

WILTON RESOURCES INC.

Management Discussion and Analysis

**For the three and nine-month periods ended September
30, 2020 and 2019**

MANAGEMENT DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis ("MD&A") of Wilton Resources Inc. ("Wilton" or the "Company") should be read in conjunction with the unaudited interim condensed consolidated financial statements of the Company as at and for the three and nine-month periods ended September 30, 2020 and 2019 (the "Financial Statements") and the most recent audited consolidated financial statements of the Company for the years ended December 31, 2019 and 2018 and the related MD&A. Amounts herein are expressed in Canadian dollars except where indicated otherwise. The Financial Statements are prepared in accordance with IAS 34 Interim Financial Reporting and do not include all information required for full annual consolidated financial statements. The most recent audited consolidated financial statements of the Company for the years ended December 31, 2019 and 2018 and all comparative information herein have been prepared in accordance with International Financial Reporting Standards ("IFRS").

This MD&A, as well as the Financial Statement and additional information regarding the Company are available on the Company's SEDAR profile at www.sedar.com.

This MD&A is dated November 26, 2020 and was prepared by management of the Company. The board of directors of the Company approved this MD&A on November 26, 2020.

FORWARD-LOOKING INFORMATION

Certain statements contained in this MD&A constitute forward-looking statements. These statements relate to future events or the Company's future performance. All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "potential", "targeting", "intend", "could", "might", "should", "believe", "prospect", "future", "possible", "can", "speculative", "perhaps" and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Company believes that the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this MD&A should not be unduly relied upon. These statements speak only as of the date of this MD&A. The Company does not intend, and does not assume any obligation, to update or revise these forward-looking statements except as required pursuant to applicable securities laws.

Forward looking information and statements are included throughout this MD&A and include, but are not limited to, statements pertaining to the following:

- *the Company's ability to continue as a going concern;*
- *the potential impacts of access to capital conditions;*
- *the Company's pursuit to acquire oil and natural gas properties in various international locations, including in the Middle East and Africa;*
- *the Company's liquidity and capital resources;*
- *the nature of the risks faced by the Company; and*
- *the potential impacts of COVID-19.*

The Company's actual results could differ materially from those anticipated in these forward-looking statements as a result of the risk factors set forth below and elsewhere in this MD&A:

- *general economic conditions in Canada, the United States and globally, including reduced availability of debt and equity financing generally;*
- *industry conditions, including fluctuations in the price of oil, NGL and natural gas;*
- *governmental regulation of the oil and gas industry, including environmental regulation;*
- *fluctuation in foreign exchange or interest rates;*
- *liabilities inherent in oil and natural gas operations;*
- *geological, technical, drilling and processing problems and other difficulties in producing reserves;*

- *uncertainties associated with estimating oil and natural gas reserves;*
- *incorrect assessments of the value of acquisitions;*
- *unanticipated operating events which can reduce production or cause production to be shut in or delayed;*
- *failure to obtain industry partner and other third party consents and approvals, when required;*
- *stock market volatility and market valuations;*
- *availability of financing on acceptable terms;*
- *competition for, among other things, capital, acquisitions of reserves, undeveloped land and skilled personnel;*
- *competition for and inability to retain drilling rigs and other services;*
- *rights to surface access;*
- *the need to obtain required approvals from regulatory authorities;*
- *general business and market conditions;*
- *Economic slow down as a result of COVID-19; and*
- *Changes in commodity prices*

These factors should not be considered exhaustive. Statements in respect of “reserves” are by their nature forward-looking statements, as they involve the implied assessment, based on certain estimates and assumptions that the reserves described can be profitably produced in the future.

Forward-looking statements or information is based on a number of factors and assumptions which have been used to develop such statements and information but which may prove to be incorrect. Although the Company believes that the expectations and assumptions reflected in such forward-looking statements or information are reasonable, undue reliance should not be placed on forward-looking statements because the Company cannot give any assurance that they will prove to be correct. In addition to other factors and assumptions which may be identified in this document and other documents filed by the Company, assumptions have been made regarding, among other things: future exchange rates; energy markets and the price of oil and natural gas; general economic conditions, commodity and financial markets; the ability to replace and expand oil and natural gas reserves through acquisition, development or exploration; the ability to acquire oil and natural gas properties in various international locations, including in the Middle East and Africa; current technology; cash flow; commodity prices; production rates; effects of regulation and environmental and tax laws; future operating costs and the Company’s ability to obtain financing on acceptable terms. Readers are cautioned that the foregoing list of factors is not exhaustive.

The above summary of assumptions and risks related to forward-looking information has been provided in this MD&A in order to provide readers with a more complete perspective on the Company’s future operations and prospects. Readers are cautioned that this information may not be appropriate for other purposes.

The forward-looking statements contained in this MD&A are expressly qualified by this cautionary statement.

DESCRIPTION OF THE BUSINESS

Hackamore Capital Corp. was incorporated under the laws of the Province of Alberta on August 15, 2007 and changed its name to Wilton Resources Inc. on October 27, 2008. On July 24, 2009, the Company completed its initial public offering by way of a capital pool company prospectus. The Company was listed as a capital pool company as defined in Policy 2.4 of the TSX Venture Exchange (“TSXV”) on August 5, 2009. On October 28, 2011, Wilton completed its qualifying transaction by the acquisition of a certain oil and gas interests.

The Financial Statements of the Company comprise accounts of the Company and its subsidiaries (collectively, the "Company" or "Wilton"). Wilton is currently an oil and gas exploration and development company, with a property in Canada, however, the Company is pursuing oil and gas properties in various international locations including the Middle East and Africa.

The common shares of the Company (“Common Shares”) are listed for trading on the TSXV with the trading symbol WIL.

GOING CONCERN

As at September 30, 2020, the Company had a working capital deficit of \$557,036 (December 31, 2019 - \$425,155). The net cash used in operating activities by the Company during the three and nine-month periods ended September 30, 2020, was \$79,876 and \$878,418 (2019 – \$369,127 and \$1,115,812). In order to settle its existing liabilities and continue operations, including its ongoing oil and natural gas acquisition, exploration and development activities, Wilton will require additional financing. The amount of capital required cannot be quantified until additional transactions are identified and completed. Failure to obtain such financing on a timely basis could cause Wilton to forfeit its interest in its properties, to miss certain acquisition opportunities and/or to reduce or terminate its operations. There can be no assurance that debt or equity financing will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to Wilton. Moreover, future activities may require Wilton to alter its capitalization significantly. The inability of Wilton to access sufficient capital for its operations could have a material adverse effect on Wilton's financial condition, results of operations or prospects. These conditions create a material uncertainty which casts significant doubt on the Company's ability to continue as a going concern.

The Company's access to capital and the consequences of COVID-19 will impact its ability to complete exploration and development activities, acquire international concessions and to ultimately achieve profitable operations.

On January 30, 2020, the World Health Organization declared the coronavirus outbreak (COVID-19) a "Public Health Emergency of International Concern" and on March 11, 2020, declared COVID-19 a pandemic. The current and expected impacts on global commerce are anticipated to be far-reaching. To date there have been significant stock market decline and volatility, significant volatility in commodity and foreign exchange markets, restrictions on the conduct of business in many jurisdictions and the global movement of people and some goods have become restricted. There is significant ongoing uncertainty surrounding COVID-19 and the extent and duration of the impacts that it may have on the Company's operations. Concurrent with the impact of COVID-19, demand in energy markets, oil supply to global markets has decreased, placing further negative pressure on oil prices. The extent to which COVID-19 impacts the Company's results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of COVID-19 and actions taken to contain COVID-19 or its impact, among others.

CORPORATE UPDATES

On January 6, 2020, the Company granted 975,000 stock options to purchase Common Shares to certain directors, officers and consultants of the Company. The options vested on the date of the grant and are exercisable for a period of five years from the date of the grant at an exercise price of \$0.50 per Common Share. The fair value of the options was \$0.47.

On January 24, 2020, the Company issued 200,000 Common Shares pursuant to the exercise of 200,000 stock options held by directors and officers at \$0.30 per share for gross proceeds of \$60,000.

On March 26, 2020, the Company closed a non-brokered private placement of 2,000,000 Common Shares at a purchase price of \$0.25 per share for gross proceeds of \$500,000.

On September 14, 2020, the Company closed a non-brokered private placement of an aggregate of 1,000,000 units of the Company at a purchase price of \$0.25 per unit for gross proceeds of \$250,000. Each unit consisted of one Common Share and one Common Share purchase warrant. Each purchase warrant entitles the holder to purchase an additional Common Share for a period of twenty-four months from the date of issuance at an exercise price of \$0.30 per Common Share.

Summary Financial Information

For the period ended	Three months ended September 30, 2020	Three months ended September 30, 2019	Nine months ended September 30, 2020	Nine months ended September 30, 2010
Revenue	\$ 2,724	\$ 687	\$ 9,857	\$ 687

Loss per share – basic and diluted	\$ 0.00	\$ 0.01	\$ 0.01	\$ 0.01	\$ 0.01	\$ 0.01	\$ 0.01	\$ 0.02

Third Quarter 2020 vs Third Quarter 2019

- Revenue increased to \$2,724 and \$9,857 (2019 - \$687 and \$687) due to increased revenue from oil and gas sales.
- General and administrative expenses decreased to \$209,445 and \$919,978 (2019 – 368,359 and \$1,117,176) due to decreased consulting fees, office and travel expenses. Wilton reduced the requirements of consulting services in Q3 2020 as operational activity pertaining to these costs decreased .
- Production costs were \$3,071 and \$5,557 compared to \$326 and \$326 in 2019 due to increased production costs related to the oil and gas sales.
- Share based compensation was \$nil and \$456,293 compared to \$nil and \$271,073 as a result of 975,000 stock options issued in the first quarter of 2020 which vested upon issuance.

DISCUSSION OF OPERATIONS

On April 30, 2019, the Company entered into the Workover Agreement with an Alberta oil and gas company pursuant to which the Company has agreed to participate in the Workover. Upon execution of the Workover Agreement, the Company paid a \$10,000 signing fee. Pursuant to the Workover Agreement, the Company also paid \$50,000 upon receiving a workover notice as a fee for its participation in the Workover and earned a 3.833% working interest in the well.

The Company’s business development plan is focused upon acquiring international oil and natural gas interests. Wilton’s revenue for the three and nine month period ended September 30, 2020 was \$2,724 and \$9,857 (2019 - \$687 and \$687). The Company received revenue from production during the three and nine-month periods ended September 30, 2020 from the Company’s working interest in a well near Highvale, Alberta. Q3 2020 revenue increased from Q2 2020 as realized petroleum prices increased after dropping in Q2 2020. Royalty costs for the three and nine month period ended September 30, 2020 were \$62 and \$561 (2019 - \$33 and \$33) and production costs for the three and nine-month periods ended September 30, 2020 were \$3,071 and \$5,557 (2019 - \$326 and \$326). General and administrative expenses for the three and nine-month periods ended September 30, 2020 were \$209,445 and \$919,978 (2019 - \$368,359 and \$1,117,176). The Company is dedicating resources, including third party consultants, to identify and evaluate potential international oil and natural gas property acquisitions.

General and administrative details for periods ended September 30:

	3 months		9 months	
	2020	2019	2020	2019
Professional	\$ 34,513	\$ 52,672	\$ 114,745	\$ 180,768
Officer & Consulting Costs	129,333	208,773	617,742	614,163
Office and administrative	41,741	70,538	162,639	236,286
Travel and meals	3,858	36,376	24,852	85,959
Total	<u>\$ 209,445</u>	<u>\$ 368,359</u>	<u>\$ 919,978</u>	<u>\$ 1,117,176</u>

General and administrative expenses decreased in the three and nine-month periods ended September 30, 2020 over the prior comparative period principally due to the net effect of the following:

- Travel and meals decreased to \$3,858 and \$24,852 (2019 – \$36,376 and \$85,959) primarily as a result of decreased travel;
- Professional fees decreased to \$34,513 and \$114,745 (2019 - \$52,672 and \$180,768) primarily as a result of decreased legal fees as a result of decreased activities;
- Office and administrative fees decreased to \$41,741 and \$162,639 (2019 - \$70,538 and \$236,286) primarily as a result of decreased activities during the period.
- Officer and Consulting Costs decreased to \$129,333 from \$208,773 during the three months period ended September 30, 2020 as a result of reduced services required from consultants. Although there was a decrease during the three months ended, the net increase during the nine month period ended September 30, 2020 is a result of an increase in officer compensation.

LIQUIDITY AND CAPITAL RESOURCES

The Company is exposed to liquidity risk. Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

As previously highlighted under the Going Concern section of this MD&A, significant doubt exists about the Company's ability to continue as a going concern. As at September 30, 2020, the Company had working capital deficit of \$557,036 including cash of \$186,863 compared with a working capital deficit of \$425,155 including cash of \$280,923 at December 31, 2019. The Company continues to experience negative operating cash flow as a result of limited revenue from its Canadian oil and natural gas assets, coupled with the Company's ongoing expenses related to its international oil and natural gas business development activities. The Company anticipates a negative operating cash flow will continue until such time as international oil and natural gas assets are acquired or developed.

In order to satisfy its existing liabilities and maintain further operations and to carry out its ongoing oil and natural gas acquisition, exploration and development activities, Wilton will require additional financing. The amount of capital required cannot be quantified until additional transactions are identified and completed. Failure to obtain such financing on a timely basis could cause Wilton to forfeit its interest in its property, to miss certain acquisition opportunities and/or to reduce or terminate its operations. Upon any resumption of production, any decrease of Wilton's revenues from its reserves as a result of lower oil and natural gas prices or otherwise will affect Wilton's ability to expend the necessary capital to replace its reserves or to maintain its production. There can be no assurance that debt or equity financing, or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to Wilton. Moreover, future activities may require Wilton to alter its capitalization significantly. The inability of Wilton to access sufficient capital for its operations could have a material adverse effect on Wilton's financial condition, results of operations or prospects. Unfavorable global economic conditions, unfavorable global oil market conditions, scarce credit, volatile capital markets and the consequences of COVID-19 may exacerbate Wilton's liquidity risk.

OFF BALANCE SHEET ARRANGEMENTS

The Company is not a party to any off balance sheet arrangements or transactions.

RELATED PARTY TRANSACTIONS

The Company entered into an agreement with Rick Anderson, Chief Executive Officer and a Director, whereby the Company pays Mr. Anderson for office rental. During the three and nine-month periods ended September 30, 2020, the Company recorded \$12,000 and \$36,000 as an expense for office rental (2019 - \$12,000 and \$36,000). At September 30, 2020, Mr. Anderson owed the Company \$310,524 (December 31, 2019 - \$325,699). The September 30, 2020 amount represents an advance on operating expenses that will be drawn down as incurred on behalf of Wilton in addition to expenses reimbursed by the Company or upon repayment.

ACCOUNTING POLICIES & CRITICAL ACCOUNTING ESTIMATES

Management is required to make judgments, assumptions and estimates in the application of IFRS that may have a significant impact on the financial results of the Company. Details outlining the Company's accounting policies are contained in the notes to the Financial Statements.

The preparation of the Financial Statements in conformity with IFRS requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of such Financial Statements and the reported amounts of revenues and expenses during the reported periods. The Company evaluates its estimates on an ongoing basis and bases them on various assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions.

The Company has applied all Standards and Interpretations issued or adopted by the International Accounting Standards Board.

NEW ACCOUNTING STANDARDS

In October 2018, the IASB issued amendments to the definition of a business in IFRS 3 “Business Combinations”. The amendments are intended to assist entities to determine whether a transaction should be accounted for as a business combination or as an asset acquisition. IFRS 3 continues to adopt a market participant’s perspective to determine whether an acquired set of activities and assets is a business. The amendments clarify the minimum requirements for a business; remove the assessment of whether market participants are capable of replacing any missing elements; add guidance to help entities assess whether an acquired process is substantive; narrow the definitions of a business and outputs; and introduce an optional fair value concentration test. The concentration test is a simplified assessment that results in an asset acquisition if substantially all of the fair value of the gross assets is concentrated in a single identifiable asset or a group of similar identifiable assets. If an entity chooses not to apply the concentration test, or the test is failed, then the assessment focuses on the existence of a substantive process.

The amendments to IFRS 3 are effective for annual reporting periods beginning on or after January 1, 2020 and apply prospectively. There was no impact to the Company as a result of this amendment.

ISSUED AND OUTSTANDING SECURITIES INFORMATION

(a) Preferred Shares

The Company is authorized to issue an unlimited number of preferred shares, issuable in series, none of which are issued and outstanding as of the date hereof.

(b) Common Shares

The Company is authorized to issue an unlimited number of Common Shares without nominal or par value.

The holders of Common Shares are entitled to dividends, if and when declared by the board of directors, to one vote per share at meetings of the shareholders of the Company and, upon dissolution, to share equally in such assets of the Company as are distributable to the holders of Common Shares.

Issued share capital

The Company had 59,163,832 Common Shares outstanding as of September 30, 2020.

	Number of Common Shares	Number of Stock Options	Number of Warrants
Balance at December 31, 2019	55,963,832	4,618,480	7,649,026
Common Shares issued	3,000,000	-	-
Options exercised ⁽¹⁾	200,000	-	-
Options granted	-	975,000	-
Warrants issued	-	-	1,000,000

\$0.33	423,480	423,480	June 18, 2019	June 18, 2024
\$0.50	975,000	975,000	January 6, 2020	January 6, 2025
	5,593,480	5,593,480		

Warrants

As at September 30, 2020, the Company had the following warrants outstanding and exercisable:

Exercise price		Number outstanding	Expiration date
\$0.70		835,714	February 13, 2021
\$0.40		1,500,000	October 24, 2021
\$1.00	(1)	529,000	December 11, 2021
\$0.72	(2)	34,312	December 11, 2021
\$0.30		1,000,000	September 14, 2022
		3,899,026	

Note (1): If at any time prior to the expiry of the purchase warrants the trading price of the Common Shares exceeds \$1.50 for a certain period of time, the Company may provide notice to the holder of the purchase warrants that the warrants will be subject to early expiry.

Note (2): These warrants were issued to agents as finder's warrants.

As at the date of this MD&A, the Company had 59,163,832 Common Shares, 5,593,480 stock options and 3,899,026 share purchase warrants issued and outstanding.

BUSINESS RISKS

Readers are cautioned that the following is a summary only of certain risk factors and is not exhaustive and is qualified in its entirety by reference to, and must be read in conjunction with the additional information on these and other factors that could affect the Company's operations and financial results that are included in reports on file with Canadian securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com).

The Company's access to capital will impact its ability to complete exploration and development activities, acquire international concessions and to ultimately achieve profitable operations. The Financial Statements have been prepared on a going concern basis, which contemplates the realization of assets and the payment of liabilities in the ordinary course of business. Should the Company be unable to continue as a going concern, it may be unable to realize the carrying value of its assets and to meet its liabilities as they become due. The Financial Statements do not reflect the adjustments or reclassification of assets and liabilities which would be necessary if the Company were unable to continue its operations.

Oil and natural gas exploration involves a high degree of risk, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. These include the uncertainty of finding new reserves, the volatility of commodity prices, operational risks, the cost of capital available to fund exploration and development programs, regulatory issues and taxation, and the requirements of new environmental laws and regulations.

There is no assurance that expenditures made on future exploration by Wilton will result in new discoveries of oil or natural gas in commercial quantities. Without the continual addition of new reserves, any existing reserves that Wilton may have at any particular time and the production there from will decline over time as such existing reserves are depleted. It is difficult to project the costs of implementing an exploratory drilling program due to the inherent uncertainties of drilling in unknown formations, the costs associated with encountering various drilling conditions such as over pressured zones and tools lost in the hole, and changes in drilling plans and locations as a result of prior exploratory wells or additional seismic data and interpretations thereof.

The long-term commercial success of Wilton depends on its ability to find, acquire, develop and commercially produce oil and natural gas reserves. No assurance can be given that Wilton will be able to continue to locate satisfactory properties for acquisition or participation. Moreover, if such acquisitions or participations are identified, Wilton may determine that current markets, terms of acquisition and participation or pricing conditions make such acquisitions or participations uneconomic.

Future oil and natural gas exploration may involve unprofitable efforts, not only from dry wells, but from wells that are productive but do not produce sufficient net revenues to return a profit after drilling, operating and other costs. Completion of a well does not assure a profit on the investment or recovery of drilling, completion and operating costs. In addition, drilling hazards or environmental damage could greatly increase the cost of operations, and various field operating conditions may adversely affect the production from successful wells. These conditions include delays in obtaining governmental approvals or consents, shut-ins of connected wells resulting from extreme weather conditions, insufficient storage or transportation capacity or other geological and mechanical conditions. While diligent well supervision and effective maintenance operations can contribute to maximizing production rates over time, production delays and declines from normal field operating conditions cannot be eliminated and can be expected to adversely affect revenue and cash flow levels to varying degrees.

Oil and natural gas operations are subject to the risks of exploration, development and production of oil and natural gas properties, including encountering unexpected formations or pressures, premature declines of reservoirs, blowouts, cratering, sour gas releases, fires and spills. Losses resulting from the occurrence of any of these risks could have a materially adverse effect on Wilton and its future results of operations, liquidity and financial condition.

Oil and natural gas are commodities whose prices are determined based on world demand, supply and other factors, including geo political events, all of which are beyond the control of the Company. Oil prices are expected to remain volatile and may decline in the near future as a result of global excess supply due to the increased growth of shale oil production in the United States, declines in global demand for exported crude oil commodities, and

recent decisions by the Organization of the Petroleum Exporting Countries in respect of member countries' production of oil, among other factors. These recent fluctuations have had a material impact on the oil and natural gas industry.

The Company may elect not to produce from certain wells at lower prices in the future. All these factors could result in a material decrease in the Company's future net production revenue, causing a reduction in its oil and gas exploration, development and acquisition activities.

In addition, bank borrowings available to the Company in the future, if any, will be in part determined by the borrowing base of the Company. A sustained material decline in prices from prior relatively higher average prices could reduce the Company's future borrowing base, therefore reducing the bank credit available to the Company.

Volatility in oil and natural gas prices makes it difficult to estimate the value of producing properties for acquisitions and often cause disruption in the market for oil and natural gas producing properties, as buyers and sellers may have difficulty agreeing on the value of such properties. Price volatility also makes it difficult to budget for and project the return on acquisitions and development and exploitation projects.

The marketability and price of oil and natural gas which may be acquired or discovered by Wilton will be affected by numerous factors beyond its control. Wilton will be affected by the differential between the price paid by refiners for light quality oil and the grades of oil produced by Wilton. The ability of Wilton to market its oil and natural gas may depend upon its ability to acquire capacity on pipelines which deliver oil and natural gas to commercial markets. Wilton will also likely be affected by deliverability uncertainties related to the proximity of its reserves to pipelines and processing facilities and related to operational problems with such pipelines and facilities and extensive government regulation relating to price, taxes, royalties, land tenure, allowable production, the export of oil and natural gas and many other aspects of the oil and natural gas business.

The Company manages these risks by contracting competent professional staff, following sound operating practices and the prudent issuance of equity to fund capital expenditures so that debt does not become a burden. Extensive geological, geophysical, engineering and environmental analyses are performed before committing to the exploration of new prospects. These analyses are used to ensure a suitable balance between risk and reward. The Company conducts its operations in a manner consistent with environmental regulations as stipulated in applicable local legislation. The Company is committed to meeting its responsibilities to protect the environment wherever it may operate and anticipates making increased capital and operating expenditures as a result of the increasingly stringent laws relating to the protection of the environment. Wilton's operations are subject to the risks normally associated with the oil and natural gas industry. The Company is committed to respecting the safety of its personnel, the environment and the communities where it has operations.

The Company is presently pursuing direct investments in international oil and natural gas projects, often competing with companies that possess greater financial and other resources. There is no assurance that oil and natural gas concessions will be granted to the Company in foreign jurisdictions where the Company is making applications, nor is there assurance that any resulting exploration or development efforts will be successful. If the Company is successful in obtaining exploration prospects in foreign jurisdictions, additional capital will be required to execute the exploration and development programs.

If these international investments are successful, the Company will be exposed to the laws governing the petroleum industry with respect to matters such as taxation, environmental compliance, and other regulatory and political factors as well as shifts in the politics and labor unrest, any of which could adversely affect the Company and its exploration and production activities. The Company's business, results of operations, financial condition, and the trading price of its Common Shares could be materially adversely affected by any of the foregoing risks and by other risks, including risks related to development of petroleum properties, third party transportation, disruption to export pipelines due to vandalism, political and community unrest, oil prices, title matters, reclamation costs, oil price volatility, competition, additional funding requirements, destruction or expropriation of assets, changes to agreements with co-venturers governing commercial terms of the venture including allocation of tax burdens amongst the co-venturers, insurance, currency fluctuations, conflicts of interest, and share trading volatility. Any of these risks could have a material adverse effect on the business, operations or financial condition of the Company.

During the period ended September 30, 2020, the spread of COVID-19 has severely impacted many local economies around the globe. In many countries, businesses are being forced to cease or limit operations for long or indefinite periods of time. Measures taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses worldwide, resulting in an economic slowdown. Global stock markets have also experienced great volatility and a significant weakening. Governments and central banks have responded with monetary and fiscal interventions to stabilise economic conditions. The current travel bans in place may delay the Company's ability to acquire international assets.

The duration and impact of the COVID-19 pandemic, as well as the effectiveness of government and central bank responses, remains unclear at this time. It is not possible to reliably estimate the duration and severity of these consequences, as well as their impact on the financial position and results of the Company for future periods.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company recognizes financial assets and financial liabilities, including derivatives, on the consolidated statements of financial position when the Company becomes a party to the contract. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or when the Company has transferred substantially all risks and rewards of ownership. Financial liabilities are removed from the Financial Statements when the liability is extinguished either through settlement of or release from the obligation of the underlying liability.

Financial assets, financial liabilities and derivatives are measured at fair value on initial recognition. Measurement in subsequent periods depends on the financial instrument's classification, as described below.

Amortized cost

A financial asset is measured at amortized cost if the objective of the business model is to hold the financial asset for the collection of the cash flows, and all contractual cash flows represent only principal and interest on that principal. All financial liabilities are measured at amortized cost using the effective interest method except for liabilities which meet the definition of a derivative and liabilities incurred for the purposes of selling or repurchasing in the short-term, if they are held for trading.

Fair value through other comprehensive income

A financial asset shall be measured at FVTOCI if the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise on specified dates to cash flows that are Solely Payment of Principal and Interest on the principal amount outstanding.

Fair value through profit or loss

All financial assets that do not meet the definition of being measured at amortized cost or FVTOCI are measured at FVTPL, which includes all derivative financial assets. A financial liability is classified as measured at FVTPL if it is held-for-trading, a derivative, or designated as FVTPL on initial recognition. For financial assets and liabilities, the Company may make an irrevocable election to designate an asset at FVTPL. If the election is made it is irrevocable, meaning that asset, liability, or group of financial instruments must be recorded at FVTPL until that asset, liability or group of financial instruments are derecognized.

Financial assets and liabilities are offset and the net amount is reported on the balance sheet when there is a legally enforceable right to offset the recognized amounts, and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

The fair value of cash, accounts receivable and accounts payable approximates the carrying value. The main financial risks affecting the Company are as follows:

Concentration risk

A majority of the Company's cash is held by one major Canadian banking institution. Deposits held with this bank may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand and bear minimal risk.

Credit risk

The Company's principal financial assets are cash and accounts receivable. The credit risk on cash is limited because the majority of cash of the Company is deposited with banks with high credit ratings.

The Company's accounts receivable are primarily from a director of the Company and GST from the Canadian government and are subject to credit risks that would be considered normal.

Commodity price risk

The Company's operations and financial results may be affected by fluctuations in commodity prices and exchange rates.
