Certain information, in particular the accompanying notes, normally included in the audited annual consolidated financial statements prepared in accordance with IFRS has been omitted or condensed. 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies as disclosed in the Company's audited annual consolidated financial statements for the year ended September 30, 2018 have been applied consistently in the preparation of these unaudited condensed consolidated interim financial statements, except as detailed below.

(a) New standards recently adopted

IFRS 9 – Financial Instruments

Effective October 1, 2018, the Company adopted IFRS 9, "Financial Instruments", issued in July 2014, which replaces IAS 39, "Financial Instruments: Recognition and Measurement". The new standard accounts for all aspects of financial instruments and includes a logical model for classification and measurement, a single forward looking 'expected-loss' impairment model and a substantially reformed approach to hedge accounting. Adoption of this new standard did not have a material impact on the Company's financial statements. The Company has adopted IFRS 9 using a retrospective approach with no impact to the net earnings or opening retained earnings of comparative periods.

The Company has revised the description of its accounting policy for financial instruments to reflect the new classification approach as follows:

On initial recognition, financial instruments as measured at fair value. Measurement in subsequent periods depends on the classification of the financial instruments described below:

Amortized cost: Financial instruments under this classification include cash, accounts receivable, due from related parties, bank indebtedness, accounts payable and accrued liabilities, due to related parties and loan payable.

Fair value through profit or loss: Financial instruments under this classification include foreign exchange forward contracts.

Fair value through other comprehensive income: The Company has no financial instruments under this classification.

IFRS 9 replaces the incurred loss model in IAS39 with a forward-looking expected credit loss model ("ECL"). This new model applies to financial assets measured at amortized cost. Under IFRS 9, credit losses are recognized earlier than under IAS 39. The Company's accounts receivable balance is primarily comprised of amounts due from customers. The Company has determined the adoption of IFRS 9 has resulted in no additional recorded impairment allowance for the nine months ended June 30, 2019.

IFRS 15 – Revenue from Contracts with Customers

Effective October 1, 2018, the Company adopted IFRS 15 issued in May 2014, and amended in September 2015 and April 2016. IFRS 15 replaces the existing revenue recognition guidance with a single comprehensive accounting model. The standard requires an entity to recognize revenue to reflect the transfer of goods and services for the amount it expects to receive when control is transferred to the purchaser of such goods and services.

As a result of the adoption of IFRS 15, no changes to the Company's comparative financial statements were required. IFRS 15 did not have a material impact on the condensed interim financial statements of loss and comprehensive loss or its condensed interim statements of financial position as at June 30, 2019.

IFRS 15 – Revenue from Contracts with Customers, continued

The Company has revised the description of its accounting policy for revenue recognition to reflect the new standard as follows:

The Company recognizes revenue when control of the goods and services has been transferred to the customer. Revenue is measured at the fair value of the amount of consideration to which the Company expects to be entitled to, including variable consideration, if any, to the extent that it is highly probable that a significant reversal will not occur.

Net revenue reflects the Company's sale of merchandise, less returns, and after making allowance for anticipated discounts and rebates.

(b) Future changes to accounting standards

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or International Financial Reporting Interpretations Committee ("IFRIC") that are mandatory for accounting periods beginning on January 1, 2019 or later periods. The standards implemented or impacted that are applicable to the company are as follows:

- i) IFRS 16, 'Leases', was published in January 2016, replacing IAS 17, 'Leases', and related interpretations. The standard introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. Lessors continue to classify leases as finance and operating leases. Other areas of the lease accounting model have been impacted, including the definition of a lease. Transitional provisions have been provided. IFRS 16 becomes effective for annual periods beginning on or after January 1, 2019, and is to be applied retrospectively. The Company is currently assessing the impact of the new standard on its consolidated financial statements.
