For the three months ended September 30, 2024 and 2023
(Expressed in Canadian dollars, except where noted)

Acquisition of Sakumpu Exploration Oy ("Sakumpu")

On September 18, 2024, the Company completed the transaction whereby the Company acquired all of the issued and outstanding shares of Sakumpu (the "Transaction") from Norse Exploration Pty Ltd. (the "S2 Subsidiary"), an indirect wholly owned subsidiary of S2 pursuant to a share purchase agreement between the Company, the S2 Subsidiary, and S2 dated May 9, 2024 (the "Share Purchase Agreement"). Pursuant to the Share Purchase Agreement, the Company paid S2 \$1,500,000 in cash and issued 13,750,000 common shares of the Company at a fair value of \$0.40 per share to S2. As a result of the common shares issued to S2 and its common share ownership resulting from participation in private placements, S2 became the largest single shareholder of Valkea with an approximate 44.6% ownership at the time of the Transaction. Due to the significant shareholding in Valkea by S2, the TSXV viewed the Transaction as a reverse takeover of Valkea by S2.

The Company incurred transaction costs of \$1,128,268 comprised of legal fees and due diligence costs in connection with the Transaction, of which \$115,364 was incurred during the year ended June 30, 2024 and recorded in deferred transaction costs. Total transaction costs have been included as part of the total consideration in the Transaction.

Sakumpu did not qualify as a business under IFRS 3 *Business Combinations*, as it did not possess the significant inputs, processes, and outputs that together constitute a business at the time of acquisition. Therefore, the Transaction was accounted for as an asset acquisition. Accordingly, no goodwill was recorded and consideration measured at fair value was allocated to the assets and liabilities acquired.

A summary of the Company's consideration and the net assets acquired from Sakumpu as at the September 18, 2024 acquisition date is as follows:

	\$
Consideration:	
Cash payments	1,500,000
Fair value of common shares issued to S2	5,500,000
Transaction costs	1,128,268
	8,128,268
Assets and liabilities acquired:	
Cash	17,936
Amounts receivable	73,603
Exploration and evaluation assets	8,041,728
Equipment	1,316
Accounts payable and accrued liabilities	(6,315)
	8,128,268

The amount of \$8,041,728 allocated to the exploration and evaluation assets was allocated to the Finnish properties.

Each unit consists of one common share of the Company and one common share purchase warrant. On September 17, 2024, the Company granted 1,931,250 DSUs to certain directors and officers of the Company. These DSUs will vest on September 17, 2025.

OUTLOOK

The Company will be focused on work to initiate exploration of its Finnish gold portfolio, including diamond drilling of the most advanced and prospective targets. The Company has initiated transition activities to operate and administer its wholly owned Finnish subsidiary.

On February 28, 2024, the Company entered into a letter of intent with S2 whereby the Company would grant S2 (a) an option to earn a 80% interest in the Company's Victorian Gold Projects, located in the Victorian Goldfields, Australia by incurring minimum exploration expenditures of AUD\$1,000,000 within a period of 48 months; and (b) an option to earn a 51% interest in the Glenfine Project by incurring minimum exploration expenditures of AUD\$200,000 within a period of 48 months. The Victorian Gold Projects are expected to have exploration synergies with S2's gold projects located in the Victorian Goldfields, near the Fosterville gold mine.

Further details of the proposed transaction were published in the Information Circular dated July 31, 2024, as found on SEDAR+ and distributed to all shareholders.

The Company is re-engaging with S2 to enter into a definitive agreement as per the signed letter of intent to enter into a joint venture on its Victorian portfolio. This step is anticipated to be completed in early 2025.

Comprehensive loss for the period	(490,201)	(243,904)

YTD 2025 compared to YTD 2024

The Company's net loss increased to \$589,929 compared to \$243,904 in the prior year comparable period. The primary drivers of the increase in net loss were as follows:

- Accounting and legal fees increased to \$46,720 from \$5,452 in the prior year comparable period primarily due to increased legal costs associated with corporate matters and increased activity following the acquisition of Sakumpu.
- Corporate development, marketing, and investor services costs increased to \$110,127 from \$11,658 in the prior year comparable period primarily due to increased investor relations activities associated with the private placements in the current period.
- Share-based compensation increased to \$309,805 from \$nil in the prior year comparable period attributable to the vesting of stock options and DSUs that were granted to certain directors and officers in the current period.
- Transfer agent, listing and filing fees increased to \$14,531 from \$5,069 in the prior year comparable period primarily due to additional filing activities to support the Transaction in the current period.

Partially offsetting the increase in net loss were decreases to expenses as follows:

- Exploration expenses decreased to \$662 from \$89,712 in the prior year comparable period. The amount classified as exploration expenses in the prior year comparable period resulted from exploration activities conducted on impaired properties. The decrease in the current year period is due to most efforts of the Company being focused on the completion of the Transaction with S2 and its minimization of activity on the impaired properties. The Company's Victorian Gold Projects were kept in good standing, but minimal additional work was completed in the current period.
- Management and professional fees decreased to \$102,199 from \$118,525 in the prior year comparable period primarily due to certain directors not being paid in cash and paid in DSUs in the current period.
- Office and administrative costs decreased to \$24,491 from \$59,906 in the prior year comparable period primarily due to lower office rent costs in the current period.

SUMMARY QUARTERLY PERFORMANCE

All the Company's exploration and evaluation assets are in the exploration stage. The Company does not derive any revenue from its operations. Its primary focus is the acquisition, exploration and evaluation of mineral properties. As a result, the loss per period has fluctuated depending on the Company's activity level and cash availability. Therefore, quarterly periods are not comparable. The significant increase in net loss in Q4 2023 resulted from impairment of two of the Company's properties, the Ballarat West property and the Glenfine property.

CRITICAL ACCOUNTING ESTIMATES AND ACCOUNTING JUDGMENTS

The preparation of the financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable in the circumstances. Uncertainty about these judgments, estimates and assumptions could result in a material adjustment to the carrying amount of the asset or liability affected in future periods.

A detailed summary of all of the Company's accounting estimates and assumptions is included in the Annual Financial Statements filed on SEDAR+.

Information about significant areas of estimation uncertainty considered by management in preparing the financial statements include the following:

Impairment of exploration and evaluation assets

Management applies judgement in assessing, each reporting period, whether there are any indicators of impairment related to exploration and evaluation assets. If an indicator exists, the recoverability of the exploration and evaluation asset is assessed using estimates, judgements and assumptions. To estimate recoverability, management considers current and forecasted commodity prices, the economic viability of the project, and its geological prospectivity, amongst other factors.

CHANGES IN ACCOUNTING POLICIES INCLUDING INITIAL ADOPTION

Standards, Amendments, and Interpretations Not Yet in Effect

The International Accounting Standards Board continually issues new and amended standards and interpretations which may need to be adopted by the Company. The Company continually assesses the impact that the new and amended standards and interpretations may have on its financial statements or whether to early adopt any of the new requirements.

In the preparation of the Financial Statements, the Company used the same accounting policies as in the Annual Financial Statements, except for the following pronouncements which became effective for periods beginning on or after January 1, 2024 and have thus been applied effective for July 1, 2024:

Disclosure of accounting policies - amendments to IAS 1 and IFRS Practice Statement 2

The amendments to IAS 1 *Presentation of financial statements* and IFRS Practice Statement 2 *Making materiality judgements* provide guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures. The amendments had no impact on the Company's disclosures of accounting policies as well as on the measurement, recognition or presentation of any items in the Company's financial statements.

Classification of liabilities as current or non-current - amendments to IAS 1

Additionally, the Company assessed the impacts of the amendments to IAS 1 *Presentation of Financial Statements*, effective for periods beginning on or after January 1, 2024, which clarifies that the classification of liabilities as current or non-current depends on the rights existing at the end of the reporting period as opposed to the expectations of exercising the right for settlement of the liability. The amendments had no impact on the Company's financial statements.

Definition of accounting estimates - amendments to IAS 8

The amendments to IAS 8 *Accounting policies, changes in accounting estimates and errors* clarify the distinction between changes in accounting estimates, changes in accounting policies and the correction of errors. They also clarify how entities use measurement techniques and inputs to develop accounting estimates. The amendments had no impact on the Company's financial statements.

FINANCIAL INSTRUMENTS

As at September 30, 2024, financial instruments comprised of cash and cash equivalents, amounts receivable, reclamation bond, accounts payable and accrued liabilities that are classified as and measured at amortized cost. The carrying value of cash and cash equivalents, amounts receivable, reclamation bond, accounts payable and accrued liabilities approximate their respective fair values due to the short-term nature of these financial instruments.

The Company is exposed in varying degrees to a variety of financial instrument-related risks. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to fulfil its contractual obligations. The Company's credit risk relates primarily to cash and cash equivalents. The Company minimizes its credit risk related to cash and cash equivalents by placing cash and cash equivalents with major financial institutions. The Company considers the credit risk to be minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations when they become due. The Company's primary exposure to liquidity risk is through accounts payable and accrued liabilities as well as subscription liability. To mitigate this risk, the Company has a planning and budgeting process in place to determine the funds required to support its ongoing operations and capital expenditures. As of September 30, 2024, the Company had cash and cash equivalents of \$2,861,792 (June 30, 2024 - \$83,684) and working capital of \$2,071,327 (June 30, 2024 - \$2,483,178). At September 30, 2024, liquidity risk is assessed as low, however, the Company will need to raise additional funds in the future to continue its exploration operations.

Foreign exchange risk

Foreign exchange risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured. The Company is exposed to foreign exchange risk from fluctuations in the Canadian dollar to the Australian dollar and the Euro. A 1% change in the Canadian dollar exchange rate relative to the Australian dollar would change the Company's loss or loss by approximately \$292; and a 1% change in the Canadian dollar exchange rate relative to the Euro would change the Company's loss or loss by approximately \$701.

A summary of the Company's financial assets and liabilities as at September 30, 2024 that are denominated in the Australian dollar and the Euro is as follows:
