NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS

For the three months ended September 30, 2024

(Unaudited – Prepared by Management - Expressed in Canadian Dollars)

1. NATURE AND CONTINUANCE OF OPERATIONS AND GOING CONCERN

JZR Gold Inc. (the “Company”) was incorporated under the laws of the Province of British Columbia and is in the business of the exploration and development of mineral properties. The Company’s principal place of business, head office and records office is located at 404 – 1688 152nd Street, Surrey, British Columbia, Canada, V4A 4N2. To date, the Company has not earned any revenues and is considered to be in the exploration stage.

The Company’s common shares are listed on the TSX Venture Exchange with the symbol “JZR.V”.

The Company is in the process of exploring and developing its mineral properties and rights and has not yet determined whether the properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for mineral properties and related deferred exploration costs is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

The financial statements of the Company are presented in Canadian dollars, which is the functional currency of the Company.

Going concern of operations

These financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred losses since its inception and the ability of the Company to continue as a going-concern depends upon its ability to raise adequate financing and to develop profitable operations. As at the current reporting period, the Company does not have sufficient cash resources to meet its obligations for the next twelve months of operations.

Management is actively targeting sources of additional financing from investors, shareholders and through alliances with financial entities, and is considering issuances of debt or equity or other business and financial transactions which would assure continuation of the Company’s operations. To the extent financing is not available, working capital commitments may not be satisfied and could result in a loss of property ownership or earning opportunities for the Company. Management is closely monitoring economic trends, global financial conditions, and the equity markets to determine the appropriate course of action to be taken by the Company.

The Company has incurred a loss of \$397,431 for the three-month period ended September 30, 2025 (2024 - \$154,901), with an accumulated deficit of \$12,314,253 (June 30, 2025 - \$11,916,822) and had a working capital deficiency of \$67,878 (June 30, 2025 - \$3,144,462). Although it has been successful to date, there can be no assurance that the Company will be able to raise the funds necessary to continue future operations and commitments. Should the Company be unable to realize its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded on the statements of financial position.

For the three months ended September 30, 2024

(Unaudited – Prepared by Management - Expressed in Canadian Dollars)

1. NATURE AND CONTINUANCE OF OPERATIONS AND GOING CONCERN (cont'd...)*Going concern of operations (cont'd...)*

The financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations, such adjustments could be material. These conditions create a material uncertainty that may cast significant doubt upon the Company's ability to continue as a going concern.

2. BASIS OF PREPARATION**Statement of compliance**

These financial statements, including comparative periods, have been prepared in accordance with IFRS Accounting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") and Interpretations of the IFRS Interpretations Committee ("IFRIC"). These financial statements are prepared using IFRSs in effect as at June 30, 2025. Material accounting policy information and the applicable basis of measurement used in the preparation of these financial statements are described in Note 3.

These financial statements have been prepared on a historical cost basis, except for certain financial instruments which are classified as fair value through profit or loss. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

These financial statements were authorized for issuance by the Board of Directors on November 26, 2025.

3. MATERIAL ACCOUNTING POLICY INFORMATION*Basis of presentation*

These condensed interim financial statements have been prepared in conformity with International Accounting Standard ("IAS") 34, Interim Financial Reporting, using the same accounting policies as detailed in the Company's annual audited financial statements for the period ended June 30, 2025, and do not include all the information required for full annual financial statements in accordance with IFRS, as issued by the IFRIC. It is suggested that the condensed interim financial statements be read in conjunction with the annual audited financial statements.

Except as otherwise indicated hereunder, these condensed interim financial statements have been prepared using the same policies and methods as the financial statements of the Company for the year ended June 30, 2025. Refer to Note 3 of the Company's financial statements for the year ended June 30, 2025 for more information on new accounting standards and amendments not yet effective.

4. MINERAL PROPERTIES AND DEFERRED EXPLORATION COSTS

The Company owns the Spider Mineral Property which is located in the Province of British Columbia (“B.C.”) comprising of claims that are 100% owned by the Company. The Spider Mineral Property is comprised of certain Crown granted mineral claims and several land lots in fee simple within the township of Camborne, B.C.

The following table summarizes mineral rights and property costs:

Balance, June 30, 2024	\$ 789,469
Acquisition costs	4,000
Property taxes	8,738
Site exploration	96,710
Balance, June 30, 2025	\$ 898,916
Site exploration	24,000
Balance, June 30, 2025	\$ 922,916

Title to mining properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for uncertainties arising from the frequently ambiguous conveyancing history characteristic of many mining properties. The Company has investigated titles to all of its mineral properties and, to the best of its knowledge, the titles to all of the Company’s properties are in good standing. Site exploration costs consists of consulting fees paid to related and third-party service providers.

5. INTANGIBLE ASSET

On January 20, 2021, the Company acquired from a third party, its interest in a JV Royalty Agreement dated July 6, 2020 (“JVRA”) with Eco Mining Oil & Gaz Drilling and Exploration EIRELI (“Eco”) with respect to the Vila Nova gold project, which is mine in the development phase located in Amapa, Brazil. The Company acquired the right to acquire the JVRA for the Vila Nova property from a third party through issuance of 5,125,000 common shares valued at \$1,981,000.

Pursuant to a purchase and sale agreement, the Company acquired a 100% interest in the JVRA, wherein the Company shall have the option and right to acquire a 50% net profits interest in the Vila Nova property. Pursuant to the terms of the JVRA, in order to exercise the option and acquire the rights thereunder, the Company must make the following payments to Eco, subject to satisfactory project assessment prior to each stage of funding:

- an initial payment of USD\$500,000 to fund the 2,000 m drilling program and related costs needed to complete the business plan to construct a 1,280 t/d bulk exploitation program on the Vila Nova property (payment made by third party prior to acquisition of the JVRA);
- a second payment of USD\$500,000 (paid); and
- a final payment of up to USD\$5,000,000 (paid).

As of September 30, 2025, \$11,452,051 (\$8,482,839 USD) of funding had been paid to Eco in relation to the payments for the option and acquisition of the net profits interest. If exercised and all payments are made, the Company shall receive a 50% net profits interest from all products and minerals produced from the Vila Nova property and exclusive rights to explore and develop the property, including initiating and carrying out commercial production. Eco will remain the sole operator of all mining-related activity on the property, including environmental remediation. In the event the JVRA is terminated, the cash amounts advanced will convert into a 2-year term loan with interest bearing 6% per annum. Additional payments totaling \$245,160 (\$185,000 USD) were made subsequent to September 30, 2025 (Note 14).

The following table summarizes the net carrying amount of the intangible asset:

Balance, June 30, 2024	\$ 11,294,171
Option and acquisition payments made	109,100
Balance, June 30, 2025	\$ 12,963,903
Option and acquisition payments made	469,148
Balance, September 30, 2025	\$ 13,433,051

As the intangible asset was not yet available for use, management has performed its impairment test for the intangible asset as at September 30, 2025. The recoverable amount for the intangible asset was based on value in use using a discounted cash flow model. The significant assumptions applied by management in determining value in use included revenue projections and projected cash flows based on financial budgets approved by management over a period of 5 years and a pre-tax discount rate of 20%.

The recoverable amount of the intangible asset exceeded its carrying amount and accordingly, no impairment was recognized as at September 30, 2025.

12. FINANCIAL INSTRUMENTS AND RISKS

The Company's financial instruments consist of cash and cash equivalents, loan receivable, security deposits, accounts payable and accrued liabilities, due to related parties and loan payable.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

As September 30, 2025, the Company's cash and cash equivalents is measured using level 1 inputs of the fair value hierarchy, consisting of quoted prices in active markets for identical assets. The fair value of all other financial instruments approximates their carrying values due to the relatively short-term maturity of these instruments, or attached market rates of interest, as the loan receivable and security deposits are not short term.

Assets and liabilities measured at fair value on a recurring basis were presented on the Company's statement of financial position as at September 30, 2025 as follows:

	Fair Value Measurements Using			Balance, September 30, 2025 \$
	Quoted prices in active markets for identical instruments (Level 1) \$	Significant other observable inputs (Level 2) \$	Significant unobservable inputs (Level 3) \$	
Cash and cash equivalents	432,125	–	–	432,125

Assets and liabilities measured at fair value on a recurring basis were presented on the Company's statement of financial position as at June 30, 2025 as follows:

	Fair Value Measurements Using			Balance, June 30, 2025 \$
	Quoted prices in active markets for identical instruments (Level 1) \$	Significant other observable inputs (Level 2) \$	Significant unobservable inputs (Level 3) \$	
Cash and cash equivalents	1,007,056	–	–	1,007,417

12. FINANCIAL INSTRUMENTS AND RISKS (cont'd...)

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company's cash and cash equivalents and security deposits are held with high credit quality financial institutions, and the loan receivable is secured by the asset sold. The Company believes it does not have material exposure to credit risk. The Company's exposure to and management of credit risk have not changed materially from that of the year ended June 30, 2025.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2025, the Company had a cash balance of \$432,125 to settle current liabilities of \$595,397.

There is a risk that the Company may not be able to fulfill its obligation when a liability is due. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms. The Company's exposure to and management of liquidity risk have not changed materially from that of the year ended June 30, 2025.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices and comprises: currency risk, interest rate risk and other price risk. The Company's exposure to and management of market risk have not changed materially from that of the year ended June 30, 2025.

(a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has \$33,500 of security deposits earning interest at an average rate of 0.57% per annum. Cash is held in banks receiving market rates of interest. The loan receivable does not bear interest and the loan payable is at a set interest rate of 12% per annum, which approximates a market rate of interest. As such, the Company does not believe that it is materially exposed to interest rate risk.

(b) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company does not have assets or liabilities denominated in a foreign currency and therefore is not exposed to currency risk.

(c) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer by factors affecting all similar financial instruments traded in the market. The Company considers commodity prices when raising money through equity issuances of units or common shares of the Company. However, the Company is not directly exposed to other price risk with respect to commodity and equity prices, as it does not hold or trade commodities or marketable securities. When considering an equity raise of funds, the Company closely monitors commodity prices of gold and the stock market price of the Company's common shares to determine the appropriate course of action to be taken by the Company.

13. CAPITAL MANAGEMENT

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern.

In the management of capital, the Company monitors its capital structure which comprises all components of shareholders' equity, which totaled \$14,373,420 at September 30, 2025 (June 30, 2025 - \$10,853,514).

The Company sets the amount of capital in proportion to risk. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue common shares through private placements. The Company is not exposed to any externally imposed capital requirements. The Company's overall strategy remains unchanged from the year ended June 30, 2025.

14. SUBSEQUENT EVENTS

Subsequent to September 30, 2025, the Company:

- Issued 4,000,000 shares by way of exercise of warrants for total proceeds of \$1,600,000; and
- Advanced an additional \$185,000 USD in relation to the JVRA.
