

# Prospera Announces Financing Update

CALGARY, Alberta, Dec. 12, 2025 (GLOBE NEWSWIRE) -- Prospera Energy Inc. (TSX.V: PEI, OTC: GXRFF) ("**Prospera**", "**PEI**" or the "**Corporation**")

## Convertible Debt Offering

Prospera Energy Inc. (TSXV: PEI) is pleased to announce the closing of its previously announced convertible debt offering, raising total proceeds of \$3,627,580. The proceeds have been allocated exclusively toward strengthening working capital, well reactivations, and production optimization.

Through this offering, the Corporation proactively addressed near-term debt obligations by replacing soon-to-expire debt instruments with longer-term three-year debt instruments aligned with Prospera's growth and cash flow profile. This initiative significantly extends the debt maturity profile, reduces near-term liquidity risk, enhances the working capital position, and provides greater financial flexibility for ongoing operations and future growth. It also aligns future cash outflows with expected cash flow generation and reduces monthly cash commitments tied to payback of debt instruments.

The placement received substantial participation from insiders and members of the Board, demonstrating strong internal confidence and commitment to Prospera's strategic direction.

CFO Chris Ludtke commented, "*The financing materially improves our liquidity, reduces near-term balance sheet risk, and positions the company for sustainable execution.*"

The offering remains subject to TSXV acceptance. The securities were offered to qualified purchasers in reliance upon exemptions from prospectus and registration requirements under applicable securities legislation. These private placements are offered only in jurisdictions where the Corporation is legally permitted to do so.
