Company Overview

Dash Capital Corp. (the "**Corporation**") was incorporated under the *Business Corporations Act* (Alberta) on January 13, 2021 as a Capital Pool Company as defined in Policy 2.4 of the TSX Venture Exchange. The principal business of the Corporation will be the identification and evaluation of assets or businesses with a view to completing a Qualifying Transaction, as defined under Exchange Policy 2.4. The Corporation has not commenced commercial operations and has no assets other than cash. Given the nature of the activities, no separate segmented information is reported. The Corporation's continuing operations, as intended, are dependent on its ability to secure equity financing with which it intends to identify and evaluate potential acquisitions of businesses, and once identified and evaluated, to negotiate an acquisition thereof or participation therein subject to receipt of regulatory and, if required, shareholders' approval.

Once the Corporation has been successful in being classified as a CPC, the proceeds raised from the issuance of common shares including the funds held in trust, may only be used to identify and evaluate assets or businesses for future investment, with the exception that up to \$3,000 per month may be used for reasonable general and administrative expenses of the Corporation. These restrictions apply until completion of a Qualifying Transaction by the Corporation as defined under the policies of the Exchange.

Corporate Strategy

Dash Capital Corp. has completed an initial public offering with a minimum of funds with which to identify and evaluate businesses or assets with a view to completing a Qualifying Transaction. Any proposed Qualifying Transaction must be approved by the TSX Venture Exchange Inc. The Corporation is a Capital Pool Company. It has not commenced commercial operations and has no assets other than a minimum amount of cash. Financial Instruments

IFRS requires that the Company disclose information about the fair value of its financial assets and liabilities. Fair value estimates are made at the balance sheet date based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be

determined with precision. Changes in assumptions could significantly affect these estimates. The Company's financial instruments consist of cash and accounts payable. Management estimates that the fair value of its cash and accounts payable approximates their carrying values as at September 30, 2022, due to the relatively short maturity periods of these instruments.

Impact and Response to COVID-19 Pandemic

The global outbreak of COVID-19 (coronavirus) has had a significant impact on businesses through the restrictions put in place by the Canadian, provincial and municipal governments regarding travel, business operations and isolation/quarantine orders. At this time, there has been no significant impact of the COVID-19 pandemic on the Corporation as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease, and the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place by Canada and other countries to fight the virus.
