
INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Dividend Select 15 Corp. (the "Company")

We have audited the accompanying financial statements of the Company, which comprise the statements of financial position as at November 30, 2016 and November 30, 2015 and the statements of comprehensive income/(loss), changes in net assets attributable to holders of redeemable Equity Shares and cash flow for the years ended November 30, 2016 and November 30, 2015 and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as at November 30, 2016 and November 30, 2015 and its financial performance and its cash flow for the years ended November 30, 2016 and November 30, 2015 in accordance with International Financial Reporting Standards.

DIVIDEND SELECT 15 CORP.
NOTES TO THE FINANCIAL STATEMENTS
FOR YEARS ENDED NOVEMBER 30, 2016 AND 2015

1. Incorporation

Dividend Select 15 Corp. (the “Company”) is a mutual fund corporation established under the laws of the Province of Ontario on August 26, 2010 that began investment operations on November 19, 2010. The manager and the investment manager of the Company is Quadravest Capital Management Inc. (“Quadravest” or “Manager”). All Equity shares outstanding will be redeemed by the Company on December 1, 2017 or such other date as the Company may terminate (the “termination date”). The Company’s principal office is located at 77 King Street West, Suite 4500, Toronto, Ontario M5K 1K7. The Company invests primarily in an actively managed portfolio of common shares of 15 core large capitalization Canadian companies selected from a portfolio universe of 20 companies. The Company employs an active covered call writing program to enhance the income earned from the portfolio.

2. Basis of presentation

These financial statements have been prepared in compliance with International Financial Reporting Standards (“IFRS”) as published by the International Accounting Standards Board (“IASB”). These financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss (“FVTPL”).

These financial statements were authorized for issue by Quadravest on February 22, 2017.

3. Summary of significant accounting policies

The following is a summary of the significant accounting policies followed by the Company.

Investments and financial instruments

The Company recognizes financial instruments at fair value upon initial recognition.

The Company’s investments are designated at FVTPL and derivatives (including options) are held for trading and also carried at FVTPL.

The Company recognizes regular purchases and sales of financial instruments on the trade date, which is the date on which it commits to purchase or sell the instrument. Transaction costs, such as brokerage commissions, related to financial assets classified or designated as at FVTPL are expensed as incurred and transaction costs related to financial instruments not at FVTPL are included in the carrying amounts thereof. A financial asset is derecognized when the rights to receive cash flows from the investment have expired or have been transferred and when the Company has transferred substantially all the risks and rewards of ownership of the asset. Dividends are recognized as income on the ex-dividend date. Realized gains and losses and unrealized appreciation and depreciation are determined on an average cost basis. The cost of investments is determined using the average cost method.

Written option premiums received by the Company are, so long as the options are outstanding, reflected as a liability, in the Statements of Financial Position and are valued at an amount equal to the current market value of an option that would have the effect of closing the position. Gains or losses realized upon expiration or exercise of the option are included in net realized gain (loss) on investments and derivatives in the Statements of Comprehensive Income/(Loss).

The Class B shares rank prior to the Equity shares and are thus not subordinate to all other classes of puttable instruments and therefore, the shares have been classified as financial liabilities. These shares are carried at amortized cost.

DIVIDEND SELECT 15 CORP.
NOTES TO THE FINANCIAL STATEMENTS
FOR YEARS ENDED NOVEMBER 30, 2016 AND 2015

The Equity shares may be retracted monthly, annually, or on the termination date of the Company. As a result, the shares contain multiple contractual obligations, and therefore, have been presented as financial liabilities at the annual redemption amount.

Financial assets and liabilities other than investments, derivatives, and Equity shares are recognized initially at the amount expected to be received or paid less, when material, a discount to reduce them to fair value. Subsequently, they are measured at amortized cost using the effective interest rate method less a provision for impairment, if any. Due to their short-term nature, the fair values of these financial assets and liabilities approximate their carrying amounts.

The net asset value of the Company is determined in accordance with requirements of law, including National Instrument 81-106 Investment Fund Continuous Disclosure, and is used to process shareholder transactions. For financial reporting purposes, net assets of the Company is determined as the difference between the aggregate amount of the Company's assets and the aggregate amount of its liabilities ("Net Assets of the Company").

Valuation of investments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded shares and options) are based on the last traded prices at the close of trading on the reporting date. The Company uses the last traded market price for both financial assets and financial liabilities where the last traded price falls within that day's bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, Quadravest determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. The Company's policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and others commonly used by market participants and which make the maximum use of observable inputs. Refer to note 5 for further information about the Company's fair value measurements.

Cash

Cash consists of cash on hand.

Translation of foreign currencies

The Company's functional and presentation currency is Canadian dollars. The fair value of investments and other assets and liabilities in foreign currencies are translated into the Company's functional currency at the rates of exchange prevailing at each measurement date. Purchases and sales of investments, income and expenses are translated at the rates of exchange prevailing on the respective dates of such transactions.

DIVIDEND SELECT 15 CORP.
NOTES TO THE FINANCIAL STATEMENTS
FOR YEARS ENDED NOVEMBER 30, 2016 AND 2015

Management fees and administration fees

Management fees and administration are accrued by the Company over time, as services are rendered by Quadravest. Refer to note 7 for further information about the calculation of management and administration fees of the Company.

Increase (decrease) in Net Assets Attributable to Holders per Redeemable Equity share

Increase (decrease) in net assets attributable to holders per redeemable Equity share is based on the increase or decrease in net assets attributable to holders of redeemable Equity shares divided by the weighted average number of such shares outstanding during the year. Refer to note 8 for the calculation.

Taxation

The Company qualifies as a mutual fund corporation under the Income Tax Act (Canada) (the "Tax Act") and it is subject to income tax in each taxation year on the amount of its net income for the taxation year, including net realized taxable capital gains, if any, at the rate applicable to mutual fund corporations. The general income tax rules associated with a public corporation also apply to a mutual fund corporation with the exception that taxes payable on net realized capital gains are refundable on a formula basis when its shares are redeemed or when it pays capital gains dividends out of its capital gains dividend account to its shareholders.

Interest and foreign income are taxed at normal corporate rates applicable to mutual fund corporations and can be reduced by permitted deductions for tax purposes.

All of the Company's expenses including management fees, administration fees and operating expenses will be taken into account in determining its overall tax liability.

As a mutual fund corporation, taxable dividends received from taxable Canadian corporations are subject to a Part IV tax of 38 1/3% (33 1/3% for dividends received on or before December 31, 2015). Such taxes are fully refundable upon payment of taxable dividends to its shareholders on a basis of \$1.15 for every \$3 of dividends paid (\$1 for every \$3 of dividends paid on or before December 31, 2015). Any such tax paid is reported as an amount receivable until recovered through the payment to shareholders of dividends out of net investment income. All tax on net taxable realized capital gains is refundable when the gains are distributed to shareholders as capital gains dividends or through redemption of shares at the request of shareholders, while the Company qualifies as a mutual fund corporation. As a result of the capital gains refund mechanism and Part IV tax refunds, the Company recovers any Canadian income taxes paid in respect of its capital gains and taxable Canadian dividends. As a result, the Company has determined that it is in substance not taxable. Consequently, the tax benefit of capital and non-capital losses and other temporary differences have not been reflected in the Statements of Financial Position as deferred income tax assets or liabilities.

The Company has estimated accumulated non capital losses for tax purposes of \$5,002,428 (November 30, 2015-\$3,666,994) that are available to lower taxable income in future years if required and expire after the scheduled termination date of the Company on December 1, 2017.

DIVIDEND SELECT 15 CORP.
NOTES TO THE FINANCIAL STATEMENTS
FOR YEARS ENDED NOVEMBER 30, 2016 AND 2015

4. Critical Accounting Estimates and Judgments

The preparation of these financial statements include estimates and assumptions by management based on past experiences, present conditions and expectations of future events. Where estimates were made, the reported amounts for assets, liabilities, income and expenses may differ from the amounts that would otherwise be reflected if the ultimate outcome of all uncertainties and future events were known at the time these financial statements were prepared. The Company's most significant estimates involve the measurement of investments and derivatives at fair value as described in note 5. The following discusses the most significant accounting judgments that the Company has made in preparing the financial statements:

Classification and measurement of investments and application of the fair value option

In classifying and measuring financial instruments held by the Company, the Manager is required to make significant judgments about whether or not the business of the Company is to invest on a total return basis for the purpose of applying the fair value option for financial assets under IAS 39, Financial Instruments – Recognition and Measurement (IAS 39). The most significant judgments made include the determination that certain financial instruments are held-for-trading, and that the fair value option can be applied to investments in financial assets which are not.

5. Management of Risk of Financial Instruments

The Company classifies fair value measurements within a hierarchy which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and lowest priority to unobservable inputs. The three levels of the fair value hierarchy are:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can assess at the measurement date;

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3 - Inputs that are unobservable for the asset or liability.

The following table illustrates the classification of the Company's financial instruments within the fair value hierarchy as at November 30, 2016 and November 30, 2015:

	Financial assets and liabilities at fair value as at November 30, 2016			
	Level 1	Level 2	Level 3	Total
Equities	\$74,958,390	-	-	\$74,958,390
Options	(\$239,055)	-	-	(\$239,055)
	<u>\$74,719,335</u>	<u>-</u>	<u>-</u>	<u>\$74,719,335</u>

	Financial assets and liabilities at fair value as at November 30, 2015			
	Level 1	Level 2	Level 3	Total
Equities	\$75,808,397	-	-	\$75,808,397
Options	(\$122,263)	-	-	(\$122,263)
	<u>\$75,686,134</u>	<u>-</u>	<u>-</u>	<u>\$75,686,134</u>

DIVIDEND SELECT 15 CORP.
NOTES TO THE FINANCIAL STATEMENTS
FOR YEARS ENDED NOVEMBER 30, 2016 AND 2015

All fair value measurements above are recurring and fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. There were no transfers or reclassifications between levels for the years ended November 30, 2016 and 2015.

The Company's net gain (loss) on financial instruments that are held for trading and those designated at FVTPL are as follows:*

	2016	2015
Realized gain (loss) on derivatives held for trading	\$278,382	\$669,415
Realized gain (loss) on investments designated at FVTPL	\$135,787	\$1,589,782
Net change in unrealized appreciation (depreciation) on investments	\$7,126,958	(\$9,042,092)
Net change in unrealized appreciation (depreciation) on derivatives	(\$198,372)	\$152,745
Dividends	\$3,018,305	\$3,113,494
	<u>\$10,361,060</u>	<u>(\$3,516,656)</u>

* The Company employs an active and integrated strategy of writing call options on the underlying equity holdings in the portfolio. The requirement to measure and attribute gains separately to either derivatives or the underlying equities may not reflect the relative contributions and benefits from implementing this strategy. As an example, written call options that are subsequently repurchased and/or rolled as part of the active covered call writing program would have had the effect of lowering reported gains from derivatives (which would have otherwise occurred had the written call option been exercised or expired), while achieving other gains to the portfolio that would have been measured and attributed to the underlying equity holdings.

The Company's investment activities expose it to a variety of financial risks: market risk (including price risk, interest rate risk and currency risk), credit risk and liquidity risk.

Any sensitivity analysis presented below may differ from actual results and the difference could be material.

Market Price Risk

All securities investments present a risk of loss of capital.

The market price risk is affected by three main components: price risk, interest rate risk and foreign currency movements.

Price risk

Quadravest manages market price risk by limiting investment in any one portfolio company to no more than 10% of the net asset value of the Company at the time of purchase. In addition, the supplemental covered call writing program generates an additional stream of income to the portfolio which may also help mitigate against market price declines during years in which a particular portfolio company has a covered call option written against that position.

Since the 15 portfolio companies are significant components of the S&P/TSX 60 index, it would be reasonable to expect that the Company's portfolio will exhibit market price movements that are reflective and generally highly correlated with those particular securities and to a lesser extent with the price movements of the S&P/TSX 60 index based on the underlying composition of the portfolio.

A 10% increase/decrease in the portfolio would currently increase/decrease Net Assets of the Company by \$7,471,934 (November 30, 2015-\$7,568,613).

DIVIDEND SELECT 15 CORP.
NOTES TO THE FINANCIAL STATEMENTS
FOR YEARS ENDED NOVEMBER 30, 2016 AND 2015

Interest rate risk

The majority of the Company's financial assets are invested in financial assets and liabilities that are non interest bearing. As a result, the Company is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates and considers interest rate insignificant.

Currency risk

All portfolio holding and other Net Assets of the Company are denominated in Canadian dollars and therefore there is no currency risk.

Other risks

Credit risk

Credit risk is defined as the risk that a counterparty will be unable to pay amounts in full when due. All of the Company's transactions are in listed securities and options and are settled and paid for using approved brokers. The risk of default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on purchase once the securities have been received by the broker. Credit risk of cash is considered low as it is held at a AA-rated Canadian bank.

Liquidity risk

Liquidity risk is the risk that the Company may not be able to settle or meet its obligations on time or at a reasonable price. The Company is exposed to liquidity risk primarily through its monthly and annual retractions of Equity shares. The Company receives adequate notice for all redemption requests. The Company's portfolio is invested in highly liquid large capitalization stocks that trade on the TSX. All Equity shares outstanding are redeemable on a monthly and annual basis but are scheduled to be redeemed upon termination of the Company. All other financial liabilities are payable within three months the end of the year.

Concentration risk

An individual portfolio holding may represent no more than 10% of the net asset value of the Company at the time of purchase.

The Company's investment portfolio is concentrated in the following segments as at:

	November 30, 2016	November 30, 2015
Canadian Common Equities	95.1%	94.4%
Call Options written	-0.3%	-0.2%
Other Assets less Liabilities	5.2%	5.8%
	<u>100%</u>	<u>100%</u>

6. Redeemable Equity Shares

Equity and Class B shares

The Company is authorized to issue an unlimited number of Equity shares and 1,000 Class B shares

<u>Equity share transactions</u>	November 30, 2016	November 30, 2015
Beginning of year	9,455,088	7,755,088
Issued during the year	-	1,700,000
Redeemed during the year	<u>(383,400)</u>	<u>-</u>
End of year	9,071,688	9,455,088

Equity shares were originally issued at \$10 per share. Equity shares currently have a distribution policy in which the monthly dividend payable on the Equity shares is determined by applying a 10% annualized rate on the volume weighted average market price (VWAP) of the Equity shares over the last 3 trading days of the preceeding month. All Equity shares outstanding on December 1, 2017 will be redeemed by the Company on that date unless shareholders approve an extension to such termination date. Equity shares trade under the symbol "DS" on the TSX. Equity shares trading price on the TSX was \$8.63 as at November 30, 2016 (November 30, 2015-\$8.62)

Equity shares may be surrendered at any time for retraction at specified retraction amounts, but will be retracted only on the last day of each month. Shareholders who retract an Equity share in the month of March in each year will be entitled to receive an amount equal to the net asset value per Equity share calculated on the last day of March. Equity shares retracted in any other month will receive a retraction price based on a discounted specified retraction formula. Under the terms of a recirculation agreement, the Company may, but is not obligated to, require the recirculation agent to use its best efforts to find purchasers for any Equity shares tendered for retraction. Gains or losses from the redemption of shares, if any, are recorded in gain (loss) on redemptions on the Statements of Comprehensive Income/ (Loss).

The Company issued 1,700,000 Equity shares at \$10.35 per share pursuant to a secondary offering that was completed on March 9, 2015. Net proceeds of \$16,969,813 were received after deducting \$898,187 for agents and filing fees in connection with the secondary offering.

On September 17, 2010, the Company issued 1,000 Class B shares for \$20 to Dividend Select 15 Holding Trust.

7. Expenses

The Company is responsible for all expenses incurred in connection with the operation and administration of the Company, including, but not limited to, ongoing custodian, transfer agent, legal and audit expenses.

Pursuant to the management and investment management agreement, Quadravest is entitled to a management fee payable monthly in arrears at an annual rate of 0.75% of the net asset value of the Company, calculated as at each month-end valuation date and an amount equal to the service fee payable to dealers on the Equity shares at a rate of 0.40% per annum.

Total management fees of \$581,840 were incurred during the year (November 30, 2015-\$622,011). As at November 30, 2016, \$47,412 (November 30, 2015-\$47,290) was payable to Quadravest with respect to management and administrative fees.

The brokerage commissions paid during the year by the Company for its portfolio transactions were \$32,091 (November 30, 2015-\$20,934).

FOR YEARS ENDED NOVEMBER 30, 2016 AND 2015

8. Increase (decrease) in net assets attributable to holders per redeemable Equity share

The increase in net assets attributable to holders per redeemable Equity share for the years ended November 30, 2016 and 2015 is calculated as follows:

	2016	2015
Increase (decrease) in net assets attributable to holders of Equity shares	\$9,113,007	(\$4,878,631)
Weighted average shares outstanding	9,199,488	9,030,088
Increase (decrease) in net assets attributable to holders per redeemable Equity share	\$0.99	(\$0.54)

9. Distributions

	November 30, 2016	November 30, 2015
Equity shares	\$0.8079	\$0.9788

10. Capital Management

The Company considers its capital to consist of its Equity shares and Class B shares. The Company's current objectives in managing its capital are to provide a steady stream of monthly dividends and to return the original issue price of the Equity shares upon the termination date of the Company.

In order to manage its capital structure, the Company may adjust the amount of dividends paid to Equity shareholders or return capital to Equity shareholders.

11. Accounting Standards, Interpretations and Amendments to Existing Standards Not Yet Effective

The final version of IFRS 9, Financial instruments, was issued by the IASB in July 2014 and will replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 introduces a model for classification and measurement, a single, forward-looking 'expected loss' impairment model and a substantially reformed approach to hedge accounting. The new single, principle based approach for determining the classification of financial assets is driven by cash flow characteristics and the business model in which an asset is held. The new model also results in a single impairment model being applied to all financial instruments, which will require more timely recognition of expected credit losses. It also includes changes in respect of credit risk in measuring liabilities elected to be measured at fair value, so that gains caused by the deterioration of an entity's own credit risk on such liabilities are no longer recognised in profit or loss. IFRS 9 is effective for annual years beginning on or after January 1, 2018, however it is available for early adoption. In addition, the own credit changes can be early applied in isolation without otherwise changing the accounting for financial instruments. The Company is in the process of assessing the impact of IFRS 9 and has not yet determined when it will adopt the new standard.

12. Reconciliation of net asset value per Equity share to net assets attributable to holders per redeemable Equity share

As at November 30, 2016 and November 30, 2015, there were no differences between net asset value per Equity share used for transactional purposes and assets attributable to holders per redeemable Equity share for financial reporting purposes.
