

## MANAGEMENT DISCUSSION AND ANALYSIS FOR THE THREE MONTHS ENDED DECEMBER 31, 2025

---

Management's discussion and analysis ("MD&A") provides a detailed analysis of the results and financial condition of Enduro Metals Corporation (the "Company") for the period ended December 31, 2025. The following MD&A should be read in conjunction with the unaudited condensed interim consolidated financial statements for the period ended December 31, 2025 and 2024, which have been prepared using accounting policies consistent with IFRS Accounting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting

This Management's Discussion and Analysis ("MD&A") is dated March 2, 2026, and discloses specified information up to that date. Unless otherwise cited, references to dollar amounts are in Canadian dollars. This MD&A contains "forward-looking statements" that are subject to risk factors including those set out in the "Cautionary Statement" at the end of this MD&A. All information contained in this MD&A is current and has been approved by the Company's Board of Directors as of March 2, 2026, unless otherwise indicated. Throughout this report we refer to "Enduro", the "Company", "we", "us", "our", or "its". All these terms are used in respect of Enduro Metals Corporation. **We recommend that readers consult the "Cautionary Statement" on the last page of this report.** Additional information relating to the Company is available on the Company's website at [www.endurometals.com](http://www.endurometals.com) and on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

The condensed interim consolidated financial statements were prepared in accordance with IFRS with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The operations of the Company are primarily funded from financing activities and the issuance of capital stock.

The continued operations of the Company are dependent on its ability to develop a sufficient financing plan, receiving the continued financial support from related parties, completing sufficient equity financings, or generating profitable operations in the future. The Company has not generated revenue from its operations and expects to incur further losses in the exploration and evaluation of its mineral properties. These conditions indicate the existence of material uncertainty which may cast significant doubt on the Company's ability to continue as a going concern. The condensed interim consolidated financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue its business.

### Description of Business

Enduro Metals Corporation was incorporated under the Business Corporations Act (British Columbia) on July 20, 2009, and is publicly listed and traded on the TSX Venture Exchange ("TSX-V") under the trading symbol "ENDR", the OTC Markets Group Inc under the ticker symbol "ENDMF", and the Frankfurt Stock Exchange ("FSE") under the ticker symbol "SOGO". The Company is currently engaged in the identification, acquisition, and exploration of prospective mineral properties in Canada. Enduro Metals is focused on its Newmont Lake Project, a 688km<sup>2</sup> property located in the heart of British Columbia's Golden Triangle, a world class mineral district hosting multiple successful mines. The Company maintains a broader portfolio of mineral projects across Canada including the advanced Burn porphyry copper and gold project in northern British Columbia.

Robert Cameron, P.Geol., Chief Executive Officer and a Qualified Person under National Instrument 43-101, has reviewed and approved the technical information presented in this MD&A.

**Data Verification:** All technical data presented herein is either accompanied by a reference to the original public disseminated news release which contains the detailed QA/QC data for the data, or the QA/QC is presented here. Historical data is, when referenced as such, treated as valid for exploration purposes only by the Company following review by Qualified Persons, Robert Cameron, P.Geol. and Stephen Wetherup, P.Geol. For additional details on data verification, sample, analytical and testing results, refer to the technical reports titled "Technical Report on the Newmont Lake Property" authored by Maurizio Napoli, P.Geol. and Ali Wasiliew, P.Geol. dated March 1, 2025 and "Technical Report on the Burn Property" authored by Afzaal Pirzada, P.Geol. dated April 9, 2025 posted on Sedar+ and the Company's website.

## Financial Highlights

### Private Placement

On August 19, 2025, the Company completed the first tranche of a non-brokered private placement for gross proceeds of \$2,730,477. The tranche consisted of 1,945,825 flow-through common shares ("FT Shares") issued at \$0.185 per FT Share and 15,803,332 non-flow-through units ("NFT Units") issued at \$0.15 per NFT Unit. Each FT Share qualified as a flow-through share as defined in subsection 66(15) of the Income Tax Act (Canada). Each NFT Unit comprised one common share and one-half of one common share purchase warrant, with each whole warrant entitling the holder to acquire one additional common share at an exercise price of \$0.22 until August 19, 2027.

In connection with the financing, the Company paid cash finder's fees of \$91,695 and issued 599,741 finder's warrants to arm's length parties. Each finder's warrant is exercisable into one common share at a price of \$0.18 until August 19, 2026. All securities issued are subject to a four-month statutory hold period under applicable Canadian securities laws and, where applicable, the Exchange hold period, expiring December 20, 2025.

On September 5 the Company closed the final tranche of the financing closed the second and final tranche of the non-brokered private placement announced on July 16, 2025, for gross proceeds of \$890,650.15. The total gross proceeds raised was \$3,621,127.58.

The final tranche consisted of the issuance of 289,190 flow-through shares (FT shares) at a price of 18.5 cents per FT share and 5,581,000 non-flow-through units (NFT units) at a price of 15 cents per NFT unit. Each FT share qualified as a flow-through share (within the meaning of Subsection 66(15) of the Income Tax Act (Canada)). Each NFT unit consisted of one common share and one-half of one common share purchase warrant of the company. Each warrant entitles the holder thereof to acquire one common share of the company at a price of 22 cents per warrant share until Sept. 5, 2027. The company paid finders' fees for tranche 2 in the amount of \$4,110.01 cash and 23,351 finders' warrants to arm's-length qualified parties in accordance with exchange policies.

The proceeds from the issue and sale of the NFT Units are for general working capital. The proceeds from the issue and sale of the FT Shares will be used primarily by the Company to incur eligible "Canadian exploration expenses" that qualify as "flow-through mining expenditures" (as both terms are defined in the Income Tax Act (Canada)) (the "**Qualifying Expenditures**") related to the Company's exploration and development of the large 688 km<sup>2</sup> Newmont Lake project, located in the heart of British Columbia's Golden Triangle.

### Acquisition of Commander Resources Ltd.

On May 30, 2025, the Company completed the acquisition of Commander Resources Ltd. ("Commander") pursuant to a court-approved Plan of Arrangement. The Plan of Arrangement was implemented pursuant to the terms and conditions of an arrangement agreement dated February 25, 2025, between the Company and Commander and resulted in the acquisition by the Company of all the issued and outstanding shares of Commander (the "Commander Shares"). In connection with the Plan of Arrangement, Robert Cameron and Brandon MacDonald joined the board of directors of the Company and Lawrence Roulston resigned as a director.

At closing, a total of 23,692,393 Company Shares were issued to the former holders of Commander Shares, resulting in the former Commander shareholders holding approximately 45.65% of the issued and outstanding Company Shares. In addition, the outstanding options to purchase Commander Shares were replaced with options to purchase Company Shares.

The transaction does not constitute a business combination, as Commander does not meet the definition of a business under IFRS 3 – *Business Combinations*. Accordingly, the acquisition of Commander has been accounted for as an asset acquisition, with all assets acquired and liabilities assumed recorded at fair value. Upon closing of the transaction, Commander and its subsidiaries became a wholly-owned subsidiary of the Company.

**Exploration Highlights**

In July, the Company commenced its 2025 exploration program at the Newmont Lake project in the Golden Triangle of British Columbia. The program focused on the Andrei porphyry copper-gold target, initial work at the newly identified Twin target, an early-stage area with limited prior data as well as preliminary appraisal of additional targets within the project area. The phase 1 program comprised:

- 2,120 line-kilometers of airborne magnetic surveying (Heli-GT system, 100 metre line spacing) in two blocks - the Andrei porphyry target and the Twin target.
- 20 kilometers of ground induced polarization (IP) surveying at the Andrei porphyry target; and
- extensive geological mapping, and rock and soil sampling.

Results of the magnetic and IP surveys were released on October 6, 2024. At Andrei high-resolution magnetics and IP defined a large, coherent, and coincident geophysical footprint consistent with a porphyry system. Large magnetic high anomalies and a four km by 1.2 km zone of elevated chargeability comprised of two internal zones exceeding 15 mv/v outline a target area situated beneath a prominent ridge between two valleys that were historically covered by glaciers. Geological mapping of Andrei indicates a large mineralized system characterized by low-sulphur, magnetite-rich alteration (replacement masses, breccia infill, stockworks and sheeted veins) with lesser pyrite and local chalcopyrite and rare bornite. Rock sample results released on January 8, 2026 documented widespread copper mineralization, with highest grade samples exceeding 10 per cent copper (25 per cent of samples returned values above 0.1 per cent Cu).

The McLymont and Camp Zone gold targets were re-evaluated and rock samples at Camp zone returned gold values of up to 110 grams per tonne gold with 142 g/t silver. Results confirm the presence of high-grade gold mineralization in an area of historical exploration significance prior to the discovery of the NW zone. Camp Zone mineralization is interpreted as structurally controlled, associated with alteration and veining along the McGilverly fault, a significant regional structure running parallel to the McLymont fault.

Following completion of the 2025 work program, the Company acquired several claims (12 square km) from Romios Gold Resources north of the Andrei porphyry target area. A 1.5 km by 2.5 km magnetic high anomaly within the new claims mirrors the geophysical signature of the Andrei porphyry target. The claims were acquired for single payment of \$300,000.

The Company also completed a small work program at its October Dome property. The October Dome gold-copper property is in central BC, near the town of Likely. The October Dome property is located 10 km north of Imperial Metals Corporation's ("Imperial") Mount Polley porphyry copper gold mine property and 7 km to the southeast of Osisko Development Corp.'s QR skarn gold mine property. In August and September, the Company completed a program of geological mapping and sampling comprised of the collection of 46 rock samples and 9 soil samples. This program was greatly aided by new access and bedrock exposures resulting from placer mining activities. In February 2026, the Company released the results of this work program. Highlights from the exploration work were as follows:

- Gold skarn identified in bedrock for the first time
- Float and bedrock samples returned values ranging from background to 0.54 g/t gold over a 600 metre trend
- Soil samples from the same area defined a 450 metre gold anomaly ranging from 74 ppb to 912 ppb gold, with copper values up to 0.13%
- Overall gold/copper target area now spans 5.5 kilometres

The Sabin property is a Commander asset located at the north margin of the mineral-rich Sturgeon Lake Greenstone belt of Archean metavolcanic and metasedimentary rocks in the Wabigoon Sub-Province of the Superior Province, 400 km northwest of Thunder Bay and about 10 km north of the community of Savant Lake, Ontario.

The property hosts a VMS base-precious metal deposit called the Marchington Zone. Work undertaken in 2025 in November included an approximately 10 line-kilometre Induced polarization survey over the gold target in the Patterson lake stock accompanied by diamond saw channel samples and local grab samples. Results have been reviewed and compiled. A short 700 metre chargeability high defines an interpreted fault within the Patterson Lake Stock. Rock samples returned low level values values.

## **Mineral Properties**

### **Newmont Lake Property, British Columbia, Canada**

In September 2018, the Company entered into a letter agreement for an option to acquire (“Option Agreement”) 100% of Romios Gold Resources Inc.’s (“Romios”) interest in 436km<sup>2</sup> of the Newmont Lake Property (“Romios Claims”) in the Golden Triangle, immediately southeast of Galore Creek (Newmont/Teck JV), north of the Snip Mine (formerly Cominco/Prime Resources JV, now Skeena Resources), and northwest of the Eskay Creek Mine (formerly Barrick Gold, now Skeena Resources). The Option Agreement was approved by the TSX-V on February 22<sup>nd</sup>, 2019. Subsequently the Company acquired 252km<sup>2</sup> of mineral claims adjacent to the Romios Claims via claim staking from the Government of British Columbia. The combination of the Romios Claims and the Company’s staked claims form the 688 sq. km Newmont Lake Property.

The Company satisfied all the conditions of the Option Agreement on February 2, 2022, and owns a 100% interest in the Newmont Lake Property.

The Romios Claims are subject to a 2% NSR held by Romios. The NSR has a 5km radius area of interest (“AOI”) beyond the claim boundaries of the Romios Claims. The Option Agreement stated that the Company will issue 2,000,000 shares to Romios in the event a NI 43-101 compliant resource estimate which exceeds 1,000,000 ounces of gold equivalent resources (being the sum indicated and inferred) is confirmed/executed. An additional 1,000,000 shares of the Company will be issued to Romios for each additional 1,000,000 ounces of gold equivalent resources (being the sum of indicated and inferred). Subsequent to the date of signing the Option Agreement, the Company has undertaken a 10 for 1 share consolidation.

The shares represent contingent consideration, and the Company has assessed the fair value of the contingent consideration to be \$Nil as at the acquisition date and September 30, 2025.

## **Property Overview**

The Newmont Lake Property consists of 688 km<sup>2</sup> of mineral claims located within the center of northwestern British Columbia’s Golden Triangle, a large region with notable mines and deposits including Eskay Creek, KSM, Brucejack, Galore Creek, Red Chris, Snip, Schaft Creek, Treaty Creek, and, and Saddle.

The property is accessed via Highway 37 (Stewart Cassiar Highway) and the Northwest Hydroelectric Facilities access road to the south, or the Galore Creek Access Road to the North. It is proximal to the 287-kV Northwest Transmission Line and three hydroelectric facilities, including the McLymont Power Plant whose intake sits on the southern boundary of the Newmont Lake Property.

The Property is fully permitted to conduct various mineral exploration activities (including diamond drilling) until 2029, with mineral claims remaining in “good-standing” until 2030.

The Property sits within the traditional territory of the Tahltan First Nation. There are currently 2 active mines within Tahltan traditional territory, and a 3<sup>rd</sup> mine is in construction.

## **Property Exploration Targets**

The Newmont Lake Property represents one of the larger contiguous landholdings in the Golden Triangle and is considered prospective for several different deposit types. The key areas of focus for the Company have been the Burgundy Project, an alkalic copper-gold porphyry target, the McLymont Project, an easily accessible high grade gold project, and more recently the Andrei Project, a low-elevation porphyry Cu-Au target.

## **Burgundy Project**

The Burgundy Project is located in the northwest side of the property and is viewed as being prospective for alkalic copper-gold porphyry deposits similar to Newmont/Teck's Galore Creek Project located approximately 25km further to the northwest. It includes the Burgundy Ridge and the 72' Zones. Burgundy Ridge is a 500m long x 1,500m wide series of outcroppings consisting of a suite of megacrystic-syenites in contact with a large limestone horizon consistent with the Stikine Volcanic Package. Copper and gold mineralization is widespread in close proximity to the contact of the limestone, with regular, but less-frequent, occurrences of copper and gold mineralization found on surface along the rest of Burgundy Ridge. Age dating of the intrusive rocks indicates it is coeval with the Galore Creek Suite.

A summary of work on the Burgundy Project undertaken by the Company is set out below. Details of these work programs and relevant QA/QC statements can be found in the news releases at the time.

- 2018: 4 reverse circulation holes ("RC") were drilled. All 4 RC drill holes intersected copper, gold, and silver mineralization associated with widespread skarn alteration, indicating that surface geochemical results extend with depth.
- 2019: 13 diamond drill holes were drilled, as well as a program of surface geochemical sampling, geological mapping, and channel sampling. Highlights of the drill program include:
  - BR19-02 which intersected 91.26m of 0.38% Cu, 0.30 g/t Au, and 4.12 g/t Ag starting at 36.7m depth containing a higher-grade interval of 25.78m of 0.73% Cu, 0.63 g/t Au, 9.36 g/t Ag, and 0.11% Zn starting at 82.22m;
  - BR19-16 which intersected 51.38m of 0.46% Cu, 1.22% Zn, 0.17 g/t Au, 9.98 g/t Ag, and 0.16% Pb starting at 343.66m depth; and
  - BR19-13 which intersected 184.67m of 0.21% Cu, 0.14 g/t Au, 3.70 g/t Ag, and 0.17% Zn starting at surface;
  - ST19-06 which intersected 56.35m of 0.45% Cu, 0.33 g/t Au, and 3.44 g/t Ag starting at 225m depth.
- 2021: 8 diamond drill holes were drilled. Highlights of the drill program include:
  - BR21-01 intersected 331m of 0.71% CuEq from surface, including 146m of 1.00% CuEq at 138m downhole, and 1.80m of 7.30% CuEq at 218.6m.
  - BR21-03 intersected 257m of 0.50% CuEq from surface, including 43m of 1.39% CuEq at surface.
  - BR21-04 intersected 84m of 0.72% CuEq from 57m downhole. The drill hole was also successful in identifying another high-grade mineralization style including 6.63% CuEq over 3.00m at 136m downhole. Due to early winter conditions, the drill hole stopped short of target depth while in mineralization.
  - ST21-01 intersected 2.17% Cu and 27.07 g/t Ag over 9.37m from 15.92m downhole, including 7.20% Cu and 87.77 g/t Ag over 2.00m.
- 2022: 20 diamond drill holes were drilled. Highlights of the drill program include:
  - BR22-23 intersected 66.80m of 0.50% CuEq starting from 243.60m, including 6.08m of 1.82% CuEq at 253.69m downhole
  - BR22-22 intersected 24.20m of 1.24% CuEq starting at 445.80m, including 2.98m of 5.8% CuEq at 464.25m downhole
  - BR22-20 intersected 97.93m of 0.33% CuEq starting from 120.10m, including 16.05m of 0.84% CuEq at 120.10m downhole
  - BR22-17 intersected 91.00m of 0.35% CuEq starting from 118.00m, including 40.20m of 0.47% CuEq at 137.35m downhole
- 2023: Work was directed to establishing a geological model to establish relationships among lithology, alteration, mineralization, and structural events across Burgundy Ridge. This involved relogging 12,783 meters of drill core.

Intervals of high-grade mineralization comprise massive chalcopyrite and disseminated and vein-hosted chalcopyrite, sphalerite, and pyrite. Hydrothermal brecciation is an important mineralizing event and is uniquely identified by hydrothermal cement which can be well mineralized and made up of chalcopyrite or sphalerite.

### **McLymont Project**

The McLymont Project is a 70 km<sup>2</sup> area that the Company views as being prospective for high-grade gold deposits of varying styles, associated with the >20km long McLymont Fault and parallel Mcgilvary Fault. The McLymont Fault is a regional-scale geological structure that is the western-bounding normal fault of the Newmont Lake Graben; a geological feature that dominates the center of the Newmont Lake Property.

The McLymont Project was the target of most of the historic exploration undertaken on the Newmont Lake Property and includes the NW Zone target which has a historic, non-compliant mineral estimate based on 16,992m of diamond drilling completed between 1987-1990 by previous operators.

A summary of the work undertaken by the Company on the McLymont Project is set out below:

- 2019: the Company executed a drill campaign over both the historic NW Zone and new areas of interest along fault trend. Highlights of this campaign include:
  - NW19-012 intersected 188m of 1.10 g/t Au, 1.15 g/t Ag, and 0.09% Cu starting at 67.0m, including 44.13m of 4.03 g/t Au, 4.06 g/t Ag, and 0.29% Cu starting at 82.0m.
  - NW19-017 intersected 1.62m of 14.84 g/t Au within 18.31m of 1.80 g/t Au starting at 189.00m, and 1.50m of 9.33 g/t Au, 16.29 g/t Ag, and 0.82% Cu starting at 80.24m.
- 2020: the Company drilled 17 diamond drill holes for a total of approximately 4,500m. All 17 holes intersected gold mineralization of varying styles and significance, with highlights including:
  - NW20-01 intersected 17.15 g/t gold, 26.19 g/t silver, and 1.18% copper over 2.72m. Mineralization was seen over a longer bulk-tonnage gold interval of 146.30m of 0.61 g/t AuEq starting at 30m depth.
  - NW20-04 intersected 138.6m of 0.82 g/t AuEq (“Gold Equivalent”), including 33.6m of 2.47 g/t AuEq starting at 119.83m depth. The drill hole ended in gold mineralization and remains open.
  - NW20-09 intersected 8.85m of 31.09 g/t gold, 6.54 g/t silver, and 1.07% copper within a broader interval of 28.34m of 10.03g/t gold, 2.31 g/t silver and 0.36% copper.
- 2021: the Company drilled 3 diamond drill holes, with highlights including:
  - NW21-03 intersected 151m of 0.73 g/t AuEq starting at 124.2m.
- 2022: the Company drilled 5 diamond drill holes at the McLymont West target, some 2.5km to the west of the NW Zone. This first pass drilling confirmed the presence of gold mineralization over an area of anomalous soil geochemistry along strike of the McLymont Fault and point to a southern vector towards high-grade surface samples not yet intersected by drilling.
- 2024: the Company drilled 4 diamond drill holes at the NW Zone, within the McLymont Gold Zone. All drill holes intersected gold associated with mineralized structures; highlights included:
  - NW24-02: 10.01 g/t Au, 12.12 g/t Ag, and 0.37% Cu over 12.45m starting at 44.00m, within a broader interval of 24.70m grading 5.17 g/t Au, 6.34 g/t Ag, and 0.20% Cu starting at 44.00m.

Three different gold mineralization styles have been identified within the McLymont Project including skarn, epithermal, and porphyry-like mineralization.

### **Andrei (previously referred to as North Toe)**

The Andrei target is a low-elevation porphyry Cu-Au target located in the northern half of the property. Work in 2022 outlined a 2.5 km trend of porphyry mineralization that was exposed due to recent ice melt at the base of the Andrei glacier. Sample results released by the Company in 2023 noted highly anomalous copper and gold assay values along the 2.5 km anomaly, with peak results of 4.08 per cent Cu and 57.83 g/t Au. Exposed bedrock locally comprises potassic altered monzonite with chalcopyrite and minor bornite in sheeted to stockwork quartz magnetite veinlets. The Andrei target correlates with a strong magnetic high anomaly, part of a 14 km long corridor that also includes the FK and Southmore porphyry targets.

Andrei has been a key focus of the Company’s exploration program in 2025 with the objective of defining specific drill targets. Work completed has included a high-resolution, low-noise helicopter magnetic survey using a Heli-GT system, a 20 km ground IP survey, and extensive geological mapping and rock sampling.

On November 10, 2025, Enduro entered into a purchase agreement with Romios Gold Resources Inc. to acquire a package of mineral claims located immediately north of Enduro’s Andrei porphyry copper gold target on its Newmont Lake property. Under the terms of the agreement, Enduro acquired a 100% interest in the 12 km<sup>2</sup> claim block for cash consideration of C\$300,000. The claims remain subject to the existing Net Smelter Return royalty currently in place between Enduro and Romios.

**Other Areas of Interest**

**Twin**

The Twin target, located at the southwest corner of the Newmont Lake property, is a potential 7 km extension of the “Bronson Trend”, a 14 kilometre linear alignment of porphyry and porphyry-related deposits that extends from the Quartz Rise deposit northwest to the new North Snip deposit, discovered in 2024 by Seabridge Gold. The North Snip deposit is a large gold and copper rich system hosted by potassic altered tuffs that is interpreted by Seabridge to be a zone peripheral to an intrusive hosted porphyry Cu-Au deposit.

Newmont Lake: QA/QC

Details of QA/QC procedures and metal equivalent calculations can be found in the company’s press releases (summarized below) and within the 43-101 report “Technical Report on the Newmont Lake Property” authored by Maurizio Napoli, P.Geol, and Ali Wasiliew, P.Geol. dated March 1, 2025.

**Properties acquired from Commander Resources Ltd.**

**Burn, BC**

In July 2019, Commander entered into an earn-in agreement (the “Freeport Agreement”) with Freeport-McMoRan Mineral Properties Canada Inc. (“Freeport”) granting Freeport the right to earn up to a 75% interest in the Burn property. The terms of the Freeport Agreement comprised cash considerations of \$560,000 and exploration expenditures of \$2,500,000. In August 2023, Freeport fulfilled both of the option terms and earned a 75% vested interest in the Burn property. This resulted in a joint arrangement of 75% Freeport and 25% Commander.

In August 2024, Freeport transferred its 75% vested interest in the Burn property back to Commander. In consideration of the transfer, Freeport was granted two net smelter return royalties (“NSR”):

- (i) a 2% NSR over the majority of the property; and
- (ii) a 1% NSR over the inner claims which comprise two mineral claims totaling 127 hectares optioned from a third party (see below “Inner Claims”).

Commander has a buy-down option of 1 % NSR over the majority of the property for US \$5,000,000.

*Inner Claims*

In October 2022, Commander expanded the Burn property through an option agreement (“Option Agreement”) with two private tenure vendors (“Vendors”) acquiring a 100% interest in two mineral tenures. The acquisition cost comprises cash and Commander shares, to be split evenly between the two Vendors.

Cash consideration totals \$290,000 staged into four payments over three years as follows:

- i) \$20,000 on or before October 3, 2022 (paid);
- ii) \$40,000 on or before October 3, 2023 (paid);
- iii) \$80,000 on or before October 3, 2024 (paid); and
- iv) \$150,000 on or before October 3, 2025 (paid).

Issuances of Commander shares in an aggregate value equal to \$160,000 based on the market price (20-day volume-weighted average price) as below:

- i) After the Effective Date on October 3, 2022, valued at \$20,000 (241,000 shares issued on November 10, 2022);
- ii) on or by the first anniversary, valued at \$20,000 (\$10,000 paid in cash, \$10,000 in 140,845 shares fair-valued at \$8,541 issued on October 16, 2023, resulting in a gain of \$1,549 on the shares issued);
- i) on or by the second anniversary, valued at \$40,000 (\$20,000 in cash, \$20,000 in 281,690 shares fair-valued at \$21,127 issued on October 18, 2024, resulting in a loss of \$1,127 on the shares issued); and
- iv) on or by the third anniversary, valued at \$85,344 (issued 533,400 Enduro’s common shares).

In October 2022, the Option Agreement was amended that the shares to be issued are subject to a floor price of \$0.071 per share. If the calculated share price falls below the floor price, the Vendors may elect to receive the cash value instead. The Vendors retain a 2% NSR and granted Commander a buy-down provision of the first 1% for \$1,000,000 and the remaining 1% for \$5,000,000.

**Henry Lee, BC**

Commander owns 100% in the Henry Lee copper project. In March 2019, the Company entered into a purchase agreement to acquire a 100% interest in two mineral claims adjacent to its Henry Lee property. Total consideration was \$56,500 (\$25,000 in cash and 350,000 shares issued at fair value of \$0.09 per share for \$31,500). The vendor retains a 1% NSR royalty and is entitled to receive a one-time advance royalty payment of \$1,000,000 upon the commencement of commercial production. In 2022, additional claims were staked on the property for \$1,140. No work was completed in 2024/25

**Sabin, Ontario**

Commander's ownership interest on the Sabin base-precious metal property varies from 58.5% to 100%

**First Loon, Ontario.**

In 2020, Commander acquired by staking three gold properties on First Loon for \$19,590. In 2021, additional claims were staked for \$8,100. Subsequently a portion of the large property was allowed to lapse following negative exploration results.

**Pedro, Mexico**

In September 2016, Commander acquired BRZ Mex Holdings Ltd. ("BRZM") and its subsidiary, Minera BRG SA de CV ("BRG") which owns a 100% interest in the Pedro property ("Pedro") in Mexico.

In February 2022, Commander via an option agreement granted Southern Empire Resources Corp. ("SMP") a 100% interest in Pedro. The terms of the option agreement comprised 100,000 SMP shares (issued) upon signing, cash consideration of \$700,000 (\$50,000 received) over 3 years and exploration expenditures of \$1,500,000 of which \$400,000 (completed) to be spent in the first year of the option agreement. Commander retains a 2% NSR royalty with no provision for a buydown.

On October 26, 2022, the SMP option agreement was amended. Commander's subsidiary, BRG agreed to acquire the Centauro Gold Property or such other properties ("Additional Properties") on behalf of SMP provided that SMP will be responsible for all costs associated with the acquisition and annual maintenance fees of the Additional Properties. BRG will hold title of the Additional Properties as a bare legal trustee for the sole benefit of SMP. If SMP fails to acquire a 100% interest of Minera BRG under the terms of the option agreement, BRG shall immediately transfer all of its right, title and interest in the Additional Properties to SMP

In February 2024, Commander agreed to explore terms to accelerate and conclude the option agreement through a final payment (to be determined) in shares and or cash, thereby granting SMP a 100% interest in the project and the operating entity, Minera BRG, in Mexico. Commander would retain the 2% NSR royalty. In the meantime, Commander has agreed to suspend the annual payments due and SMP has agreed to maintain the property in good standing and to cover all costs related to maintaining Minera BRG. While this process is ongoing, the option remains in good standing and regular payments will resume if an agreement cannot be achieved.

On October 1, 2025 Enduro and Southern Empire Resources Corp announced that they have agreed to close Southern Empire's acquisition of the 1,750-hectare Pedro project. A 100% interest in the Pedro mineral tenements was transferred to Southern Empire Resources Corp through the acquisition of a 100% beneficial interest in Minera BRG, S.A. de C.V. (the Mexican subsidiary of Enduro that owns Pedro). The Company was issued 2,000,000 common shares of Southern Empire and will receive a future milestone payment of \$2,000,000 upon commencement of commercial production. Enduro retains a 2% net smelter return (NSR) royalty interest with no buydown provision. The transaction closed on January 20, 2025

## MANAGEMENT DISCUSSION AND ANALYSIS FOR THE THREE MONTHS ENDED DECEMBER 31, 2025

### Results of Operations

#### Summary of Quarterly Financial Results

Quarter ended	2025 Dec 30 Q1	2025 Sept 30 Q4	2025 Jun 30 Q3	2025 Mar 31 Q2	2024 Dec 30 Q1	2024 Sep 30 Q4	2024 Jun 30 Q3	2024 Mar 31 Q2
Income (Loss) per quarter	\$ (771,321)	(551,318)	(301,393)	\$ (296,667)	\$ (209,671)	\$ (253,577)	\$ (646,963)	\$ (187,943)
Basic and fully diluted loss per share	\$ (0.01)	\$ (0.03)	\$ (0.03)	\$ (0.01)	\$ (0.01)	\$ (0.03)	\$ (0.02)	\$ (0.01)
Total Assets	\$ 36,713,147	\$ 37,174,934	\$ 34,529,285	\$ 31,781,142	\$ 31,802,286	\$ 31,613,104	\$ 31,589,041	\$ 31,619,857

During the quarter ended December 31, 2025, the Company recorded a net loss of \$771,321 compared to a net loss of \$209,671 for the same period in 2024. Quarterly losses over the past eight quarters have fluctuated between \$187,943 and \$771,321 reflecting the timing of exploration activities, corporate expenditures and non-cash and non-recurring items. Basic and fully diluted loss per share has ranged from \$0.01 to \$0.03 per quarter over the period presented and has generally been consistent with changes in net loss and the Company's capital structure. Net loss over the eight quarter period is not necessarily indicative of underlying operating performance as results were impacted by several non-recurring and non cash items including flow through share premium income, write off of accounts payable, write off of certain exploration and evaluation assets and gains or losses on the disposition of property and equipment which vary in timing and magnitude from period to period.

Total assets decreased to \$36.7 million as at December 31, 2025 from \$37.2 million at September 30, 2025, primarily due to general corporate overhead costs and a reduction in working capital, while overall total assets have increased from approximately \$31.6 million in mid 2024 reflecting continued investment in exploration and evaluation assets.

#### Three months ended December 31, 2025, compared to the three months ended December 31, 2024:

	2025	2024	Note
<b>EXPENSES</b>			
Amortization of property and equipment	\$ 12,260	\$ 4,440	1
Corporate communications	44,292	14,912	2
Interest on right of use asset	4,869	8,361	
Management and consulting fees	102,344	120,000	3
Office and miscellaneous	37,615	9,734	4
Professional fees	50,106	30,445	5
Regulatory and compliance fees	9,722	10,355	
Salary	88,779	-	6
Share-based payments	508,631	15,249	7
Travel	12,651	4,536	8
<b>Loss before other items</b>	<b>(870,819)</b>	<b>(218,032)</b>	

## MANAGEMENT DISCUSSION AND ANALYSIS FOR THE THREE MONTHS ENDED DECEMBER 31, 2025

### OTHER ITEMS

Recovery of flow-through premium	30,731	-	9
Other income	49,697	8,361	9
Unrealized gain/(loss) on marketable securities	(5,500)	-	9
Recovery of VAT	24,570	-	9

---

**Net loss and comprehensive loss** \$ (771,321) \$ (209,671)

---

- For the three months ended December 31, 2025, the Company recorded a loss before other items of \$870,819 compared to a loss of \$218,032 in the comparative period. The increase in loss was primarily driven by share-based payments and to a lesser extent higher office and miscellaneous expenses, corporate communications fees, professional fees, travel expenses and salaries incurred following the completion of the Commander Resources Ltd. acquisition. These increases were partially offset by lower management and consulting fees. Significant variances are discussed below:
- Amortization of property and equipment increased to \$12,260 from \$4,440 in the prior quarter due to an increased depreciable asset base.
- Corporate communications expense increased to \$44,292 from \$14,912 in the comparative quarter, primarily reflecting the implementation of new marketing initiatives during the current period. The prior year period included lower costs and reflected the cancellation of the Company's contract with its market maker.
- Management and consulting fees decreased to \$102,344 from \$120,000 due to less compensation paid to officers and consultants in the first quarter of 2025.
- Office and miscellaneous expense increased to \$37,615 from \$9,734 in the comparative quarter primarily due to higher subscription fees for technical software and increased First Nations engagement activities during the period.
- Professional fees increased to \$50,106 from \$30,445, primarily due to increased legal, audit, and advisory activities.
- Salaries of \$88,779 were recorded in the current quarter compared to \$Nil in the prior quarter, reflecting the addition of employee-based staffing following the Commander acquisition.
- Share-based payments increased substantially to \$508,631 from \$15,249 due to 3.7M new options granted to employees, consultants, and directors. Further, RSU's that were issued in prior periods vested during the quarter.
- Travel expenses increased to \$12,651 from \$4,536 due to more business and marketing trips for management.
- Other items for the three months ended December 31, 2025 included recovery of flow through premium of \$30,731, other income of \$49,697 and recovery of VAT of \$24,570, partially offset by an unrealized loss on marketable securities of \$5,500, compared to other income of \$8,361 in the comparative period. These items partially offset operating expenses and contributed to a net loss and comprehensive loss of \$771,321 for the quarter compared to \$209,671 in the prior year period.

### Liquidity, Capital Resources and Capital Expenditures

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. At December 31, 2025, the Company had a cash balance of \$1,990,804 (September 30, 2025 - \$3,087,751) to settle current liabilities of \$905,450 (September 30, 2025 - \$1,161,866). The Company does not require additional funding at this time to fund its current obligations.

The Company plans to continue to raise the necessary funding through private placements, exercising of stock options, warrants and/or credit facilities to address its liabilities and to continue operations.

At December 31, 2025, the Company's working capital, defined as current assets less current liabilities, was \$1,453,613, a decrease of \$817,622 as compared to \$2,271,235 at September 30, 2025.

The Company's cash is primarily in Canadian dollars. The Company is subject to only minor exchange rate fluctuations relative to the reporting currency.

The Company has not made any arrangements for sources of financing that remain undrawn.

### **Contractual Obligations and Loans**

#### *Reclamation Provision*

During the year ended September 30, 2025, the Company continued to carry a reclamation liability related to the option agreement with Romios Gold Resources Inc. The reclamation obligation was initially recognized in 2022 with an undiscounted value of \$232,653. To date, the Company has completed \$101,914 of reclamation work, reducing the estimated remaining obligation to \$130,739.

No additional reclamation work was completed during the period ended December 31, 2025. The Company intends to resume and complete its reclamation obligations during the 2026 exploration season in conjunction with planned exploration activities.

### **Financial Risk Factors**

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

The carrying value of the Company's receivables, accounts payable and accrued liabilities, due to related parties, and loans payable approximate their fair value because of the short-term nature of these instruments.

Cash and marketable securities are carried at a fair value using a level 1 fair value measurement. Loans payable are accounted for using the effective interest rate method.

#### *Credit risk*

Credit risk is the risk of loss associated with counterparty's inability to fulfil its payment obligations. The Company's management believes it has no significant credit risk.

#### *Liquidity risk*

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. At December 31, 2025, the Company had a cash balance of \$1,990,804 (September 30, 2025 – \$3,087,751) to settle current liabilities of \$905,450 (September 30, 2025 – \$1,161,866). All of the Company's accounts payable and accrued liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms. The Company expects to fund these liabilities through the use of existing cash resources and additional equity financing.

#### *Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

- a) Interest rate risk

**MANAGEMENT DISCUSSION AND ANALYSIS  
FOR THE THREE MONTHS ENDED DECEMBER 31, 2025**

The Company has cash balances held with financial institutions. The Company is satisfied with the credit rating of its bank.

b) Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to cash and accounts payable and accrued liabilities that are denominated in a foreign currency. As at December 31, 2025 the Company had minimal cash amounts in foreign currencies and considers foreign currency risk insignificant.

c) Price risk

The Company's net income or loss, and ability to raise capital to fund exploration and evaluation activities is subject to risks associated with fluctuations in mineral prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

**Capital Management**

The Company's primary objectives in capital management are to safeguard its ability to continue as a going concern in order to provide return for shareholders and to maintain sufficient funds to finance its exploration and evaluation interests. Capital is comprised of the Company's shareholders' equity. As at December 31, 2025, the Company's shareholders' equity was \$35,807,697 (September 30, 2025 – \$35,985,043).

The Company manages its capital structure to maximize its financial flexibility by making adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets and business opportunities. The Company does not presently utilize any quantitative measures to monitor its capital and is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management during the period ended December 31, 2025.

**Off Balance Sheet Arrangements**

The Company did not have any off-balance sheet arrangements as at December 31, 2025.

**Related Party Transactions and Key Management Compensation**

All related party transactions are recorded at the exchange amount which is the amount agreed to by the Company and the related party.

a) Key management personnel

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers and companies controlled by them. The Company also transacts with corporations controlled by officers of the Company for the primary purpose of acquiring exploration and evaluation services. The remuneration of directors and other members of key management personnel during the period ended December 31, 2025 and 2024 were as follows

	2025	2024
Consulting fees	\$ 81,450	\$ 120,000
Salary	57,332	-
Share-based payments	481,438	15,249
	\$ 620,220	\$ 135,249

**MANAGEMENT DISCUSSION AND ANALYSIS  
FOR THE THREE MONTHS ENDED DECEMBER 31, 2025**

During the year ended September 30, 2025, pursuant to the Plan of Arrangement (Note 3), the Company granted 425,325 replacement options with a value of \$14,041 to officers and directors of the Company.

During the period ended December 31, 2025, the Company granted 3,490,000 stock options with a value of \$474,508 to officers and directors of the Company.

- b) The Company also transacts with corporations controlled by officers or former officers of the Company for the primary purpose of acquiring exploration and evaluation services. The remuneration paid to related parties for exploration and evaluation activities during period ended December 31, 2025 and 2024 were as follows:

	2025	2024
Exploration and evaluation expenditures	\$ 46,800	\$ -

- c) Amounts due to/from related parties

In the normal course of operations, the Company transacts with corporations controlled by directors or officers of the Company. All amounts payable and receivable are non-interest bearing, unsecured and due on demand and also include amounts advanced for services to be rendered. The following table summarizes the amounts due to / (from) related parties:

	December 31, 2025	September 30, 2025
WJWS Advisory Ltd.	12,000	24,000
LHC Mine Finance Ltd.	3,000	3,000
Wetherup Geological Consulting	16,065	-
Robert Cameron	18,333	11,392
Steven Wetherup	-	43,556
Napoli Technical Services	-	3
Susanne A Hermans	-	21,453
Brandon Macdonald	-	2,874
	\$ 49,398	\$ 107,074

**Uncertainties and Risk Factors**

Being in the exploration stage, the Company will face a variety of risks, and while unable to eliminate all of them, the Company aims at managing and reducing such risks as much as possible.

The Company faces a variety of risk factors such as project feasibility, risks related to determining the validity of mineral property title claims, commodities prices, political and environmental laws and regulations. Management monitors its activities and those factors that could impact them in order to manage risk and make timely decisions.

**Financial Instruments**

**New Accounting Policies and New Accounting Pronouncements**

Please refer to the December 31, 2025, condensed interim consolidated financial statements on [www.sedarplus.ca](http://www.sedarplus.ca) for newly adopted accounting policies and recent accounting pronouncements.

### **Cautionary Statement**

Certain information contained in this MD&A constitutes “forward-looking information” within the meaning of applicable Canadian securities laws. Forward-looking information includes statements that relate to future events or the future activities or performance of the Company. All statements, other than statements of historical fact, are forward-looking statements. Forward-looking information may include, but is not limited to, information which reflects management’s expectations regarding:

- the Company’s future growth and results of operations (including, without limitation to future production and capital expenditures);
- the timing, costs and content of upcoming work programs and exploration budgets;
- geological interpretations, receipt of property titles, and potential mineral recovery processes;
- the Company’s performance (both operational and financial) and business prospects (including the timing and development of new deposits and the success of exploration activities) and opportunities;
- general business and economic conditions; and
- the Company’s ability to meet its financial obligations as they come due, and to be able to raise the necessary funds to continue operations.

Often, forward-looking information is identified by words such as “plans”, “expects” or “does not expect”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates” or “does not anticipate” or “believes” or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking information in this MD&A includes, but is not limited to, statements concerning: the Company’s expectations with respect to the completion of the proposed transaction with Commander, including the terms and timing thereof; the Company’s intention to forge partnerships with identified targets, the Company’s intention to complete its reclamation obligations and the timing thereof; and the Company’s expectations concerning its ability to fund its liabilities through existing cash resources and additional equity financing.

In making and providing the forward-looking information included in this MD&A the Company’s assumptions may include among other things: (i) assumptions about the price of base metals; (ii) that there are no material delays in the optimization of operations at the exploration and evaluation assets; (iii) assumptions about operating budgets, costs and expenditures; (iv) assumptions about exploration and assay results, (v) assumptions about estimated drilling success rates and other prospects, (vi) assumptions about future production and recovery; (vii) that there is no unanticipated fluctuation in foreign exchange rates; (viii) that there is no material deterioration in general economic conditions; (ix) assumptions about general business and economic conditions; and (x) assumptions about the timing of the receipt of regulatory and governmental approvals, permits and authorizations necessary to implement and carry on the Company’s planned exploration and other business activities.

Although management believes that the assumptions made and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. By its nature, forward-looking information is based on assumptions and involves known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance or achievements, or results, to be materially different from future results, performance or achievements expressed or implied by such forward-looking information. Such risks, uncertainties and other factors include among other things the following: (i) decreases in the price of base metals; (ii) the risk that the Company will continue to have negative operating cash flow; (iii) the risk that additional financing will not be obtained as and when required; (iv) material increases in operating costs; (v) adverse fluctuations in foreign exchange rates; (vi) environmental risks and hazards and changes in environmental legislation; (vii) mining industry risks and hazards, (viii) economic and political events affecting metal supply and demand, (ix) uncertainty as to calculation of mineral reserves and resources, and (x) risks associated fulfilling contractual and/or legislative obligations, and (xi) risks associated with contractual counterparties, including as a result of any disputes with such counterparties.

The Company's exploration properties in Mexico and are subject to the political, economic, legal and regulatory risks associated with operating in that jurisdiction. Mexico has experienced changes in laws, regulations and government policies relating to mining, including amendments to the Mexican Mining Law and related regulations affecting concession terms, permitting requirements, water rights, environmental approvals, community consultation obligations and foreign investment. Any future changes to applicable laws, regulations, taxation regimes, royalty structures, land access requirements or government policies could adversely affect the Company's ability to acquire, maintain or renew mineral concessions, obtain or maintain required permits and authorizations, or continue exploration activities on commercially reasonable terms.

Mineral concessions in Mexico are granted by the federal government and are subject to compliance with ongoing legal, technical, environmental and financial obligations, including minimum work expenditures and payment of concession fees. Failure to comply with such requirements could result in fines, suspension, cancellation or reduction of the Company's mineral rights. There can be no assurance that existing concessions will be renewed or that new concessions will be granted on terms favorable to the Company.

Mexico has experienced security challenges in certain regions, including criminal activity and organized crime. and there can be no assurance that its personnel, contractors or assets will not be subject to theft, vandalism, violence or other security incidents, which could result in injury, operational disruptions, increased costs or reputational harm.

This MD&A contains information on risks, uncertainties and other factors relating to the forward-looking information (see "Financial Instruments" and "Uncertainties and Risk Factors"). Although the Company has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in the forward-looking information, there may be other factors that cause actual results, performances, achievements or events not to be anticipated, estimated or intended. Also, many of the factors are beyond the Company's control. Accordingly, readers should not place undue reliance on forward-looking information. The Company undertakes no obligation to reissue or update forward-looking information as a result of new information or events after the date of this MD&A except as may be required by law. All forward-looking information disclosed in this document is qualified by this cautionary statement.
