Notes to Condensed Interim Consolidated Financial Statements

Three and Nine Months Ended September 30, 2019

(Expressed in Canadian Dollars, Unless Otherwise Stated)

(Unaudited)

1. Nature of operations and going concern

Sintana Energy Inc. ("Sintana" or the "Company") is a public Canadian oil and gas exploration company listed on the TSX Venture Exchange ("TSXV"), with offices in Toronto, Canada; and Dallas, Texas. The trading symbol of the Company is SEI. The Company is targeting assets in Colombia's Magdalena Basin. The Company's exploration strategy is to acquire, explore, develop and produce superior quality assets with significant reserve potential. The primary office of the Company is located at The Canadian Venture Building, 82 Richmond Street East, Toronto, Ontario, Canada, M5C 1P1.

Sintana is at an early stage of development and as is common with similar exploration companies, it raises financing for its property acquisition and exploration activities. Sintana has not incurred any operating income in the current and prior periods. For the nine months ended September 30, 2019, the Company incurred a loss of \$1,180,297 and had an accumulated deficit of \$88,684,645. Sintana had a working capital deficit of \$4,931,976 at September 30, 2019 (December 31, 2018 - working capital deficit of \$4,019,456).

These unaudited condensed interim consolidated financial statements have been prepared on a basis which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern. The certainty of funding future exploration expenditures and availability of additional financing sources cannot be assured at this time. These uncertainties cast significant doubt as to the Company's ability to continue as a going concern and, accordingly, the ultimate use of accounting principles applicable to a going concern. The Company's ability to continue as a going concern is dependent upon obtaining additional financing and eventually achieving profitable production.

2. Significant accounting policies

Statement of compliance

The Company applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34 - Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by the IASB.

The policies applied in these unaudited condensed interim consolidated financial statements are based on IFRSs issued and outstanding as of November 26, 2019, the date the Board of Directors approved these financial statements. The same accounting policies and methods of computation are followed in these unaudited condensed interim consolidated financial statements as compared with the most recent annual audited consolidated financial statements as at and for the year ended December 31, 2018, except as noted below. Any subsequent changes to IFRS that are given effect in the Company's annual audited consolidated financial statements for the year ending December 31, 2019 could result in restatement of these unaudited condensed interim consolidated financial statements.

New standard adopted during the period

IFRIC 23 – Uncertainty Over Income Tax Treatments ("IFRIC 23") was issued in June 2017 and clarifies the accounting for uncertainties in income taxes. The interpretation committee concluded that an entity shall consider whether it is probable that a taxation authority will accept an uncertain tax treatment. If an entity concludes it is probable that the taxation authority will accept an uncertain tax treatment, then the entity shall determine taxable profit (tax loss), tax bases, unused tax losses and credits or tax rates consistent with the tax treatment used or planned to be used in its income tax filings. If an entity concludes it is not probable that the taxation authority will accept an uncertain tax treatment, the entity shall reflect the effect of uncertainty in determining the related taxable profit (tax loss), tax bases, unused tax losses and credits or tax rates. IFRIC 23 is effective for annual periods beginning on or after January 1, 2019. At January 1, 2019, the Company adopted this standard and there was no material impact on the Company's unaudited condensed interim consolidated financial statements.

6. Convertible debentures

On July 24, 2018, the Company closed a financing pursuant to which it issued senior convertible debentures (the "Debentures") in the principal amount of \$650,000 and 5,720,000 warrants to a private investor. Each warrant entitles the holder to acquire one common share of the Company at an exercise price of \$0.10 for a period of three years.

The Debentures have a term of five years and an annual interest rate of 8%. The principal amount thereof may be converted into common shares of the Company at the option of the holder at a conversion price of \$0.07 per share during the first year following closing (the "Initial Conversion Price") and \$0.10 thereafter (the "Conversion Price"). Commencing two years after the date of closing, the Company may elect to redeem part or all of the remaining Debentures balance. The Debentures are also automatically convertible into common shares of the Company at the applicable Conversion Price in the event the closing price of the common shares exceeds 500% of the then applicable Conversion Price for 40 of 60 consecutive trading days.

While the Debentures remain outstanding, the holder is entitled to appoint one nominee to the Board of Directors of the Company.

The fair value of the 5,720,000 warrants issued with the Debentures was estimated at \$191,928 using the Black-Scholes option pricing model based on the following assumptions: volatility - 115% using the historical price history of the Company, risk-free interest rate - 2.04%, expected life - 3 years, share price - \$0.10 and dividend yield - nil%.

On July 16, 2019, the Company announced that it had received a notice of partial conversion (the "Notice") in respect of the Debenture in the principal amount of \$650,000 issued on July 24, 2018. Interest is also convertible under the Debenture at the election of the holder, subject to the approval of the TSXV. The Notice provided for conversion of (i) \$550,000 of the principal amount of the Debenture at the Initial Conversion Price in exchange for the issuance of 7,857,143 common shares of the Company; and (ii) \$42,874 of interest owing under the Debenture at a conversion price of \$0.075 per share in exchange for the issuance of 571,664 common shares of the Company. The partial conversion of the Debenture resulted in a loss on conversion \$83,566 which was recorded in the unaudited condensed interim consolidated statements of loss and comprehensive loss.

Movement in the Debenture was as follows:

	Amount
Balance, December 31, 2018	\$ 396,203
Conversion to shares to be issued	(372,410)
Accrued interest	32,295
Accretion expense	17,229
Balance, September 30, 2019	\$ 73,317

7. Share capital

a) Authorized share capital:

At September 30, 2019, the authorized share capital consisted of an unlimited number of common shares.

The common shares do not have a par value. All issued shares are fully paid.

Balance, December 31, 2018 and September 30, 2019	10,200,000	\$ 0.13

(i) On June 8, 2018, the Company granted a total of 450,000 stock options to certain directors of the Company. The options have an exercise price of \$0.10, vest in three equal tranches over the next 24 months and expire on June 8, 2023. The fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 125.78%; risk-free interest rate of 2.15%; and an expected average life of 5 years. The options were valued at \$21,780, \$908 and \$5,876, respectively (three and nine months ended September 30, 2018 - \$2,723 and \$10,699, respectively) was expensed to salaries and benefits (share-based compensation) and as an addition to contributed surplus during the three and nine months ended September 30, 2019.

(ii) Share-based compensation included in salaries and benefits expense includes \$23,359 and \$70,077, respectively (three and nine months ended September 30, 2018 - \$1,158 and \$11,951, respectively) relating to stock options granted in previous years in accordance with their respective vesting terms, during the three and nine months ended September 30, 2019.

The following table reflects the actual stock options issued and outstanding as of September 30, 2019:

Expiry date	Exercise price	Weighted average remaining contractual life (years)	Number of options outstanding	Number of options vested (exercisable)	Number of options unvested

10. Restricted share units ("RSUs")

The grant date fair value of RSUs equals the fair market value of the corresponding shares at the grant date. The fair value of these equity-settled awards is recognized as compensation expense with a corresponding increase in equity. The total amount expensed is recognized over the vesting period, which is the period over which all the specified vesting conditions should be satisfied. RSUs are converted into common shares when vested.

During the nine months ended September 30, 2019, the Company granted 800,000 RSUs to four officers of the Company. These RSUs vest as follows: one-half of the RSUs vest immediately and one-half vest on the first anniversary. In relation to this grant, compensation for the three and nine months ended September 30, 2019 was \$9,000 and \$58,734, respectively.

During the three and nine months ended September 30, 2019, nil and 400,000 RSUs, respectively vested and converted to common shares with a value of \$nil and \$36,000, respectively.

As of September 30, 2019, there were 400,000 RSUs outstanding. The weighted average fair value of RSUs granted during the nine months ended September 30, 2019 was \$0.09.

11. Net loss per share

The calculation of basic and diluted loss per share for the three and nine months ended September 30, 2019 was based on the loss attributable to common shareholders of \$516,881 and \$1,180,297, respectively (three and nine months ended September 30, 2018 - loss of \$331,066 and \$1,294,079, respectively) and the weighted average number of common shares outstanding of 118,044,490 and 117,982,024, respectively (three and nine months ended September 30, 2018 - 117,538,326 and 117,331,325, respectively). Diluted loss per share did not include the effect of options, warrants, RSUs, Debenture and shares to be issued for the three and nine months ended September 30, 2019 and 2018 as they were anti-dilutive or not in the money.

16. Contingencies

(a) Farmout agreement arbitration

On March 20, 2015, Canacol Energy Inc. ("Canacol") advised the Company that it had exercised its right to terminate the Farmout Agreement for each of the COR-11 and COR-39 Blocks. The Company concurred in writing that the Farmout Agreements had terminated. Canacol also contends that it has the right to recover certain historical costs with which the Company disagrees. Management is currently evaluating this matter and, together with legal counsel and other experts, assessing its potential options and alternatives with respect to these costs.
