The line of credit is secured by trade receivables and inventories. The line of credit may be reviewed periodically by the bank and is repayable on demand. The operating line of credit is subject to working capital and debt to equity covenants (as defined in the lending agreement), all of which were respected as at June 30, 2020 and December 31, 2019. As at June 30, 2020, the Company had drawn \$1.0 million (\$4.5 million as at December 31, 2019) on the line of credit.
- (b) The loan is repayable in monthly instalments of \$40,550 until May 2023. The Company obtained a 6-month capital payment moratorium for this loan starting in April 2020 and payments will resume normally thereafter.
- (c) The loan is repayable in one instalment of \$3,630 in May 2019 followed by 71 monthly instalments of \$3,470 until October 2025. The Company obtained a 6-month capital payment moratorium for this loan starting in April 2020 and payments will resume normally thereafter.
- (d) The loan is repayable in one instalment of \$8,530 followed by 59 monthly instalments of \$8,330 through July 2023. The Company obtained a 6-month capital payment moratorium for this loan starting in April 2020 and payments will resume normally thereafter.
- (e) The Company borrowed \$3,609,480 for payments towards a piece of equipment through a loan which is repayable in blended monthly instalments of \$66,072 through October 2024. This loan is secured by a hypothec on a specific piece of equipment of the Company. The progressive payments made to the supplier for this piece of equipment were initially borrowed under a lease agreement and all amounts were transferred to this loan when the equipment was fully delivered. The Company obtained a 3-month capital payment moratorium for this loan starting in April 2020 and payments will resume normally thereafter.
- (f) The Company borrowed \$3,280,940 for payments towards a piece of equipment that was received during the course of the 2019 fiscal year. This loan is repayable in blended monthly instalments of \$60,061 through November 2024. This loan is secured by a hypothec on a specific piece of equipment of the Company. The banker's acceptance that was outstanding as at December 31, 2018 was reimbursed with the proceeds of this loan. The Company obtained a 3-month capital payment moratorium for this loan starting in May 2020 and payments will resume normally thereafter.

### **13. Financial instruments (continued)**

Fair value estimates are made as of the date of the consolidated statement of financial position, using available information about the financial instrument. These estimates are subjective in nature and often cannot be determined with precision.

The following methods and assumptions were used to determine the estimated fair value of each class of financial instruments:

- The fair value of cash, trade and other receivables, bank indebtedness, short-term borrowings and trade and other payables approximates their respective carrying amounts as at the date of the consolidated statement of financial position because of the short-term maturity of those instruments.
- The fair value of long-term debt that bears interest at floating rates approximates its carrying value as the interest rate applicable to the loan reflects the latest market rates whereas long term debt that bears interest at fixed rates is estimated using a discounted cash flows approach, which discounts the contractual cash flows using discount rates derived from observable market interest rates of similar loans with similar risks.

The Company ensures, to the extent possible, that its valuation techniques and assumptions incorporate all factors that market participants would consider in setting a price and that it is consistent with accepted economic methods for pricing financial instruments.

#### **13.2 Fair value hierarchy**

The Company categorizes its financial instruments into a three-level fair value measurement hierarchy as follows:

Level-1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level-2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices);

Level-3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

As at June 30, 2020 and December 31, 2019, the fair values of long-term debt and lease obligations are categorised as Level 2.

### **14. Non-cash transactions**

During the six months ended June 30, 2019, the Company made a \$1.8 million interim payment for a piece of equipment under an existing lease agreement. This payment was included in property, plant and equipment and in the long-term lease obligations in the statement of financial position.

**15. COVID-19**

COVID-19 may cause significant changes to the Company's assets or liabilities in the coming year, particularly to accounts receivable, although to date the Company's assessment did not identify important customers with a great exposure to segments of the economy most impacted by the crisis. These events may also have an impact on future operations, although for the moment all of the Company's plants remain fully operational at normal business levels given it is considered an essential supplier. The Company has taken and will continue to take action to minimize the impact. However, it is impossible to determine the financial implications of these events for the moment.
