Form 51-102F1
Management Discussion and Analysis
For
Capella Minerals Limited (previously known as New Dimension Resources Ltd.)
(“Capella”, or the “Company”)

The following Management’s Discussion and Analysis (“MD&A”) of the Company has been prepared as of October 29, 2021 and is intended to supplement and complement the Company’s audited consolidated financial statements for the years ended May 31, 2021 and May 31, 2020 (the “Annual Financial Statements”) and should be read in conjunction with the Annual Financial Statements, together with the notes thereto. The Annual Financial Statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

Unless otherwise noted, all currency amounts are stated in Canadian dollars.

NATURE OF BUSINESS

Capella Minerals Limited is incorporated under the laws of the Province of British Columbia, Canada with a registered address and records office located at 8681 Clay Street, Mission BC V4S 1E7. The Company was previously known as New Dimension Resources Ltd, with the Corporate name change to Capella Minerals Limited (and new trading symbol) becoming effective on November 10, 2020.

The Company’s activities are currently focused on the exploration and development of a portfolio of high-grade gold and copper projects located in Scandinavia (Finland, Norway, and Sweden) and Canada.

The Company is listed on the TSX Venture Exchange (“TSXV”) and trades under the symbol “CMIL”. The Company also has a secondary listing on the Frankfurt Stock Exchange and trades under the symbol “N7D2”.

HIGHLIGHTS AND DEVELOPMENTS FOR THE THREE MONTHS ENDED AUGUST 31, 2021 AND TO THE DATE OF THIS REPORT

Projects

Finnish Gold-Copper Projects (Katajavaara & Aakenus; Capella Earn-In to Initial 70% Interest)

- On August 24, 2021, the Company announced that it had signed a binding Letter of Intent (“LOI”) with Cullen Resources Ltd (ASX:CUL)(“Cullen”) through which Capella may earn-in to Cullen’s Katajavaara and Aakenus gold-copper projects in the highly-prospective Central Lapland Greenstone Belt of northern Finland. TSXV approval for the Cullen agreement was received on September 7, 2021.
- Data compilations for the Katajavaara-Aakenus project area are well underway and include an evaluation of inhouse data already acquired by Cullen, together with the acquisition of historical geophysical and soil auger geochemical data available from the GTK (Geological Survey of Finland).

Norwegian Copper and Swedish Gold Projects (Kjøli, Løkken, & Southern Gold Line; 100% Capella)

- Field activities completed during the Quarter were focused on: i) drill target definition at the high-grade Kjøli and Løkken massive sulfide (“VMS”) copper projects in Norway, and ii) regional reconnaissance activities at the Southern Gold Line project in Sweden.
 - Field activities in Norway were primarily focused on the Kjøli copper project and included systematic soil sampling (2,800 samples) and ground geophysics (gravity survey) undertaken along the 20km strike length of prospective stratigraphy for the discovery of new copper-rich massive sulfide deposits. The incorporation of final results from both the soil sampling and gravity surveys, together with previous results from the CARDS AI/Data Mining target generation work, is expected

to allow the Company to identify specific drill sites and initiate permitting for a winter diamond drill program.

- At the Løkken project, a field evaluation and ranking of 24 known satellite copper-sulfide occurrences around the former Løkken mining operation was undertaken by experienced local geologist Rune Wilberg. Data derived from this review are currently being analyzed together with existing geophysical datasets (especially anomalies derived from regional Electro-Magnetic and Magnetic surveys), with recommendations for further work on the highest-priority drill targets currently being reviewed.
- Regional reconnaissance activities undertaken at the Southern Gold Line project included extensive soil sampling surveys (3,648 Multi Element and 754 Ionic Leach samples, mainly from the Fäboliden North, Fäboliden South, and Rötjärnen claim blocks) in addition to the completion of the regional Bulk Leach Extractable Gold survey. The sampling programs were designed to identify priority gold target areas for gold mineralization, with initial results indicating the definition of a new target area (Örnträsk) on the Fäboliden North claim block.

Canadian Gold Joint Venture Projects (Domain, Savant Lake)

- Savant Lake: The Company agreed to revise the terms of Ethos Gold Corp's (TSXV:ECC; "Ethos") earn-in to a 70% interest in the Savant Lake Project in order to accommodate some delays in accessing parts of the project area. As a result, the Company received a further 1,000,000 ECC shares on the first anniversary date (September 20, 2021) of the signing of the original agreement. Ethos currently expects to apply for permits for Savant Lake during Q4, 2021 with a view towards undertaking drilling on the project late in the 2021/2022 winter season.
- Domain: Project operator Yamana Gold Inc's (TSX:YRI; "Yamana") current focus is on Community Relations activities and work supporting an eventual exploration permit application (including a Stage 1 archaeological assessment, with permits being applied for those areas not requiring a more detailed Stage 2 assessment). Pending receipt of the permit, follow-up diamond drilling is currently expected to begin in H1, 2022. An exploration agreement with the Bunibonibee Cree Nation was previously signed in 2020. Domain is a participating 70.4%-29.6% Joint Venture ("JV") between Yamana and Capella.

Argentine Project Divestitures (Sierra Blanca, Minera Mariana)

- Sierra Blanca: Austral Gold Limited (ASX:AGD; TSX:AGLD; "Austral") has successfully completed its minimum commitments to earn-in to a 51% interest in the Company's former Sierra Blanca SA ("SBSA") subsidiary in Santa Cruz, Argentina. These initial commitments (the "Tranche 1" investment) included a cash payment to Capella on signing and a USD 100,000 investment in exploration at the Sierra Blanca gold-silver project within 12 months of the deal closing. Austral now retains the right to earn-in to a further 29% interest in SBSA (80% total) in return for a further USD 600,000 in work commitments over the next 24 months ("Tranche 2"). Subsequently, Austral will retain an option to acquire the remaining 20% in SBSA in return for further cash payments to Capella and work commitments at Sierra Blanca (see Company News Release dated April 1, 2020, and notes in the Annual Financial Statements).
- Minera Mariana: Final closing of the transaction to sell Capella's former 100%-owned subsidiary Minera Mariana SA to Cerrado Gold Inc (TSX:CERT; "Cerrado") occurred on January 22, 2021, and the Company received 833,334 common shares of Cerrado in recognition of the sale. At the date of this report, the Company holds these shares within its portfolio of marketable Corporate securities.

Corporate Developments

- On August 24, 2021, the Company signed a binding LOI through which Capella may earn-in to Cullen's Katajavaara and Aakenus gold(-copper) projects in the highly-prospective Central Lapland Greenstone Belt ("CLGB") of northern Finland. The agreement with Cullen was approved by the TSX Venture Exchange subsequent to the period ending August 31, 2021, and the acquisition of the Finnish subsidiary will be recognised in the next reporting period.

OUTLOOK

The Company's planned corporate and exploration operations have been impacted by the uncertainty created by the global pandemic COVID-19 announced by the World Health Organisation on March 11, 2020. The COVID-19 pandemic is having a negative impact on stock markets, currencies, and business activities globally. The full impact of COVID-19, on the Company or the Jurisdictions in which we operate, cannot be fully determined; but there may be potential negative impacts on the Company's ability to raise capital funds, planned exploration programmes, cash flows and liquidity.

The Complete plans to initiate formal drill permitting for priority drill locations at the Company's Norwegian project as soon as results from the current work program have been received, with planning for a high-resolution drone magnetic survey over key target areas on the Southern Gold Line property located in Sweden, is also well advanced. Joint Venture partners will continue to manage work programs at both the Savant Lake and Domain projects in Canada.

The volatility of stock markets and precious and base metals have eroded investor confidence to the extent that both advanced and junior companies have had a difficult time obtaining equity financing on reasonable terms. The Company is currently evaluating all financing options available to the Company at both the corporate and project level. The Company is seeking additional equity funding or alternative financing options to fund its ongoing exploration activities and to meet its current and ongoing general and administrative costs. The Company cannot guarantee it will be successful in raising additional funding or securing alternative financing options.

EXPLORATION ASSETS AND ACTIVITIES

SCANDINAVIAN PROJECTS

Capella's Scandinavian project portfolio currently consists of 5 high-grade copper and gold assets:

- Kjølvi and Løkken high-grade copper projects in central Norway:
 - 100% interests acquired from EMX Royalty Corp. (TSX:EMX; NYSE American:EMX; "EMX") in late-2020; and
- Southern Gold Line gold project in northern Sweden:
 - 100% interest acquired from EMX in late-2020, and
- Katajavaara and Aakenus gold-copper projects in Finland
 - Binding LOI signed with Cullen Resources Ltd (ASX:CUL; "Cullen") to earn-in to an initial 70% interest as per Company announcement dated August 24, 2021.

Finnish Gold-Copper Projects (Katajavaara & Aakenus; Capella Earn-in to Initial 70% Interest)

The Company announced on August 24, 2021, that it had signed a binding LOI with Cullen Resources Ltd ("Cullen") through which Capella may earn-in to Cullen's Katajavaara and Aakenus gold(-copper) projects in the highly-prospective Central Lapland Greenstone Belt ("CLGB") of northern Finland. The Katajavaara and Aakenus projects lie immediately adjacent to the productive Sirkka Thrust Zone, a regional structural corridor within the CLGB which is associated with numerous occurrences of both gold and base metals.

TSXV approval for the agreement with Cullen was received on September 7, 2021. As this approval was received subsequent to the period ending August 31, 2021, the acquisition of Cullen's Finnish subsidiary ("Cullen Finland Oy") will be recognised in future reporting periods.

The Katajavaara and Aakenus gold(-copper) projects cover an area of approximately 200km² and flank Outokumpu Oy's former gold-copper mining operation at Sattopora and the S2Resources/Kinross Gold Joint Venture ("JV") at Home, in addition to lying along strike from major recent exploration discoveries at Ikkari (Rupert Resources Ltd) and Aamurusko (Risti-Launi; Aurion Resources Ltd)¹. Scandinavia's largest operating gold mine - Agnico Eagle Mines Ltd's Kittila Gold Mine (2020 production - 208,125 oz Au; Reserves 30.4 MT

@ 4.1 grams per tonne Au for 4Moz Au; Agnico Eagle Mineral Reserves and Resources Statement December 31, 2020; <https://agnicoeagle.com/>)¹ – lies directly to the NE of the Cullen projects.

The binding LOI provides Capella with the opportunity to acquire an initial 70% in Cullen Finland Oy (Cullen's 100%-owned Finnish subsidiary; "Cullen Oy", and registered owner of the Katajavaara Exploration Permit Licence Application ("EPLA") and the Aakenus Reservation) through an initial cash payment to Cullen of AUD 50,000. Subsequently, a total USD 250,000 investment in exploration over a two-year period and staged cash payments to Cullen totalling USD 225,000 over a three-year period are required. Capella may increase its interest in Cullen Oy by an additional 10% (for a total 80% interest) by investing an additional USD 750,000 in exploration over a further two-and-a-half years.

Data compilations for the Katajavaara-Aakenus project area are well underway and include an evaluation of inhouse data already acquired by Cullen, together with the acquisition of historical geophysical and soil auger (till) geochemical data available from the GTK (Geological Survey of Finland).

¹ References made to nearby mines and analogous deposits provide context for the Katajavaara and Aakenus projects but are not necessarily indicative that these projects host similar tonnages or grades of mineralization.

Norwegian Copper and Swedish Gold Projects (Kjøli, Løkken, & Southern Gold Line)

Kjøli Copper Project, Norway (100% Capella)

The Company's Kjøli high-grade copper project cover a total area of 246km² and is located within the northern extension of the Røros mining district, which saw copper production from a number of high-grade massive sulfide (VMS) deposits from the mid-1600's until low copper prices in the mid-1980's resulted in their closures. Kjøli represents a brownfields/greenfields exploration project covering the former Kjøli and Killingdal copper mines, together with approximately 20km strike of underexplored but highly prospective stratigraphy for the discovery of new copper-rich VMS deposits. Historical copper grades from the Kjøli mine were reported to be 2.9% Cu².

Field activities completed at Kjøli during the Quarter included detailed soil sampling (2,800 samples) and ground geophysics (gravity survey) performed along the 20km strike extent of prospective stratigraphy for the discovery of new copper-rich massive sulfide deposits. Results are pending. The incorporation of final results from both the soil sampling and gravity surveys, together with previous results from the CARDS AI/Data Mining target generation work, is expected to allow the Company to identify specific drill sites and initiate permitting for a maiden winter diamond drill program.

² Historic production figures are from Birkeland, A. (1986) Mineralogisk og geokjemisk undersøkelse av Killingdal gruver, Sor-Trondelag. M. Scient. Thesis, University of Oslo in Geological Survey of Finland, Special Paper 53 pg. 86.

Løkken Copper Project, Norway (100% Capella)

The Løkken high-grade copper project is located 50km SW of the regional centre of Trondheim and covers an area of 210 km². The Løkken claim block surrounds the former Løkken underground mine (which closed in 1987 in response to low copper prices), and covers associated historical mineral processing facilities, plus multiple satellite bodies of mineralization with varying degrees of development. Løkken is considered to be the largest ophiolite-hosted Cyprus-type VMS deposit by tonnage, having produced an estimated 24Mt @ 2.3% Cu and 1.8% Zn (plus silver and gold credits)³.

³ Historic production values quoted for Løkken are from Grenne T, Ihlen PM, Vokes FM (1999) Scandinavian Caledonide metallogeny in a plate-tectonic perspective. Mineral Deposita 34:422–471, Neither Capella or EMX have performed sufficient work to verify the published data reported above, but both Companies believe this information to be considered reliable and relevant.

Field work during the current Quarter was focused on an evaluation and ranking of 24 known satellite copper-sulfide occurrences around the former Løkken mining operations. This field review was undertaken by experienced local geologist Rune Wilberg. Data derived from this review are currently being analyzed together with existing geophysical datasets (especially anomalies derived from regional Electro-Magnetic and Magnetic surveys) with recommendations for further work on the highest priority drill targets currently being reviewed.

Southern Gold Line, Sweden (100% Capella)

The Southern Gold Line (“SGL”) project is located in northern Sweden and consists of approximately 500km² of mineral claims located to the south of the Barsele gold project (Agnico Eagle Mines Ltd/Barsele Minerals Corp. JV) and in the immediate vicinity of Dragon Mining Ltd’s Fäboliden development project and Svartliden gold mine⁴. The SGL exploration concessions cover areas with similar geologic and structural settings to the Fäboliden deposit, with further potential for the discovery of high-grade orogenic gold deposits at or near granitoid-greenstone contacts. Previous exploration activities at SGL were successful in discovering gold-bearing boulders on surface in the southernmost Rötjärnen claim block.

During the Quarter, exploration activities at SGL were focused on the definition of priority target areas for gold mineralization through:

- Extensive soil sampling programs (Multi-Element Fine Fraction Analysis, or “MEFFA”), particularly in the Fäboliden North (2,105 samples taken) and southernmost Rötjärnen claim blocks (1,543 samples taken). Soil sampling at Fäboliden North was designed to follow-up on the anomalous areas defined in 2019/2020 from the regional Bulk-Leach Extractable Gold (“BLEG”) surveys, as well as over potentially gold-bearing lineaments identified in regional aeromagnetic surveys. At Rötjärnen, the MEFFA sampling grids were designed to extend the initial Hilti auger drill grids (see comments below) towards the north. Initial results have been received and are currently in the process of being evaluated.
- Ionic Leach (IL) sampling was undertaken in the area of previous BLEG anomalies in Fäboliden South. A total of 754 samples were taken, with results currently pending.
- BLEG sampling - a total of 55 samples were taken from the Fäboliden North and South claims, in order to complete first-pass coverage of the entire SGL property. Results have now been received and have resulted in the successful delineation of a new gold target (Örnträsk) in the Fäboliden North claim block.

On July 12, 2021, the Company provided an update on the Hilti auger drilling that had been undertaken on the southernmost Rötjärnen claim block, where geochemical vectors are being utilized to determine the source of gold-bearing boulders identified on surface. Anomalous gold and arsenic values were returned from the initial auger (Hilti) drilling of tills located up the interpreted glacial flow direction from gold-bearing boulders on the Rötjärnen claim. Gold values ranged from below detection limit to 110 parts per billion (“ppb”) whilst arsenic values, an important pathfinder element in orogenic gold systems, ranged from below detection limit to 40 parts per million (“ppm”). A follow-up auger drill program is currently underway, towards an area where historical scout drilling appears to have targeted gold deposits within a major flexure in a regional structural corridor.

⁴ References made to nearby mines and analogous deposits provide context for the Southern Gold Line project but are not necessarily indicative that the project hosts similar tonnages or grades of gold mineralization.

CANADA

Savant Lake Gold Project, Ontario (Capella 100%; Ethos Gold Corp. Earn-In to 70%)

On September 16, 2021, the Company agreed to revise the terms of Ethos Gold Corp's (TSXV:ECC: "Ethos") earn-in to a 70% interest in the Savant Lake Project in order to accommodate some delays with accessing parts of the Savant Lake project area. Revised terms are detailed below:

	Cash	Ethos Shares	Work Commitment
On signing	\$50,000	2,000,000	-
September 20, 2021	-	1,000,000	-
November 15, 2022	\$50,000	2,000,000	\$500,000
November 15, 2023	\$50,000	2,000,000	\$1,000,000
November 15, 2024	\$50,000	1,000,000	\$500,000
Total	\$200,000	8,000,000	\$2,000,000

The original terms of the Ethos earn-in agreement as announced on September 20, 2020, were as follows:

	Cash	Ethos Shares	Work Commitment
On signing	\$50,000	2,000,000	-
September 20, 2021	\$50,000	2,000,000	\$500,000
September 20, 2022	\$50,000	2,000,000	\$1,000,000
September 20, 2023	\$50,000	2,000,000	\$500,000
Total	\$200,000	8,000,000	\$2,000,000

In addition, in the event of an NI-43-101 compliant mineral resource of >1 million ounces of gold being defined on the property, then Ethos will make a further payment to Capella of \$50,000 in cash and 2 million Ethos shares.

At the date of this report, Capella owns 3,000,000 shares in Ethos Gold Corp which represents approximately 2.1% of Ethos's Issued and Outstanding shares.

Ethos currently expects to apply for permits for Savant Lake during Q4, 2021, with a view towards undertaking drilling on the project late in the 2021/2022 winter season.

The Savant Lake Project is located within the Archean-age Savant Lake-Sturgeon Lake greenstone belt, approximately 240 km NW of Thunder Bay and 240 km S of Newmont's operating Musselwhite mine⁵ (Proven and Probable Reserves at December 31, 2020: 8.9 MT @ 6.25 g/t Au for 1.79 Moz Au⁶). The Company's mineral claims in the Savant Lake area total 229 square kilometres and cover meta-volcanic and meta-sedimentary rock sequences which are prospective for both iron formation- ("Musselwhite-type") and shear zone-hosted gold deposits, in addition to base metal-rich (copper-zinc-gold) VMS deposits. The underlying vendors of the Savant Lake property retain a 2% Net Smelter Royalty ("NSR") on future metal production from the Project; one half (1%) of this NSR may be acquired for \$1 million.

⁵ Mineralization hosted on adjacent and nearby properties is not necessarily indicative of mineralization that may be hosted on the Company's Savant Lake project.

⁶ Source: Newmont Corporation Reserve and Resource Statement: February 10, 2021.

Domain Gold Joint Venture, Manitoba (Yamana Gold Inc. 70.4% - Capella 29.6%)

At the Domain Gold JV, project operator Yamana Gold Inc.'s ("Yamana") current focus is on Community Relations activities and work supporting an eventual exploration permit application (including a Stage 1 archaeological assessment, with permits being applied for in those areas not requiring a more detailed Stage 2 assessment). Pending receipt of the permit, follow-up diamond drilling is currently expected to begin in H1, 2022. Yamana had previously entered into an Exploration Agreement with the Bunibonibee Cree Nation in 2020 in

order to develop a cooperative and mutually beneficial relationship relating to mineral exploration within the Traditional Territory of Bunibonibee Cree Nation.

The Domain JV claims total 576 hectares and cover an area in which 62 holes / 9,660m of historic drilling have been completed and which successfully delineated significant high-grade, iron formation-hosted gold mineralization. Notable intercepts from this drilling include: RR-08-23, 2.65 metres (“m”) at 17.44 grams per tonne (“g/t”) of gold (“Au”) and 2.67m at 10.43 g/t Au; RR-08-21, 2.70m at 15.16 g/t Au; and RR-08-20, 9.0m at 7.29 g/t Au (see Company News Release dated June 12, 2017). True widths are estimated to be 80-100% of core length based on limited drilling.

Drilling to date at the Domain JV has been focused on the “Main Zone”, where high-grade, iron formation-hosted gold mineralization has been partially tested along some 800m of strike and remains open at both depth and along strike. The “Main Zone” mineralization lies on a prominent, northwest trending Horizontal Loop ElectroMagnetic (“HLEM”) anomaly, and a combined strike length of approximately 5km of HLEM anomalies remain to be tested within the Domain JV area. Initial drilling of HLEM conductors during the last drill program in the winter of 2017 was successful in discovering additional gold mineralization.

All information relating to exploration activities has been reviewed by Eric Roth, Chief Executive Officer and Executive Director of Capella Minerals Limited and presented in accordance with Canadian regulatory requirements as set out by National Instrument (“NI”) 43-101. Mr Roth holds a Ph.D. in Economic Geology from the University of Western Australia, is a Fellow of the Australian Institute of Mining and Metallurgy (AusIMM), a Fellow of the Society of Economic Geologists (SEG), and a Qualified Person under NI 43-101. Mr Roth has 30 years experience in international minerals exploration and mining project evaluation.

FINANCIAL CONDITION, LIQUIDITY, CAPITAL RESOURCES, OPERATIONS AND FINANCIAL RESULTS

OVERALL PERFORMANCE

During the three months ended August 31, 2021, the Company incurred a gain of \$328,591 (August 31, 2020: gain \$127,489). This gain was due predominantly to the gain of \$510,000 recognised on quoted equity shares held by the company as at August 31, 2021 offset by general operating costs incurred of \$180,760 (2020: \$171,080).

The Company will seek additional equity funding or alternative financing options to fund current and ongoing exploration activities and general and administrative costs.

FINANCIAL POSITION

A summary of the Company's financial position is as follows:

	August 31, 2021	May 31, 2021	May 31, 2020
	\$	\$	\$
Current assets	990,257	1,273,900	86,576
Non-current assets	5,880,124	5,104,626	1,501,591
Current liabilities	(345,645)	(211,675)	(2,701,409)
Non-current liabilities	(169,202)	(169,118)	(797,848)
Shareholders' equity (deficiency)	6,355,534	5,997,733	(1,911,090)

Included in current assets at August 31, 2021 is cash of \$650,896 receivables of \$23,493 and prepaid expenses of \$315,868. The decrease in current assets in the current period is due mainly to the cash balance being used to undertake exploration activities at the Company's Swedish and Norwegian interests and payment of corporate costs incurred to support the Company's operations, offset by prepaid expenses balance related to the Scandinavian properties.

The non-current assets balance has increased by \$775,498 due to exploration and evaluation expenditures of \$265,498 incurred on the recently acquired Scandinavian projects as the Company continued its exploration programs at projects located in Sweden and Norway, as well as an increase in the fair value of \$510,000 of the Company's quoted equity shares. This balance will fluctuate from period to period due to the revaluation of the investments each reporting period.

Current liabilities of the Company include accruals and accounts payable totalling \$314,310. These balances can fluctuate from period to period depending on the level of exploration activity and corporate activities undertaken by the Company. This balance has increased from the prior period due to continued exploration activities resulting in increased creditor balances being incurred during the period. At August 31, 2021 these liability balances mainly comprise of directors' fees payable of \$37,846, accounting and administration fees of \$36,000, audit and tax fee accrual of \$54,104, and other accounts payable related to exploration and general expenditure of \$173,809.

RESULTS OF OPERATIONS

The following is a breakdown of significant costs incurred for the three-month periods ending:

	August 31, 2021	August 31, 2020
	\$	\$
Management and administrative fees	99,355	100,271
Shareholder information and meetings	44,831	6,448
Share-based payments	21,417	-
Office and general	6,607	13,425
Professional fees	4,966	24,743
Regulatory and transfer agent fees	3,584	25,090
Salaries and benefits	-	1,103
Foreign exchange loss/(gain)	546	(7,893)
Loan interest	-	10,208
Contractual obligation interest	103	4,183
Write off IVA receivable	-	1,681
Provision against exploration & evaluation assets	-	11,816

Discussion of operations

Three months ended August 31, 2021 and August 31, 2020

During the three months ended August 31, 2021 (“current three-month period”), the Company recorded a net gain of \$328,591 compared to a net gain of \$127,489 for the three-month period ended August 31, 2020 (“comparative three-month period”).

The net gain recorded for the current three-month period is due mainly to the revaluation of \$510,000 on financial assets held at August 31, 2021. The value of these financial assets will fluctuate from period in line with movements in the closing share price of the quoted equity shares.

These gains were offset by increased investor relations expense of \$38,383 as the Company looked to promote its recently acquired Scandinavian properties and an increase in the share-based payment expense of \$21,417 due to options being issued.

Significant costs are detailed further below.

Management and administration fees have remained consistent as the Company continued its corporate activities to support its portfolio of the exploration activities.

Shareholder information expenses has increased by \$38,383 as the Company attended a greater number of conferences in the current period compared to the prior comparative period which had been impacted by COVID-19 restrictions. The Company also incurred greater costs as it looked to promote its recently acquired Scandinavian projects.

Office and general expenses and professional fees have decreased in the current three-month period due to less costs being incurred compared to the prior three-month period due mainly to the disposal of its Argentinean subsidiaries.

Regulatory and transfer agent fees decreased by \$21,506 in the current three-month period due predominantly to fees incurred in relation to the private placement completed in September 2020 (comparative three-month period).

Loan interest expense decreased by \$10,208 as the Company extinguished its loans with Sandstorm during the period ended May 31, 2021. Capella also continued to record interest in relation to its contractual obligation of payable to Sandstorm of \$103 for the current three-month period, this has reduced from the prior comparative three-month period as a result of the amendment to the terms of the annual payments to be made to Sandstorm.

The Company has recognised a total foreign exchange loss of \$546 which is an increase in costs from the prior comparative period due to the change in denomination of foreign currency transfers from the prior three-month period as a result of the Company's refocus from exploration activities in Argentina to Sweden and Norway.

The Company capitalizes all acquisition and exploration costs until the property to which those costs relate is placed into production, sold or abandoned. The decision to abandon a property is largely determined from exploration results and the amount and timing of the Company's write-offs of capitalized mineral property costs will vary from one year to the next and typically cannot be predicted in advance. Exploration and evaluation costs associated with the Savant Lake property are accounted for in line with the Company's farm out accounting policy.

SUMMARY OF QUARTERLY RESULTS

The following table sets out selected quarterly financial information of Capella and is derived from unaudited quarterly financial statements prepared by management.

Period	Revenues \$	Net profit (loss) for the period \$	Net profit/(loss) per share for the period- basic \$	Net profit/(loss) per share for the period- diluted \$
Three months ended August 31, 2021	Nil	328,591	0.00	0.00
Three months ended May 31, 2021	Nil	151,339	0.00	0.00
Three months ended February 28, 2021	Nil	1,578,722	0.01	0.01
Three months ended November 30, 2020	Nil	(305,717)	0.00	n/a
Three months ended August 31, 2020	Nil	127,489	0.00	0.00
Three months ended May 31, 2020	Nil	(4,799,790)	(0.08)	n/a
Three months ended February 29, 2020	Nil	(221,386)	(0.00)	n/a
Three months ended November 30, 2019	Nil	(251,230)	(0.00)	n/a

The Company's quarterly results can be affected by many factors such as winter conditions and/or seasonal fluctuations, variations in capital markets, the write-off of capitalized amounts, share-based payment costs, tax recoveries and other factors that affect Company's exploration and financing activities.

Mineral exploration is often a seasonal business, and the Company's expenditures and cash requirements may fluctuate depending upon the season.

The Company's expenditures may also be affected by the strength of capital markets. The Company's primary source of funding is through the issuance of share capital. When the capital markets are depressed, the Company's activity level may decline as a result of difficulties raising funds. When capital markets strengthen and the Company is able to secure equity financing with favourable terms, the Company's activity levels, and the size and scope of planned exploration projects may increase.

The Company's net gain of \$328,591 for the first quarter of fiscal 2022 is due mainly to the revaluation of \$510,000 on financial assets held at August 31, 2021. The value of these financial assets will fluctuate from period in line with movements in the closing share price of the quoted equity shares. This gain was offset by increased shareholder information costs as the Company increased its investor relations activities which had been impacted by COVID-19 restrictions and share based payment expense as the cost associated with the issue of options being recognised over their vesting period.

The Company's net gain of \$151,339 for the fourth quarter of fiscal 2021 is due mainly to the revaluation of \$468,333 related to financial instruments held in Ethos Gold and Cerrado Gold. This gain was offset by increased investor relation costs of \$96,622 which have increased from comparative quarters due to greater attendance at conferences in the current quarter which did not occur in the prior comparative period as a result of the COVID-19 pandemic, as well as increased targeted investor relations expenses during the current quarter as the Company looked to promote its recently acquired Scandinavian properties. Share based payments costs of \$21,417 was recorded related to options issued during the fiscal year were recorded. These increases were offset by decrease in travel expenses of \$37,813 due to the impact of COVID-19 travel restrictions in the current quarter, decrease in accounting fees of \$19,428 due to the decrease in operations in Argentina and ultimate sale of the Argentinean subsidiaries. A decrease of \$12,910 was recorded in relation to contractual obligation payable interest and interest recorded on SSL loan. In the prior period comparative quarter, the Company recognised a provision of \$4,528,887 in relation to its Argentinean projects., no provision against projects was recognised in the current quarter.

The Company's net gain of \$1,578,722 for the third quarter of fiscal 2021 is higher than that of the comparative 2020 quarter due mainly to the gain recognised on the sale of the Company's subsidiary of \$ 2,225,163 offset by increased share-based payments cost of \$18,680 and increased regulatory and transfer fees of \$6,652 due to the increased share issue activity in the current quarter. These increases were offset by a decrease in management and administrative fees \$10,508 and professional fees of \$22,827 due mainly to a decrease in these costs in Argentina due to a reduction in activity in that jurisdiction and ultimate sale of this operation this quarter. These reductions were offset by an increase in unrealized losses of \$165,000 on the revaluation of the financial assets held at the end of the current reporting period and an increase in foreign exchange loss recognised of \$277,682 due to the transfer of the balance of the foreign currency translation reserve following the sale of the Argentinean operation during the current period.

The Company's loss of \$ 305,717 for the second quarter of fiscal 2021 is higher than that of the comparative 2019 quarter due mainly to an increase in provision of \$37,615 recognised against exploration and evaluation costs, recognition of loss on sale of subsidiary of \$51,084, higher general and administrative expenses of \$28,489 due to increased share based payments expense of \$54,395 and increased management and administrative fees of \$30,605 due to increased non-executive director fees and consulting fees incurred. These costs were offset by unrealized gain on quoted equity shares of \$40,000 and the gain recognised on sale of equipment in Argentina of \$17,201.

The Company's gain of \$ 127,489 for the first quarter of fiscal 2021 is due mainly to the revaluation gain of \$318,564 recorded as a result of the revaluation of the contractual obligation payable due to amended terms being agreed with Sandstorm and a reduction in costs in related to share based payment expense and salary costs in the current three-month period when compared to the comparative period.

The Company's loss of \$4,799,790 for the fourth quarter of fiscal 2020 is higher than that that of the comparative quarter due mainly to the write down provision recorded of \$4,528,887 in relation to the Company's Argentinean projects.

The Company's loss of \$221,386 for the third quarter of fiscal 2020 is lower than that of the comparative quarter due mainly to a reduction in share-based payment expense and a general reduction in fees paid and administrative costs management looked to decrease costs.

The Company's loss of \$251,230 for the second quarter of fiscal 2020 is lower than that of the comparative quarter due to a reduction in share base payments expenses and a general decrease in management and administrative costs, and shareholder information expenses as the Company continued to look for areas to decrease expenditure.

SEGMENT INFORMATION

The Company's business consists of only one reportable segment, mineral exploration and development. Details on a geographic basis are as follows:

	August 31, 2021	May 31, 2021
	\$	\$
Sweden	778,289	659,524
Norway	1,709,359	1,562,626
Canada	908,103	908,103
	3,395,751	3,130,253

LIQUIDITY AND CAPITAL RESOURCES

As at August 31, 2021 the Company had cash of \$650,896. The Company has no operations that generate cash flow and its long-term financial success is dependent on management's ability to discover economically viable mineral deposits. The mineral exploration process can take many years and is subject to factors that are beyond the Company's control. The Financial Statements have been prepared on the assumption that the Company is a going concern, meaning that it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the normal course of operations.

The Company has incurred an accumulated deficit of \$15,803,344 at August 31, 2021 and has no current source of revenue. It is important to note the Company's continuation as a going concern is dependent on its ability to attain profitable operations and generate funds therefrom and/or raise funds sufficient to meet current and future obligations. In order to continue normal course of operations the Company is seeking additional equity funding, or alternative options, to fund ongoing exploration activities and to meet its current and ongoing general and administrative costs. The Company cannot guarantee it will be successful in raising additional funding, or in securing alternative financing options.

The Company's planned corporate and exploration operations have further been impacted by the uncertainty created by the global pandemic COVID-19 announced by the World Health Organisation on March 11, 2020. The COVID-19 pandemic is having a negative impact on stock markets, currencies and business activities globally. The full impact of COVID-19, on the Company or the Jurisdictions in which we operate, cannot be fully determined; but there may be potential negative impacts on the Company's ability to raise capital funds, planned exploration programmes, cash flows and liquidity.

In order to finance the Company's exploration programs and to cover administrative and overhead expenses, the Company raises money through equity sales and from the exercise of convertible securities. Actual funding requirements may vary from those planned due to a number of factors, including the progress of exploration activity and the state of the financial markets. There can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Many factors influence the Company's ability to raise funds, including the health of the resource market, the climate for mineral exploration investment, the Company's track record and the experience and caliber of its management.

The Company is currently evaluating all financing options at a Company and a project level in order to continue its normal course of operations. The Company intends to continue to use various strategies to minimize its dependence on equity capital, including the securing of joint venture partners where appropriate.

Operating Activities

During the three months ended August 31, 2021, the Company used \$185,374 (comparative three-month period – \$335,887) of cash to fund the ongoing operating activities of the Company. The cash used in operations reflects the gain for the period of \$328,591 (comparative three-month period – gain \$127,489) adjusted for the changes in working capital items such as accounts receivable and accounts payable and non-cash items. Non-cash items

include; unrealized gain of \$510,000 on revaluation of financial asset (comparative three-month period \$nil) and share based payments expense \$21,417 (comparative three-month period - \$nil).

Investing Activities

During the period ended August 31, 2021 the Company incurred net cash outflow in investing expenditures of \$274,664 (comparative three-month period – outflow \$11,394) due to expenditure incurred on exploration activities related to its Scandinavian projects. This expenditure has increased from the prior comparative period as the Company had reduced its exploration activities in the prior comparative period as it wound down its operations in Argentina.

Financing Activities

No financing activities were undertaken in the three months ended August 31, 2021. In the prior comparative period the Company had commenced raising funds via private placement which concluded in September 2020.

The Company has no operations that generate cash flow and its long-term financial success is dependent on management's ability to discover economically viable mineral deposits. The mineral exploration process can take many years and is subject to factors that are beyond the Company's control.

COMMITMENTS AND CONTINGENCIES

The Company has the following commitments and contingencies in relation to the revised acquisition terms for the Southern Gold Line, Løkken and Kjølø projects are as follows:

- Until Capella has completed financings to the value of CAD 4,500,000, EMX will retain a free carried 9.9% shareholding in Capella (subject to a cap of 15,693,785 shares). Afterwards, EMX retains the option to participate in future financings at its own discretion (in progress).
- On or before September 1, 2021, Capella shall incur no less than USD 100,000 in exploration expenditures on each of the three projects (in progress).
- On or before September 1, 2022, Capella shall incur an additional USD 500,000 in exploration expenditures aggregated across three projects (or on any one project).
- Beginning September 1, 2023, Capella commits to completing at least 1,000m of drilling on each project per year until the earlier of: i) a minimum of 10,000m has been completed on such project ii) the date that Capella has delivered to EMX a relinquishment notice in respect of a project or iii) the date that the parties mutually agree that no further drilling is warranted.
- From the second anniversary of signing (September 1, 2022), Capella will be required to make advanced royalty payments to EMX of USD 25,000 per project, increasing USD 5,000/year up until reaching a maximum of USD 75,000/year per project.
- Capella to make additional payments of USD 500,000 to EMX upon:
 - The filing of a Preliminary Economic Assessment technical report
 - The filing of a National Instrument 43-101 ("NI-43101) compliant feasibility study
- EMX to retain a 2.5% NSR in the projects, with 0.5% being purchasable for USD 1M within 6 years

OFF BALANCE SHEET ARRANGEMENTS

The Company does not utilize any off-balance sheet arrangements.

OUTSTANDING SHARE DATA

Outstanding share date as at August 31, 2021 is as follows:

	Price	Expiry date	Number of common shares
Common shares issued and outstanding			151,137,862
Securities convertible into common shares			
Options			
	\$0.25	June 4, 2023	2,165,000
	\$0.15	October 18, 2023	250,000
	\$0.12	November 4, 2023	4,980,000
Warrants	\$0.125/0.25*	March 8, 2022	7,062,350
	\$0.12	September 3, 2023	62,558,260
			228,153,472

* exercise price was \$0.125 to September 8, 2020 and \$0.25 thereafter until expiry March 8, 2022

RISKS AND UNCERTAINTIES

Capella has no history of profitable operations and is an exploration stage company. As such, it is subject to many risks common to such enterprises, including under-capitalization, cash shortages and limitations with respect to personnel, financial and other resources and lack of revenues. The Company's planned corporate and exploration operations have been impacted by the uncertainty created by the global pandemic COVID-19 announced by the World Health Organisation on March 11, 2020 of which the duration and full impact is unknown at this time.

Some of the Company's property interests are located in remote, undeveloped areas and the availability of infrastructure such as surface access, skilled labour, fuel and power at an economic cost, cannot be assured. These are integral requirements for exploration, development and production facilities on mineral properties. Power may need to be generated on site.

Resource acquisition, exploration, development, and operation is a highly speculative business that involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. While the discovery of precious metals and other minerals may result in substantial rewards, few properties that are explored are ultimately developed into producing mines. Major expenses may be required to locate and establish economically viable mineral deposits, to develop metallurgical processes and to construct mining and processing facilities at a particular site. It is impossible to ensure that the acquisition, exploration or development programs planned by the Company will result in a profitable commercial mining operation. The potential for any project to eventually become an economically viable operation depends on numerous factors including: the quantity and quality of the minerals discovered if any, the proximity to infrastructure, metal and mineral prices (which vary considerably over time) and government regulations. The exact effect these factors can have on any given exploration property cannot accurately be predicted but the effect can be materially adverse.

Exploration Stage Company

The Company is engaged in the business of acquiring and exploring mineral properties to locate economic deposits of minerals. All of its properties are in the early stages of exploration and are without defined mineral bodies. Advancement of the Company's properties will only occur after obtaining satisfactory exploration results. There can be no assurance that the Company's existing or future exploration programs will result in the discovery of economically recoverable mineral deposits. Further, there can be no assurance that even if an economic deposit of minerals is located, it can be commercially mined.

No Source of Operating Revenue and the Ability to Raise Capital to Fund Operations

At present, the Company's operations do not generate cash inflows and the Company's continued existence depends on management's ability to raise additional equity financing, discover recoverable mineral deposits and sell or otherwise participate in the development of those projects. Many factors influence the Company's ability to raise funds, including the health of the commodity resource market, the climate for mineral exploration investment, the Company's track record, and the experience and calibre of its management. Actual funding requirements may vary from those planned due to a number of factors, including the progress of exploration activities. Management will need to raise equity capital in the short term in order to continue as a going concern, but recognizes there are risks involved that may be beyond its control. If those risks fully materialize, the Company may not be able to raise adequate funds to continue its operations.

Political or economic instability in countries where the Company operates

Certain of the Company's properties are located in countries which may be subject to political and economic instability, or unexpected legislative change which may delay or prevent exploration of properties or affect investor appetite for the Company's jurisdictions.

Exploration of the Company's properties could be adversely affected by:

- political instability and violence;
- war and civil disturbance;
- labour unrest or community relation issues;
- permitting issues
- expropriation or nationalization;
- changing fiscal regimes and uncertain regulatory environments;
- changes to royalty and tax regimes;
- underdeveloped industrial and economic infrastructure; and
- the unenforceability of contractual rights and judgments.

Competition

The mineral exploration and mining business is competitive in all of its phases. The Company competes with numerous other companies in the search for and the acquisition of attractive mineral properties and individuals, including competitors with greater financial, technical and other resources, in the search for and the acquisition of attractive mineral properties. The Company's ability to acquire properties in the future will depend not only on its ability to advance its present properties, but also on its ability to select and acquire suitable prospects for mineral exploration or advancement. There is no assurance that the Company will be able to compete successfully with others in acquiring such prospects. In addition, there is a limited supply of good geological talent and drilling crews and equipment. There is no assurance that the Company will be able to acquire the supply of geological talent or drillers, executives or other employees or contractors that are required to complete exploration work in planned time frames.

Title to Property

The Company has taken precautions to ensure that legal titles to its property interests are properly recorded. There can be no assurance that the Company will be able to secure the grant or the renewal of exploration permits or other tenures on terms satisfactory to it, or that governments in the jurisdictions in which the properties are situated will not revoke or significantly alter such permits or other tenures or that such permits and tenures will not be challenged or impugned. In addition, some of the Company's properties are held in the names of others. Third parties may have valid claims underlying portions of the Company's interests and the permits or tenures may be subject to prior unregistered agreements or transfers or native land claims and title may be affected by undetected defects. If a title defect exists, it is possible that the Company may lose all or part of its interest in the properties to which such defects relate. In addition, the Company may fail, due to error, omission, or

technological issues to renew its claims in a timely manner, potentially resulting in the loss of valuable claims to property.

Personnel

Capella is very dependent upon the personal efforts and commitment of its existing management. To the extent that management's services would be unavailable for any reason, a disruption to the operations of Capella could result, and other persons would be required to manage and operate the Company.

Commodity Price Risk

The market price of precious metals and other minerals is volatile and cannot be controlled.

TRANSACTIONS WITH RELATED PARTIES

Balances and transactions between the Company and its subsidiaries have been eliminated on consolidation and are not disclosed below. Details of the transactions between the Company and other related parties are disclosed below.

a) Related party transactions

The Company incurred the following transactions in the normal course of operations in connection with an officer and/or director or companies which have or had a director and/or officers in common.

		Three months ended August 31, 2021	Three months ended August 31, 2020
		\$	\$
Consulting & Salary	(i)	71,754	67,811
Share-based payments		19,697	-

(i) Consulting costs relate to ER Global (CEO) - \$30,000, Marketworks (Company Secretary) \$10,620, and Genco Professional Services (CFO) \$17,976 and non-executive director fees of \$13,158.

b) Related party balances

	August 31, 2021	May 31, 2021
	\$	\$
Perihelion Inc - Mary Little	18,923	12,072
Glen Parsons	18,923	12,072
Marketworks Inc Kathryn Witter -Corporate Secretary	150	150

The Company also has a contractual obligation payable balance of \$159,091 to Sandstorm.

Refer to *Liquidity and Capital Resources* section for further details.

c) Compensation of key management personnel

The remuneration for the services of key management personnel during the period was as follows:

		Three months ended August 31, 2021	Three months ended August 31, 2020
		\$	\$
Salary/Exploration/Consulting	(i)	71,754	67,811
Share based payments		19,697	-

(i) Key management were not paid post-employment benefits or other long-term benefits were paid during the three months ended August 31, 2021 and August 31, 2020.

FINANCIAL RISK MANAGEMENT

The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments are summarized below.

a) Currency Risk

The Company is primarily exposed to currency fluctuations relative to the Canadian dollar through expenditures that are predominantly denominated in US dollars, Swedish kroner and Norwegian kroner. Also, the Company is exposed to the impact of currency fluctuations on its monetary assets and liabilities.

The Company is exposed to foreign currency risk through the following financial assets and liabilities denominated in currencies other than Canadian dollars:

August 31, 2021	Cash	Receivables	Accounts payable and accrued liabilities
	\$	\$	\$
US dollars	92,920	-	75,692
Swedish kroner	24,984	19,305	140,432
Norwegian kroner	1,890	-	26,177

May 31, 2021	Cash	Receivables	Accounts payable and accrued liabilities
	\$	\$	\$
US dollars	87,505	-	24,144
Swiss Francs	-	-	15,427

At August 31, 2021 with other variables unchanged, a +/-10% change in exchange rates would decrease/increase pre-tax loss by \$10,320. (2020: \$43,765).

b) Interest rate and credit risk

Interest risk is the risk that the value of assets and liabilities will change when the related interest rates change. The Company is not currently exposed to interest rate risk. The Company's long-term debt will attract interest with effect from December 31, 2022 if not paid prior. The Company's current financial assets and financial liabilities are not significantly exposed to interest rate risk because either they are of a short-term nature or because they are non-interest bearing. The Company has a positive cash balance. At August 31, 2021, the Company has a positive cash balance. The Company has no significant concentrations of credit risk arising from operations. The Company's current policy is to invest excess cash in investment-grade short-term deposit

certificates issued by reputable financial institutions with which it keeps its bank accounts and management believes the risk of loss to be remote. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. As at August 31, 2021 and August 31, 2020, the Company did not hold any short-term investments or cash equivalents.

Receivables consist of goods and services tax and taxes due from the government of Canada and Sweden. Management believes that the credit risk concentration with respect to receivables is limited.

c) Liquidity Risk

Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short-term obligations. The Company cannot guarantee it will be successful in raising additional funding or securing financing options.

The COVID-19 pandemic is having a negative impact on stock markets, currencies and business activities globally. The full impact of COVID-19, on the Company or the Jurisdictions in which we operate, cannot be fully determined; but there may be potential negative impacts on the Company's ability to raise capital funds, planned exploration programmes, cash flows and liquidity.

Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short-term obligations. As at August 31, 2021, the Company had cash of \$650,896 (May 31, 2021 - \$1,103,663) to settle current liabilities of \$345,645 (May 31, 2021 - \$211,675). Included in current liabilities is a balance owed to related parties of \$37,996 which were settled subsequent to the period. Also included in current liabilities is a balance of \$29,889 for the current portion of the contractual obligation payable to Sandstorm to be paid in either cash or shares at the Company's discretion. The balance of the current liabilities are to creditors and suppliers related to the Company's exploration activities in Sweden and Norway and corporate activities supporting these operations.

d) Commodity Price risk

The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market prices of gold and silver. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

e) Equity price risk

The Company is exposed to equity price risk for equity investments at fair value through profit and loss. Equity price risk is the risk that the fair value of a financial instrument varies due to equity market changes. The Company's equity investments are exposed to equity price risk since their fair value is determined through the last closing share price on the relevant stock exchange. The Company has no specific strategy to manage the equity price risk.

At August 31, 2021 with other variables unchanged a +/- 10% change of the quoted equity investment value at the end of the reporting period would result in a decrease/increase in pre-tax loss of \$235,833 (2020: nil),

CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure for its projects for the benefit of its stakeholders. As the Company is in the exploration stage, its principal source of funds is from the issuance of common shares.

In the management of capital, the Company includes the components of shareholders' equity/(deficiency) and loans.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the

Company may attempt to issue new shares, enter into joint venture property arrangements, acquire or dispose of assets or adjust the amount of cash and cash equivalents and short-term investments. There are no external requirements imposed on the Company regarding its capital management or changes to the Company's approach.

The Company's investment policy is to invest its cash in highly liquid short-term interest-bearing investments selected with regards to the expected timing of expenditures from continuing operations.

The Company will require additional financing in order to fund working capital requirements and conduct additional acquisitions, exploration and evaluation of mineral properties.

SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of the financial statements in conformity with IFRS requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the interim financial statements and the reported revenues and expenses during the period.

Although management uses historical experiences and its best knowledge of the amount, events or actions to form the basis for judgments and estimates, actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised, if the revision affects only that period or in the period of the revision and further periods if the revision affects both current and future periods.

In March 2020, the COVID-19 outbreak was declared a pandemic by the World Health Organization. We have seen an impact on our business to date, with some delays in corporate and operational activities being experienced as a result of restrictions imposed by governments in dealing with the pandemic. The scale and duration of these developments continue to remain uncertain as at the date of this report creating ongoing uncertainty and as a result certain assumptions and estimates used in the preparation of these financial statements are subject to greater volatility than normal.

The most significant accounts that require estimates as the basis for determining the stated amounts include exploration and evaluation assets, the valuation of share-based payments, the valuation of other income on deferred premiums, the valuation of the contractual obligation payable, the valuation of amounts receivable from governments and the valuation of deferred tax amounts.

Critical judgments exercised in applying accounting policies that have the most significant effect on the amounts recognized in the Interim Financial Statements are as follows:

(i) Economic recoverability and probability of future benefits of exploration and evaluation costs.

Management has determined that exploration, evaluation and related costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geologic and other technical information, history of conversion of mineral deposits with similar characteristics to its own properties to proven and probable mineral reserves, the quality and capacity of existing infrastructure facilities, evaluation of permitting and environmental issues and local support for the project.

(ii) Valuation of share-based payments

The Company uses the Black-Scholes Option Pricing Model for valuation of share-based payments. Option pricing models require the input of subjective assumptions including expected price volatility, interest rates and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and Company's earnings and equity reserves.

(iii) *Income taxes*

In assessing the probability of realizing income tax assets, management makes estimates related to expectations of future taxable income, applicable tax opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified.

(iv) *Non-cash transactions*

The valuation of shares issued in non-cash transactions. Generally, the valuation of non-cash transactions is based on the value of the goods or services received. When this cannot be determined, it is based on the fair value of the non-cash consideration. When non-cash transactions are entered into with employees and those providing similar services, the non-cash transactions are measured at the fair value of the consideration given up using market prices.

(v) *Functional currency*

The Company has evaluated the economic environment its entities operate in and determined that the functional currency of its newly incorporated entities Capella Minerals Sweden AB and Capella Minerals Norway AS is the Swedish kroner and Norwegian Kroner respectively. The functional currency of its other entities, including the parent is the Canadian dollar. It was determined that the Company's former Argentinean subsidiaries had the Argentinean peso as their functional currency.

(vi) *Contractual obligation payable*

The Company has a contractual obligation to pay up to \$400,000 per year for a period of up to 15 years to acquire Sierra Blanca in Argentina. The terms of this payable were amended during the period ended May 31, 2021. The Company has assessed the contractual obligation payable for the acquisition of the Argentinean asset as being more likely than not to not continue past 5 years from the effective date of the amendment to the agreement.

ACCOUNTING STANDARDS

Principles of Consolidation

The Company's financial statements have been prepared in accordance with IFRS and include the accounts of the Company and its 100% controlled entities as follows:

Entity	Country of Incorporation	Functional Currency
NDR Guernsey Limited	Guernsey	Canadian dollar
Dimension Resources (USA) Inc.	U.S.A.	Canadian dollar
Capella Minerals Sweden AB (previously known as Bastutrask Holdings AB)	Sweden	Swedish kroner
Capella Minerals Norway AS (previously known as Norra Metals 1 AS)	Norway	Norwegian kroner

The Company's financial statements have been prepared on a historical cost basis except for certain financial instruments measured at fair value and balances related to the Argentinean subsidiaries that have applied IAS 29 during the year.

APPROVAL

The Board of Directors of Capella has approved the disclosure contained in this MD&A. A copy of this MD&A will be provided to anyone who requests it.

FORWARD LOOKING INFORMATION

Forward-looking statements relate to future events or future performance and reflect management's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage.

These forward-looking statements include, among others, statements with respect to the Company's objectives for the ensuing year, our medium and long-term goals, and strategies to achieve those objectives and goals, as well as statements with respect to our beliefs, plans, objectives, expectations, anticipations, estimates and intentions. The words "may," "could," "should," "would," "suspect," "outlook," "believe," "plan," "anticipate," "estimate," "expect," "intend," and words and expressions of similar import are intended to identify forward-looking statements. In particular, statements regarding the Company's ability to raise sufficient capital, future operations, future exploration and development activities or other development plans contain forward-looking statements.

All forward-looking statements and information are based on the Company's current beliefs as well as assumptions made by and information currently available to the Company concerning anticipated financial performance, business prospects, strategies, regulatory developments, development plans, exploration, development and mining activities and commitments. Although management considers these assumptions to be reasonable based on information currently available to it, they may prove to be incorrect.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution readers not to place undue reliance on these statements as a number of important factors could cause the actual results to differ materially from the beliefs, plans, objectives, expectations, anticipations, estimates and intentions expressed in such forward-looking statements.

These factors include, but are not limited to, COVID 19 pandemic, developments in world financial and commodity markets, risks relating to fluctuations in the Canadian dollar and other currencies, including the Argentinean peso, relative to the US dollar, changes in exploration plans due to exploration results and changing budget priorities of the Company or its joint venture partners, changes in project parameters as plans continue to be refined; possible variations in ore reserves, grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing, the effects of competition in the markets in which the Company operates, the impact of changes in the laws and regulations regulating mining exploration and development, judicial or regulatory judgments and legal proceedings, operational and infrastructure risks, and the Company's anticipation of and success in managing the foregoing risks. The Company cautions that the foregoing list of factors that may affect future results is not exhaustive. When relying on our forward-looking statements to make decisions with respect to the Company, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. The Company does not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by the Company or on our behalf, except as required by law.
