## NOTES TO THE CONSOLIDATED INTERIM FINANCIAL STATEMENTS

### FOR THE THREE AND NINE-MONTH PERIODS ENDED SEPTEMBER 30, 2025 AND 2024

(IN CANADIAN DOLLARS)

---

#### 1. STATUTE OF INCORPORATION, NATURE OF ACTIVITIES AND GOING CONCERN

Arianne Phosphate Inc. ("the Company") was incorporated under Part IA of the *Companies Act* (Quebec) and was continued under the *Business Corporations Act* (Quebec) (QBCA). The Company is engaged in the development of its Lac à Paul phosphate property located in Quebec, Canada. The Company has a Regulation 43-101 compliant technical report for its mineral reserve and resource estimate and for a feasibility study on the Lac à Paul property. In October 2018, management determined that the technical feasibility and commercial viability of the Lac à Paul property had been established and accordingly, the development phase for the Lac à Paul property has commenced.

The Company's shares are listed on the TSX Venture Exchange (symbol DAN), on the Frankfurt exchange (symbol JE9N) and on the OTCQX Market (OTCQX) (symbol DRRSF). The registered office of the Company is located at 901 Talbot boulevard, Suite 302, Chicoutimi, Quebec, Canada G7H 6N7.

Although management has taken steps to verify titles of mining properties in which the Company has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliant with regulatory requirements.

These condensed consolidated interim financial statements have been prepared on the basis of accounting principles applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. In assessing whether the going concern assumption is appropriate, management considers all available information about the future, which is at least, but not limited to, 12 months from the end of the reporting period. For the three and nine-month period ended September 30, 2025, the Company recorded a net loss of \$11,124,093 and has an accumulated deficit of \$100,751,123 as at September 30, 2025. In addition to ongoing working capital requirements, the Company must secure sufficient funding to meet its obligations and pay general and administration costs.

As at September 30, 2025, the Company had a negative working capital of \$39,474,728 (negative working capital of \$575,683 as at December 31, 2024). The working capital includes the convertible debenture of \$4,322,353 as at September 30, 2025 even if the repayment is due in 2027 because the convertible option is a derivative and not an equity item (Note 5). Management estimates that the working capital will not be sufficient to meet the Company's obligations and budgeted operating and development expenditures for the next 12 months, considering the maturity of the credit line in March 2026. These circumstances are indicative of the existence of material uncertainties that may cast significant doubt as to the ability of the Company to meet its obligations as they come due and, accordingly, the appropriateness of the use of accounting principles applicable to a going concern. The Company will need to secure financing for 2026.

Any funding shortfall may be met in the future in a number of ways including, but not limited to, the issuance of new equity, debt financing or securing capital from potential partners. While management has been successful in securing financing in the past, there can be no assurance that it will be able to do so in the future or that these sources of funding or initiatives will be available to the Company or that they will be available on terms which are acceptable to the Company. If management is unable to obtain new funding, the Company may be unable to continue its operations, and amounts realized for assets might be less than amounts reflected in the consolidated financial statements.

These consolidated interim financial statements do not reflect the adjustments to the carrying values of assets and liabilities, expenses and financial position classifications that would be necessary if the going concern assumption was not appropriate. These adjustments could be material.

# **ARIANNE PHOSPHATE INC.**

## **NOTES TO THE CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

### **FOR THE THREE AND NINE-MONTH PERIODS ENDED SEPTEMBER 30, 2025 AND 2024**

---

#### **2. SUMMARY OF MATERIAL ACCOUNTING POLICIES**

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS Accounting Standards”) applicable to the preparation of interim financial statements, including International Accounting Standard (“IAS”) 34, Interim Financial Reporting. These condensed consolidated interim financial statements should be read in conjunction with the Company annual consolidated financial statements for the year ended December 31, 2024, which have been prepared in accordance with IFRS Accounting Standards.

The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company’s annual consolidated financial statements for the year ended December 31, 2024.

The Board of Directors approved these condensed consolidated interim financial statements on November 11, 2025.

(IN CANADIAN DOLLARS)

---

#### 4. CREDIT LINE AND EMBEDDED DERIVATIVES

The Company has non-revolving credit lines with Mercury Financing Corp. ("the Lender") which were obtained to finance the development of the Lac a Paul project. As of May 12, 2016, the lines were fully drawn. The Lender holds a first ranking security over the Company's Lac a Paul property claims, up to an aggregate amount of \$27 million. The wholly owned subsidiary, 9252-5880 Québec Inc., has guaranteed jointly and severally the credit lines. Furthermore, the Company is subject to restrictions related to the disposal of assets and equity issuance through financing. The combined credit lines have been extended in 2017, 2018, 2020 and 2021.

On March 17, 2021, the Company amended and extended its credit line until March 31, 2026. Since the amendment, the credit line bears interest at an annual rate equal to 8%, with all interest capitalized to the principal amount, to be paid annually in cash or in common shares of the Company using the volume weighted average price ("VWAP") of the Company's shares for a period of 1 year prior to the interest payment date. It was determined that the option of conversion of the interest using the VWAP is an embedded derivatives to be separated from the host contract.

On March 31, 2021, the Lender also exercised 26,780,000 warrants into the Company's common shares, thereby reducing the credit facility of \$6,603,948. In conjunction with the amended credit line, the Lender received 32 million non-transferable share purchase warrants, exercisable at a price of \$0.33 per warrant for a period of 5 years. These warrants are subject to a "warrant blocker" provision meaning the Lender's holdings can only go above 19.9% of the issued and outstanding common shares of the Company in certain limited circumstances. An amount of \$8,412,413 was allocated to the fair value of the warrants, using the Black-Scholes pricing model. In connection with this extension, the Company also paid \$47,522 of transaction fees.

Since the terms of the extended credit facility were substantially different, the modification was considered as an extinguishment of the original credit line. The difference between the carrying value of the credit line extinguished and the new credit line was recognized in the year ended December 31, 2021, in the consolidated statement of loss and comprehensive loss, through a gain of \$175,827. The Company used an effective interest rate of 33.7%.

The Company has undertaken to raise additional funds in the amount of \$3 million within the 1-year anniversary of the closing of the transaction, and every anniversary thereafter for the three subsequent years, for total cumulative gross proceeds of \$12M. Should the Company not raise additional funds on a yearly and cumulative basis, the Company shall issue the Lender an additional 5M non-transferable share purchase warrants per year where a funding milestone has not been met (maximum of 20M non-transferable warrants). Each warrant will be exercisable at a price per share equal to the market price on the date such warrants must be issued by the Company and will expire on the date the amended credit facility expires. This requirement included in the debt agreement was determined to be an embedded derivative to be separated from the host contract and classified as a liability because it failed the fixed for fixed criteria per IAS 32.11.

In connection with the credit line, in August 2012, the Company granted the Lender of the credit line a royalty of \$1 per ton of phosphate concentrate sales from the Lac à Paul project. This royalty may be redeemed at any time through a lump-sum payment of \$9 million. In July 2013, the Company also granted

# ARIANNE PHOSPHATE INC.

## NOTES TO THE CONSOLIDATED INTERIM FINANCIAL STATEMENTS

### FOR THE THREE AND NINE-MONTH PERIODS ENDED SEPTEMBER 30, 2025 AND 2024

(IN CANADIAN DOLLARS)

---

the Lender of the credit line a royalty of \$0.25 per ton of phosphate concentrate sales from the Lac à Paul project that can be also redeemed any time through a lump-sum payment of \$2.25 million. These royalties will have to be redeemed by the Company for the same amount in the event of a change of control where at least 90% of the issued and outstanding shares of the Company are acquired, purchased, or held by a third party, either through a tender offer or other transaction with the same result. It was determined that this clause does not constitute an embedded derivative because of the non-financial variable specific to the Company and therefore the cash flows from the buy back of the production fees had to be included in the amortized cost of the host contract.

For the first 4 years of the amended credit facility, in the event the Company has not repaid the credit line in full and the Lender remains the creditor of the Company in relation to such credit line, the Company shall grant the Lender an additional annual production fee of \$0.25/tonne, which may be bought back by the Company for \$2.25M, for a maximum annual additional production fee of \$1/tonne (which may be bought back by the Company for a total amount of \$9M). It was determined that this clause does not constitute an embedded derivative because of the non-financial variable specific to the Company and therefore the cash flows from the buy back of the production fees had to be included in the amortized cost of the host contract. After the second anniversary, since the Company had not settled the Mercury debt, the Company had granted an additional Production Fee of \$0.25 per tonne. The cumulative additional production fee can be bought back for \$4,500,000. On March 28, 2024, the Company amended the credit line to cap the maximum additional production fees and the buy-back price to \$0.75/tonne and \$6.75M respectively, if the credit line is not repaid in full before March 31, 2024.

The Company has the option to reimburse the credit line before its maturity without any penalty. This was considered an embedded derivative to be separated from the host contract and it was determined that the fair value of that option was nil.

On March 16, 2023, the Company sold its James Bay area 1.5% NSR royalty to Lithium Royalty Corp for \$2,350,000, having a cost of nil. In connection with this transaction, the Company agreed to reduce its outstanding debt through a one-time cash payment of \$1,000,000. That amount was paid in April 2023. Also, the Company waived the reduction of the additional production fees of that capital payment.

On March 31, 2024, the Company opted to issue 6,080,939 common shares at a price of \$0.27 per share, in lieu of cash, as its annual interest payment to the Lender due on March 31, 2024 (3,899,424 common shares at a price of \$0.5107 per share in lieu of cash as at March 31, 2023). The carrying value of the interest payable and of the corresponding embedded derivative – interest conversion option were then transferred to capital stock.

On March 31, 2025, the Company opted to issue 10,824,601 common shares at a price of \$0.155 per share, in lieu of cash, as its annual payment to the Lender due on March 31, 2025. The carrying value of the interest payable and of the corresponding embedded derivative – interest conversion option were then transferred to capital stock. Also, on the same day the Company issued the Lender of the credit line 5 million non-transferable share purchase warrants with a maturity on March 31, 2026, and an exercise price of \$0.33. The fair value was estimated at \$52,851 using the Black-Scholes option pricing model.

## 5. CONVERTIBLE DEBENTURE

On October 10, 2024, the Company issued a convertible debenture in the principal of \$3,808,269, that matures on October 10, 2027 and bears interest at 9.5% per annum that are added to the principal amount.

The Holder has the option, at any time and subject to customary adjustments, to convert (i) the principal amount of the convertible debenture at a price of \$0.35 per common share, and (ii) the accrued interest thereon at a price per share equal to the greater of (a) \$0.35 and (b) the market price at the time the accrued interest is converted, as determined in accordance with the rules of the TSX Venture Exchange.

The conversion price of the convertible debenture is subject to adjustments, including in the event that the Company issues a convertible debenture or other similar debt-like instrument convertible into common shares to any person (other than the debenture Holder or its affiliates) pursuant to a transaction that is not

a common share reorganization, rights offering or capital reorganization (a "Third Party Debenture Issuance"), in any such case at an effective conversion or exercise price (net of all fees and commissions associated with such subscription) (the "Third Party Debenture Issuance Price") that is less than the conversion price applicable at the time of such issuance, in which case, upon closing of such Third Party Debenture Issuance: (i) the conversion price for the principal amount shall automatically be adjusted downwards to the greater of: (a) the Third Party Debenture Issuance Price; and (b) \$0.19, and (ii) the conversion price for the accrued interest shall be equal to the market price at the time such amounts are converted into common shares, as determined in accordance with the rules of the TSX Venture Exchange, subject to the application of Policy 4.3 – Shares for Debt of the TSX Venture Exchange. It was determined that the conversion option is an embedded derivative to be separated from the host contract and classified as a liability because it failed the fixed for fixed criteria per IAS 32.11. Also, because the Holder can convert the debenture at any time, per IAS 1 *Presentation of financial statements*, the convertible debt is classified as a short-term liability.

In some circumstances of common share reorganization, rights offering, special distribution and capital reorganization, the conversion price for the principal amount can be modified. It was determined that this was an embedded derivative classified as a liability to be separated from the host contract.

In the event of a change of control or a project transfer, the Holder has the right to require the Company to redeem the debenture at a price equal to (i) 130% of the original principal amount of the debenture, plus (ii) all accrued and unpaid interest. This was considered as an embedded derivative classified as a liability to be separated from the host contract.

No common shares of the Company shall be issued to the Holder if, as a result of such issuance, the Holder would beneficially own or exercise control or direction over 9.99% that would be issued and outstanding immediately after giving effect of such issuance. The Holder may, at its sole discretion, increase the ownership cap to 19.99% of the common shares that would be issued and outstanding immediately after any issuance. This clause does not constitute an embedded derivative but has to be considered when evaluating the fair value of the conversion option.

According to IFRS 9.B4.3.4, all the embedded derivatives in the single hybrid contract were treated as a single compound embedded derivative. The Company used an effective interest rate of 16.67%.

Upon the Holder reaching an ownership of at least 3.0% of the issued and outstanding common shares of the Company (either through conversion, open market purchase or otherwise), the Company will enter into an investor rights agreement with the Holder that will provide customary participation and top-up rights and a board nomination right.

## 7. STOCK OPTIONS, WARRANTS AND OPTIONS GRANTED TO BROKERS

### STOCK OPTIONS

The shareholders of the Company initially approved on June 25, 2013, a stock option plan, last amended on September 26, 2025 (the “plan”) whereby the Board of Directors may grant stock options of the Company to directors, officers, employees and suppliers. The terms of stock options are determined by the Board of Directors.

The stock options granted to directors and employees vest on a basis of 33% every year on a three-year period from the date of grant and options to consultants vest on a basis of 25% every three months, starting three months after the grant date.

Stock options expire no later than ten years after being granted. The exercise price of each share purchase option is determined by the Board of Directors and may not be lower than the market price of the common shares at the time of grant.

On January 8, 2025, the Company granted 570,000 stock options to its directors and management, having an exercise price of \$0.165 and expiring on January 8, 2035. On March 13, 2025, 300,000 stock options were granted to a consultant, having an exercise price of \$0.14 and expiring on March 13, 2027. On June 23, 2025, 600,000 stock options were granted to an officer, having an exercise price of \$0.155 and expiring on June 23,

## NOTES TO THE CONSOLIDATED INTERIM FINANCIAL STATEMENTS

### FOR THE THREE AND NINE-MONTH PERIODS ENDED SEPTEMBER 30, 2025 AND 2024

(IN CANADIAN DOLLARS)

---

- <sup>(2)</sup> Salaries and benefits capitalized to property and equipment amount to \$6,569 (\$18,944 for the nine-month period ended September 30, 2024).

#### 9. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company defines the fair value hierarchy under which its financial instruments are valued as follows: level 1 includes unadjusted quoted prices in active markets for identical assets or liabilities; level 2 includes inputs other than quoted prices in level 1 that are observable for assets or liabilities, either directly or indirectly; and level 3 includes inputs for the asset or liability that are not based on observable market data. There was no transfer of hierarchy level during the nine-month periods ended September 30, 2025, and 2024.

The carrying value of cash and cash equivalents, receivables and other assets, accounts payable and accrued liabilities are considered to be a reasonable approximation of their fair value because of the short-term maturity and contractual terms of these instruments.

The fair value of the credit line and the convertible debenture is based on discounted cash flows and is not materially different from their carrying value because there was no material change in the assumptions used for fair value determination at inception. Therefore, their principal amounts approximate their fair value.

The embedded derivatives on the convertible debenture are classified as a level 3 instrument. An increase of 10% in the volatility and a 10% change in the probability determined for each embedded derivative, the main non-observable inputs used in the model, would lead to a variation in the fair value as at September 30, 2025, of \$130,000.
