### 1. NATURE OF OPERATIONS AND GOING CONCERN

FuelPositive Corporation (the "Company" or "FuelPositive") is incorporated under the Business Corporations Act (Ontario) and its common shares are listed on the TSX Venture Exchange ("TSXV") under the symbol "NHHH". Any specific reference to "EESor" herein means EESor, Inc. alone a 71.3% subsidiary of FuelPositive Corporation. The Company's head office is located 40 Temperance Street Suite 3200 - Bay Adelaide Centre - North Tower, Toronto, Ontario, M5H 0B4, Canada.

FuelPositive Corporation is at the forefront of Canadian technology and is committed to delivering sustainable, environmentally responsible Green Ammonia solutions. The Company's innovative approach includes on-farm/on-site, containerized Green Ammonia production systems, effectively eliminating carbon emissions.

FuelPositive commercial Green Ammonia systems are versatile, serving multiple applications, including nitrogen fertilizer for farming, fuel for grain drying, internal combustion engines, and hydrogen storage for fuel cells and other sectors.

The Company's main customer base consists of farmers. We address their nitrogen fertilizer needs while advocating for environmental change.

FuelPositive leverages Canada's expertise in technology and environmental stewardship to empower communities worldwide against food insecurity and is shaping a more resilient future for generations through collaboration and innovation.

The Company also holds certain technology rights to solid-state capacitor and related energy storage technologies currently under further advancements with strategic third parties. The Company is also a developer of energy storage and fossil fuel replacement technologies. The Company holds certain technology rights to solid-state capacitor and related energy storage technologies. The Company's success depends on the commercialization of its technology. There is no assurance that FuelPositive will be successful in the manufacturing, distribution or licensing of its technology. Readers are directed to the "Risk Factors" disclosed in the Company's public filings.

These unaudited condensed interim consolidated financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. Realization values may be substantially different from carrying values as shown and the financial statements do not given effect to adjustments that would be necessary to the carrying values and the classification of assets and liabilities should the Company be unable to continue operating as a going concern.

From time to time, the Company may pursue the raising of funds by an equity investment, debt borrowing or a combination of both. There can be no assurance that additional financing will be available on commercially reasonable terms or at all. If adequate funds are not available on acceptable terms, the Company may not be able to fund its planned operations for at least the next 12 months and as a result may be required to substantially reduce or temporarily cease its operations, including but not limited to the reduction of payroll costs, development activities and other operating expenditures. Any such actions could have a material adverse effect on the Company's business, financial condition and prospects.

The Company has incurred a comprehensive loss of \$2,646,980 during the nine months ended June 30, 2025 and as of that date, the Company's deficit was \$131,867,306. These conditions raise material uncertainties which may cast significant doubt as to whether the Company will be able to continue as a going concern. The Company's ability to continue as a going concern is dependent upon raising additional capital to meet its present and future commitments, the continued support of certain shareholders and trade creditors, and on achieving profitable commercial operations.

### 1. NATURE OF OPERATIONS AND GOING CONCERN (Continued)

These unaudited condensed interim consolidated financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

### 2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE

The Company applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the IFRS Interpretations Committee ("IFRIC"). These unaudited consolidated interim condensed financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by the IASB.

The policies applied in these unaudited condensed interim consolidated financial statements are based on IFRS issued and outstanding as of August 29, 2025, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these condensed interim consolidated financial statements as compared with the most recent annual consolidated financial statements as at and for the year ended September 30, 2024. Any subsequent changes to IFRS that are given effect in the Company's annual financial statements for the year ending September 30, 2025 could result in restatement of these unaudited condensed interim consolidated financial statements.

### 3. USE OF ESTIMATES AND JUDGMENTS

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Significant areas requiring the use of management estimates and judgments relate to:

(i) Impairment of intangible assets

Judgment is required in assessing whether any indicators of impairment are applicable, as defined in IAS 36. Determination of the amount of impairment is based on management's estimate of the fair value less costs to sell of the intangible assets. The basis of EEStor intellectual property March 31, 2025 calculation (Market calibration approach) involves multiple estimates such as estimated market price based on a historical transaction, adjustments for qualitative factors such as achievement of goals for further development, economic factors surrounding the battery industry and other.

### 3. USE OF ESTIMATES AND JUDGMENTS (Continued)

(ii) Stock-based transactions

The Company uses an option pricing model to determine the fair value of share based compensation. Inputs to the model are subject to various estimates relating to volatility, interest rate and expected life of the instrument. Fair value inputs are subject to market factors as well as internal estimates. The Company considers historic trends together with any new information to determine the best estimate of fair value at the date of grant.

Separate from the fair value calculation, the Company is required to estimate the expected forfeiture rate of stock-based compensation.

(iii) Going concern

The Company makes significant judgments with respect to uncertainties in the ability of the Company to continue as a going concern based on estimates of future operations. The ability of the Company to continue as a going concern is dependent on the successful generation of revenue and financing.

(iv) Development costs

Management monitors the progress of green ammonia technologies. Significant judgment is required to distinguish between the research and development phases. Development costs are recognized as an asset when the following criteria are met: (i) technical feasibility; (ii) management's intention to complete the project; (iii) the ability to use or sell; (iv) the ability to generate future economic benefits; (v) availability of technical and financial resources; (vi) ability to measure the expenditures reliably. Research costs are expensed as incurred. Management also monitors whether the recognition requirements for development assets continue to be met and whether there are any indicators that capitalized costs may be impaired.

(v) Provision and contingent liabilities

Management's decision that no provision is needed for the contingency in note 24 represents management estimates and the eventual resolution of the liability may differ based on additional information and the occurrence of future events.

(vi) Estimated useful lives of equipment and intangible assets

Depreciation of equipment and intangible assets is dependent upon estimates of useful lives based on management's judgment.

(vii) Functional currency

The functional currency of Fuelpositive and its subsidiaries is the Canadian Dollar. The functional currency determination was conducted through an analysis of the consideration factors identified in IAS 21, The Effects of Changes in Foreign Exchange Rates. The determination of functional currency involves certain judgments to determine the primary economic environment and the Company reconsiders the functional currency if there are changes in events and conditions of the factors used in the determination of the primary economic environment.

#### 7. LOAN RECEIVABLE

The Company is providing the following further clarification regarding the terms of a loan transaction involving the Chief Executive Officer. On August 16, 2021, the Company provided a loan of \$200,000 to the Chief Executive Officer. An additional loan of \$250,000 was issued on November 9, 2021, under the same terms.

The loans were provided to support the relocation and housing of the Chief Executive Officer in a location which met the operational needs of the Company, and to ensure retention of the Chief Executive Officer and continuity of management. The loans bear interest at a rate of one percent (1%) per annum, compounded monthly and payable annually on the last business day of August during the loan term. The loan matures on the earlier of: (a) the termination of the consulting agreement with the Chief Executive Officer for any reason whatsoever; or (b) August 31, 2026. On the maturity date, the Chief Executive Officer is required to repay the full principal along with any accrued but unpaid interest. The Chief Executive Officer is required to complete an accelerated repayment of \$100,000 in the event the weighted average closing price of the common shares of the Company on the TSX Venture Exchange exceeds \$0.50 for a period of at least ten business days. During the three and nine months ended June 30, 2025, the Company accrued interest income of \$1,163 and \$3,480, respectively (three and nine months ended June 30, 2024 - \$1,151 and \$3,457, respectively).

#### 9. GREEN AMMONIA PRODUCTION TECHNOLOGY

The Company's core technology, a modular and scalable Green Ammonia system, takes air, water and sustainable electricity and synthesizes it into a non-polluting chemical for multiple applications, including as a carbon free fertilizer for farming, fuel for grain drying and internal combustion engines and a solution for grid storage. Green Ammonia is being considered as a replacement for fossil fuels and as a key enabler of the hydrogen economy.

On March 26, 2021, the Company entered into an intellectual property purchase agreement with Dr. Ibrahim Dincer and his team for a technology to produce ammonia (NH<sub>3</sub>) – a carbon free fertilizer and fuel – in a zero-emission manner, by utilizing only water, air and sustainable electricity. On April 21, 2021, the Company announced approval of the acquisition from the TSXV.

In consideration for the acquisition of all rights to the technology, the Company has agreed to issue 50,000,000 common shares to Dr. Dincer and his team, of which 35,000,000 (valued at \$12,425,000) were issued upon completion of the acquisition and the balance of 15,000,000 were issued after twelve months. During the year ended September 30, 2022, 15,000,000 common shares (valued at \$2,400,000) were issued. The Green Ammonia intellectual property has an estimated useful life of 8 years.

#### 16. STOCK OPTIONS

The Company has a stock option plan (the "Plan") which authorizes the Board to issue options to employees, directors and consultants providing services to the Company or its subsidiaries. The Plan is structured as a "fixed plan". Under the terms of the Plan, the number of shares issuable under stock options and the performance warrants cannot exceed 20% of the outstanding common shares of the Company. The Company sets the exercise price based on the closing market price at the time of the grant. The Company may grant options for a term not to exceed ten years. Vesting periods are assessed at the time of the grant and are documented in more detail in the table below. In the event of a takeover bid which results in the Offer or exercising control of the Company, stock options which might otherwise not be vested may be exercised as part of the takeover transaction.

The following table reflects the continuity of stock options for the years presented:

	Number of Options	Weighted Average Exercise Price
<b>Balance, September 30, 2023</b>	<b>57,198,654</b>	<b>\$ 0.13</b>

### 20. MANAGEMENT OF CAPITAL

The Company's objective when managing capital is to maintain its ability to continue as a going concern for the benefit of shareholders and other stakeholders by balancing cash conservation and prudent investment in its operations in order to further its business objectives.

Working capital management is fundamental to the broader management of capital. The Company has a defined investment policy restricting the investment of cash balances to term deposits and bankers' acceptances. Non-cash working capital is managed with defined business practices and policies intended to optimize the investment and safeguard the assets.

The Company includes equity in its definition of capital. Equity is comprised of share capital, contributed surplus, warrant capital and deficit and amounted to \$14,460,989 (September 30, 2024 - \$16,964,174). The Company's approach to raising equity has been to raise sufficient capital to take the Company toward a target milestone, with an objective of successive capital raises being at a higher price and therefore less dilutive for shareholders. To secure additional capital to pursue its objectives, the Company may raise additional funds through the issuance of equity. The Company's ability to continue with its incremental capital raise strategy is a function of many factors, including the state of the capital markets, and there is no assurance that this approach will be practical on a go forward basis.

The Company is not subject to any external capital requirements. There have been no changes with respect to the overall capital management strategy during the period ended June 30, 2025.

### 21. CONTINGENCY

There is an ongoing legal proceeding in the Ontario Superior Court of Justice involving a statement of claim (the "Claim") filed by Green NH3 Inc. ("Green NH3") against Ontario Tech University and Ibrahim Dincer (collectively, the "Defendants"). The Claim asserts that Green NH3 is the owner of certain intellectual property and rights (collectively, the "Intellectual Property Rights"). However, these Intellectual Property Rights were previously assigned to the Company pursuant to an intellectual property purchase agreement (the "Purchase Agreement") entered into with Ibrahim Dincer and his team, effective March 26, 2021.

The Company is not a party to the Claim and firmly believes the Claim is without merit. The Company understands that the Defendants intend to vigorously defend against the Claim, which has had no impact whatsoever on the Company's business operations or planned activities.

Through the Purchase Agreement, the Company has received contractual assurances regarding the ownership of the Intellectual Property Rights. Even in the unlikely event that the Claim was to succeed, management does not believe it would affect the Company's ability to fully exploit the Intellectual Property Rights.

Accordingly, the Company has made no provisions related to this legal proceeding in its unaudited condensed interim consolidated financial statements for the three and six months ended March 31, 2025.
