principal considerations for our determination that the assessment of impairment indicators of the E&E Assets is a key audit matter are that there was judgment made by management when assessing whether there were indicators of impairment for the E&E Assets, specifically relating to the assets' carrying amount which is impacted by the Company's intent and ability to continue to explore and evaluate these assets. This in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures to evaluate audit evidence relating to the judgments made by management in their assessment of indicators of impairment that could give rise to the requirement to prepare an estimate of the recoverable amount of the E&E Asset.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. Our audit procedures included, among others:

- Evaluating management's assessment of impairment indicators.
- Evaluating the intent for the E&E Assets through discussion and communication with management.
- Reviewing the Company's recent expenditure activity.
- Assessing compliance with agreements and expenditure requirements including reviewing option agreements and vouching cash payments and share issuances.
- Obtaining, on a test basis, confirmation of title to ensure mineral rights underlying the E&E Assets are in good standing.

Other Information

Management is responsible for the other information. The other information obtained at the date of this auditor's report includes Management's Discussion and Analysis.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Stephen Hawkshaw.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

1. NATURE AND CONTINUANCE OF OPERATIONS

Eastfield Resources Ltd. (the “Company”) was incorporated in the Province of British Columbia. Its principal business activities are the acquisition and exploration of gold, copper and other precious and base metal properties in Canada. The Company is in the process of actively exploring its mineral properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. The Company is considered to be in the exploration stage and does not have operating cash flows. The Company operates in one reportable segment, being mining exploration and all of the Company’s long term assets are located in Canada.

The Company’s shares are listed for trading on the TSX Venture Exchange (the “Exchange”) under the symbol ETF. Its registered office is located at 110-325 Howe Street, Vancouver, British Columbia V6C 1Z7.

These financial statements have been prepared on the basis of accounting principles applicable to a going concern which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of operations. The ability of the Company to fund its potential future operations and commitments is dependent upon the ability of the Company to obtain additional financing. There is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These conditions indicate the existence of material uncertainties that may cast significant doubt about the Company’s ability to continue as a going concern. These financial statements do not reflect the adjustments or reclassifications that would be necessary if the Company were unable to continue operations. Such adjustments and reclassifications could be material.

2. BASIS OF PREPARATION

These financial statements were authorized for issue by the directors of the Company on June 27, 2025.

Statement of Compliance

These financial statements for the Company’s reporting periods ended February 28, 2025 and February 29, 2024 have been prepared in accordance with and using accounting policies which are in full compliance with IFRS Accounting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”).

Basis of Measurement

These financial statements have been prepared on a historical cost basis, except for certain financial instruments classified as fair value through profit or loss or fair value through other comprehensive income that may be measured at fair value as described in Note 3 (c), and are presented in Canadian dollars, the Company’s reporting currency and functional currency. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

3. MATERIAL ACCOUNTING POLICY INFORMATION

(a) Accounting Estimates and Judgments

The preparation of these financial statements required management to make estimates, judgments and assumptions that affect the reported amounts and other disclosures in these financial statements. The estimates and assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates, judgments and assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both the current and future periods.

Critical accounting estimates are estimates, judgments and assumptions made by management that may result in material adjustments to the carrying amount of assets and liabilities within the next financial year. Critical estimates used in the preparation of these financial statements include, among others, the recoverability of accounts receivable, determination of realizable amounts of deferred tax assets and liabilities, impairment of the carrying value of non-financial assets, estimation of provisions and measurement of equity and share-based compensation.

Critical accounting judgments are accounting policies that have been identified as being complex or involving subjective judgments or assessments. Critical accounting judgments include the expected economic lives of and the estimated future operating results and net cash flows from equipment, and the recognition of deferred tax assets and liabilities.

(b) Cash and Cash Equivalents

Cash and cash equivalents are comprised of cash and bank deposits and may include highly-liquid investments that are readily convertible into known amounts of cash.

(c) Financial Instruments

Financial instruments consist of financial assets and financial liabilities and are initially recognized at fair value, plus transaction costs if the financial instrument is not subsequently measured at fair value through profit and loss.

Financial assets are measured subsequently at amortized cost, fair value through other comprehensive income (“FVOCI”), or fair value through profit and loss (“FVTPL”) based on the business model for managing the financial asset and the contractual cash flow characteristics of the financial asset. Financial assets which are investments in equity instruments are measured subsequently at FVTPL unless they are not held for trading and are designated as FVOCI. Financial liabilities are measured subsequently at amortized cost, except for derivatives and certain other specified exceptions measured at FVTPL.

The Company classifies its financial instruments as amortized cost except for investments in equity instruments, which are designated as FVOCI.

Financial instruments classified as amortized cost are measured at amortized cost using the effective interest method, adjusted as required for credit-impaired financial assets. Financial assets measured at amortized cost are subject to a loss allowance for expected credit losses resulting from default events that are possible within 12 months after the reporting date, or an allowance for lifetime expected losses where credit risk has increased significantly since initial recognition. Changes in the amount of expected credit losses are recognized as an impairment gain or loss in profit and loss.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(c) Financial Instruments (continued)

Financial assets are derecognized when the contractual rights to the cash flows expire, for certain transfers, or when there is no reasonable expectation of recovering the financial asset. Financial liabilities are derecognized when the obligation specified in the contract is discharged, cancelled or expires.

Fair value measurements are determined based on quoted prices when these are available or other appropriate valuation methods. Gains and losses on investments in equity instruments designated as FVOCI are recognized in other comprehensive income until they are derecognized. Dividends from these investments are recognized in profit and loss.

The Company classifies and discloses fair value measurements based on a three-level hierarchy:

- Level 1 – inputs are unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices in Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3 – inputs for the asset or liability are not based on observable market data.

The Company has determined the estimated fair values of its financial instruments based upon appropriate and generally accepted valuation methodologies. Investments in equity instruments are measured and recognized in the statements of financial position using Level 1 inputs. There were no movements between the levels of the hierarchy during the years ended February 28, 2025 and February 29, 2024. The carrying value of the Company's financial assets classified at amortized cost approximate their fair values because of the short term nature of these instruments.

(d) Exploration and Evaluation Assets and Patented Claims

The Company capitalizes all costs related to investments in mineral property interests on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. The amounts shown for acquisition costs and deferred exploration expenditures represent costs incurred to date and do not necessarily reflect present or future values. Costs are deferred until such time as the extent of mineralization has been determined and mineral property interests are either developed or the Company's mineral rights are allowed to lapse. Costs accumulated relating to projects that are abandoned are written-off in the period in which a decision to discontinue the project is made. Pre-exploration costs are expensed in the year they are incurred.

All deferred mineral property interests are reviewed, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment. When the carrying value of a property exceeds its net recoverable amount that may be estimated by quantifiable evidence of an economic geological resource or reserve, expenditure commitments or the Company's assessment of its ability to sell the property for an amount exceeding the deferred costs, a provision is made for the impairment in value.

When it has been determined that a mineral property can be economically developed as a result of establishing proven and probable reserves, costs will be depleted using the unit-of-production method over the estimated life of the ore body based upon recoverable metals to be mined from estimated proven and probable reserves by property.

From time to time, the Company may acquire or dispose of a mineral property interest pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded until the payments are made or received. Proceeds received on the sale or option of the Company's property interest is recorded as a reduction of the mineral property cost. When proceeds received in respect of a property exceed its carrying cost, such excess is recognized in profit or loss.

Although the Company has taken steps to verify title to the properties in which it has an interest, in accordance with industry standards for properties in the exploration stage, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(e) Joint Arrangements

The Company classifies its interests in joint arrangements as either joint operations or joint ventures. When making this assessment, the Company considers the structure of the arrangements, the legal form of any separate vehicles, the contractual terms of the arrangements and other facts and circumstances.

Where the interest is classified as a joint operation, the Company recognizes its assets (including its share of any assets held jointly), its liabilities (including its share of any liabilities incurred jointly), any income from the sale or use of its share of the output of the joint operation, and any expenses (including its share of any expenses incurred jointly) that it has incurred in respect of its interest in the joint operation.

Where the interest is classified as a joint venture, the Company recognizes its interest as an investment and accounts for that investment using the equity method.

(f) Project Deposits

Project deposits consist of term deposits in favour of regulatory authorities held as site restoration deposits for mineral properties. These amounts are expected to be recovered on satisfactory completion of the related exploration activities.

(g) Provisions

(i) Environmental expenditures

The operations of the Company have been and may in the future be affected by changes in environmental regulations, including those relating to future reclamation and site restoration. The likelihood of new regulations and their overall effect on the Company are unknown and unpredictable.

Environmental expenditures relating to ongoing environmental and reclamation programs are charged to operations as incurred, or depending on their future economic benefits, capitalized and amortized over the estimated remaining life of the related business operation, net of expected recoveries. These costs are recognized when the obligation is incurred and the fair value of the related costs is reasonably determinable. Management's estimate of reclamation and restoration costs has not been included in these financial statements as the amount is not currently material.

(ii) Other provisions

Provisions are recorded when a present legal or constructive obligation exists as a result of past events if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the statement of financial position date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount receivable can be measured reliably.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(h) Equipment

Equipment is recorded at cost less accumulated amortization. The Company records amortization on a declining balance basis at the following annual rates.

Technical equipment	20%
Office equipment	20%
Furniture and fixtures	20%
Computer software	100%

(i) Leases

(i) Initial measurement

A contract is a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. On the lease commencement date, the Company records a right-of-use asset at cost and a lease obligation at the present value of future lease payments, discounted using the implicit interest rate in the lease. If the implicit rate cannot be readily determined, the Company uses its incremental borrowing rate. The Company also adopts the practical expedient not to separate non-lease components from lease components and instead account for each lease component and any associated non-lease component as a single lease component. The cost of the right-of-use asset is comprised of the amount of the initial measurement of the lease liability, any lease payments made at or before the lease commencement date, less any lease incentives received, any initial direct costs incurred and an estimate of costs to be incurred in dismantling and removing the underlying asset, restoring the underlying asset to the condition required by the terms and conditions of the lease. The lease payment is comprised of fixed payments less any lease incentives receivable, variable lease payments, residual value guarantee payments, exercise price of a purchase option if the Company is reasonably certain it will exercise the option, and penalties for early termination of the lease.

(ii) Subsequent measurement

A right-of-use asset is recorded at cost less accumulated depreciation and accumulated impairment write-downs and is depreciated on a straight-line basis over the shorter of its useful life or the lease term. The lease obligation is reduced by lease payments, net of interest on the lease liability and adjusted for any reassessment or lease modifications.

Leases with terms of less than one year or leases with low value underlying assets are recorded as operating leases. Lease payments under operating leases are recorded as expenses on a straight-line basis over the lease term.

(iii) Sub-leases

Sub-lease arrangements where the head lease is short-term are classified as operating leases, otherwise they are classified by reference to the right-of-use asset arising from the head lease.

Sub-lease payments from operating sub-leases are recorded as income over the lease term.

Sub-lease arrangements that are classified as finance leases are recorded as an investment in the sub-lease on the sub-lease commencement date and recorded as the present value of the sub-lease payments, discounted using the implicit interest rate in the lease. If the implicit rate cannot be readily determined, the Company uses the same discount rate as the head lease. The investment in sub-leases will be reduced by the sub-lease payments net of interest income.

Eastfield Resources Ltd.
Notes to the Financial Statements

(Expressed in Canadian dollars)

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(j) Impairment of Non-Financial Assets

The Company assesses at each reporting date whether there is an indication that its equipment or mineral exploration and evaluation assets may be impaired. If any indication of impairment exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset or cash-generating unit's ("CGU") fair value less costs to sell and its value in use and is determined for an individual asset or CGU. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Impairment is recognized immediately in profit or loss. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. Where an impairment subsequently reverses, the carrying amount is increased to the revised estimate of recoverable amount but only to the extent that this does not exceed the carrying value that would have been determined if no impairment had previously been recognized. A reversal is recognized as a reduction in the impairment charge for the period.

(k) Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost. At each reporting date, the loss allowance for the financial asset is measured at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset has not increased significantly since initial recognition, the loss allowance is measured for the financial asset at an amount equal to twelve month expected credit losses. For trade receivables the Company applies the simplified approach to providing for expected credit losses, which allows the use of a lifetime expected loss provision.

Impairment losses on financial assets carried at amortized cost are reversed in subsequent periods if the amount of the loss decreases and the decrease can be objectively related to an event occurring after the impairment was recognized.

(l) Share Capital

Transaction costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

(m) Flow-through Shares

Flow-through shares issued by the Company transfer the tax deductibility of qualifying mineral resource exploration and evaluation expenditures to investors. The sale of tax deductions is recognized as a liability at the time the flow-through shares are issued, at an amount equal to the fair value allocated using a residual value method. This liability is subsequently recognized as other income when the Company has fulfilled the obligation to pass on tax deductions by incurring the eligible expenditures.

(n) Exploration Tax Credits

The Company may receive refundable exploration tax credits and grants from provincial jurisdictions in Canada equal to a specified rate of qualifying expenditures incurred on properties located within that jurisdiction. The Company records these exploration tax credits and grants as a reduction of qualifying expenditures as it incurs the related expenditures.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(o) Income Recognition

Interest from cash and cash equivalents is recorded on an accrual basis when collection is reasonably assured.

(p) Share-based Compensation

The Company has a stock option plan that is described in Note 7. All goods and services received in exchange for the grant of any share-based compensation are measured at their fair values. Where employees are rewarded using share-based compensation, the fair values of employees' services are determined indirectly by reference to the fair value of the equity instruments granted. The fair value is measured at the grant date, using the Black-Scholes option pricing model, and exclude the impact of non-market vesting conditions such as performance conditions.

All share-based compensation is recognized as an expense in profit or loss with a corresponding credit to the option reserve, over the period during which the related share-based compensation vests. No amount is recognized for instruments which do not ultimately vest.

Consideration received on the exercise of share purchase options is recorded as share capital and the related amount originally recorded in options reserve is transferred to share capital.

(q) Income or Loss per Share

Income or loss per share is calculated using the weighted average number of common shares outstanding during the period. The computation of diluted earnings is performed by presuming the exercise of outstanding options, warrants and similar instruments. It assumes that the proceeds of such exercise would be used to re-purchase common shares at the average market price during the period. However, the calculation of diluted loss per share excludes the effects of conversions or exercise of options and warrants if they would be anti-dilutive.

(r) Comprehensive Income or Loss

Other comprehensive income or loss is the change in net assets arising from transactions and other events and circumstances from non-owner sources. Comprehensive income or loss comprises net income or loss and other comprehensive income or loss. Financial assets that are classified as fair value through other comprehensive income have revaluation gains and losses included in other comprehensive income or loss until the asset is removed from the statement of financial position.

(s) Income Taxes

The provision for income taxes consists of current and deferred tax expense and is recorded in operations. Current income tax expense is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted by the reporting date, adjusted for amendments to estimates of taxes payable made in previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for: initial recognition of goodwill; initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss; and differences relating to investments in subsidiaries to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they are related to taxes levied by the same tax authority on the same taxable entity.

(t) Changes in accounting standards

Classification of Liabilities as Current or Non-Current (Amendments to IAS 1)

This amendment clarifies the requirement in determining whether a certain liability should be classified as current or noncurrent based on the rights that exist at the end of the reporting period, explains that rights are in existence if covenants are complied with at the end of the reporting period, and introduces a definition of ‘settlement’ to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services. The Company adopted the Amendments to IAS 1 effective April 1, 2024 but did not result in a change in the presentation of the Company’s liabilities.

Certain other new standards, interpretations, and amendments to existing standards have been issued by the IASB or the International Financial Reporting Interpretations Committee. However, these updates either are not applicable to the Company or are not material to the consolidated financial statements.

(u) New accounting policies issued but not effective

IFRS 18 Presentation and Disclosure in Financial Statements

IFRS 18 Presentation and Disclosure in Financial Statements, which will replace IAS 1, Presentation of Financial Statement aims to improve how companies communicate in their financial statements, with a focus on information about financial performance in the statement of profit or loss, in particular additional defined subtotals, disclosures about management defined performance measures and new principles for aggregation of information. IFRS 18 is accompanied by limited amendments to the requirements in IAS 7 Statement of Cash Flows. IFRS 18 is effective from January 1, 2027. Companies are permitted to apply for IFRS 18 before that date.

The Company has not yet determined the impact of these amendments on its financial statements.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

4. INVESTMENTS

	2025			2024		
	Number of Shares	Cost	Fair Value	Number of Shares	Cost	Fair Value
Investments in Equity Instruments Measured at FVOCI						
Cariboo Rose Resources Ltd.	208,000	\$ 14,925	\$ 10,400	208,000	\$ 14,925	\$ 9,360
Vizsla Copper Corp.	3,000,000	524,409	210,000	3,410,300	596,952	272,824
Silicon Metals Corp	550,000	37,654	19,250	550,000	37,654	44,000
Alpha Copper Corp.	-	-	-	31,353	119,014	7,838
GK Resources Ltd.	330,000	49,500	13,200	330,000	49,500	16,500
		\$ 626,488	\$ 252,850		\$ 818,045	\$ 350,522

The Company has irrevocably designated investments in equity instruments as measured at FVOCI rather than FVTPL as they are not held for trading and the FVOCI classification is considered more appropriate for these strategic investments. The fair value of these equity investments is based on quoted market prices which is a Level 1 fair value measurement.

During the year ended February 28, 2025, the Company sold investments for gross proceeds of \$46,894 (2024 - \$93,782) and recognized a gain of \$5,902 (2024 \$nil) reflected through other comprehensive loss.

Eastfield Resources Ltd.

Balance, end of the year	<u>(1,384,605)</u>	<u>(1,359,085)</u>
	<u>1,049,961</u>	<u>\$1,293,718</u>

The Company incurred additional impairment costs of \$4,360 on other exploration claims held.

Indata Property, Omineca Mining Division, British Columbia

The Company has a 94.8% interest in the Indata property. Imperial Metals Corporation (“Imperial Metals”) owns the remaining 5.2% interest. This interest will be reduced if Imperial Metals fails to make its proportionate share of exploration and other payments on the property.

On June 20, 2018 and amended on May 7, 2019, November 16, 2020, July 6, 2022, March 20, 2023, January 15, 2024, July 24, 2024 and March 19, 2025, the Company entered into an option agreement with Alpha Copper Corp. (“Alpha” formally Prophecy Potash Corp.) whereby Alpha may earn a 60% interest in the Indata property by making \$270,000 in cash payments, issuing \$170,000 in shares and completing \$2,700,000 in exploration work over a eight-year period ending December 31, 2026. During the year ended February 28, 2025 the Company received cash payments of \$60,000 which resulted in a gain on exploration and evaluation assets of \$44,480.

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

5. EXPLORATION AND EVALUATION ASSETS (continued)

Hedge Hog Project

The Company owns a 100% interest in the copper, gold, silver, cobalt Hedge Hog project located in the Cariboo Mining division in British Columbia.

In December 2020 and amended January 16, 2023 and August 2, 2023, the Company optioned a 60% interest to Silicon Metals Corp. (formally West Oak Gold Corp.). To earn its interest, Silicon was to make payments (cash and/or shares) totaling \$392,500 and complete \$1,750,000 in exploration expenditures over a five-year term. Upon completion of the earn-in, Eastfield would have retained a 40% working interest and a 0.5% net smelter return royalty. During the year ended February 28, 2025 the Company received cash payments of \$10,000. In May 2025 Silicon Metals terminated the option on the Hedge Hog property. During the year ended February 28, 2025 the Company recorded a property impairment against exploration and evaluation assets of \$67,759.

Zymo Property, Skeena Mining Division, British Columbia

The Company holds a 100% interest in the Zymo property.

CR Property, Cariboo Mining Division, British Columbia

The Company holds a 100% interest in the CR property. During the year ended February 28, 2025 the Company recorded a property impairment against exploration and evaluation assets of \$274,440.

Iron Lake Property, Clinton Mining Division, British Columbia

The Company acquired 100% of the Iron Lake property from Canevex Resources Ltd. and Scott Geophysics Ltd. (the "Vendors"). Canevex Resources Ltd. is owned by two directors of the Company. The Company has reserved a 1.5% net smelter royalty for the Vendors of which 1.0% is for Canevex Resources Ltd.

Option agreement with Tech-X Resources

In May 2021, and amended April 27, 2023 the Company entered into an agreement with Tech-X Resources Inc. ("Tech-X") whereby Tech-X earned a 51% interest in the property. Tech-X can earn an additional 29% (80% total) by completing an additional \$7,500,000 in exploration and making an additional \$500,000 in cash payments over a further two-year period.

Tech-X has also entered into an agreement with the original vendors of the Iron Lake properties who hold a 1.5% net smelter return on production from the Eastfield claims ("the Royalty"). The Production Royalty Purchase Agreement allows Tech-X to purchase up to two thirds of the Royalty for \$3,000,000 and retain a first right of refusal to purchase the balance. Escalating advance royalty payments totaling \$500,000 are payable over 80 months as a credit towards the purchase following commencement of commercial production. In the event that Tech-X elects not to exercise its purchase option then the advance royalty payments are repayable to Tech-X out of production and Eastfield will then be allowed to purchase the Royalty for \$3,000,000 and if it so chooses to purchase the entire Royalty for \$4,500,000.

Project Deposits

As at February 28, 2025 and February 29, 2024, the Company held \$28,646 in deposits provided to the Ministry of Energy and Mines of British Columbia (the "Ministry") and \$110,500 in term deposits, bearing interest at rates ranging from 0.20% to 0.75% and maturing over two years are provided as reclamation bonds for the above mineral properties. The term deposits will continue to be renewed to comply with the Ministry's requirements. As these reclamation bonds are required to be in place whilst the Company has ownership of these mineral properties, they are recorded as non-current assets.

February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

7. SHARE CAPITAL AND RESERVES

Authorized - Unlimited common and preferred shares without par value.

Private Placement

During the year ended February 28, 2025 the Company completed a non-brokered private placement for total proceeds of \$150,000. The private placement consisted of the sale of 6,000,000 units at a price of \$0.025 per unit, with each unit consisting of one common share and one share purchase warrant, with each warrant entitling the holder to purchase an additional common share at a price of \$0.05 until July 23, 2026. The Company incurred share issuance costs of \$1,800 pursuant to this private placement.

There were no shares issued during the year ended February 29, 2024.

Share Purchase Options

The Company issues options to directors, officers, and employees of the Company, and persons who provide ongoing services to the Company, under an incentive stock option plan. Share option terms issued under this stock option plan are at the discretion of the Board of Directors and generally include contractual lives of less than 10 years, vesting provisions, and exercise prices based on the fair market value of the common shares at the grant date.

A summary of changes in common share purchase options for the years ended February 28, 2025 and February 29, 2024 is:

	2025		2024	
	Number of Share Options	Weighted Average Exercise Price	Number of Share Options	Weighted Average Exercise Price
Balance, beginning of the year	4,885,000	\$ 0.06	4,120,000	\$ 0.07
Granted	-	-	1,365,000	0.05
Cancelled/Expired	(1,145,000)	0.05	(600,000)	0.08
Options outstanding and exercisable, end of the year	3,740,000	\$ 0.07	4,885,000	\$ 0.06

The following common share purchase options are outstanding at February 28, 2025:

Expiry Date	Options Outstanding and Exercisable		
	Number of shares	Exercise price (\$)	Weighted Average Remaining Life (Years)
September 15, 2026	1,875,000	0.08	1.55
October 10, 2027	500,000	0.05	2.61
June 9, 2028	200,000	0.05	3.27
December 14, 2028	1,165,000	0.05	3.79
	3,740,000		2.48

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

7. SHARE CAPITAL AND RESERVES (continued)

Share Purchase Options (continued)

The Company determines the fair value of the options granted using the Black-Scholes option pricing model. The weighted average grant date fair value of options granted during the year ended February 29, 2024 was \$0.03 using the following weighted average inputs and assumptions:

	<u>2024</u>
Share price	\$0.05
Exercise price	\$0.05
Risk-free interest rate	3.54%
Expected share price volatility	160%
Expected average period until exercise	5 years
Expected dividend yield	-

The effects of early exercise were incorporated in the estimate of the expected life of the common share purchase options. Expected volatility was determined based on the historic volatility of the Company's share price over a period ending on the grant date of the instrument and commensurate with the instrument's expected life. Other features of common share purchase options granted did not affect the calculation of grant date fair value.

Share Purchase Warrants

A summary of changes in common share purchase warrants for the years ended February 28, 2025 and February 29, 2024 is:

	<u>2025</u>		<u>2024</u>	
	Number of Warrants	Weighted Average Exercise Price	Number of Warrants	Weighted Average Exercise Price
Balance, beginning of year	3,666,000	\$ 0.10	3,666,000	\$ 0.10
Expired during the year	(3,666,666)	0.10	-	-
Issued pursuant to private placement	6,000,000	0.05	-	-
Balance, end of year	6,000,000	\$ 0.05	3,666,666	\$ 0.10

The following common share purchase warrants are outstanding at February 29, 2024:

<u>Expiry Date</u>	<u>Number of warrants Outstanding</u>	<u>Exercise price</u>	<u>Weighted Average Remaining Life in years</u>
July 26, 2026	6,000,000	\$ 0.05	1.41

8. SUPPLEMENTAL CASH FLOW INFORMATION

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

9. RELATED PARTY DISCLOSURES

The key management personnel of the Company are the directors, Chief Executive Officer and Chief Financial Officer.

The Company is related to Cariboo Rose Resources Ltd. (“Cariboo Rose”) through common directors and officers. In the normal course of business, the Company will enter into transactions with Cariboo Rose for the use of equipment, services and rental of office space. During the year, recoveries of rent, salaries, telephone, office, consulting, convention and travel costs were \$140,674 (2024 - \$113,374) from Cariboo Rose.

At February 28, 2025, accounts receivable included \$nil (2024 - \$1,837) receivable from Cariboo Rose and due to related parties included \$60,041 payable to Cariboo Rose (2024 - \$35,596).

During the year ended February 28, 2025, geological services amounting to \$123,006 (2024 - \$87,802) were provided to the Company by Mincord Exploration Consultants Ltd. (“Mincord”), a geological service company owned by two directors of the Company. Mincord’s relationship with the Company is non-exclusive and without retainer and on a project-by-project basis. Services provided include the hiring of field and professional personnel, rental of vehicular, camp and technical equipment, transportation and mobilization costs. At February 28, 2025, accounts payable to related parties included \$45,886 (2024 - \$18,598) payable to Mincord.

During the year, payments of \$19,000 (2024 - \$30,500) were made to the Chief Financial Officer, who is also a director of the Company, for accounting services.

Salaries and benefits of \$44,438 (2024 - \$41,260) were paid to the spouse of a director for office administration services provided.

Remuneration in the form of share-based compensation for key management personnel for the year ended February 28, 2025 was \$nil (2024 - \$34,899).

10. INCOME TAXES

The Company’s deferred tax assets and liabilities arise from the following items:

	<u>2025</u>	<u>2024</u>
Deferred tax assets (liabilities) arising from:		
Losses deductible against future taxable income	\$ 926,000	\$ 801,000
Equity investments	54,000	68,000
Equipment	80,000	95,000
Exploration and evaluation assets	(48,000)	(167,000)
Share issuance costs	1,000	2,000
Net deferred tax liability assets	<u>1,013,000</u>	<u>799,000</u>
Valuation allowance	<u>(1,013,000)</u>	<u>(799,000)</u>
Deferred tax assets recognized	<u>\$ -</u>	<u>\$ -</u>

Eastfield Resources Ltd.
Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

10. INCOME TAXES (continued)

The reconciliation of the provision for income taxes is as follows:

	<u>2025</u>	<u>2024</u>
Loss before income taxes	\$ (528,614)	\$ (321,315)
Combined federal and provincial statutory income tax rates	27%	27%
(Recovery) or provision of income taxes based statutory income tax rates	(143,000)	(87,000)
Add (deduct):		
Other	17,000	(82,000)
Permanent differences	(12,000)	11,000
Adjustment to prior years provision versus statutory tax returns	(76,000)	27,000
Change in unrecognized deductible temporary difference	214,000	131,000
Recovery of income taxes recognized in net income	\$ -	\$ -

In addition, the Company has resource related expenditures (Canadian Exploration Expenses) of approximately \$872,000 most of which can be deducted at a 100% rate and which can be used to offset future taxable income and can be carried forward indefinitely.

Provision and recovery of income taxes recognized in profit or loss for the year ended February 28, 2025 are the result of the recognition of previously unrecognized income tax losses related to the decrease and increase in the fair value of equity investments, which is recorded in other comprehensive income net of deferred income tax expense.

The Company has non-capital losses of approximately \$2,263,000 and capital losses of approximately \$1,167,000 for income tax purposes, which may be used to reduce taxable income and taxable capital gains, respectively, in future years. If unused, the non-capital losses will expire between 2024 and 2045. The capital losses can be carried forward indefinitely.

11. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral property interests, and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. The Company considers its capital for this purpose to be its shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may issue new shares or debt, acquire or dispose of assets or adjust the amount of cash and investments.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

In order to maximize ongoing development efforts, the Company does not pay out dividends.

The Company's investment policy is to invest its surplus cash in highly liquid short-term interest-bearing investments with maturities 90 days or less from the original date of acquisition, selected with regard to the expected timing of expenditures from continuing operations.

The Company currently has sufficient capital resources to meet its administrative overhead expenses through its current operating period and it is confident it can raise additional funds to undertake all of its planned business activities. Actual funding requirements may vary from those planned due to a number of factors. Management believes it will be able to raise capital as required in the long term, but recognizes that there will be risks involved that may be beyond its control.

Notes to the Financial Statements
February 28, 2025 and February 29, 2024
(Expressed in Canadian dollars)

12. RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

The Company's financial instruments are exposed to certain risks, which include credit, liquidity, and market risk. The risks related to financial instruments are managed by the senior management of the Company under policies and directions approved by the Board of Directors.

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. The Company's market risk is comprised of interest rate risk, equity price risk, and foreign currency risk.

(i) Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk when holding fixed rate short term deposits of varying maturities. As at February 28, 2025 and February 29, 2024, the Company considers its exposure to interest rate risk to be minimal.

(ii) Equity Price Risk

Equity price risk is the uncertainty associated with the valuation of assets arising from changes in equity markets. The Company is exposed to this risk through its equity and derivative investments (Note 4). All of the Company's equity investments are common shares of companies listed on the TSX Venture Exchange and the Canadian Securities Exchange.

The fair value of these investments and the underlying share prices are monitored by management with decisions on sale taken at the board level.

(iii) Foreign Currency Risk

Foreign currency risk is the risk that a variation in exchange rates between the Canadian dollar and US dollar or other foreign currencies will affect the Company's operations and financial results. The Company does not have significant exposure to foreign exchange rate fluctuation as it has a limited number of transactions denominated in foreign currencies.

Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's cash and project deposits are held at large Canadian financial institutions. The Company's receivables consist mostly of Goods and Services Tax due from the federal government of Canada. Receivables also include amounts due from related parties which are expected to be fully recovered. The Company considers the credit risk from these instruments to be minimal and has not recognized an allowance for expected credit losses. As at February 28, 2025 and February 29, 2024, none of the Company's financial instruments subject to credit risk were past due or impaired.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. Accounts payable and accrued liabilities and payable to related parties are due within the current operating period. The Company's lease obligations are due as set out in Note 6. The Company manages liquidity risk through the management of its capital structure (Note 11) and financial leverage.
