

PURE NICKEL INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS

YEAR ENDED NOVEMBER 30, 2017

Background and overview

This Management's Discussion and Analysis ("MD&A") is intended to assist readers in understanding Pure Nickel Inc. ("Pure Nickel," the "Corporation," the "Company", "we," "our," "us"), its business environment and future prospects. This MD&A should be read in conjunction with the Company's consolidated audited financial statement for the years ended November 30, 2017. Those financial statements are presented in Canadian dollars and prepared in accordance with International Financial Reporting Standards ("IFRS"). Unless otherwise indicated, all dollar amounts refer to Canadian funds. Information herein includes any significant developments to March 13, 2018, the date on which this MD&A was approved by our directors.

Historically, we have been in the business of acquiring, exploring and developing mineral properties in Canada and the United States of America ("US"), primarily those containing nickel ("Ni"), platinum group elements ("PGE"s), copper ("Cu"), gold ("Au"), silver ("Ag") and associated base and precious metals. We continuously evaluate our mineral property holdings with respect to carrying costs and the future likelihood of any property driving shareholder value. Past and future divestiture decisions have been, and will be made based on this criterion. We are also investigating other opportunities, such as sale of assets and project acquisitions that would enable the Company to diversify and grow.

Our common shares trade on the TSX Venture Exchange under the symbol "NIC."

We were incorporated under the *Company Act* (British Columbia) on April 29, 1987, and continued under the *Canada Business Corporations Act* on April 7, 2009. We conduct our US operations through a wholly-owned subsidiary, Nevada Star Resource Corp. (U.S.), a Nevada corporation. Nevada Star Resource Corp. (U.S.) was the sole member of MAN Alaska LLC, a Delaware limited liability company, until April 25, 2016, the date on which MAN Alaska LLC was dissolved.

Royalty Interest - Milford Copper Property, Utah

The Milford Copper Property was previously owned by CS Mining LLC ("CS Mining") and is now owned by Tamra Mining Company, LLC ("Tamra"). The Company holds a 1% net smelter royalty on all Tamra's Milford properties. That Royalty is shared with another party on a pro-rata basis, with the Company's royalty capped at US\$5,000,000 (\$6,444,000) and the other party's royalty capped at US\$3,000,000 (\$3,866,400). During the year ended November 30, 2017, the Company received total royalty payments of US\$388,585 (\$487,172) (2016 - \$nil). As a result, the remaining maximum royalty is US\$4,611,415 (\$5,943,192) as at November 30, 2017 (2016 - US\$5,000,000).

The Company was previously informed by CS Mining that the property was in production and there were royalties owing. In June 2016, a group of creditors of CS Mining filed a petition for involuntary Chapter 11 bankruptcy and two of CS Mining's owners filed an action against the other owners of the company. Subsequently, CS Mining converted the involuntary bankruptcy to voluntary Chapter 11 bankruptcy and a bidding process for the assets ensued. As a result of the bankruptcy filing by CS Mining, the timing of the royalty payments was uncertain, therefore the royalty was written down to \$1 during the year ended November 30, 2016. On August 29, 2017, the successful bidder, Tamra became the owner of the Milford Copper Property and on August 31, 2017, the Company received a court approved royalty payment, for previously earned royalty, of \$486,158 (US\$387,810).

PURE NICKEL INC.**MANAGEMENT'S DISCUSSION AND ANALYSIS****November 30, 2017**

During the year ended November 30, 2017, the Company evaluated its royalty interest in Milford Copper Property for indication that the impairment loss that had been recognized in previous periods either no longer existed or had decreased. The Company concluded that due to the positive developments, which included new ownership and the activities post acquisition of Milford Copper Property, that there were indicators that the asset value had increased. Thus, the management estimated the recoverable amount and reversed a portion of previously recognized impairment of \$1,067,863 (US\$851,805).

Exploration and Evaluation Projects

We have mineral rights for a number of properties in North America. A summary of the properties, is presented below.

Property	Location	Claims area (approx.)	Comments
William Lake¹	Manitoba (70 km from Grand Rapids)	10,566 hectares	The William Lake property has the potential for nickel and PGEs. An extensive exploration program was conducted during 2008. A re-assay program was completed in 2012 and preliminary target modelling was completed in 2013. The costs to maintain the claims on this property are minimal as the Company has banked work credits that will be used at renewal.
Fond du Lac²	Saskatchewan (20 km NW of Stony Rapids)	19,713 hectares	This nickel, copper property is currently in the early exploration stage. The costs to maintain the claims on this property are minimal as the Company has banked work credits that will be used at renewal.
Manibridge¹	Manitoba (128 km SW of Thompson)	274 hectares	This nickel property is located in the Thompson Nickel Belt. The costs to maintain the claims on this property are minimal as the Company has banked work credits that will be used at renewal.
HPM¹	Quebec (180 km NW of Sept Isles)	748 hectares	This nickel, copper property is in the early exploration stage. We own 50% of this property and Murchison Minerals Ltd. owns the other 50%.

¹ Properties were part of a property purchase from Xstrata Nickel terms included:

- a net smelter royalty of 2% on each property with Pure Nickel having the right to reacquire 1% by payment of \$1,000,000 with respect to a particular property at any time up to twelve months after commercial production has been achieved on that property;
- off-take and marketing rights for all concentrate or product produced from the properties; and
- the right to retain one back-in right to 50% for any one mining project with an economic threshold of 15,000,000 tons of resources.

² Property is subject to a 0.5% NSR

We continue to evaluate the properties in our portfolio and make divestiture decisions based on the carrying costs of maintaining the claims in good standing and the likelihood of directing resources towards exploration on the properties.

Tower Property, Manitoba

On March 31, 2015, we announced we had signed an agreement with Akuna Minerals Inc. ("Akuna") for the sale of the Company's 30% interest in the Tower Property. This sale closed on May 22, 2015. Under the terms of the agreement, Akuna paid us \$1,000,000. In addition, upon achievement of nameplate production, as defined in an NI 43-101 feasibility study, Akuna will make a one-time payment to us of \$500,000. Akuna has advised that they continue to work towards bringing this project into production. They have not committed to a start date at this time.

PURE NICKEL INC.**MANAGEMENT'S DISCUSSION AND ANALYSIS****November 30, 2017**

Outlook

We continue to operate with reduced activity levels and are proactively reducing expenditures in an effort to conserve cash while we identify and evaluate new opportunities going forward. Currently, our properties have sufficient work credits and can therefore be carried at very minimal costs. We are also investigating other opportunities, such as asset sales or project acquisitions that would enable the Company to diversify and grow.

Annual Information

Selected financial information for the previous three completed financial years is set out below.

	Year Ended November 30, 2017 \$	Year Ended November 30, 2016 \$	Year Ended November 30, 2015 \$

Note: * Fully diluted income (loss) per share is not presented since it would be anti-dilutive.

PURE NICKEL INC.**MANAGEMENT'S DISCUSSION AND ANALYSIS****November 30, 2017**

Results of Operations – year ended November 30, 2017

With the exception of royalty payments outlined above, no operating revenues were generated during the year ended November 30, 2017, which is unchanged from the year ended November 30, 2016. This was in accordance with expectations as we are an exploration stage company and expect to finance activities through joint ventures, the sale of property interests, and by raising additional share capital when market conditions are suitable.

We generated a net income of \$107,219 or \$0.00 per share for the year ended November 30, 2017, compared to a net loss of \$2,502,504 or (\$0.04) per share for the year ended November 30, 2016. The net income was primarily due to reversal of impairment of royalty interest in Milford Copper Property of \$1,067,863 (US\$851,805). The income is offset by an increase in administrative and general expenses of \$208,325 compared to the comparative period, which is explained below.

The Company continues to operate with reduced activity levels and reduced expenditures in an effort to conserve cash.

Total comprehensive income was \$129,061 for the year ended November 30, 2017, compared to a total comprehensive loss of \$2,000,244 in the comparable period. This was due to the effect of currency translation adjustment which was an income of \$21,842 in the year ended November 30, 2017 compared to \$7,601 in the comparative period as well as a reclassification to profit and loss of the accumulated currency translation adjustment of \$494,659 related to the cancellation of MAN Alaska LLC on April 25, 2016. The currency translation adjustment results from the effect of translating the balance sheets of our US subsidiary from US dollars into Canadian funds.

Our results included a loss on foreign exchange of \$1,722 for the year ended November 30, 2017 compared to \$1,360 in the comparative period. Interest expense was \$233 for the year ended November 30, 2017 compared to interest income of \$2,613 for the comparative period primarily due to a lower cash balance.

The following table summarizes our administration and general expenses for the years ended November 30, 2017 and 2016:

	November 30, 2017	November 30, 2016
Accounting, audit and legal fees	\$ 57,448	\$ 34,335
Consulting	2,700	9,202
Depreciation	1,297	2,362
Directors' fees	52,125	79,563
Investor relations	517	—
Occupancy (recoveries) costs	(4,442)	40,456
Office and miscellaneous	24,679	57,580
Regulatory, filing and transfer agent fees	14,178	20,159
Salaries and benefits	803,629	488,565
Share-based compensation	-	843
Travel	3,630	14,371
Total administration and general expenses	\$ 955,761	\$ 747,436

PURE NICKEL INC.**MANAGEMENT'S DISCUSSION AND ANALYSIS****November 30, 2017**

Total administration and general expenses for the year ended November 30, 2017 was \$955,761, up from \$747,436 for the year ended November 30, 2016, an increase of 28%. Directors' fee decreased by \$27,438, or 34%, for the year ended November 30, 2017 as the directors agreed to reduce directors' fees in the current fiscal year. Occupancy costs decreased by \$44,898, or 111% when compared to the comparative period as the Company terminated the lease of the office space and moved to virtual office in February 2017. In addition, the Company received a rent refund of \$13,668 in March 2017 related to 2016 fiscal year. Office and miscellaneous expenses decreased by \$32,901 or 57% for the year ended November 30, 2017. This decrease is a result of the overall emphasis on cost reduction. Salaries and benefits increased by \$315,064, or 64%, for the year ended November 30, 2017 compared to the comparative period. This increase is mainly due to the severance compensation for the Company's CEO pursuant to the transition agreement entered on May 26, 2017 whereby the Company's CEO is entitled to, in addition to deferred salary of \$118,800, 24 months' salary, \$528,000 plus US\$100,000. The transition agreement runs until December 31, 2017. The increase is offset by fewer employees compared to prior period and, effective February 1, 2017, the Company's CEO elected to forgo his salary payment to further conserve cash.

Cash provided in operating activities was \$237,907 during the year period ended November 30, 2017, compared to cash used in operating activities of \$770,659 in the comparative period. On August 29, 2017, the successful bidder, Tamra Mining Company, LLC ("Tamra") became the owner of the Milford Copper Property and on November 30, 2017, the Company received a court approved royalty payment, for previously earned royalty, of \$486,158 (US\$387,810). The Company incurred lower accounts payable and accrued liabilities settled in the first two quarters compared to the comparative period as well as lower administration and general costs compared to the comparative period.

Investing activities generated cash of \$75,298 for the year ended November 30, 2017 compared to \$517 in the year ended November 30, 2016. In December 2016, the Company cancelled one of its corporate credit cards and the associated security of \$33,226 (US\$25,000) in guaranteed investment certificate was redeemed. A further \$45,000 in guaranteed investment certificate was redeemed as the Company reduced the limit of the corporate credit cards in March 2017.

Pure Nickel did not raise any cash through financing activities in the year ended November 30, 2017, nor in the year ended November 30, 2016.

Results of Operations – three months ended November 30, 2017

We generated no operating revenues during the three months ended November 30, 2017, which is unchanged from the three months ended November 30, 2016. This was in accordance with expectations as we are an exploration stage company and expect to finance activities through joint ventures, the sale of property interests, and by raising additional share capital when market conditions are suitable.

We recorded a net loss of \$117,944 or \$0.001 per share for the three months ended November 30, 2017, compared to net loss of \$1,428,603 or \$0.02 per share for the three months ended November 30, 2016. The decrease is due to the impairment of royalty interest during the fourth quarter of 2016 of \$1,266,283 and reduction of administration and general costs of \$91,842.

Total comprehensive loss was \$89,469 for the three months ended November 30, 2017, compared to \$1,384,120 in the comparative period. This was due to the effect of the currency translation adjustment which was a loss of \$6,251 compared to an income of \$855 in the comparative period.

PURE NICKEL INC.**MANAGEMENT'S DISCUSSION AND ANALYSIS****November 30, 2017**

Our results included income on foreign exchange of \$22,280 for the quarter ended November 30, 2017 compared to \$44,783 in the comparative period.

Interest expense increased to \$274 for the three months ended November 30, 2017 compared to income \$234 for the comparative period due to a higher cash balance during the quarter ended November 30, 2016 than in the current quarter.

The following table summarizes our administration and general expenses for the three months ended November 30, 2017 and November 30, 2016:

	Three months ended November 30, 2017	Three months ended November 30, 2016
Accounting, audit and legal fees	\$ 26,204	\$ 3,842
Consulting	1,400	975
Depreciation	324	351
Directors' fees	10,124	12,750
Investor relations	—	9,933
Occupancy recoveries (costs)	703	12,918
Office and miscellaneous	5,250	2,697
Regulatory, filing and transfer agent fees	913	119,479
Salaries and benefits	23,971	84
Share-based compensation	—	206
Travel	2,504	3,842
Total	\$ 71,393	\$ 163,235

Total administration and general expenses for the three months ended November 30, 2017 were \$71,393, down from \$163,235 for the three months ended November 30, 2016, a decrease of 56%. Occupancy costs decreased by \$9,230 or 93%, as the Company terminated the lease of the office space and moved to virtual office in February 2017. Office and miscellaneous expenses decreased by \$7,668 or 59% for the three month period ended November 30, 2017. This decrease is a result of the overall emphasis on cost reduction. Salaries and benefits increased by \$95,508 or 80%, for the three months ended November 30, 2017 compared to the comparable period due the severance compensation to the Company's CEO as noted above.

Cash used in operating activities was \$41,492 during the three month period ended November 30, 2017, compared to \$152,652 in the third quarter of the prior year. The decrease is mainly due to lower expense in the current quarter compared to the comparative period.

Cash used in investing activities of \$36 for the three months ended November 30, 2017 compared to \$782 in the comparative period. This is due to the lower expenditures on exploration and evaluation properties during the quarter ended November 30, 2017.

Pure Nickel did not raise any cash through financing activities in the three months ended November 30, 2017, nor in the three months ended November 30, 2016.

Liquidity and Capital Resources

Currently, none of our property interests generate revenue. Our capital needs have historically been met by the issuance of securities (either through private placements, the exercise of stock options, or the issuance of shares for services, property or other assets). Fluctuations in our share price will affect our ability to obtain future financing, and future financing will represent dilution to existing shareholders. During the year ended November 30, 2017, the Company had a net income of \$107,219 (November 30, 2016 – net loss \$2,502,504), positive cash flow from operations of \$237,907 (November 30, 2016 – negative cash flow of \$770,659) and working capital deficiency as at November 30, 2017 of \$290,718 (November 30, 2016 – working capital of \$176,921). The Company is subject to risks and challenges similar to companies in a comparable stage of exploration. As a result of these risks, there are material uncertainties which cast significant doubt as to the Company's ability to continue as a going concern. There is no assurance that the Company's funding initiatives will be successful and these consolidated financial statements do not reflect the adjustments to carrying values of assets and liabilities and the reported and consolidated statements of financial position classifications that would be necessary if the going concern assumption was inappropriate. These adjustments could be material. Additional funding will be necessary to advance its exploration and development efforts and discussions are ongoing in monetizing some Company assets to assist this. While the Company has been successful in doing so in the past, there can be no assurance that it will be able to do so in the future.

We had cash and cash equivalents of \$570,754 as at November 30, 2017 compared to \$331,239 as at November 30, 2016. This balance includes restricted cash and cash equivalents of \$5,000 (November 30, 2016 - \$83,573) which are funds invested in guaranteed investment certificates with maturities of less than year as security for corporate credit cards.

The exploration and development of our exploration and evaluation projects will require substantial additional capital. Going forward, we continue to seek joint venture and other arrangements with partners by which we can advance the exploration of our properties without bearing all of the exploration costs directly. Management reviews the properties on a regular basis and abandons claims and writes off their book value when it is determined that further exploration is not likely to be productive

Off-Balance-Sheet Arrangements

We have not entered into any off-balance-sheet financing arrangements.

Proposed Transactions

We are not aware of any proposed transactions involving a proposed asset or business or business acquisition or disposition which may have a material effect on our financial condition, results of operations and cash flows. At any time, however, we may have under consideration potential transactions in such categories as part of the continuous review of our business activities and opportunities.

PURE NICKEL INC.**MANAGEMENT'S DISCUSSION AND ANALYSIS****November 30, 2017**

Related Party Transactions**(a) Compensation awarded to key management personnel**

Key management personnel include the Company's directors, chief executive officer and chief financial officer. Compensation expenses for key management personnel include:

	Year ended November 30, 2017	Year ended November 30 2016
Salaries and other short-term benefits	\$ 709,106	\$ 291,779
Directors' fees	52,125	66,813
Share-based compensation	—	506
	<u>\$ 761,231</u>	<u>\$ 359,098</u>

(b) Transactions with related parties

The Company has no plans or arrangements in respect of remuneration received or that may be received by the named executive officers of the Company in the most recently completed financial year or current financial period in respect of compensating such officers in the event of termination of employment (as a result of resignation, retirement, change of control, etc.) or a change in responsibilities following a change of control; except for an employment agreement with the President and CEO of the Company, which provides that in the event of termination without cause or if a terminating event occurs because of a change in control (or similar event, as defined in the contract), the President and CEO will receive a minimum of 24 months' salary, \$528,000; deferred salary of \$118,800; plus US\$100,000. On February 1, 2017 the President and CEO decided to forgo his salary payments in an effort to improve working capital. On May 26, 2017 a transition agreement was agreed to whereby the CEO and President's severance amounts owing were crystalized as per the forgoing. The agreement runs until December 31, 2017.

Subsequent Events

On December 28, 2017, the Company extended the transition agreement with the Company's CEO and President from December 31, 2017 to March 31, 2018.

Share Capital

At March 13, 2018 and November 30, 2017 share capital was as follows:

Issued and outstanding common shares	68,144,874
--------------------------------------	------------

Critical Accounting Estimates and Policies

Our consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS). Management makes certain estimates and relies upon certain assumptions related to reporting our assets and liabilities as well as results of operations in conformity with IFRS. Actual results will differ from these estimates and assumptions.

The most significant accounting estimates for us relate to the carrying values of our exploration and evaluation property assets, and the reversal of impairment losses previously recognized on the Milford Copper Property royalty interest.

Exploration and evaluation properties consist of exploration and mining claims and leases. Acquisition and exploration costs are capitalized and deferred until such time as the property is put into production or the properties are disposed of either through sale or abandonment. The estimated values of all properties are assessed by us on a continual basis, and if the carrying values exceed estimated recoverable values, then these costs are written down to the estimated recoverable values. If properties are put into production, the costs of acquisition and exploration are amortized over the life of the property, based upon the estimated economic reserves. Proceeds received from the sale of any interest in a property are first credited against the carrying value of the property, with any excess included in operations for the period.

At the end of each reporting period, the Company assesses whether there is any indication that an impairment loss recognized in prior periods for royalty interests may no longer exist or may have decreased. In assessing whether there is any indication that an impairment loss recognized in prior periods may no longer exist or may have decreased, the Company considers observable market data, significant changes in market conditions, and evidence that the royalty's economic performance will be better than expected. Significant judgement required in estimating future cash flows associated with the royalty includes future commodity prices, foreign exchange rates, and production volumes. Management estimated the recoverable amount of the Milford Copper Property royalty interest through the use of third party valuator, and estimated the fair value less costs to sell of the royalty interest based on an evaluation of comparable transactions and the underlying resources of the Milford Copper Property

The following are our more critical accounting policies.

Exploration and evaluation properties

All expenditures related to the cost of exploration and evaluation of mineral resources, including acquisition costs for interests in mineral claims are capitalized as exploration and evaluation properties. Exploration and evaluation costs include costs to acquire and maintain rights to explore, geological, geophysical and geochemical studies, sampling, exploratory drilling, analytical testing, assaying, metallurgical work and directly attributable administrative costs.

General exploration costs not related to a specific exploration and evaluation property or those incurred before the Company has a legal right to explore an area are expensed in the period incurred.

Proceeds received from the sale of properties or cash received from option payments are recorded as a reduction of the related exploration and evaluation property asset.

Exploration and evaluation properties are recorded at cost on a property-by-property basis. The recoverability of the amounts shown for exploration and evaluation properties is dependent upon the existence of economically recoverable reserves, the ability to obtain financing to complete the development of such reserves and meet obligations under various agreements, and future profitable production or, alternatively, upon the Company's ability to recover its costs through a disposition of its exploration and evaluation resource properties. If a project does not prove to be viable, all unrecoverable costs associated therewith would be written off. The amounts shown for exploration and evaluation of the properties do not necessarily represent present or future value. Changes in future conditions could require a material change in the amount recorded for exploration and evaluation.

Foreign currency translation**Translation of foreign operations**

The functional currency for the Company and its subsidiaries is the currency of the primary economic environment in which each operates. The parent company's functional currency is the Canadian dollar. The functional currency for the Company's United States subsidiaries is the United States (US) dollar. The presentation currency for these consolidated financial statements is the Canadian dollar.

Translation of all assets and liabilities from the US dollar functional currency to the presentation currency is performed using the rates prevailing at the balance sheet date. The differences arising upon translation from the functional currency to the presentation currency are recorded as currency translation adjustments in other comprehensive income.

Translation of all income and expenses from the US dollar functional currency to the presentation currency are performed using the average exchange rate for the period with translation gains and losses recorded as currency translation adjustments in other comprehensive income.

Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of loss. Non-monetary items are not retranslated at period-end and are measured at historical cost (translated using the exchange rates at the transaction date).

Share-Based Compensation

The Company has an equity-settled share-based compensation plan for granting stock options to management, directors, employees and consultants. The Company recognizes compensation expense for this plan at fair value so that the fair value of each option grant is estimated on the date of the grant and amortized over the vesting period, with the resulting amortization credited to reserve. The Company uses the accelerated method (also referred to as graded vesting) for allocating stock option expense over the vesting period. Stock option expense incorporates an expected forfeiture rate. The forfeiture rate is based on past experience and expectations of future forfeitures rates. Adjustments are made if the actual forfeiture rate differs from the expected rate. The fair value of each grant is determined using the Black-Scholes option-pricing model. Consideration paid upon the exercise of stock options is recorded as share capital.

Future accounting standards

Certain pronouncements have been issued by the IASB or IFRIC (IFRS Interpretations Committee) that will be effective for future accounting periods. Many of these updates are not applicable or consequential to the Company and are not included in the list below.

IAS 7 – Statements of cash flows

The amendments require disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flow and non-cash changes. These amendments are effective for annual periods beginning on or after January 1, 2017.

IFRS 9 – Financial Instruments

In July 2014, the IASB issued the final version of International Financial Reporting Standard (“IFRS”) 9, “Financial Instruments”, which replaces IAS 39, “Financial Instruments: Recognition and Measurement”. IFRS 9 provides guidance on the classification and measurement of financial assets and financial liabilities, establishes an expected credit losses impairment model and a new hedge accounting model with corresponding risk management activity disclosures. The standard is effective for annual periods beginning on or after January 1, 2018.

IAS 12 – Income Taxes

The amendments clarify that the existence of a deductible temporary difference is not affected by possible future changes in the carrying amount or expected manner of recovery of the asset and also clarify the methodology to determine the future taxable profits used for assessing the utilization of deductible temporary differences. These amendments are effective for annual periods beginning on or after January 1, 2017.

IFRS 15 – Revenue from Contracts with Customers

IFRS 15 presents new requirements for the recognition of revenue, replacing IAS 18 ‘Revenue’, IAS 11 ‘Construction Contracts’, and several revenue-related Interpretations. The new standard establishes a control-based revenue recognition model and provides additional guidance in many areas not covered in detail under existing IFRSs, including how to account for arrangements with multiple performance obligations, variable pricing, customer refund rights, supplier repurchase options, and other common complexities. IFRS 15 is effective for reporting periods beginning on or after January 1, 2018.

IFRS 16 – Leases

IFRS 16 was issued in January 2016. IFRS 16 replaces IAS 17 Leases. IFRS 16 introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than twelve months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. IFRS 16 is effective for fiscal periods beginning on or after January 1, 2019 with early adoption permitted.

Earlier application is permitted for these pronouncements. These new standards are expected to have minimal impact on the Company’s future reporting periods and on foreseeable future transactions.

Disclosure Controls and Procedures

There have been no significant changes in the Company's internal control over financial reporting during the year ended November 30, 2017 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management of the Company has separately filed on SEDAR (at www.sedar.com) the Form 52-109FV2 Venture Issuer Basic Certificate at the same time as having filed the Company's consolidated financial statements and MD&A for the year ended November 30, 2017.

In contrast to the certificate required under National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings* ("NI 52-109"), the venture issuer certificate on Form 52-109FV2 does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers filing certificates for venture issuers are not making any representations relating to the establishment and maintenance of:

- controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation, and
- a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's generally accepted accounting principles.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in their certificate(s). Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement, on a cost effective basis, DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Economic Factors

Our financial performance will be directly affected by the exploration activities to be conducted on our projects, the results of those activities, and the possible development of the properties for commercial production of nickel and/or other valuable minerals. Should the results of such exploration activities warrant bringing any of the projects into commercial production, substantial additional funds would be required. Until such time as commercial production is achieved (and there can be no assurance it will be), we will continue to incur administrative costs and exploration expenditures that are either deferred or expensed, depending upon the nature of those expenditures, resulting in continuing operating losses and significant cash requirements. In the future, should the development of our exploration and evaluation projects occur, then our financial performance will become more closely linked to the prices obtained for the nickel and/or other metals produced.

We report our financial results in Canadian dollars although our revenues, if any, will be primarily earned in US dollars, while our expenses are in both currencies. The Canadian dollar has shown significant volatility compared with the US dollar. As a result, prices of commodities (such as nickel) as well as the Canadian value of disbursements incurred in United States funds have been highly volatile. We take this volatility and anticipated trends in metal prices and foreign exchange rates into consideration when evaluating our business, prospects and projects and expenditures thereon.

Risks

Any investment in our common shares involves a high degree of risk. Selected risk factors are shown below. In addition to the other information presented in this Management Discussion and Analysis, you should consider the following risk factors carefully in evaluating Pure Nickel Inc., our business, and the mineral exploration and mining industry.

We have a limited operating history and as a result there is no assurance we can operate profitably or with a positive cash flow.

We are an exploration stage company. Our operations are subject to all the risks inherent in the establishment of an exploration stage enterprise and the uncertainties arising from the absence of a significant operating history. Investors should be aware of the difficulties normally encountered by mineral exploration companies and the high rate of failure of such enterprises. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the exploration of the exploration and evaluation properties that we plan to undertake. These potential problems include, but are not limited to, unanticipated problems relating to exploration, and additional costs and expenses that may exceed current estimates. The amounts disbursed by us in the exploration of the mineral claims may not result in the discovery of mineral deposits. Problems such as unusual or unexpected formations of rock or land and other conditions are involved in mineral exploration and often result in unsuccessful exploration efforts. If the results of future exploration programs do not reveal viable commercial mineralization, we may decide to abandon our claims and in fact have abandoned some already.

If we do not obtain additional financing, our business will fail and investors could lose their investment.

We had cash of \$570,754 and net working capital deficiency of \$290,718 as at November 30, 2017. We do not currently generate revenues or cash flows from operations (except for interest income and payments that are credited to exploration and evaluation properties on the balance sheet rather than being identified as revenues in our statement of operations). The exploration and development of our mineral projects will require substantial additional capital. In order to maintain certain of our property claims, we must incur certain minimum exploration expenditures on an ongoing basis. There can be no assurance that we will have the funds required to make such expenditures or that those expenditures will result in positive cash flow. There are no arrangements in place for additional financing and there is no assurance that we will be able to find such financing if required.

We are an exploration company with an accumulated deficit of \$54,635,165 as at November 30, 2017. With ongoing cash requirements for exploration, development and new operating activities, it will be necessary to raise substantial funds from external sources. If we do not raise these funds, we will be unable to pursue our business activities, and our investors could lose their investment. If we are able to raise funds, investors could experience a dilution of their interests that would negatively affect the market value of the shares.

Because there is no assurance that we will generate revenues, we face a high risk of business failure.

We have not earned any revenues to date and have never had positive cash flow. Before being able to generate revenues, we will incur substantial operating and exploration expenditures without receiving any revenues. If we are unable to generate significant revenues from our activities, we will not be able to earn profits or continue operations. Based upon current plans, we expect to incur significant operating losses in the future. We cannot guarantee that we will be successful in raising capital to fund these operating losses or generate revenues in the future. There is no assurance that we will ever generate any operating revenues or ever achieve profitable operations. If we are unsuccessful in addressing these risks, our business may

fail and our investors could lose some or all of their investment.

There are no known reserves of minerals on our mineral claims and there is no assurance that we will find any commercial quantities of minerals.

We have not found any mineral reserves on our claims and there can be no assurance that any of the mineral claims under exploration contain commercial quantities of any minerals. Even if commercial quantities of minerals are identified, there can be no assurance that we will be able to exploit the reserves or, if we are able to exploit them, that it can be done on a profitable basis. Substantial expenditures will be required to locate and establish mineral reserves, to develop metallurgical processes and to construct mining and processing facilities at a particular site, and substantial additional financing may be required. It is impossible to ensure that the exploration or development programs planned by us will result in a profitable commercial mining operation. The decision as to whether a particular property contains a commercial mineral deposit and should be brought into production will depend on the results of exploration programs and/or feasibility studies, and the recommendations of duly qualified engineers and geologists. Several significant factors will be considered, including, but not limited to: (i) the particular attributes of the deposit, such as size, grade and proximity to infrastructure; (ii) metal prices, which are highly cyclical; (iii) government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection; (iv) ongoing costs of production; and (v) availability and cost of additional funding. The effect of these factors cannot be accurately predicted, but the combination of these factors may result in us receiving no return or an inadequate return on invested capital.

Because of the speculative nature of the exploration of natural resource properties, there is substantial risk that our business will fail.

While the discovery of a commercially viable ore body may result in substantial rewards, few exploration and evaluation properties which are explored are ultimately developed into producing mines. There is no assurance that any of the claims that we will explore or acquire will contain commercially exploitable reserves of minerals. Exploration for natural resources is a speculative venture involving substantial risk. Even a combination of careful evaluation, experience and knowledge may not eliminate such risk. Hazards such as unusual or unexpected geological formations, formation pressures, fires, power outages, labour disruptions, flooding, cave-ins, landslides, and the inability of us to obtain suitable machinery, equipment or labour are all risks involved with the conduct of exploration programs and the operation of mines.

Development and exploration activities depend, to one degree or another, on adequate infrastructure. Reliable roads, bridges, power sources and water supply are important determinants, which affect capital and operating costs. Unusual or infrequent weather phenomena, sabotage, government or other interference in the maintenance or provision of such infrastructure could adversely affect our operations, financial condition and results of operations.

We are subject to market factors and volatility of commodity prices beyond our control.

The marketability of mineralized material that we may acquire or discover will be affected by many factors beyond our control. These factors include market fluctuations in the prices of minerals sought which are highly volatile, the proximity and capacity of natural resource markets and processing equipment, and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The effect of these factors cannot be predicted, but may result in a very low or negative return on invested capital. Prices of certain minerals have fluctuated widely, particularly in recent years, and are affected by numerous factors beyond our control. Future mineral prices cannot be accurately predicted. A severe decline in the price of a mineral being produced or expected to be produced by us would have a material adverse effect on us, and could result in the suspension of our exploration programs or mining operations.

Our stock price could be volatile.

Market prices of securities of many public companies have experienced significant fluctuations in price that have not been related to the operating performance, underlying asset values or prospects of such companies. The market price of our common shares has been and is likely to remain volatile. Results of exploration activities, the price of nickel, future operating results, changes in estimates of our performance by securities analysts, market conditions for natural resource companies in general, and other factors beyond our control could cause a significant decline of the market price of our common shares.

If we do not make certain payments or fulfill other contractual obligations, we may lose our option rights and interests in our joint ventures.

We may, in the future, be unable to meet our share of costs incurred under option or joint venture agreements to which we are a party and we may have our interest in the properties subject to such agreements reduced as a result. Furthermore, if other parties to such agreements do not meet their share of such costs, we may be unable to finance the cost required to complete programs. The loss of any option rights or interest in joint ventures would have a material, adverse effect on us.

We may not have good title to our exploration and evaluation properties, potentially impairing our value.

The acquisition of title to exploration and evaluation properties is a very detailed and time-consuming process. Title to exploration and evaluation properties may be disputed. Although we believe we have taken reasonable measures to ensure proper title to our properties, there is no guarantee that title to any of our properties will not be challenged or impaired. Third parties may have valid claims underlying portions of our interests, including prior unregistered liens, agreements, transfers or claims, including aboriginal land claims, and title may be affected by, among other things, undetected defects or unforeseen changes to the boundaries of our properties by governmental authorities. As a result, we may be constrained in our ability to operate our properties or unable to enforce our rights with respect to our properties. An impairment to or defect in our title to our properties could have a material adverse effect on our financial condition or results of operations. In addition, such claims, whether or not valid, will involve additional cost and expense to defend or settle.

If key employees or contractors leave the company, we will be harmed since we are heavily dependent upon them for all aspects of our activities.

We are dependent upon key employees and contractors, the loss of any of whom could have a negative impact on our ability to operate the business and could cause a decline in the value of, or cash flows from, our properties or additional costs resulting from a delay in development or exploration of properties.

If we do not comply with all applicable regulations, we may be forced to halt our business activities and/or incur significant expense.

We are subject to government and environmental regulations. Permits from a variety of regulatory authorities are required for many aspects of exploration, mining operations and reclamation. We cannot predict the extent to which future legislation and regulation could cause additional expense, capital expenditures, restrictions, and delays in the development of our Canadian and/or US properties, including those with respect to unpatented mining claims.

Failure to comply with applicable environmental laws, regulations and permitting requirements may result in enforcement actions including orders issued by regulatory or judicial authorities that may result in operations ceasing or being curtailed; and may include corrective measures requiring capital expenditures, installation of additional equipment, or other expensive and/or time-consuming remedial actions. Parties engaged in the exploration or development of exploration properties may be required to compensate those

suffering loss or damage by reason of such parties' activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations.

Our activities are not only subject to extensive federal, provincial, state and local regulations controlling the exploration and mining of exploration and evaluation properties, but also the possible effects of such activities upon the environment as well as costs, cancellations and delays resulting from lobbying activities of environmental groups. Future legislation and regulations could cause additional disbursements, capital expenditures, restrictions and delays in the development of our properties, the extent of which cannot be predicted. Also, as noted above, permits from a variety of regulatory authorities are required for many aspects of mine operation and reclamation. In the context of environmental permitting, including the approval of reclamation plans, we must comply with known standards, existing laws and regulations that may entail greater or lesser costs and delays, depending on the nature of the activity to be permitted and how stringently the regulations are implemented by the permitting authority. If we become more active on our properties, compliance with environmental regulations may increase our costs. Such compliance may include feasibility studies on the surface impact of proposed operations; costs associated with minimizing surface impact, water treatment and protection, reclamation activities including rehabilitation of sites, ongoing efforts at alleviating the mining impact on wildlife, and permits or bonds as may be required to ensure our compliance with applicable regulations. The costs and delays associated with such compliance may result in us deciding not to proceed with exploration, development or mining operations on any exploration and evaluation properties.

Exercise of outstanding options, and other future issuances of securities, will result in dilution of our common shares.

As of March 13, 2018 and November 30, 2017, there were 68,144,874 common shares issued and outstanding and no options outstanding.

The holders of the options were given an opportunity to profit from a rise in the market price of the common shares with a resulting dilution in the interest of the other shareholders. Our ability to obtain additional financing during the period such rights are outstanding may be adversely affected and the existence of the rights may have an adverse effect on the price of the common shares. The holders of options may exercise such securities at a time when we would otherwise be able to obtain any needed capital by a new offering of securities on terms more favourable than those provided by those outstanding rights.

The increase in the number of common shares issued and outstanding and the possibility of sales of such shares may depress the market price of our common shares. In addition, as a result of any such issuances the votes of existing shareholders will be diluted.

Forward-Looking Statements

This Management Discussion and Analysis includes forward-looking statements concerning our future performance, operations, and financial performance and financial condition. These forward-looking statements may include, among others, statements with respect to our objectives and strategies to achieve those objectives, as well as statements with respect to our beliefs, plans, expectations, anticipations, estimates, and intentions. When used herein, the words “plan”, “believe”, “anticipate”, “may”, “should”, “intend”, “estimate”, “expect”, “project”, and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such words. These forward-looking statements are based on current expectations. We caution that all forward-looking information is inherently uncertain and actual results may differ materially from the assumptions, estimates, or expectations reflected or contained in the forward-looking information, and that actual future performance will be affected by a number of factors including economic conditions, technological change, regulatory change, and competitive factors, many of which are beyond our control.

Future events and results may vary significantly from what is expected. We are under no obligation (and we expressly disclaim any such obligation) to update or alter the forward-looking statements whether as a result of new information, future events or otherwise.

Additional Information

Additional information about Pure Nickel is available on our website at www.purenickel.com, on the SEDAR website at www.sedar.com.
