1. Nature of operations

Goldstrike Resources Ltd. (the “Company”) was incorporated under the laws of the province of British Columbia, Canada. The Company trades on the TSV Venture Exchange (the “TSX-V”) under the symbol “GSR.V”, and the Frankfurt Stock Exchange under the symbol “KCG”. The registered office of the Company is located at Suite 1500, 1040 West Georgia Street, Vancouver, B.C. The head office of the Company is located at Suite 1010, 1130 West Pender Street, Vancouver, B.C.

The Company is a mineral exploration company focusing on acquiring and developing exploration and evaluation assets.

These consolidated financial statements have been prepared in accordance with accounting principles applicable to a going concern. The Company has no current source of revenues from operations. The Company’s continuation as a going concern is dependent upon the successful results from its exploration activities and its ability to attain profitable operations and generate funds there from and/or raise equity capital or borrowings sufficient to meet current and future obligations. These factors indicate the existence of a material uncertainty that may cast significant doubt as to the Company’s ability to continue as a going concern. Management intends to finance operating costs over the next twelve months with cash on hand and the private placement of common shares. Should the Company be unable to continue as a going concern, the net realizable value of its assets may materially less than the amounts on its statement of financial position.

2. Significant accounting policies and basis of preparation

The condensed interim consolidated financial statements were authorized for issuance on **November 26, 2020** by the directors of the Company.

Statement of compliance with IFRS

The condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

The notes presented in these condensed consolidated interim financial statements include only significant events and transactions occurring since the Company’s last fiscal year end and they do not include all of the information required in the Company’s most recent annual consolidated financial statements. These condensed consolidated interim financial statements follow the same accounting policies and methods of application as the Company’s annual financial statements and should be read in conjunction with the Company’s annual financial statements for the year ended December 31, 2019, which were prepared in accordance with IFRS as issued by IASB. There have been no changes in judgment or estimates from those disclosed in the consolidated financial statements for the year ended December 31, 2019.

Basis of consolidation

The consolidated financial statements include the accounts of the Company and its subsidiary. The subsidiary is fully consolidated from the date of acquisition, being the date on which the Company obtains control and continues to be consolidated until the date such control ceases. Details of the controlled entity are as follows:

| Entity: | Country of incorporation: | Ownership interest | |
|------------------------|---------------------------|--------------------|-------------------|
| | | September 30, 2020 | December 31, 2018 |
| Petro One Energy Corp. | Canada | 100% | 100% |

Inter-company balances and transactions have been eliminated upon consolidation.

2. Significant accounting policies and basis of preparation (continued)

Significant estimates and assumptions

The preparation of these financial statements in accordance with IFRS requires management to make certain estimates and assumptions concerning the future. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting periods include the recoverability of the carrying value of exploration and evaluation assets and petroleum and natural gas assets, the measurements for financial instruments and share-based payments, the recoverability of deferred tax assets and the measurement of decommissioning liabilities.

The recent outbreak of the coronavirus, also known as "COVID-19," has spread across the globe and is impacting worldwide economic activity. Conditions surrounding the coronavirus continue to rapidly evolve and government authorities have implemented emergency measures to mitigate the spread of the virus. The outbreak and the related mitigation measures may have an adverse impact on global economic conditions as well as on the Company's business activities. The extent to which the coronavirus may impact the Company's business activities will depend on future developments, such as the ultimate geographic spread of the disease, the duration of the outbreak, travel restrictions, business disruptions, and the effectiveness of actions taken in Canada and other countries to contain and treat the disease. The Company continues to closely monitor developments in the coronavirus outbreak, including the potential impact on the Company's activities and its liquidity.

The Company's petroleum and natural gas assets consist of oil and gas wells located in Saskatchewan and Manitoba. During the year ended December 31, 2019, the Company determined that it was unlikely to recover its investment in the exploration and evaluation assets and therefore wrote-down the carrying value to \$nil. In April 2020, the Company received additional quotes to fully reclaim the remaining suspended oil wells. The increased potential costs resulted in the recognition of additional \$497,087 decommissioning assets and liability (Note 13). During the nine months ended September 30, 2020, the Company wrote-down the carrying value of decommissioning asset and the exploration and evaluation assets to \$nil.

13. Decommissioning liabilities

| | | |
|-------------------------------------|----|---------|
| Closing balance, December 31, 2018 | \$ | 301,675 |
| Accretion | | 3,120 |
| Reclamation expenses | | (3,832) |
| Closing balance, December 31, 2019 | \$ | 300,963 |
| Addition | | 497,087 |
| Reclamation expenses | | (5,206) |
| Closing balance, September 30, 2020 | \$ | 792,844 |

The Company's decommissioning liabilities result from ownership interests in petroleum and natural gas interests including well sites, gathering systems and processing facilities. The total decommissioning liabilities were estimated by management based on the Company's net ownership interest in all wells, estimated costs to reclaim and abandon the wells and the estimated timing of the costs to be incurred in future periods. The Company has estimated the total amount of liabilities to be \$792,844 (December 31, 2019 - \$300,963) as at September 30, 2020. These payments are expected to be made in a few years.

14. Contingencies

15. Financial risk management

The Company is exposed in varying degrees to a variety of financial instrument related risks.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash and cash equivalents. Cash and cash equivalents are held with the same financial institution giving rise to a concentration of credit risk. This risk is managed by using a major Canadian bank that is a high credit quality financial institution.

Liquidity risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements. Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding. All of the Company's financial liabilities are due within a year.

Foreign exchange risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company does not incur significant expenditures that are denominated in foreign currencies and does not have any mineral property commitments that are denominated in foreign currencies. Therefore, the Company's exposure to currency risk is considered minimal.

Interest rate risk

Interest rate risk refers to the risk that fair values of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company is exposed to interest rate risk as cash and cash equivalents earn interest income at variable rates. The fair value of cash and cash equivalents are minimally affected by changes in short term interest rates.
