KINGSMEN RESOURCES LTD.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2018
(Unaudited - Expressed in Canadian Dollars)

1. Nature of Operations

The Company was incorporated on January 11, 2000 under the provisions of the Company Act (British Columbia). The Company's common shares are listed and trade on the TSX Venture Exchange ("TSXV") under the symbol "KNG" and on the OTCQB under the symbol ("TUMFI"). The Company's principal office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia V6E 3V7.

The Company is engaged in the acquisition and exploration of precious metals on mineral properties. On the basis of information to date, the Company has not yet determined whether these properties contain economically recoverable ore reserves. The underlying value of the exploration and evaluation assets is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete development and upon future profitable production. Exploration and evaluation assets represent costs incurred to date, less amounts amortized and/or written off, and do not necessarily represent present or future values.

As at September 30, 2018 the Company had working capital in the amount of \$633,809 and an accumulated deficit of \$19,653,437. To date the Company has not earned any revenues and is considered to be in the exploration stage. These consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business operations for the foreseeable future. The Company's ability to continue as a going concern is dependent upon the ability of the Company to obtain the necessary financing to develop properties and to establish future profitable production. The Company's operations are funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. The Company currently does not anticipate incurring significant exploration activities on its existing exploration and evaluation assets and management considers that the Company has adequate resources to maintain its core operations for the next twelve months. The Company continues to conduct reviews and due diligence on prospective acquisitions and business opportunities. Completion of any acquisition may require the Company to obtain additional financing. While the Company has been successful in securing financings in the past, there can be no assurance that it will be able to do so in the future.

2. Basis of Preparation

Statement of Compliance

These unaudited condensed consolidated interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS"), and in accordance with International Accounting Standards ("IAS") 34, "*Interim Financial Reporting*", as issued by the International Accounting Standards Board ("IASB"). These condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2017, which have been prepared in accordance with IFRS as issued by the IASB. The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company's audited financial statements for the year ended December 31, 2017 other than the adoption of IFRS 9 - *Financial Instruments* ("IFRS 9").

Financial Instruments

Effective January 1, 2018, the Company adopted IFRS 9 - *Financial Instruments* ("IFRS 9") using the modified retrospective approach. IFRS 9 did not impact the Company's classification and measurement of financial assets and liabilities. The standard did not have an impact on the carrying amounts of the Company's financial instruments at the transition date. IFRS 9 uses a single approach to determine whether a financial asset is classified and measured at amortized cost or fair value. The classification and measurement of financial assets is based on the Company's business models for managing its financial assets and whether the contractual cash flows represent solely payments for principal and interest.

Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward in IFRS 9.

The Company owns a 100% interest in the La Trini and Mololoa mineral claims ("La Trini Project"). The La Trini Project is located in the Jalisco silver belt approximately 100 kilometres northwest of Guadalajara, Jalisco State, Mexico.

The exercise price of the options is set at the Company's closing share price on the day before the grant date, less allowable discounts in accordance with the policies of the TSXV. Options granted may be subject to vesting provisions as determined by the Board of Directors and have a maximum term of five years.

8. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following categories: fair value through profit or loss ("FVTPL"); amortized costs; fair value through other comprehensive income; and other financial liabilities. The carrying values of the Company's financial instruments are classified into the following categories:

KINGSMEN RESOURCES LTD.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2018
(Unaudited - Expressed in Canadian Dollars)

8. Financial Instruments and Risk Management (continued)

Financial Instrument	Category	September 30, 2018 \$	December 31, 2017 \$
Cash	FVTPL	632,616	249,061
Accounts payable and accrued liabilities	Other financial liabilities	(20,551)	(8,850)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amount for accounts payable and accrued liabilities approximate its fair value due to the short-term nature. The Company's fair value of cash under the fair value hierarchy are measured using Level 1 inputs.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash. Management believes that the credit risk concentration with respect to financial instruments included in cash is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

	Contractual Maturity Analysis at September 30, 2018				
	Less than 3 Months \$	3 - 12 Months \$	1 - 5 Years \$	Over 5 Years \$	Total \$

8. Financial Instruments and Risk Management (continued)

	Contractual Maturity Analysis at December 31, 2017				
	Less than 3 Months \$	3 - 12 Months \$	1 - 5 Years \$	Over 5 Years \$	Total \$
Cash	249,061	-	-	-	249,061
Accounts payable and accrued liabilities	(8,850)	-	-	-	(8,850)

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

Foreign Currency Risk

The Company has operations in Mexico subject to foreign currency fluctuations. The Company's operating expenses are incurred in Canadian Dollars and Mexican Pesos. The fluctuation of the Canadian Dollar in relation to the Mexican Peso will have an impact upon the profitability of the Company and may also affect the value of the Company's assets and the amount of shareholders' equity. The Company also maintains a US Dollar bank account with its Canadian bank. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks. At September 30, 2018, 1 Canadian Dollar was equal to 14.51 Mexican Pesos and 0.77 US Dollars.

Balances are as follows:

	Mexican Pesos	US Dollars	CDN \$ Equivalent
Cash	23,095	4,318	7,181
Accounts payable and accrued liabilities	<u>(13,651)</u>	<u>-</u>	<u>(941)</u>
	<u>9,444</u>	<u>4,318</u>	<u>6,240</u>

Based on the net exposures as of September 30, 2018 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the Mexican Peso and the US Dollar would be insignificant to the Company.

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of exploration and evaluation assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain development of the business. The Company defines capital that it manages as share capital. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
