1. Nature of Operations

Plato Gold Corp. (the "Company") is an Ontario corporation formed by amalgamation on May 30, 2005. The primary offices are located at 1240 Bay Street, Suite 800, Toronto, Ontario M5R 2A7.

The Company is a public gold and rare minerals exploration company with three projects. The first project, Good Hope Niobium Project consists of a total of 254 claims, consisting of 227 Single Cell Mining Claims and 27 Boundary Cell Mining Claims, and covers an area of approximately 5,100 hectares in Killala Lake Area and Cairngorm Lake Area Townships, northwest of Marathon, Ontario. The second project, the Lolita Project in Santa Cruz, Argentina, includes three adjoining concessions in Southern Argentina, which are held by the Company's 75% owned subsidiary, Winnipeg Minerals S.A. ("WMSA"). The third project, the Timmins Gold Project in Northern Ontario includes four properties (Guibord, Harker, Holloway and Marriott) in what is sometimes referred to as the Harker/Holloway gold camp located east of Timmins.

The Company is in the process of exploring its mineral properties and has not yet determined whether its properties contain economic mineral reserves. Consequently, as of September 30, 2019 the Company considers itself to be an exploration and evaluation stage company with respect to these properties.

The Company has not yet realized profitable operations and has incurred significant losses to date resulting in a cumulative deficit of \$11,370,541 as at September 30, 2019. The Company's continued existence is dependent upon its ability to raise additional capital and/or obtaining financing from related parties and develop profitable operations. Management believes that it has the ability to raise the required additional funding. While management has been historically successful in raising the necessary capital, it cannot provide assurance that it will be able to execute on its business strategy or be successful in future financing activities. As at September 30, 2019, the Company's current liabilities exceed its current assets by \$272,913. Given the above, the Company has material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern.

2. Basis of Presentation and Going Concern

The Company's condensed interim consolidated financial statements reflect the results of operations for the nine months ended September 30, 2019 and 2018, and the assets, liabilities and shareholders' equity as at September 30, 2019.

The condensed interim consolidated financial statements include the accounts of the Company and its 75% owned subsidiary, Winnipeg Minerals S.A., an Argentinean company. All significant intercompany balances and transactions have been eliminated on consolidation.

a) Statement of Compliance

The Company's consolidated financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting ("IAS 34"). The IAS 34 interim financial statements do not include all of the information required for annual financial statements.

2. Basis of Presentation and Going Concern (continued)

a) Statement of Compliance (continued)

These condensed interim consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2018.

The policies applied in the Company's consolidated financial statements are in accordance with International Financial Reporting Standards ("IFRS") effective as of September 30, 2019 as issued by the International Accounting Standards Board. The date that the Board of Directors approved the statements is November 22, 2019.

b) Critical judgements, estimates, and assumptions

The preparation of the condensed interim consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed interim consolidated financial statements and the reported amounts of operations during the reporting period. Significant estimates and assumptions include those related to the following:

- the recoverability of the carrying value of the resource properties
- management's determination that there is no deferred tax asset recognized in these consolidated financial statements and
- the ability to continue as a going concern
- the value of warrants issued by the Company

While management believes that the estimates and assumptions are reasonable, actual results could differ from those estimates.

Management has also used its judgement in determining that the functional currency of the Company is the Canadian dollar and the state of development of the mineral properties as exploration stage.

c) Going Concern

The Company's ability to continue as a going concern is dependent upon, but not limited to, its ability to raise financing necessary to fund its exploration and development programs and general and administrative expenses, maintain its resource properties, discharge its liabilities as they become due and generate positive cash flows from operations. There is no certainty that the Company will be successful in raising financing given the current condition of the financial markets, and as such there is significant uncertainty the Company will be able to continue as a going concern.

2. Basis of Presentation and Going Concern (continued)

c) Going Concern (continued)

The condensed interim consolidated financial statements are prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of the business. Accordingly, these condensed interim consolidated financial statements do not give effect to adjustments that may be necessary, should the Company be unable to continue as a going concern. If the going concern assumption is not used then the adjustments required to report the Company's assets and liabilities at liquidation values could be material to these condensed interim consolidated financial statements.

3. Significant Accounting Policies

The Company's complete accounting policies have been included in the consolidated financial statements for the year ended December 31, 2018. The accounting policies the Company followed in preparing these condensed interim consolidated financial statements were the same as those applied by the Company in the annual consolidated financial statements as at and for the year ended December 31, 2018.

a) Changes in accounting standards effective January 1, 2019:

IFRS 16 Leases ("IFRS 16") was issued by the IASB in January 2016 and replaces IAS 17, Leases for annual periods beginning on or after January 1, 2019. IFRS 16 specifies the methodology to recognize, measure, present, and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases except for short-term leases and leases with low value assets. A lessee will apply IFRS 16 to its leases either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of applying IFRS 16 being recognized at the date of initial application. The adoption of IFRS 16 did not have a significant impact on its condensed interim consolidated financial statements.

4. Other Receivables

Other receivables include a receivable from a related party of \$53,506 (December 31, 2018 - \$50,833), which is net of a valuation allowance of \$23,912 (December 31, 2018 - \$23,912) and HST receivable of \$17,908 (December 31, 2018 - \$15,907).

The receivables from related party are due on demand and do not bear interest. Due to the short-term nature, the carrying amount of the receivables approximates fair value. The related party holds the non-controlling interest in WMSA.

6. Mineral Properties and Deferred Exploration Costs (continued)

a) Good Hope Niobium Project (continued)

Prior to the 1st anniversary of the TSXV approval, on May 31, 2018, the Company issued 1,150,000 common shares for the KL37 and KL226 Option Agreements and made cash payment of \$20,000 for the KL226 Option Agreement. As well, exploration expenditures in excess of \$100,000 were made prior to the 1st anniversary.

Prior to the 2nd anniversary of the TSXV approval, on May 31, 2019, the Company issued 1,150,000 common shares for the KL37 and KL226 Option Agreements and made cash payment of \$20,000 for the KL226 Option Agreement.

On August 8, 2019, the Company issued the remaining 2,300,000 common shares and \$40,000 cash payable for the KL37 and KL226 Option Agreements.

On August 27, 2019, the Company announced that it has met all the terms of the KL37 and KL226 Option Agreements and 100% ownership of the claims were transferred to Plato Gold Corp.

b) Lolita Project

On August 27, 2007, the Company entered into an agreement to acquire a 75% interest in the Lolita Property in Argentina. The Company was required to incur US\$50,000 in initial expenditures before June 19, 2009. On June 16, 2009 the parties extended this requirement to December 31, 2009. As of December 31, 2009, the initial expenditures of US\$50,000 (CDN\$50,094) had been met in accordance with the agreement.

Upon completion of the initial expenditures, a Joint Work Program for up to US\$500,000 was jointly developed and financed 75% by the Company and 25% by the other party ("Lhotka"). The agreement allows that Lhotka shall have its Joint Venture interest in the property diluted by 5% for each US\$100,000 in expenditures spent by the Company, if Lhotka declines its portion of the expenditure. Lhotka's interest in the property shall not be reduced to less than 2%, unless otherwise agreed by the parties, and Lhotka is entitled to receive a 2% Net Smelter Royalty ("NSR"). The Company has available an option to purchase the NSR for US\$500,000.

With the completion of the initial expenditures, registration of ownership of the property proceeded in accordance with the Joint Venture Agreement. As of August 9, 2011, Winnipeg Minerals S.A. ("WMSA") was incorporated in Argentina with the Company holding 75% and Lhotka holding 25% of the outstanding shares. The mineral claims were subsequently transferred to WMSA as of November 14, 2011.

With the exception of the amendment on June 16, 2009, there have been no changes to the terms of the option agreement since August 27, 2007.

6. Mineral Properties and Deferred Exploration Costs (continued)

b) Lolita Project (continued)

The option agreement, including the amendment, was in good standing as of September 30 and there are no breaches of any covenants, terms or conditions in respect thereof.

Pursuant to an impairment analysis performed on the Company's Lolita property as at December 31, 2015, the Company decided to write down the carrying value of the property totaling \$321,275 to \$Nil. While the Company's interest in the Lolita project remains unchanged for the nine months ended September 30, 2019, the Company has determined not to substantiate the carrying value of the properties until there are expenditures by the Company on exploration and evaluation of mineral resources for this property. Accordingly, all costs incurred to date were written off as an impairment loss. Should a valuation analysis be performed in the future such that the estimated recoverable amount of the Lolita property is greater than the carrying amount of \$Nil, the impairment losses recognized in prior years could reverse in part, or in full. In this situation, the carrying amount could be increased to an amount that does not exceed the original carrying amount that would have been determined had no impairment loss been recognized for the Lolita property in prior years. To date, the Company has incurred and written down \$377,698 of project related costs.

c) Timmins Gold Project

The Timmins Gold Project is comprised of four properties along the DestorPorcupine Fault Zone located east of Timmins. The properties are comprised of 4 leases and 98 claims. The Company holds 100% interest in the Holloway and Marriott Properties. The Company holds 50% interest in the Guibord property with the remaining 50% held by Osisko, of which 10% is beneficially held for Kirland Lake. The Company holds 20% interest in the Harker property with the remaining 80% held by Osisko. The properties are subject to a 2% net smelter royalty held by a former director of the Company.

Pursuant to an impairment analysis performed on the Company's Timmins property as at December 31, 2015, the Company decided to write down the carrying value of the property at December 31, 2015 totaling \$1,010,246 to \$Nil. While the Company's interest in the Timmins project remains unchanged for the nine months ended September 30, 2019, the Company has determined not to substantiate the carrying value of the properties until there are expenditures by the Company on exploration and evaluation of mineral resources for this property. Accordingly, all costs incurred to date were written off as an impairment loss during the nine months ended September 30, 2019. Should a valuation analysis be performed in the future such that the estimated recoverable amount of the Timmins property is greater than the carrying amount of \$Nil, the impairment losses recognized in prior years could reverse in part, or in full. In this situation, the carrying amount could be increased to an amount that does not exceed the original carrying amount that would have been determined had no impairment loss been recognized for the Timmins property in prior years. To date, the Company has incurred and written down \$1,037,429 of project related costs.

9. Stock Based Compensation (continued)

a) Stock Options Plan (continued)

Under the Plan, the aggregate number of shares to be issued upon the exercise of options granted thereunder may not exceed 10% of the number of issued and outstanding shares at the time of granting the options. Options shall expire no later than ten years after the date of grant.

The exercise price of options granted pursuant to the Plan shall be established based on the average closing price of the shares for the five days prior to the date of grant or such other method of pricing as may be acceptable to the stock exchange on which the shares are listed. The options shall vest and may be exercised as determined by a resolution of the board of directors.

b) A summary of changes to stock options is as follows:

	Number	Weighted Average Exercise Price
Balance -December 31, 2018	11,375,000	\$ 0.10
Granted/vested	5,250,000	0.10
Expired	(500,000)	-
Balance - September 30, 2019	<u>16,125,000</u>	<u>\$ 0.10</u>

All outstanding options have fully vested and are exercisable.

During the nine months ended September 30, 2019, 500,000 options belonging to a retired employee expired unexercised.

On April 23, 2019, the Company granted 5,250,000 options to its directors, officers, employees and consultants. Each option entitles the holder to acquire one common share of the Company at an exercise price of \$0.10 per share for a period up to 10 years from the date the option was granted. The stock options vest immediately upon grant and are fully exercisable.

The Company recorded share based compensation expense of \$52,233 on the interim consolidated statement of loss and comprehensive loss for the 5,250,000 stock options granted. The fair value of the options granted was estimated at the grant date based on the Black-Scholes pricing model, using the following assumptions:

Expected dividend yield	Nil
Risk-free interest rate	1.78%
Expected life	10 years
Expected volatility	197%
Stock price	\$0.01

11. Financial Instruments

a) Liquidity Risk

Liquidity risk refers to the risk that the Company will not be able to meet its financial obligations when they become due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities as they become due. As at September 30, 2019, the Company had current assets of \$377,644 (December 31, 2018 - \$282,806) to settle current liabilities of \$650,557 (December 31, 2018 - \$707,701). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

The Company has no income and relies on equity financing to support its exploration program. Additional financing is required to fund the related operating expenses required to manage the Company through fiscal 2019. Management prepares budgets and ensures funds are available prior to commencement of any exploration program. During the year ended December 31, 2018, the Company received the majority of its financing from the private placements. During the nine months ended September 30, 2019, the Company received the majority of its financing through the sale of portfolio investments and from the private placements.

b) Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfil its payment obligations. The Company's credit risk relates to cash and other receivables. Cash is held with a reputable financial institution and is closely monitored by management. Other receivables include a receivable from a related party of \$53,506 (December 31, 2018 - \$50,833), which is net of a valuation allowance of \$23,912 (December 31, 2018 - \$23,912) and HST receivable of \$17,908 (December 31, 2018 - \$15,907).

c) Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as foreign exchange rates and equity prices.

(i) Foreign Exchange Risk

The Company is exposed to financial risk related to foreign exchange rates. The Company operates in Canada and Argentina. A significant change in the currency exchange rates between the Canadian dollar and Argentinean peso could have an effect on the Company's results of operations.

At September 30, 2019, the Company is exposed to currency risk through Argentinean cash expressed in Canadian dollars of \$366 (December 31, 2018 - \$216). A 10% depreciation or appreciation of the Canadian dollar against the Argentinean peso would result in an increase/decrease of approximately \$37 (December 31, 2018 - \$16) the Company's condensed interim consolidated statement of comprehensive loss.

c) Market Risk (continued)

(ii) Equity Price Risk

The Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company's investments in the common shares of Osisko Mining Inc., Monarques Gold Corporation and Kirkland Lake Gold Inc. are subject to fair value fluctuations arising from changes in the equity market. At September 30, 2019, should the equity prices of the Company's holdings increase or decrease by 5%, the impact on net loss would be approximately \$4,576 (December 31, 2018 - \$10,856).

12. Capital Disclosures

The Company's objective when managing capital is to raise sufficient funds to execute its exploration plan. At September 30, 2019, the Company's capital consists of shareholders' equity in the amount of \$1,369,165 (December 31, 2018 - \$1,046,165).

The properties in which the Company currently has an interest are in the exploration stage; as such, the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed.

The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company does not have any externally imposed capital requirements. There were no changes in the Company's approach to capital management during the nine months ended September 30, 2019 and the year ended December 31, 2018.
