

## PRESS RELEASE

### LONGPOINT ADDS DOUBLE LEVERAGED ETFs ON CANADIAN STOCKS

- LongPoint launches nine 2X Leveraged ETFs
- LongPoint’s new Savvy ETFs hold large-cap, actively traded Canadian stocks
- LongPoint is a Canadian owned and operated ETF provider

**TORONTO (October 22, 2025)** – LongPoint Asset Management Inc. (“**LongPoint**”) is proud to announce the launch of nine new Savvy Double Leveraged Single Stock ETFs (the “**Savvy ETFs**”) which begin trading today on the Toronto Stock Exchange (the “**TSX**”). These innovative ETFs provide two times (2X) leveraged long exposure to some of the largest and most actively traded Canadian equities.

LongPoint is once again making history in the Canadian ETF market with the first-ever double leveraged ETFs on Canadian stocks. These new listings offer 2X leveraged long exposures on five well-known publicly traded stocks: Barrick, Cameco, Canadian Natural Resources, Constellation Software, and Shopify under the tickers ABXU, CCOU, CNQU, CSUU, and SHPU respectively, as well as four of Canada’s biggest banks: RBC, TD, CIBC and NBC under the tickers RBCU, TDU, COMU and NBCU respectively.

*“LongPoint is proudly Canadian ETF company, and for the first time, we’ve introduced double-leveraged single-stock ETFs linked to actively traded Canadian equities,”* said Steve Hawkins, CEO of LongPoint. *“This innovation offers investors a new way to actively trade and amplify their exposure to some of Canada’s most dynamic, large-cap and mega-cap companies. These ETFs provide a Canadian-domiciled, TSX-listed solution that allows active investors to tactically position their portfolios around company-specific developments, technical indicators, market events, or fundamental outlooks.”*

The Savvy ETFs seek daily investment results that endeavour to correspond, before fees and expenses, to two times (2X) the daily return (on a percentage basis) of the reference stock.

Name	Ticker	Reference Stock
SavvyLong (2X) Barrick ETF	ABXU	Barrick Mining Corp.
SavvyLong (2X) Cameco ETF	CCOU	Cameco Corp.
SavvyLong (2X) Cdn Natural Resources ETF	CNQU	Canadian Natural Resources Ltd.
SavvyLong (2X) Constellation Software ETF	CSUU	Constellation Software Inc.
SavvyLong (2X) Shopify ETF	SHPU	Shopify Inc. Class A
SavvyLong 2X CIBC (CM) Equity-Linked ETF	COMU	Canadian Imperial Bank of Commerce
SavvyLong 2X NBC (NA) Equity-Linked ETF	NBCU	National Bank of Canada
SavvyLong 2X RBC (RY) Equity-Linked ETF	RBCU	Royal Bank of Canada
SavvyLong 2X TDB (TD) Equity-Linked ETF	TDU	Toronto-Dominion Bank

LongPoint anticipates listing an additional Savvy ETF at a later date that provides double leveraged inverse exposure to Shopify under the ticker SHPD.

*“Our team at LongPoint brings over 70 years of combined ETF experience, including nearly 50 years specifically focused on managing leveraged and inverse products,” Hawkins added. “We’ve designed these Savvy ETFs as specific tools for knowledgeable, sophisticated Canadian investors who want to employ high-conviction, short-term trading strategies on well-known Canadian stocks.”*

With this launch, LongPoint continues to establish itself as a leader in innovative ETF solutions. The company entered the levered ETF market in December 2024 with its leveraged crude oil and natural gas ETFs, followed in May 2025 with the launch of Canada’s first triple levered index ETFs, and then in June 2025 with the launch of Canada’s first double levered single stock ETFs linked to U.S. equities. LongPoint also offers its unique Partnership ETF platform, which simplifies the launch, operation, and growth of ETFs for its partner asset managers. LongPoint is a Canadian owned and operated company.

The Savvy ETFs have closed their offering of initial shares and will begin trading on the TSX when the market opens this morning.

The ETFs are alternative mutual funds, and as such, the ETFs are permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The ETFs are highly speculative. The ETFs use a significant amount of leverage which magnifies gains and losses. They are intended for use in daily or short-term trading strategies by very knowledgeable, sophisticated investors. If you hold the ETF for more than one day, your return could vary considerably from the ETF's daily target return. For example, you could lose your entire investment in one day if the stock of the ETF experiences a single-day price movement that is greater than 50%. The negative effect of compounding on returns is more pronounced when combined with leverage and daily rebalancing in volatile markets. The ETFs are not suitable for investors who do not intend to actively monitor and manage their investments. In addition, the ETFs are concentrated and non-diversified, meaning they are

only exposed to a single common stock. As a result, the ETF's assets are more susceptible to the impact of any specific company event, or single economic, technological, or regulatory event, compared to a diversified portfolio.

The ETFs employ significant leverage, may experience amplified losses, and should not be expected to return +200% or -200%, as applicable, over any period of time other than daily. The returns of the ETFs over periods longer than one day will likely differ in amount and possibly direction from the performance or inverse performance, as applicable, of the stock of the ETF for the same period. This effect is more pronounced for the ETFs as the volatility of the target index and/or the period of time increases.
