Description of Business and Overall Objective

Brigadier was incorporated on February 13, 1996 under the Business Corporations Act (Ontario) and was continued into British Columbia under the Business Corporations Act (British Columbia) on June 19, 2020. The Company is listed on the TSX Venture Exchange under the symbol BRG. The Company's head office is located at 300 Bellevue Centre, 235 – 15th Street, West Vancouver, BC, V7T 2X1. The Company's registered and records office is located at 40440 Thunderbird Ridge B1831, Garibaldi Highlands, BC, V0N 1T0.

Historically the Company has conducted exploration and development of mineral properties and more recently briefly focused its efforts in the biotech/medical device marketplace. On August 19, 2019, the Company entered into definitive agreements (Amended November 25, 2019) and which expired on April 30, 2020 in respect of its investments in CBD Group Asia Limited ("CGA") and Natural Source Group Pte Limited ("NSG"), which, together with a proposed concurrent private placement offering, constituted the Corporation's proposed change of business from mineral exploration to an investment issuer (the "Proposed COB"). In addition, the Corporation announced that in connection with the Proposed COB, it intended to de-list its common shares from the TSX Venture Exchange and to apply to list the common shares of the resulting issuer on the Canadian Securities Exchange. On April 24, 2020, the Company terminated the agreements related to these proposed transactions. See "**Proposed Transaction- Terminated**" and "**Transfer of Listing to Canadian Stock Exchange - Terminated**".

Accordingly, the Company continues to operate in the business of mineral property exploration.

The Company currently has completed 2 private placements which has resulted in the Company having working capital to fund its immediate operations. The Company has reported successive operating losses and has historically had limited capital resources. The Company will require additional funding to continue operations for the next 12 months. The ability of the Company to continue as a going concern is dependent on the raising of additional finance and the identification of new business opportunities.

During the nine month period to September 30, 2020, the Company issued 500,000 common shares with a fair value of \$25,000, paid \$15,000 upon receiving TSX approval and incurred \$10,500 of property evaluation expenses consisting of the preparation of a compliant NI 43-101 report.

In October 2020, the Company commenced a detailed drone magnetic survey which has been designed to define the Madonna Diamond Bearing Dyke (the "Madonna Dyke") and to reveal the extensions of the dyke along strike. The review of previously completed airborne magnetics, has indicated trends of various magnetic features including the Madonna Dyke. The detailed magnetic survey is expected to produce better resolution of the magnetic features which may define blow outs or thickened areas of the Madonna Dyke, as well as other potential diamond bearing dykes.

Further details of the subject property can be found on the SEDAR website at www.sedar.com in the NI 43-101 Technical Report which was filed on June 24, 2020.

Picachos Gold-Silver Property

On July 6, 2020, the Company entered into a binding letter of intent ("LOI") for an option to acquire a 100% interest in the 3954 hectare Picachos Gold-Silver Property centered over the historic "Viva Zapata" National Mineral Reserve, Sinaloa, Mexico. On August 4, 2020, the binding LOI was superseded with a Definitive Agreement to acquire the property. The Company received regulatory approval on August 11, 2020.

To acquire a 100% interest in 4 contiguous mineral claims comprising the Picachos Property, Brigadier will provide staged consideration to Minera Camargo S.A. de C.V. ("Minera Camargo") over a 5-year period consisting of cash payments totaling US\$275,000; share issuances totaling 4,000,000 common shares of Brigadier; and cumulative exploration expenditures of US\$3,850,000. Brigadier will also make payments to Minera Camargo for Picachos development milestones as to: i) 1,000,000 common shares of Brigadier upon delineating a mineral resource estimate containing a minimum of 350,000 ounces of gold in the inferred category (based on the then current CIM definitions); ii) US\$725,000 and 1,000,000 common shares of Brigadier upon completion of a feasibility study recommending the construction of a mine on the Property; and iii) US\$2,000,000 upon commencement of commercial production. Brigadier may, at its option, issue common shares in lieu of one half of the cash payments to be made pursuant to each of ii) and iii). A 2% NSR will be retained by Minera Camargo.

The Company has also entered into a finders fee agreement with respect to the above agreement and shall compensate the finder by the issuance of up to 1,084,401 common shares (with a deemed value of \$0.30 per share) over the term of the option agreement. Payment of the finder's fee is dependent upon the Company keeping the option agreement in good standing, and other milestone events.

Picachos, held by Minera Camargo, is comprised of four mining concessions covering an area of 3,954 hectares and is situated in the municipality of El Rosario, in the southeastern region of Sinaloa state, Mexico. Prior to 2002, the mineral tenure was fractured by several small concessions. Minera Camargo acquired a contiguous land package between 2003 and 2012. Geographically, the Picachos overlaps part of the western foothills of the Sierra Madre Occidental (SMO). Access to Picachos from Mazatlan is by state highway and paved road to the town of Cacalotan, and then by dirt road into the Property. Total driving distance is approximately 111

Management's Discussion and Analysis

road kilometres (km) over a period of four hours. Mine workings are accessed by approximately 20 km of roads internal to the Property.

Picachos overlaps (i) two regional-scale precious metal rich vein systems and (ii) a large porphyry copper prospect. Historic metal production is from the veins. The largest vein system trends northeasterly for seven kilometers along a major fault zone, and host the past-producing San Agustin underground mine. It appears to be cross-cut and disrupted by several northwesterly trending veins including El Placer. The El Placer vein system has been mapped over a 4 km long strike length. The portion that belongs to Minera Camargo is about 1.5 km long in the southeastern part of Picachos.

The Company has commenced a drilling program consisting of approximately 41 holes targeting four high grade gold silver veins. The drill targets comprise the following historical results: (none have been verified by the Company)

- i) San Agustin mine: underground channel sampling by prior operator returned average grade of 81.22 grams per ton (g/t) gold (Au) and 73.36 g/t silver (Ag) across 1.2 m (Thunderbird Projects news release dated 18 June 1997). Values of 185 g/t Au were cut across the bottom of a production shaft (sample HBM-73175).
-
- ii) Mochomos vein: historic rock chip-channel sample 26,409 yielded a result of 18.5 g/t Au and 570 g/t Ag across approximately 0.5 m.
- iii) Los Tejones vein: with values of 28.6 g/t Au, and 114 g/t Ag across approximately a meter (historic rock chip-channel sample 17873).
- iv) Fermin vein: -with values of 268 ppm Ag and 0.3 g/t Au across 1 m

The Company has not undertaken any independent investigation of the historical information contained.

The center of the Company's 2020 exploration program is the past producing San Agustín Mine, The drill program consists of approximately 5,170 meters comprising 41 holes as well as approximately 3 line- kilometers of trenching across several historic sample sites to systematically sample the anomalies identified by the historic work and formalize the drill targets. Most holes are planned at San Agustín and Los Tejones, with a few at Mochomos and other prospects. The drill holes will range from 90 m to 300 m in length.

To date 5 cores have been drilled to intercept the San Agustín Vein at depths of up to 125m and the cores have been sent to SGS Labs in Durango for assay work to be undertaken.

Further details of the subject property can be found on the SEDAR website at www.sedar.com.

Financial Instruments and Other Instruments

The Company recognizes financial assets and financial liabilities when the Company becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognized when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognized when it is extinguished, discharged, cancelled or expires.

Financial assets are classified and measured based on these three categories:

Brigadier Gold Limited
Management's Discussion and Analysis
For the Three and Nine Month Periods Ended September 30, 2020

- i) fair value through profit or loss ("FVPL")
- ii) fair value through other comprehensive income ("FVOCI") or
- iii) amortized cost.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets.

Financial liabilities are classified and measured based on two categories:

- i) fair value through profit or loss: or
- ii) amortized cost.

Financial assets and liabilities classified as FVPL are measured at fair value with changes in fair value recognized in profit or loss. Financial assets designated as FVOCI are measured at fair value with changes in fair value recognized in other comprehensive income with such changes never being reclassified to profit or loss. Financial assets and liabilities classified as amortized cost are initially measured at fair value, net of any transaction costs incurred and are measured subsequently using the effective interest method.

The Company's financial instruments consists of the following:

<i>Financial assets and liabilities</i>	<i>Classification</i>
Cash	Amortized cost
Receivables	Amortized cost
Convertible note receivable	Amortized cost
Investments	FVPL
Accounts payable and accrued liabilities	Amortized cost
Share subscriptions received	Amortised cost

Financial instruments recorded at fair value in the consolidated statements of financial position are classified according to a three level hierarchy that reflects the significance of the inputs used in making the fair value measurements. The three levels of fair value hierarchy are as follows:

- Level 1 - Unadjusted quoted prices in active markets for identical assets and liabilities
- Level 2 - Inputs other than quoted prices that are observable for assets or liabilities directly or indirectly; and
- Level 3 - Inputs for assets or liabilities that are not based on observable market data.

In the Company's September 30, 2020 condensed interim consolidated financial statements, the carrying values of cash, receivables, convertible note receivable, accounts payable and accrued liabilities and share subscriptions receivable are considered representative of their respective fair values due to their short term period to maturity, and investments have been recorded at fair market value.
