

INDEPENDENT AUDITORS' REPORT

To the Shareholders of **Microbix Biosystems Inc.**

We have audited the accompanying consolidated financial statements of **Microbix Biosystems Inc.** which comprise the consolidated statements of financial position as at September 30, 2018 and 2017, and the consolidated statements of loss and comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of **Microbix Biosystems Inc.** as at September 30, 2018 and 2017, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

The accompanying notes and summary of significant accounting policies are an integral part of these consolidated financial statements.

1. NATURE OF THE BUSINESS

Microbix Biosystems Inc. (the “Company” or “Microbix”), incorporated under the laws of the Province of Ontario, develops and commercializes proprietary biological and technology solutions for human health and wellbeing. Microbix manufactures a wide range of critical biological materials for the global diagnostics industry, notably antigens used in immunoassays or quality assessment and proficiency testing controls (the Antigen Business).

Microbix has also applied its biological expertise and infrastructure to create proprietary new products or technologies. It has been working to commercialize two; (1) Kinlytic[®] urokinase, a biologic thrombolytic drug (used to dissolve blood clots), and (2) LumiSort[™] cell-sorting, a technology platform for ultra-rapid and efficient sorting of particles that can be used to enrich cell populations of interest (such as sexing semen for the livestock industry).

The registered office and principle place of business of the Company is located at 265 Watline Avenue, Mississauga, Ontario, L4Z 1P3.

2. BASIS OF PREPARATION

The Company’s management prepared these consolidated financial statements in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”). The Board of Directors approved these consolidated financial statements on December 20, 2018.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**Basis of Measurement**

The consolidated financial statements have been prepared under the historical cost convention, except for the revaluation of certain financial assets and financial liabilities to fair value. The consolidated financial statements are presented in Canadian dollars.

Basis of consolidation

These consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, Crucible Biotechnologies Limited, over which the Company has control. Control exists when the entity is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The non-controlling interest component, if any, of the Company’s subsidiaries is included in equity.

The financial statements of the Company’s subsidiary is prepared for the same reporting period as the Company, using consistent accounting policies. All intra-company balances, transactions, unrealized gains and losses resulting from intra-company transactions and dividends are eliminated in full.

There has been no business activity in the subsidiary during the years ended September 30, 2018 and 2017. All significant intercompany transactions and balances have been eliminated upon consolidation.

Use of estimates and judgments

The preparation of financial statements requires management to make estimates and judgements that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from estimates and such differences could be material.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Use of estimates and judgements (Continued)**

Key areas of managerial judgements and estimates are as follows:

i) Property, plant and equipment:

Measurement of property, plant and equipment involves the use of estimates for determining the expected useful lives of depreciable assets. Management's judgement is also required to determine depreciation methods and an asset's residual value and whether an asset is a qualifying asset for the purposes of capitalizing borrowing costs.

ii) Internally generated intangible assets:

Management monitors the progress of each internal research and development project. Significant judgement is required to distinguish between the research and development phases. Development costs are recognized as an asset when the following criteria are met: (i) technical feasibility; (ii) management's intention to complete the project; (iii) the ability to use or sell; (iv) the ability to generate future economic benefits; (v) availability of technical and financial resources; (vi) ability to measure the expenditures reliably. Research costs are expensed as incurred. Management also monitors whether the recognition requirements for development assets continue to be met and whether there are any indicators that capitalized costs may be impaired. The amortization period and amortization method for intangible assets are reviewed at least at the end of each reporting period.

iii) Financial assets and liabilities:

Estimates and judgements are also made in the determination of fair value of financial assets and liabilities and include assumptions and estimates regarding future interest rates, the relative creditworthiness of the Company to its counterparties, the credit risk of the Company's counterparties relative to the Company, the estimated future cash flows and discount rates.

iv) Income taxes:

The Company recognizes deferred tax assets, related tax-loss carry-forwards and other deductible temporary differences where it is probable that sufficient future taxable income can be generated in order to fully utilize such losses and deductions. This requires significant estimates and assumptions regarding future earnings, and the ability to implement certain tax planning opportunities in order to assess the likelihood of utilizing such losses and deductions.

v) Fair value of share-based compensation:

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date on which they are granted. Estimating fair value for share-based compensation transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility, dividend yield and forfeiture rates and making assumptions about them.

vi) Impairments:

The recoverable amount of intangible assets and property, plant and equipment is based on estimates and assumptions regarding the expected market outlook and cash flows from each CGU.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Revenue Recognition**

Revenues from product sales are recognized when persuasive evidence of an arrangement exists, the product is shipped, received or accepted by the customer, there are no future performance obligations, the purchase price is fixed and determinable, and collectability is reasonably assured.

Revenues from licensing are recognized when the service is rendered or the deliverables are substantially complete and other revenue recognition criteria are met.

Amounts the Company expects to earn over the next year are included in deferred revenue. The term over which upfront fees are recognized is revised if the period over which the Company maintains substantive contractual obligations changes.

Cash

Cash consists of cash on hand and deposits with banks and investments in highly liquid instruments with original maturities of three months or less. There are no cash equivalents held at September 30, 2018 or 2017.

Financial assets and liabilities

All financial instruments, including derivatives, are included on the consolidated statement of financial position and are measured either at fair market value or, in limited circumstances, at cost or amortized cost. Subsequent measurement and recognition of the changes in fair value of financial instruments depends upon their initial classifications as follows:

- Held-for-trading financial assets, measured at fair value with subsequent changes in fair value recognized in current period net income;
- Held-to-maturity assets, loans and receivables and other financial liabilities, initially measured at fair value and subsequently measured at amortized cost with changes recognized in current period net income; and
- Available-for-sale financial assets, measured at fair value with subsequent gains or losses included in other comprehensive income until the asset is removed from the consolidated statements of financial position.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Financial assets and liabilities (Continued)**

The following summarizes the Company's classification and measurement of financial assets and liabilities as at September 30:

	Classification	Measurement	2018	2017
Financial assets:				
Cash	Held-for-trading	Fair value	\$ 44,358	\$ 54,460
Accounts receivable	Loans and receivables	Amortized cost	1,313,480	1,337,488
Financial liabilities:				
Accounts payable and accrued liabilities	Other liabilities	Amortized cost	\$ 1,766,592	\$ 2,841,950
Bank Indebtedness	Other liabilities	Amortized cost	260,000	1,355,000
Deferred revenue	Other liabilities	Amortized cost	931,125	1,145,185
Finance lease obligation	Other liabilities	Amortized cost	330,153	97,398
Non-convertible debentures	Other liabilities	Amortized cost	1,184,014	1,170,117
Convertible debentures	Other liabilities	Amortized cost	1,585,435	1,515,888
Long-term-debt	Other liabilities	Amortized cost	2,899,246	3,137,390
Total Financial liabilities			\$ 8,956,565	\$ 11,262,928

Transaction costs that are directly attributable to the acquisition or issuance of financial assets or financial liabilities, other than financial assets and financial liabilities measured at fair value through profit and loss ("FVTPL"), are accounted for as part of the carrying amount of the respective asset or liability at inception. Transaction costs related to financial instruments measured at amortized cost are amortized using the effective interest rate over the anticipated life of the related instrument.

Transaction costs on financial assets and financial liabilities measured at FVTPL are expensed in the period incurred. Financial assets are derecognized when the contractual rights to the cash flows from financial assets expire or have been transferred. All derivative instruments, including embedded derivatives, are recorded in the financial statements at fair value.

Inventories

Inventory is carried at the lower of cost and market. Cost consists of direct materials, direct labour and an overhead allocation and is determined on a first-in, first-out basis. Market is defined as net realizable value, which is defined as the summation of the estimated selling price less the cost to complete less the cost to sell. Management reviews its reserve for obsolete inventory at each reporting date for finished goods and work-in-process.

Property, plant and equipment

Property and equipment are measured at cost less accumulated depreciation and impairment (if any). Cost includes the cost of material, labour and other costs directly attributable to bringing the asset to a working condition for its intended use.

Depreciation is calculated at rates which will reduce the original cost to estimated residual value over the estimated useful life of each asset. Depreciation commences once the asset is available for use.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Property, plant and equipment (Continued)**

Depreciation is provided for at the following basis and rates:

Research and development equipment	Declining balance, 10-100%
Other equipment and fixtures	Declining balance, 10-30%
Buildings	Straight line, 50 years

Land is not depreciated. Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted prospectively, if appropriate.

Finance lease obligation

Leases that transfer substantially all of the benefits and risks of ownership of the asset to the Company are accounted for as finance leases. At the time a finance lease is entered into, an asset is recorded together with its related long-term obligation, reflecting the fair value of future lease payments, discounted at the appropriate interest rates. Finance lease obligations are amortized over their estimated useful lives at the same rates used for other equipment and fixtures. All other leases are classified as operating leases and expensed on a straight-line basis.

Intangible assets

Intangible assets represent technology costs, patents and trademarks, and rights and licenses. Each is recorded at cost and is amortized on a straight-line basis over the term of the agreements or over the useful life of the asset. Amortization commences when the intangible asset is available for use. Intangible assets with definite lives but not yet available for use are assessed annually for impairment.

Impairment of long-lived assets

An impairment charge is recognized for long-lived assets, including intangible assets with definite lives, when an event or change in circumstances indicates that the assets' carrying value may not be recoverable. The impairment loss is calculated as the difference between the carrying value of the asset and the recoverable amount. The recoverable amount is the higher of the fair value less costs to sell and value in use.

Borrowing costs

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the asset. All other borrowing costs are expensed in the period they are incurred.

Share-based compensation

The Company applies the fair value method of accounting for share-based compensation for awards granted to officers, directors and employees of the Company. The fair value of the award at the time of granting is determined using the Black-Scholes option pricing model, and recognized as a compensation expense over the vesting period with an offsetting amount recorded to contributed surplus. Each tranche in an award is considered a separate award with its own vesting period and grant date fair value.

Share options issued to consultants of the Company are based on the fair value of the services provided. The amount of the compensation cost recognized at any date at least equals the value of the portion of the options vested at that date. When stock options are exercised, the consideration paid by employees or directors, together with the related amount in contributed surplus, is credited to share capital. When an employee leaves the Company, vested options must be exercised within 90 days, or the options expire. Any options that are unvested are reversed in the period that the employee leaves. No

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Share-based compensation (Continued)**

forfeiture rate is incorporated into the Company's assumptions on awarding options. To the extent actual forfeitures occur, share-based compensation related to these awards will be different from the Company's estimate and are revised.

Foreign currency translation

For each entity, the Company determines the functional currency and items included in the financial statements of each entity are measured using the functional currency, which represents the currency of the primary economic environment in which each entity operates.

Foreign currency denominated revenues and expenses are translated by use of the exchange rate in effect at the end of the month in which the transaction occurs. Foreign currency denominated monetary assets and liabilities are translated at the year-end date. Exchange gains and losses arising on these transactions are included in the consolidated statements of loss and comprehensive loss for the year.

Income (loss) per common share

The Company calculates basic income per share amounts for profit or loss attributable to ordinary equity holders. Basic income (loss) per share is calculated using the weighted average number of common shares outstanding during the period. Diluted income per share is calculated in the same manner as basic income per share except for adjusting the profit or loss attributable to ordinary equity holders and the weighted average number of shares outstanding for the effects of all dilutive potential ordinary shares.

Deferred taxes

Deferred income tax assets and liabilities are recognized for the estimated income tax consequences attributable to differences between financial statement carrying amounts of assets and liabilities and their respective income tax bases. Deferred income tax assets are recognized to the extent that it is probable that future taxable income will be available against which temporary differences can be utilized. Deferred income tax assets and liabilities are measured using tax rates expected to be in effect when the temporary differences are expected to be recovered or settled. The effects of changes in income tax rates are reflected in deferred income tax assets and liabilities in the year that the rate changes are substantively enacted, with a corresponding charge to income. The amount of deferred tax assets recognized is limited to the amount that is more likely than not to be realized.

Research and development expenses

Costs associated with research and development activities are expensed during the year in which they are incurred net of tax credits earned, except where product development costs meet the criteria under IFRS for deferral and amortization.

Investment tax credits

The Company is entitled to Canadian federal and provincial investment tax credits which are earned as a percentage of eligible research and development expenditures incurred in each taxation year. Investment tax credits are accounted for as a reduction of the related expenditure for items of a current nature and a reduction of the related asset cost for items of a long-term nature. These credits are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the credits in the foreseeable future.

4. ACCOUNTING PRONOUNCEMENTS ISSUED BUT NOT YET APPLIED

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRS Interpretation Committee (“IFRIC”) that are mandatory at certain dates or later. Management is still assessing the effects of the pronouncements on the Company. The standards impacted that may be applicable to the Company are following:

IFRS 9 - Financial Instruments

IFRS 9, Financial Instruments (“IFRS”) was issued in final form by the IASB in July 2014 and will replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets.

Most requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method be used, replacing the multiple impairment methods in IAS 39. IFRS 9 also includes requirements relating to a new hedge accounting model, which represents a substantial overhaul of hedge accounting that will allow entities to better reflect their risk management activities in the financial statements.

The most significant improvements apply to those that hedge non-financial risk, and so these improvements are expected to be of particular interest to non-financial institutions. In addition, a single, forward-looking expected loss impairment model is introduced, which will require more timely recognition of expected credit losses. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier application is permitted.

The Company has assessed the impact of IFRS 9 on the consolidated financial statements and has determined that the adoption of IFRS 9 will enhance disclosures, but will not have a material impact on the consolidated financial statements.

IFRS 15, Revenue from Contracts with Customers

IFRS 15, Revenue from Contracts with Customers (“IFRS 15”) was issued by the IASB in May 2014. The core principle of the new standard is for companies to recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. The new standard will also result in enhanced disclosures for revenue, provide guidance for transactions that were not previously addressed comprehensively (for example, service revenue and contract modifications) and improve guidance for multiple-element arrangements. The new standard is effective for annual periods beginning on or after January 1, 2018. Earlier application is permitted. IFRS 15 supersedes the following standards: IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfers of Assets from Customers, and SIC-31 Revenue - Barter Transactions Involving Advertising Services.

The Company has not identified any significant differences in the timing or recognition of revenues as a result of IFRS 15. The Company continues to assess the impact of required disclosure in the notes to the consolidated financial statements.

IFRS 16, Leases

On January 13, 2016, the IASB issued IFRS 16, which outlines requirements for lessees to recognize assets and liabilities for most leases. Lessees are required to recognize the lease liability for the obligations to make lease payments and a right-of-use asset for the right to use the underlying asset for the lease term. Lease liability is measured at the present value of lease payments to be made over the term of the lease. The right-of-use asset is initially measured at the amount of the lease liability and adjusted for prepayments, direct costs and incentives received.

The new standard will be effective for annual periods beginning on or after January 1, 2019. Early recognition is permitted, provided the new revenue standard, IFRS 15 Revenue from Contracts with Customers, has been applied, or is applied at the same date as IFRS 16. The Company has commenced a review process to assess any impact on its current revenue recognition policies and reporting processes.

4. ACCOUNTING PRONOUNCEMENTS ISSUED BUT NOT YET APPLIED (Continued)***IFRS 2, Share-based Payment (“IFRS 2”)***

In June 2016, the IASB issued final amendments to IFRS 2, clarifying how to account for certain types of share-based payment transactions. The amendments, which were developed through the IFRS Interpretations Committee, provide requirements on the accounting for: (i) the effect of vesting and non-vesting conditions on the measurement of cash-settled share-based payments; (ii) share-based payment transactions with a net settlement feature for withholding tax obligations; and (iii) a modification to the terms and conditions of a share-based payment that changes the classifications of the transaction from cash-settled to equity-settled. The effective date for this standard is for reporting periods beginning on or after January 1, 2018, with earlier application permitted.

The Company has completed the review process to assess the impact and application of the aforementioned amendments and has determined it will have no impact on the Company.

IFRIC 22, Foreign Currency Transactions and Advance Consideration

In 2016, the IASB issued IFRIC Interpretation 22, Foreign Currency Transactions and Advance Consideration (“IFRIC 22”) which provides requirements about which exchange rate to use in reporting foreign currency transactions (such as revenue transactions) when payment is made or received in advance. IFRIC 22 is effective for annual periods beginning on or after January 1, 2018, with earlier adoption permitted. On initial application, entities have the option to apply either retrospectively or prospectively. The Company is in the process of evaluating the impact of adopting these amendments on the Company’s consolidated financial statements.

5. INVENTORIES

Inventories as at September 30 consist of the following:

	2018	2017
Raw material	\$ 488,060	\$ 379,661
Work in process	1,679,926	1,593,158
Finished goods	2,278,982	2,494,287
	\$ 4,446,968	\$ 4,467,106

During the year ended September 30, 2018, inventories in the amount of \$7,051,611 (2017 - \$5,287,781) were recognized as an expense through cost of sales. The allowance for inventory impairment as at September 30, 2018 was \$55,747 (2017 - \$30,561).

6. PREPAID EXPENSES AND OTHER ASSETS

Prepaid expenses and other assets as at September 30, 2018 were \$169,985 (2017 - \$152,989), consisting of insurance policy premiums, deposits for trade shows and other prepaid amounts.

Balance, as at September 30, 2018	\$ -	\$1,937,733	\$3,078,586	\$ -	\$ -	\$5,016,319

At each reporting date, the Company is required to assess its long-lived assets for potential indicators of impairment. If any such indication exists, the Company estimates the recoverable amount of the asset or cash generating unit ("CGU") and compares it to the carrying value. In addition, irrespective of whether there is any indication of impairment, the Company is required to test long-lived assets with definite lives which are not yet available for use at least annually.

8. INTANGIBLE ASSETS (Continued)**a) Lumisort™**

The Company acquired a license agreement from Sequent Biotechnologies Inc. (“Sequent”), a biotechnology company solely involved in the development and commercialization of the LumiSort™ technology under license. Subsequent to the acquisition, the Company continued to incur new intellectual property with the issue of patents has resulted from this research program, as well as the cost incurred for the research and development equipment that is not yet available for use.

The Company has assessed that it cannot fund the development of LumiSort™ assets in a timely manner and that licensing terms may not adequately support its continued value. The decision was therefore made to write-down all of the LumiSort™ related assets, including the original investment, capitalized research and development equipment, prototype costs and patent related costs.

b) Kinlytic®

The Company acquired the assets and rights pertaining to development, production, and licensing of Kinlytic® from ImaRX Therapeutics, Inc. in 2008. The asset is not yet available for use, accordingly no amortization has been recorded.

The recoverable amount of the Kinlytic® intangible has been determined based on its fair value less cost to sell. This estimate uses risk-adjusted cash flow projections based on financial budgets.

Management made these assumptions based on probabilities of technical, regulatory and clinical acceptances and financial support. Management believes that any reasonably-possible change in the key assumptions on which the recoverable amount is based would not cause the carrying amount to exceed its recoverable amount. The discount rate has been determined based on the Company’s best estimate of a risk adjusted discount rate.

c) Bioreactor

The Company has internally developed an improved bioreactor production process (“Bioreactor”) to increase the efficiency and output of manufacturing certain Antigen products.

9. DEBENTURES

The Company has convertible and non-convertible debentures issued and outstanding as at September 30, 2018. The carrying values of the debt component of these debentures are as follows:

	Non-convertible Debentures		Total Non-convertible Debentures	Convertible Debentures			Total Convertible Debentures
	(a)	(b)		(c)	(d)	(e)	
Date of issue	Jan, 2014	Apr, 2017		Oct, 2016	Oct, 2016	Oct, 2016

Terms of repayment	Principal and interest	Interest only		Interest only	Interest only	Interest only	
Blended quarterly repayment	\$ 61,071	N/A		N/A	N/A	N/A	

As discussed in note 10, the Company arranged a new secured revolving credit facility jointly with The Toronto-Dominion Bank ("TD Bank") and Export Development Canada ("EDC"). To accommodate the additional security required by TD Bank and EDC, effective October 12, 2016, the Company negotiated amended terms with the holders of its issued and outstanding convertible debentures. With the exception of debenture (a) above, all the other debentures were amended in exchange for reducing their security position to one of unlimited subordination to the credit facility lenders.

The \$2,500,000 debenture, (e) above, maturing in 2028 was originally convertible at \$0.65 per common share, and the \$1,500,000 debenture, (c) above, maturing in 2029 was originally convertible at \$0.35 per common share. The conversion price for both of these debentures were amended to \$0.23 per common share, and these debentures are now subject to restricted conversion privileges of a combined total of 1 million shares per year for the next five years, with the remaining balances being eligible for conversion through the end of their expiry dates in 2028 and 2029, respectively.

9. DEBENTURES (Continued)

The two \$500,000 debentures, (b) and (d) above, were originally convertible at \$0.90 per common share and matured on October 12, 2016 and February 15, 2017, respectively. The first \$500,000 debenture, (b) above was modified to extend its maturity date to April 30, 2017 and was modified to become non-convertible. In addition, the stated interest rate was modified from 9% to 12% for the remaining term (see paragraph below for further details on this debenture). The second \$500,000 debenture, (d) above, were modified to extend its maturity date to February 15, 2022, and the conversion price were modified from \$0.90 to \$0.23 per common share. The debenture is now callable at the option of the holder at any time after February 15, 2017 for outstanding principal and accrued interest. In addition, the debenture holder of both \$500,000 debentures (b) and (d) received 1.5 million common share purchase warrants, with an exercise price of \$0.23 per common share and a term of five years.

The Company has accounted for the modifications to each of the debentures as an extinguishment with the recognition of a new instrument. Upon extinguishment of the debentures, the Company has recognized a non-cash loss of \$2,379,776 in the 2017 comprehensive consolidated statement of loss. The Company measured the non-cash loss based on the change in fair value of the debentures under the original and modified terms. In addition, a value of \$245,860 were ascribed to warrants issued at the time of the grant. The value is determined using the Black-Scholes option pricing model, which is affected by the Company's share price as well as assumptions regarding a number of subjective variables.

On April 28, 2017, the Company announced it has reached an agreement with one of its debenture holders to extend the maturity date on the \$0.5 million non-convertible debenture set to mature on April 30, 2017, (b) above, to April 30, 2022. The debenture is callable at the option of the holder upon sixty days written notice to the Company. The Company has accounted for the modifications to each of the debentures as an extinguishment with the recognition of a new instrument. Upon extinguishment of the debenture, the Company recognized a non-cash gain of \$202,750 in the consolidated statement of income and comprehensive income. In addition, as part of the amendment, the Company amended the terms of 300,000 outstanding common share purchase warrants held by the debenture holder. The terms of the warrants were modified to extend the life of the warrants from August 21, 2019 to August 21, 2022 and modify the exercise price from \$0.55 to \$0.25 per share. The modification of the debenture was accounted for as an extinguishment with recognition of a new instrument. In addition, the modification of the warrants resulted in a non-cash loss of \$28,295.

The debentures denoted as (a), (c), and (e) above are secured against the real property and the personal property of the Company including, without limiting the foregoing, a registered second mortgage on the property at 265 Watline Avenue, Mississauga, Ontario, in favour of the holder, its successors and assigns subordinate only to indebtedness to a Canadian chartered bank or similar financial institution on normal commercial terms up to their maximum principal. The debentures denoted as (b) and (d) are secured by a subordinated security agreement covering all of the Company's property and assets.

Convertible debentures contain two components: liability and equity elements. The equity element is presented in equity under the heading of "equity component of debentures". Convertible debentures are initially accounted for in accordance with their substance and are presented in the consolidated financial statements in their component parts measured at the time of issue. The debt components were valued first with the residual to shareholders' equity. The convertible debentures are convertible at the option of the holder, at any time, into fully paid and non-assessable common shares of the Company at the conversion price then in effect.

All of the debentures were issued to shareholders of the Company. A holder of a debenture has an economic interest in future earnings of the Lumisort asset and will receive a distribution equal to 10% of any future earnings that are derived from the Lumisort asset. Over the term of the convertible debentures, the debt components will be accreted to the face value of the debentures by the recording of additional interest expense using the effective interest rate, as detailed above.

10. LONG-TERM DEBT, BANK INDEBTEDNESS AND OTHER DEBT

a) The Company has term loans with the Business Development Bank (“BDC”) for a variety of purposes. The following summarizes these loans as at September 30, 2018:

Term Loans with the Business Development Bank (“BDC”)	(a)	(b)	(c)	(d)	(e)	(f)	Total
Effective date of loan	Jun, 2008	Oct, 2014	Oct, 2015	Oct, 2015	Nov, 2015	Jul, 2015	
Initial Loan Amount	\$ 3,000,000	\$ 615,000	\$ 50,000	\$ 200,000	\$ 250,000	\$ 323,906	\$ 4,438,906

Payment frequency	Monthly	Monthly	Monthly	Monthly	Monthly	Monthly	
Maturity of loan	Feb, 2038	Jul, 2020	Dec, 2019	Dec, 2020	Dec, 2020	Sep, 2021	
Terms of repayment	Principal and interest						

Notes: (a) Loan for the purchase of manufacturing facility and building improvements.
(b) Loan for the purchase of equipment for our bioreactor project
(c) Loan for the purchase of building improvements.
(d) Loan for the purchase of manufacturing equipment
(e) Working Capital loan
(f) Loan for the purchase of manufacturing equipment

All BDC loans have a floating interest rate based on BDC’s floating base rate plus 0.5% - 1.8%. At September 30, 2018, the floating base rate was 5.8% (2017 – 5.3%). The loans are secured with the building and equipment.

As at September 30, 2018, the commitments for the next five fiscal years and thereafter for the BDC loans is as follows:

	Amount
2019	\$ 438,120
2020	408,260
2021	228,645
2022	111,120
2023	111,120
2024 and thereafter	\$ 1,601,981

On October 20, 2016, the Company arranged a new revolving line of credit agreement with its Canadian chartered bank. That agreement allowed the Company to draw on to a limit of \$1,000,000 bearing interest at the bank’s prime lending rate plus 2.25%. This credit facility was implemented in November 2016, replacing the Company’s previous credit facility of \$0.5 million. Accounts receivable and inventory were pledged as collateral for the bank credit facility.

On April 28, 2017, the Company received approval from its Chartered Bank to increase the borrowing limit on its credit facility to \$1.5 million. The newly expanded credit facility was available on May 4, 2017.

As at September 30, 2018 the Company had drawn on \$260,000 of the facility (2017 - \$1,355,000).

10. LONG-TERM DEBT, BANK INDEBTEDNESS AND OTHER DEBT (Continued)

- b) On September 12, 2017, the Company issued two outstanding shareholder interest bearing loans for total proceeds of \$200,000. These loans were repaid on October 23, 2017.
- c) On May 3, 2017, the Company signed an agreement with Business Development Corporation for a new equipment credit facility in the amount of \$610,000. On July 4, 2018 the Company received funds in the amount of \$323,906, drawn on this facility.

11. DEFERRED REVENUE

As at September 30, 2018, the Company has received payment, in the amount of \$931,125 (2017 - \$1,145,185), for a portion of product sales which was not yet shipped. This amount has been recognized as deferred revenue under the current liabilities in the consolidated statements of loss and comprehensive loss.

12. SHARE CAPITAL

The Company is authorized to issue an unlimited number of common shares with no par value and an unlimited number of preference shares with no par value.

On October 18, 2017 and October 26, 2017 (the "Closing Date"), the Company completed a private placement offering of an aggregate of 11,666,633 units for total gross proceeds of \$3,499,990, net proceeds of \$3,137,283 after share issuance costs of \$362,707. Each unit consists of one common share of Microbix and one half of a common share purchase warrant. Each whole warrant entitles the holder to purchase one additional common share at an exercise price of \$0.36 for three years. Fair value of the common share purchase warrants was determined to be \$1,102,144. Gross proceeds were allocated to common shares and common share purchase warrants in the amount of \$2,756,085 and \$743,905 respectively. The financing was brokered. Cash commissions of \$226,729 were paid and an aggregate of 755,764 Broker's Warrants were issued in the private placement offering. Fair value of the broker warrants was determined to be \$120,328 using the Black-Scholes option pricing model. The volatility of the stock for the Black-Scholes options pricing model was based on 5-year historic volatility of the Company's stock price on the Toronto Stock Exchange (86%), a risk free rate of interest of 1.45% based upon the two year Government of Canada Bond Yield at the date of the award of the Broker's warrants and a two year term. Management believes that the historic stock volatility provides a fair and appropriate basis of estimate for the expected future volatility of the stock. Each Broker's Warrant entitles the holder to purchase one unit at a price of \$0.335 for a period of two years. All securities issued under the private placement will be subject to a holding period, expiring four months and one day from the date of closing.

During 2018, the Company issued 200,000 shares at a price of \$0.275 and 250,000 warrants at an exercise price of \$0.30 as partial compensation for a consulting agreement. The transaction was measured at the fair value of the common shares issued and warrants awarded, as the fair value of the services provided could not be measured reliably. The number of issued and outstanding common shares and the stated capital of the Company as at September 30, 2018 are presented below:

	Number of Shares	Stated Capital
Balance, as at September 30, 2017	84,704,257	\$ 31,299,416
Issued on private placement	11,666,633	2,375,717
Issued for services	200,000	55,000
Exercise of Warrants	1,815	811
Exercise of stock options	400,000	181,516
Balance, as at September 30, 2018	96,972,705	\$ 33,912,460

MICROBIX**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**
As at and for the years ended September 30, 2018 and 2017**Canadian Funds****13. CONTRIBUTED SURPLUS**

Changes in contributed surplus up to September 30, 2018 are described as follows:

Balance, as at September 30, 2016	\$ 4,937,649
Issuance of Warrants pursuant to refinancing of convertible debentures	245,860
Reclassification of equity portion of a convertible debenture converted to a non-convertible debenture	86,680
Extinguishment of convertible debenture	2,293,040
Stock options expensed	485,086
Balance, as at September 30, 2017	\$ 8,048,315
Share Issuance pursuant to Stock Options Exercised	(77,516)
Share Issuance pursuant to Warrants Exercised	(203)
Issuance of Warrants pursuant to Private Placement	743,905
Issuance of Broker Warrants pursuant to Private Placement	120,328
Issuance of Warrants for Services	44,969
Share warrants issue costs pursuant to Private Placement	(102,667)
Stock options expensed	458,525
Balance, as at September 30, 2018	\$ 9,235,656

14. COMMON SHARE PURCHASE WARRANTS

A continuity of the Company's warrants outstanding as at September 30, 2018 and September 30, 2017 is presented in the following table:

	Units	Weighted average exercise price
Outstanding, September 30, 2016	7,024,392	\$ 0.54
Issued	1,500,000	\$ 0.23
Exercised	-	-
Expired	(193,079)	\$ 0.25
Outstanding, September 30, 2017	8,331,313	\$ 0.48
Issued	6,839,081	\$ 0.36
Exercised	(1,815)	\$ 0.34
Expired	-	-
Balance, September 30, 2018	15,168,579	\$ 0.40

14. COMMON SHARE PURCHASE WARRANTS (Continued)

A summary of the Company's warrants outstanding as at September 30, 2018 and September 30, 2017 is presented in the following table:

	September 30, 2018			September 30, 2017		
	Number outstanding	Weighted average exercise price	Weighted average remaining contractual life years	Number outstanding	Weighted average exercise price	Weighted average remaining contractual life years
Range of exercise prices:						
\$0.47 to \$0.55	4,949,763	\$ 0.55	1.24	6,531,313	\$ 0.55	2.18
\$0.23 to \$0.46	10,218,816	0.33	2.37	1,800,000	0.23	3.65
	15,168,579	\$ 0.40	2.00	8,331,313	\$ 0.48	2.50

15. STOCK OPTION PLAN

On March 28, 2018 the shareholders of the Company approved a resolution to amend the Company's stock option plan. This amendment changed the total number of common shares available to be issued under the plan from a maximum of 12,000,000 common shares to a rolling maximum of 10% of issued and outstanding common shares. Under the plan as at September 30, 2018, the Company has a total of 5,590,000 options (2017 – 6,470,000) issued and pending and is eligible to issue up to a total of 9,697,270 options.

The exercise price of each option equals no less than the market price at the date immediately preceding the date of the grant. In general, options issued under the plan vest and are exercisable in equal amounts in three steps, at the issue date and at the anniversary date in the subsequent two years. Management does not expect any remaining unvested stock options at the year-end to be forfeited before they vest.

The activity under the Company's stock option plan for the year ended September 30, 2018 is as follows:

	Units	Weighted average exercise price
Outstanding, September 30, 2016	4,007,000	\$ 0.47
Stock options exercised	3,220,000	0.28
Stock options expired or forfeited	(757,000)	0.54
Stock options issued	-	-
Outstanding, September 30, 2017	6,470,000	\$ 0.39
Stock options exercised	(400,000)	0.26
Stock options forfeited	(480,000)	0.54
Stock options issued	-	-
Balance, September 30, 2018	5,590,000	\$ 0.39
Exercisable, September 30, 2018	3,523,458	\$ 0.39

15. STOCK OPTION PLAN (Continued)

The exercise price of each option equals the closing market price of the Company's capital stock on the day preceding the grant date. The following table reflects the number of options, their weighted average price and the weighted average remaining contract life for the options grouped by price range as of September 30, 2018 and September 30, 2017:

	September 30, 2018			September 30, 2017		
	Number outstanding	Weighted average exercise price	Weighted average remaining contractual life years	Number outstanding	Weighted average exercise price	Weighted average remaining contractual life years
Range of exercise prices:						
\$0.54	2,440,000	\$ 0.54	2.33	2,920,000	\$ 0.54	3.00
\$0.23 to \$0.28	3,150,000	\$ 0.28	4.18	3,550,000	\$ 0.27	4.33
	5,590,000	\$ 0.39	3.41	6,470,000	\$ 0.39	3.73

Stock options are assumed to be exercised at the end of the option's life, as management believes the probability of an early exercise is remote. During the period, the fair value of the options vested in the year were expensed and credited to contributed surplus. During the year, the Company recorded share-based compensation expense of \$458,525 (2017 - \$485,086).

16. INCOME PER SHARE

Basic income per share is calculated using the weighted average number of shares outstanding. Diluted income per share reflects the dilutive effect of the exercise of stock options, warrants and convertible debt. The following table reconciles the net income and the number of shares for the basic and diluted loss per share computations:

For the years ended September 30	2018	2017
Numerator for basic income per share:		
Net loss available to common shareholders	\$ (8,621,566)	\$ (3,780,088)
Denominator for basic income (loss) per share:		
Weighted average common shares outstanding	96,198,810	84,704,257
Effect of dilutive securities:		
Warrants	-	294,624
Stock Options	-	21,792
Convertible debentures	-	-
Denominator for diluted net loss per share	96,198,810	82,020,673
Net loss per share:		
Basic	(\$0.090)	(\$0.045)
Diluted	(\$0.090)	(\$0.045)

The following represents the warrants, stock options and convertible debentures not included in the calculation of diluted EPS due to their anti-dilutive impact:

	2018	2017
Pursuant to warrants	15,168,579	8,036,689
Under stock options	5,590,000	6,448,208
Pursuant to convertible debentures	19,565,217	19,565,217
	40,323,796	34,050,114

17. EXPENSES BY NATURE

The Company has chosen to present its consolidated statements of loss and comprehensive loss based on the functions of the entity and include the following expenses by nature:

Depreciation and amortization

	2018	2017
Included in:		
Cost of goods sold	\$ 526,958	\$ 308,521
General and administrative expenses	951	991
Research and development	162,169	200,647
Total depreciation and amortization	\$ 690,078	\$ 510,159

Amortization expense included within cost of goods sold includes amortization of Bioreactor development costs that were capitalized in previous years and began amortization at the beginning of fiscal 2018.

Employee costs

	2018	2017
Included in:		
Short-term wages, bonuses and benefits	\$ 5,797,619	\$ 5,011,506
Share based payments	180,121	290,962
Total employee costs	5,977,740	5,302,468

Included in:		
Cost of goods sold	\$ 3,222,526	\$ 2,764,397
Research and development	788,367	786,305
General and administrative expenses	1,551,893	1,408,859
Selling and business development	414,954	342,907
Total employee costs	\$ 5,977,740	\$ 5,302,468

Short-term wages, bonuses and benefits in 2018, fully includes CEO salary that had been reflected in consulting costs in the previous year.

MICROBIX**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**
As at and for the years ended September 30, 2018 and 2017**Canadian Funds****18. INCOME TAXES**

	2018	2017
Provision based on combined federal and provincial statutory rates of 25.00 % (2017 – 25.00%)	\$ (2,155,391)	\$ (945,022)
Increase (decrease) resulting from:		
Non deductible expenses	2,076	552
Non deductible expenses	125,874	121,272
Non deductible expenses	2,098,271	(22,903)
Adjustments to prior years' tax returns	(70,830)	396,101
Current income tax expense	-	(450,000)

The Company has unclaimed research and development expenses, research and development investment tax credits and accumulated losses for income tax purposes. Certain of these credits have been recognized to the extent that it is probable that there will be sufficient taxable income against which to utilize the benefits of the credits in the foreseeable future.

The accumulated non-capital losses may be used to reduce taxable income in future years and must be claimed no later than September 30:

	\$
2031	1,029,000
2032	1,223,000
2037	132,000
	2,384,000

The significant components of deferred income tax assets are summarized as follows:

	2018	2017
Deferred income tax assets:		
Non-capital loss carry-forwards	\$ 595,897	\$ 780,350
Difference in net book value compared to undepreciated capital cost	2,606,720	529,057
Deferred financing fees and other reserves	95,811	18,028
Unclaimed research and development expenses	3,908,332	3,864,446
Deferred income tax liability related to debentures	(965,644)	(1,009,781)
Tax assets not recognized	(6,241,116)	(4,182,100)
Deferred tax assets	-	-

In fiscal 2018 the Company incurred \$362,707 of share issuance costs recorded directly to equity and which will be deducted from taxable income at \$72,541 over five years. The deferred tax asset for this transaction has not been recognized.

MICROBIX**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**
As at and for the years ended September 30, 2018 and 2017**Canadian Funds****18. INCOME TAXES (Continued)**

The unclaimed research and development investment tax credits may be carried forward and used to reduce federal income taxes. These must be claimed no later than September 30:

2022	\$	\$15,000
2023		160,000
2024		149,000
2025		303,000
2026		293,000
2027		304,000
2028		394,000
2029		175,000
2030		220,000
2031		170,000
2032		123,000
2033		107,000
2034		67,000
2035		159,000
2036		126,000
2037		96,000
2038		41,000
		2,902,000

The associated tax benefits relating to the unclaimed credits are as follows:

	2018	2017
Unclaimed research and development tax credits	\$ 2,449,453	\$ 2,410,197
Tax assets not recognized	(869,453)	(830,197)
Deferred tax assets related to investment tax credits	1,580,000	1,580,000

19. CHANGES IN NON-CASH WORKING CAPITAL

	2018	2017
Accounts receivable	\$ 24,008	\$ 684,384
Inventory	20,138	(1,071,113)
Prepaid expenses and other assets	(16,976)	(97,448)
Investment tax credits receivable	57,547	32,604
Deferred Revenue	(214,060)	461,691
Accounts payable and accrued liabilities	(1,075,358)	943,436
	\$ (1,204,703)	\$ 953,554

20. FINANCIAL EXPENSES

	2018	2017
Cash interest:		
Interest on long-term debt	\$ 172,565	\$ 164,305
Interest on debentures	483,158	490,292
Interest other	34,373	71,454
Interest income	(172)	(22)
Non-cash interest:	-	-
Accretion on debentures	161,934	198,560
Financial expenses	\$ 851,857	\$ 924,589

21. CAPITAL MANAGEMENT

The Company's capital management objective is to safeguard its ability to function as a going concern to maintain and grow its operations and to fund its development activities. Microbix defines its capital to include the revolving line of credit, shareholders' equity, the Business Development Bank capital loans, and the debentures. The capital at September 30, 2018 was \$16,282,197 (2017 - \$22,153,078).

To date, the Company has used cash provided by operating activities, common equity issues, debentures, bank mortgage and other financing to fund its activities. The equity is through private placements, the debentures are all controlled by private individuals known to the Company and the mortgage and other financing are with the Business Development Bank and TD Bank. If possible, the Company tries to optimize its liquidity needs by non-dilutive sources, including cash provided by operating activities, investment tax credits, grants and interest income. The Company has a revolving line of credit of \$1,500,000 with its Canadian chartered bank, Note 10 (b).

The Company's general policy is to not pay dividends and retain cash to keep funds available to finance the Company's growth. However, the Board of Directors may, from time to time, choose to declare a dividend in assets if warranted by circumstances. There was no change during the year in how the Company defines its capital or how it manages its capital.

22. FINANCIAL INSTRUMENTS

The Company categorizes its financial assets and liabilities measured at the fair value into one of three different levels depending on the observation of the inputs used in the measurement.

For the years ended September 30, 2018 and 2017, the Company has carried at fair value financial instruments in Level 1. At September 30, 2018, the Company's only financial instrument measured at fair value is cash, which is considered to be a Level 1 instrument. There were no transfers between levels during the year.

The three levels are defined as follows:

- a) Level 1: Fair value is based on unadjusted quoted prices for identical assets or liabilities in active markets.
- b) Level 2: Fair value is based on inputs other than quoted prices included within Level 1 that are not observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- c) Level 3: Fair value is based on valuation techniques that require one or more significant unobservable inputs.

22. FINANCIAL INSTRUMENTS (Continued)

The following table provides the fair value measurement hierarchy of the Company's assets and liabilities.

	Date of valuation	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value:				
Cash	30-Sep-18	\$ 44,358	-	-
Liabilities for which fair values are disclosed:				
Non-convertible debentures	30-Sep-18	-	-	\$ 1,184,014
Convertible debentures	30-Sep-18	-	-	1,585,435
Long-term-debt and other debt	30-Sep-18	-	\$ 3,159,246	-

	Date of valuation	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value:				
Cash	30-Sep-17	\$ 54,460	-	-
Liabilities for which fair values are disclosed:				
Non-convertible debentures	30-Sep-17	-	-	\$ 1,170,117
Convertible debentures	30-Sep-17	-	-	1,515,888
Long-term-debt and other debt	30-Sep-17	-	\$ 4,492,390	-

The fair value of a financial instrument is approximated by the consideration that would be agreed to in an arm's length transaction between willing parties and through appropriate valuation methods, but considerable judgement is required for the Company to determine the value. The actual amount that could be realized in a current market exchange could be different than the estimated value.

The fair values of financial instruments included in current assets and current liabilities approximate their carrying values due to their short-term nature.

The fair value of the long-term debt is based on rates currently available for items with similar terms and maturities. The convertible and non-convertible debenture fair values are not readily determinable as the convertible debentures have been issued to shareholders of the Company. The fair values of financial instruments in other long-term liabilities approximate their carrying values as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

23. FINANCIAL RISK MANAGEMENT

The primary risks that affect the Company are set out below and the risks have not changed during the reporting periods. The list does not cover all risks to the Company, nor is there an assurance that the strategy of management to mitigate the risks is sufficient to eliminate the risk.

Risks arising from financial instruments and risk management

The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

Risk management is the responsibility of the corporate finance function. Material risks are monitored and are regularly discussed with the Audit Committee of the Board of Directors.

Credit risk

The Company's cash is held in accounts or short-term interest bearing accounts at one of the major Canadian chartered banks. Management perceives the credit risk to be low. Typically the outstanding accounts receivable balance is relatively concentrated with a few large customers representing the majority of the value. As at September 30, 2018, five customers accounted for 66% (2017 - five customers accounted for 63%) of the outstanding balance. The Company has had minimal bad debts over the past several years and accordingly management has recorded an allowance of \$10,000 (2017 - \$10,000).

Trade accounts receivable are aged as follows at September 30:

	2018	2017
Current	\$ 1,171,341	\$ 1,084,414
0 - 30 days past due	117,975	176,002
31 - 60 days past due	18,686	73,268
61 days and over past due	5,478	3,804
	<u>\$ 1,313,480</u>	<u>\$ 1,337,488</u>

22. FINANCIAL RISK MANAGEMENT (Continued)***Market risk and foreign currency risk***

Market risk is the risk that changes in market prices, such as foreign exchange rates, will affect the Company's income or the value of its financial instruments. The Company's activities that result in exposure to fluctuations in foreign currency exchange rates consist of the sale of products and services to customers invoiced in foreign currencies and the purchase of services invoiced in foreign currencies. The Company does not use financial instruments to hedge these risks. As at September 30 the significant balances, quoted in Canadian dollars, held in foreign currencies are:

	US dollars		Euros	
	2018	2017	2018	2017
Cash	\$ 42,557	\$ 52,902	247	5
Accounts receivable	652,429	458,941	314,402	413,117
Accounts payable and accrued liabilities	204,696	406,000	-	11,987

The Company's revenue and expenses by foreign currency for the quarters ended September 30, 2018 and 2017 are as follows:

	2018	2017
Revenue		
Euros	43%	40%
U.S. dollars	53%	56%
Expenses		
U.S. dollars	6%	7%

Based upon prior year results, the impact of a 5% increase in the U.S. dollar against the Canadian dollar would result in an increase in annual U.S. dollar based revenue of about \$330,400 Cdn. The impact of a 5% increase in the Euro against the Canadian dollar would result in an increase in annual Euro based revenue of about \$271,500. Correspondingly, the impact of a 5% decrease in the U.S. dollar against the Canadian dollar would result in a loss in annual U.S. dollar based revenue of about \$330,400 Cdn. The impact of a 5% decrease in the Euro against the Canadian dollar would result in a loss in annual Euro-based revenue of about \$271,500.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulties in meeting its financial liability obligations as they become due. The Company has a planning and budgeting process in place to help determine the funds required to support the normal operating requirements on an ongoing basis. The Company has financed its cash requirements primarily through issuance of securities, short-term borrowings, long-term debt and debentures. The Company controls liquidity risk through management of working capital, cash flows and the availability of sourcing of financing.

Interest rate risk

Financial instruments that potentially subject the Company to cash flow interest rate risk are those assets and liabilities with a variable interest rate. Interest rate risk exposure is primarily on the BDC debt that has a variable rate that is pegged to the bank rate. The rate can be fixed at the Company's option, if the outlook for interest rates should move higher. The only other variable debt the Company has is the \$1,500,000 line of credit that bears interest at the bank's prime lending rate plus 2.25%. A 1% increase in the bank rate would cost the Company approximately \$30,000 per year for BDC and about \$15,000 on the line of credit usage if it were fully used throughout the fiscal year.

24. SEGMENTED INFORMATION

The Company operates in two ways: (i) the development, manufacturing and sales of antigens as materials for the medical diagnostic industry or as quality assessment products and, (ii) the development and commercialization of novel and proprietary products or technologies such as Lumisort and Kinlytic. The following is an analysis of the Company's revenues and profits from continuing operations for the year, segmented between antigens, Lumisort and Kinlytic:

	Segment revenue		Segment loss	
	2018	2017	2018	2017
Antigen Products and Technologies	\$ 12,510,558	\$ 10,185,798	\$ (407,379)	\$ (3,510,718)
Lumisort™	-	-	(8,101,911)	(269,370)
Kinlytic®	-	-	(112,276)	-
Total for continuing operations	\$ 12,510,558	\$ 10,185,798	\$ (8,621,566)	\$ (3,780,088)

Segment revenue reported above represents revenue generated from external customers. There were no inter-segment sales in the current period (2017 - \$Nil).

The accounting policies of the reportable segments are the same as the Company's accounting policies described in Note 3. Segment loss represents the profit (loss) before tax earned by each segment without allocation of central administration costs, directors' fees, and finance costs. These general costs are reflected in the Antigen Products and Technologies segment. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance. The Lumisort segment loss includes impairment of long-term assets of \$7,878,758 (2017-NIL), which is recognized in loss and comprehensive loss for the year.

Segmented assets and liabilities as at September 30 are as follows:

	Segment assets		Segment liabilities	
	2018	2017	2018	2017
Antigen Products and Technologies	\$ 14,651,481	\$ 14,181,887	\$ 8,696,565	\$ 11,262,928
Lumisort™	-	7,597,138	-	-
Kinlytic®	3,078,586	3,078,586	-	-
	\$ 17,730,067	\$ 24,857,611	\$ 8,696,565	\$ 11,262,928

All assets are allocated to reportable segments other than interests in associates and current and deferred tax assets. Assets used jointly by reportable segments are allocated on the basis of the revenues earned by individual reportable segments. All liabilities are allocated to reportable segments other than borrowings and current and deferred tax liabilities. Liabilities for which reportable segments are jointly liable are allocated in proportion to segment assets.

Segmented depreciation and amortization and additions to non-current assets as at September 30 are as follows:

	Depreciation and amortization		Additions to non-current assets	
	2018	2017	2018	2017
Antigen Products and Technologies	\$ 537,680	\$ 321,342	\$ 1,102,089	\$ 203,260
Lumisort™	152,398	188,817	434,021	238,372
Kinlytic®	-	-	-	308,057
	\$ 690,078	\$ 510,159	\$ 1,536,110	\$ 749,689

25. GEOGRAPHIC INFORMATION

The Company operates in three principal geographical areas – North America (where it is domiciled), Europe and in other foreign countries. The Company's revenue from external customers is tracked based on the bill-to location. Information about its non-current assets by location of assets are also detailed below. It should be noted that our distribution partner for Asia is based in the United States, so most sales destined to Asia are reflected in the North American total.

	Revenue from external customers		Non-current assets	
	2018	2017	2018	2017
North America	\$ 5,863,529	\$ 4,082,094	\$ 13,243,049	\$ 20,275,774
Europe	6,493,927	5,470,037	-	-
Other foreign countries (directly)	153,102	633,667	-	-

26. RELATED PARTY TRANSACTIONS*Key management compensation*

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company. Key management includes directors and key management executive officers. Compensation for the Company's key management personnel was as follows:

	2018	2017
Short-term wages, bonuses and benefits	\$ 901,575	\$ 815,443
Share-based payments	403,744	423,599
Total key management compensation	\$ 1,305,318	\$ 1,239,042

On September 12, 2017, the Company issued two outstanding shareholder interest bearing loans for total proceeds of \$200,000. These loans were repaid on October 23, 2017. On March 28, 2018 the board of directors approved the repricing of 1,500,000 of warrants held by a director of the Company. These warrants were repriced from \$0.55 to \$0.32 and the expiry was extended by one year. The non-cash financial impact was \$128,901, which is included in general and administrative expenses.

2024 and thereafter	7,132,166
	<u>\$ 11,522,125</u>

Commitments for the Company's long term debt and bank indebtedness are discussed in note 10.

Contingencies

The Company is not party to any legal proceedings arising out of the normal course of business.

28. SETTLEMENT OF DISPUTES AND LAWSUITS**Sale of Microbix' WFI business to Irvine Scientific**

On December 30, 2016 Microbix reached a final settlement with Irvine Scientific Inc. over an ongoing dispute related to the sale of the Company's Water-for-Injection business to Irvine Scientific that occurred in December 2012. Irvine Scientific had filed a Notice of Arbitration with the American Arbitration Association in New York as stipulated in its original agreement with Microbix. Prior to initiation of the arbitration proceeding the companies agreed on final settlement terms, namely Microbix will pay Irvine a total amount of (U.S.) \$192,500, which was fully paid by September 30, 2017.

Settlement of Zeptomatrix Lawsuit

On October 5, 2016, Zeptomatrix Corporation filed a statement of claim against Microbix in Canadian Federal Court, alleging infringement of its Canadian patent. During fiscal 2017 Microbix defended itself against these allegations, maintaining it did not infringe this patent. On October 11, 2017 Microbix announced the court approval of a legal dispute settlement with Zeptomatrix Corporation, with the latter party's claims of patent infringement being withdrawn. The withdrawal of the lawsuit was "with prejudice", following a settlement agreement between the parties that was to Microbix' satisfaction.

29. COMPARATIVE CONSOLIDATED FINANCIAL STATEMENTS

The comparative consolidated financial statements have been reclassified from statements previously presented to conform to the presentation of the 2018 consolidated financial statements.
