Enchi is road accessible, is on the Ghanaian power grid, and is situated along the eastern margin of the Sefwi gold belt that hosts multi-million ounce producing mines such as the Chirano Gold Mine (owned by Asante Gold Corporation) located 50 km north of Enchi. Enchi includes six prospecting licenses and three applications for prospecting licenses comprising a total 248 km² land package.

Recent Developments

The key recent developments in our business are as follows:

- June 26, 2024: Newcore announced the start of a 10,000-metre drill program at the Enchi Gold Project. RC drill program targeting near-surface oxide and shallow sulphide mineralization with a main goal of infill drilling for resource conversion to improve the confidence level of the existing mineral resource estimate. A subset of the

drill program is also allocated towards outlining growth on select zones, with all deposit areas and pre-resource targets remaining open along strike and at depth.

- April 25, 2024: Newcore announced the results from an independent, updated preliminary economic assessment (“**PEA**”) study completed for the Enchi Gold Project. For further information on the PEA, please see the technical report titled “NI 43-101 Technical Report, Preliminary Economic Assessment on the Enchi Gold Project, Ghana” dated June 7, 2024 with an effective date of April 24, 2024 available under the Company’s SEDAR+ profile at www.sedarplus.ca.
- February 27, 2024: Newcore announced the addition of the Omanpe prospecting license (“Omanpe”), increasing the size of the Enchi Gold Project to 248 km². Omanpe covers 32.12 km² and adds several early-stage gold targets to the Enchi Gold Project. The Company also announced completion of an updated Environmental and Social Baseline Study (the “2023 Baseline Study”) for the Project.
- November 21, 2023: Newcore announced results from two bulk-scale pilot heap tests completed as part of a metallurgical testwork program at the Enchi Gold Project. Two bulk-scale pilot heap tests, leached for 60-days, were completed on 15-tonne composite samples of oxide mineralization consisting of one each from the Sewum Gold Deposit (“Sewum”) and the Boin Gold Deposit (“Boin”). Material Facts

There are no material facts about the securities being distributed hereunder that have not been disclosed either in this Offering Document or in another document filed by the Company over the 12 months preceding the date of this Offering Document.

What are the business objectives that we expect to accomplish using the available funds?

The Company intends to use the proceeds raised from the Offering for exploration and development of Newcore’s Enchi Gold Project in Ghana and for general corporate and working capital purposes. The Company expects to complete additional drilling, metallurgical testwork and continue development and exploration work on its Enchi Gold Project with the funds available to the Company upon closing of the Offering.

3. USE OF AVAILABLE FUNDS

What will our available funds be upon the closing of the Offering?

Based on the Company’s existing working capital of approximately \$3,850,000 as at August 31, 2024, the expected total available funds to Newcore following completion of the Offering is estimated to be approximately \$8,560,000.

		Assuming 100% of the Offering
A	Amount to be raised by the Offering	\$5,000,000
B	Selling commissions and fees ⁽¹⁾	\$250,000
C	Estimated Offering costs (e.g. legal, accounting, audit)	\$40,000
D	Net proceeds of Offering: $D = A - (B + C)$	\$4,710,000
E	Working capital as at most recent month end (deficiency)	\$3,850,000
F	Additional sources of funding	\$0
G	Total Available Funds: $G = D + E + F$	\$8,560,000

(1) Newcore has not currently engaged any dealers or finders in connection with this Offering. The Company, however, anticipates compensating certain finders in cash up to 5% of the gross proceeds of the Offering in respect of investors introduced by the finder and will ultimately determine the amount of such fees in negotiation with such parties. The \$250,000 amount stated above represents the Company's estimate of the aggregate finder's fees that may be paid by the Company in connection with the Offering.

How will we use the available funds?

Description of intended use of available funds listed in order of priority	Assuming 100% of the Offering
Exploration and development – Enchi	\$5,500,000
Corporate general and administrative	\$2,000,000
Unallocated working capital	\$1,060,000
Total: Equal to “G” Total Available Funds	\$8,560,000

The above-mentioned allocation and anticipated timing represents the Company's current intentions with respect to its use of proceeds based on current knowledge, planning and expectations of management of the Company. Although the Company intends to expend the proceeds from this Offering as set forth above, there may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary materially from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including the Company's ability to execute on its business plan and financing objectives. The Company has generated negative cash flows from operating activities since inception and anticipates that it will continue to have negative operating cash flow until profitable commercial production at its Enchi property is achieved. As a result, certain of the net proceeds from this Offering may be used to fund such negative cash flow from operating activities in future periods. See the “*Cautionary Note Regarding Forward-Looking Statements*” section above.

How have we used the other funds we have raised in the past 12 months?

The Company has not raised other funds in the past twelve months.
