INVESTMENT OBJECTIVES AND STRATEGIES

TDb Split Corp. invests primarily in common shares of the Toronto-Dominion Bank.

The Company offers two types of shares:

Priority Equity Shares (XTD.PR.A)

The investment objectives with respect to the Priority Equity shares are as follows:

1. to provide holders of Priority Equity shares with cumulative preferential monthly cash dividends in the amount of \$0.04375 per share to yield 5.25% annually; and
2. on or about the termination date of December 1, 2019 (subject to further 5 year extensions thereafter), to pay an amount of \$10.00 per Priority Equity share.

Class A shares (XTD)

The investment objectives with respect to the Class A shares are as follows:

1. to provide holders of Class A shares with regular monthly cash dividends in the amount of \$0.05 per Class A share if and when the net asset value per unit exceeds \$12.50; and
2. to permit such holders to participate in all growth in the net asset value of the Company above \$10.00 per unit.

RISK

The risks of investing in the Company remain as discussed in the Annual Information Form dated February 22, 2017. In addition, note 5 of the annual financial statements ("Management of Risk of Financial Instruments") contains disclosure on specific types of risks related to the financial investments held by the Company.

RESULTS OF OPERATIONS

As at May 31, 2017, the TDb Split Corp. had 96.5% of its net assets invested in TD Bank common shares. The market price of TD Bank increased by 1.3% percent during the six month period, after reaching an all-time high in February 2017.

TD Bank remains among the best managed and strongest capitalized in the world, and appears to remain poised to benefit from any further recovery in the North American economies.

The net assets per unit (consisting of one Priority Equity share and one Class A share) finished at \$15.03 as at May 31, 2017, after the payment of \$0.56 in combined distributions to Priority Equity shares and Class A shares at the targeted rates.

Net Assets of the Company finished the period at \$51 million.

The dividend income from the common shares of TD Bank is supplemented by income received from a selective covered call writing program.

Class A shares – Distributions

Class A shareholders are entitled to receive regular monthly cash dividends targeted to be \$0.05 per Class A Share to yield 6% per annum on the original issue price. Total distributions per Class A share during the period amounted to \$0.30 at the target rate.

Priority Equity shares – Distributions

Priority Equity shareholders are entitled to receive regular monthly cash dividends in the amount of \$0.04375 per Priority Equity Share to yield 5.25% per annum on the original issue price. Distributions during the period were at the fixed rate for a total \$0.2625 per Priority Equity share.

- (1) Net assets per unit is the difference between the aggregate amount of the Company’s assets and the aggregate amount of its liabilities, excluding Priority Equity shares and net assets attributable to holders of redeemable Class A shares, at the valuation date, divided by the number of units then outstanding.
- (2) Total increase from operations is calculated based on the weighted average number of units outstanding during the period.
- (3) Distributions on the Priority Equity shares and Class A shares are based on the number of Priority Equity shares and Class A shares outstanding on the record date for each distribution in the period and were paid in cash. Characterization of distributions is based on the tax treatment that is received by investors.
- (4) Per unit figures presented for 2014 and onwards are derived from the Company’s semi-annual financial statements and audited annual financial statements which were prepared in accordance with International Financial Reporting Standards (“IFRS”). Per unit figures presented for periods prior to 2014 were derived from the Company’s audited financial statements which were prepared in accordance with Canadian Generally Accepted Accounting Principles (“GAAP”) as defined in Part V of the CPA Handbook.

(1) This information is provided as at May 31 or November 30.

(2) A separate base management expense ratio has been presented to reflect the normal operating expenses of the Company excluding any one time offering expenses. Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of average net asset value during the period.

(3) Share issue expenses, representing all Agents' fees and other offering expenses are one time initial expenses connected with the launch of the Company or any subsequent secondary offering. Any expenses incurred with secondary offerings were offset by the accretion to net assets per unit of such offerings.

(4) Management expense ratio for Class A shares is based on the requirements of NI 81-106. This instrument requires that all split share companies produce an expense ratio which allocates all operating expenses of the Company, all distributions on Priority Equity shares and all issuance costs to the Class A shares and expresses this as an annualized percentage of net assets applicable only to the Class A shares during the period. The management expense ratio per Class A share should not be interpreted as the required return necessary for the Company or the Class A shares to cover the operating expenses of the Company. This calculation is based only on a portion of the Company's assets whereas the Company utilizes its entire assets to generate investment returns. Management believes that the base management expense ratio per unit disclosed in the table above is the most representative ratio in assessing the ongoing efficiency of the administration of the Company, making comparisons to the expense ratios of single unit mutual funds or determining the minimum investment returns necessary by the Company to achieve growth in net asset value per unit.

(5) The Company's portfolio turnover rate indicates how actively Quadravest manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to the Company buying and selling all of the securities in its portfolio once in the course of the period. The Company employs a covered call writing strategy which can cause the portfolio turnover rate to be higher than conventional mutual funds. The higher the Company's portfolio turnover rate in a period, the greater the trading costs payable by the Company in the period and the greater chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the Company.

(6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

MANAGEMENT FEES

Pursuant to the terms of the investment management agreement, QuadraVest is entitled to a base management fee payable in arrears at an annual rate equal to 0.55% of the net asset value of the Company, which include the outstanding Priority Equity shares, calculated as at each month-end valuation date.

Pursuant to the management agreement, QuadraVest is entitled to an administration fee payable monthly in arrears at an annual rate equal to 0.1% of the net asset value of the Company, which includes the outstanding Priority Equity shares, calculated as at each month-end valuation date and an amount equal to the service fee payable to dealers on the Class A shares at a rate of 0.50% per annum. No service fee will be paid in any calendar quarter if regular dividends are not paid to holders of Class A shares in respect of each month in such calendar quarter.

The base management fee was used by QuadraVest to provide investment analysis, make investment decisions, and make brokerage arrangements for the purchase and sale of securities including the covered call writing program. The administration fee was used to provide or arrange administrative services required by the Company which includes all operational services, financial accounting, shareholder reporting and regulatory reporting.

PAST PERFORMANCE

Year-by-Year Returns

The past performance of 1) the net asset value per unit; 2) the Priority Equity share on a net asset value basis; and 3) the Class A share on a net asset value basis for each year since inception are presented in the bar charts below. Each bar in the chart reflects the change in percentage terms of how a unit, a Priority Equity share or a Class A share would have increased or decreased during the applicable year. In respect to the charts displayed below, please note the following:

- The performance information shown assumes that all cash distributions made by the Company during the years shown were reinvested in the applicable additional securities of the Company;
- The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance; and
- Past performance of the Company does not necessarily indicate how it will perform in the future.
