ron_parent@shaw.ca / (902) 579-1290

I, Ron Parent, P. Geo., am a self-employed Geologist under contract to AMI to prepare this report.

This certificate applies to the technical report entitled “NI 43-101 Technical Summary Report on the Rocher Deboule Property” (the “Technical Report”), dated October 25, 2020.

I am a Professional Geologist registered in British Columbia (License # 136051). I graduated with a Bachelor of Science with Honours in Geology in 1990 from the University of Alberta, preceded by graduation from the Northern Alberta Institute of Technology in Mineral Resources Engineering Technology (1986).

I have practiced my profession for 30 years. During this period, I have been directly involved in active mining operations and exploration operations. I have compiled, produced, and reviewed many geological models and exploration data sets. I have authored or co-authored several NI 43-101 reports on a variety of mineral projects covering commodities including uranium, gold, copper molybdenum and coal.

As a result of my experience and qualifications, I am a Qualified Person as defined in National Instrument 43–101 Standards of Disclosure for Mineral Projects (NI 43–101). I have prepared all the sections of this report excepting section 7, which was written by Cristo Marais, P. Geo.

I am independent of American Manganese Inc. as independence is described by Section 1.4 of NI 43-101. I had not previously provided technical assistance to AMI with regards to the Rocher Deboule Property and have had no prior involvement with the project.

I have read NI 43–101 and this report has been prepared in compliance with that Instrument.

As of the date of this certificate, to the best of my knowledge, information and belief, the technical report contains all scientific and technical information that is required to be disclosed to make the technical report not misleading.

“Signed and sealed”

Ron R. Parent, P. Geo

Dated: October 25, 2020
