

GETTY COPPER INC.
MANAGEMENT DISCUSSION & ANALYSIS
SEPTEMBER 30, 2017

The following discussion and analysis of the results of operations and financial position of Getty Copper Inc. (the “Company”) for the nine months ending September 30, 2017 should be read in conjunction with the September 30, 2017 financial statements and the related notes which have been prepared adopting International Financial Reporting Standards (“IFRS”). All dollar amounts in this Management Discussion and Analysis (“MD&A”) are stated in Canadian dollars. The effective date of this report is date of filing.

Forward Looking Statements

This document may contain forward-looking statements and forward-looking information (collectively, “**forward-looking statements**”) within the meaning of applicable securities legislation. All statements other than statements of historical fact are forward-looking statements. Such forward-looking statements include any projections or estimates made by the Company and the Company’s management in connection with the Company’s business operations. Forward-looking statements relate to future events or our future financial performance. In some cases you can identify forward-looking statements by terminology such as “may”, “should”, “expects”, “plans”, “anticipates”, “believes”, “estimates”, “predicts”, “potential” or “continue” or the negative of those terms or other comparable terminology. Although the Company believes the expectations expressed in its forward-looking statements are based on reasonable assumptions, such statements should not be in any way construed as guarantees of the ultimate size, quality or commercial feasibility of the Company’s mineral exploration projects or of the Company’s future performance. Forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement.

Such statements are based on a number of assumptions that may prove to be incorrect, including, but not limited to, assumptions about the following: the availability of financing for the Company’s exploration and development activities; operating and exploration costs; the Company’s ability to retain and attract skilled staff; timing of the receipt of regulatory and governmental approvals for exploration projects and other operations; market competition; and general business and economic conditions.

Forward-looking statements are subject to risks and uncertainties that could cause results to differ materially from those contemplated in such forward-looking statements. Risk factors that could cause the Company’s actual results and performance to differ materially from those in forward-looking statements include adverse market prices for metals, the conclusions of detailed feasibility and technical analyses, lower than expected grades and quantities of resources, mining rates and metal recovery rates and the fact that necessary capital may not be available to the Company on terms acceptable to it or at all. The need for compliance with extensive environmental and socio-economic rules and practices and the requirement for the Company to obtain government permitting can cause a delay or even abandonment of a mineral project. The Company is subject to the specific risks inherent in the mining business as well as general economic and business conditions. See the heading “Risk Factors” in the Company’s annual information form filed at www.sedar.com for additional information on risks and uncertainties relating to the Company’s forward-looking statements.

There can be no assurance that forward-looking statements referenced herein will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Also, many of the risk and uncertainty factors are beyond the control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward-looking statements contained in this MD&A. All forward-looking statements made herein are qualified by this cautionary statement. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. Please consult the Company’s public filings at www.sedar.com and www.sec.gov for more detailed information concerning these matters.

GETTY COPPER INC.
MANAGEMENT DISCUSSION & ANALYSIS
SEPTEMBER 30, 2017

Overall Performance

The Company is engaged in the acquisition and exploration of natural resource properties. Since 1993, the Company has been focusing on exploration, when funds permit, on parts of its approximately 269 km² (104 miles²) mineral properties in Highland Valley, British Columbia, comprised primarily of the Getty North, Getty South and satellite properties (collectively, the “**Getty Copper Project**”). The Getty Copper Project is immediately adjacent to the large porphyry copper mining and milling operations of Highland Valley Copper.

Over the past year a compilation of historic data was conducted over the Getty Copper Property. The compilation was aimed at the expansion of known target areas, along with identifying new areas of interest.

During the Winter/Spring 2017, additional claims were acquired expanding the current property boundary to the east to cover a number of mineral occurrences identified during a regional data review.

A subsequent airborne magnetic survey was then completed over the new claims block. In addition a detailed infill magnetics survey was completed in the area proximal to the Glossie zone.

At present the Company is currently seeking parties to finance the Company for its minimum requirements and advance the Getty Copper Project to the next phase. However, there can be no assurances that the Company will be able to raise additional financing on terms that are acceptable to it, or at all. If the Company is unable to raise additional capital, it will need to curtail operations and the Company may be materially adversely affected.

Result of Operations

Due to reduced commodity prices and a lack of working capital, nominal exploration work was carried out by the Company between 1998 and 2003. Consequently at the years ended December 31, 2001 to December 31, 2003 the financial statements were adjusted to reflect a provision for impairment of mineral properties.

At September 30, 2017, the Company had cash of \$10,380 and working capital deficit of \$555,234 compared to \$15,965 cash and working capital deficit \$511,794 at June 30, 2017. The net change in cash and working capital during the nine months ended September 30, 2017 is due to payment and accruals of administrative expense.

Current payable and long term liabilities totalled \$1,560,201 at September 30, 2017. The Company’s cash as at September 30, 2017 is insufficient to pay its current liabilities.

The Company’s total assets during the nine months ending September 30, 2017 totalled \$5,528,343, an increase of \$73,818 from September 30, 2016, which is primarily due to exploration expenditures. During the nine months ending September 30, 2017, the Company’s liabilities increased by \$266,828 compared to the nine months ending September 30, 2016. The increase in liabilities is a result of an increase in payables due to administrative expenses and accrued interest, and an increase in a loan payable to a director of the Company who has lent funds to the Company to pay its operating expenses as well as funding the magnetic survey completed in the spring of 2017. The Company has no significant source of working capital other than funds raised through private placements, exercising of warrants and Incentive Stock Options.

The loss from operations for the nine months ending September 30, 2017 decreased by \$99,506 over the loss reported at September 30, 2016. The decrease can be attributed to recognizing a stock option compensation \$12,478 (2016-\$73,458) and a decrease in professional fees of \$47,588. Operation expenditures for the nine months ending September 30, 2017 decreased to \$179,349 compared to \$278,905 at September 30, 2016. Professional fees for the nine months ending September 30, 2017 \$48,898 (2016 - \$96,486) which include legal fees of \$40,877 (2016 - \$90,410), \$8,021 (2016 - \$6,076) in accounting fees.

GETTY COPPER INC.
MANAGEMENT DISCUSSION & ANALYSIS
SEPTEMBER 30, 2017

Liquidity

The Company has no operating revenues and therefore must utilize its current cash reserves and other financing transactions to maintain its capacity to meet ongoing discretionary and committed exploration and operating activities.

The Company has no producing properties at this time and receives no revenues. All of the Company's properties are prefeasibility stage projects (Getty North and Getty South) and/or exploration projects, and there is no assurance that a commercially viable ore deposit exists in any such properties. The Getty North and Getty South deposits were the subject of a 2010 Pre-Feasibility Study, however until further exploration work and a comprehensive evaluation based upon unit costs, grades, tonnages, recoveries, and other technical and economic factors are evaluated, no conclusion about current economic feasibility of these projects is possible.

Financing for the Company's operations has historically been funded primarily from private placements and to a lesser extent the exercise of share purchase warrants and share purchase options. The Company is currently pursuing financing opportunities, but there can be no assurance that the Company will be able to raise additional financing on terms that are acceptable to it, or at all; nor can there be any assurance that any of the outstanding share purchase warrants or stock options of the Company will be exercised. If the Company is unable to raise additional capital it will need to curtail its operations and the Company may be materially adversely affected.

As of September 30, 2017, and to the date of this MD&A, the cash resources of the Company are held with a Canadian bank.

The Company owns land and a small office and storage building in Logan Lake, British Columbia, which was encumbered by a first mortgage in the amount of \$80,000 as of October 1, 2012 at a 6% interest per annum, amortized over 10 years.

The Company's use of cash at present occurs, and in the future is expected to occur, principally in two areas, namely, funding of its general and administrative expenditures and funding of its investment activities. Those investing activities include the cash components of the cost of exploring and developing the Getty Property.

The Company has funds available of \$10,380 as of September 30, 2017. The Company has an administrative expenditures rate of approximately \$15,000 per month, excluding legal fees.

Financial Instruments

The Company keeps its financial instruments denominated in Canadian dollars and does not engage in any hedging operations with respect to currency or in-situ minerals. Funds which are currently excess to the Company's needs are invested in government of Canada or like debt obligations and other short term near cash investments pending the need for the funds.

Capital Resources

The Company manages its capital structure and makes adjustments to it based on available funds in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital to include its working capital position and capital stock, warrant, and option components of its shareholders' equity.

The Company manages its capital structure in a manner that provides sufficient funding for mine development and operational activities. Funds are primarily secured through a combination of equity capital raised by way of issuing equity instruments and external debt. In order to maintain or adjust the capital structure, the Company may attempt to raise additional financing through the issuance of new equity instruments, the exercise of outstanding common share purchase

GETTY COPPER INC.
MANAGEMENT DISCUSSION & ANALYSIS
SEPTEMBER 30, 2017

warrants and stock options. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the nine months ending September 30, 2017. The Company is not subject to externally imposed capital requirements.

Outlook

The Company continues its efforts to advance the status of its mineral properties. Although the 2010 Pre-Feasibility Study has accorded probable reserve status to a portion of the known resources, it is uncertain whether the Company currently has potentially economically recoverable reserves as the 2010 estimates must be considered in need of updating and further refinement. It is unclear whether the Company will be able to obtain the necessary financing to complete the exploration and commercial development of its properties. The Company believes that it may be able to economically develop the Getty North and Getty South deposits on its mineral properties depending on continuing strength in the copper market and future financing conditions which are currently quite weak. The ability to raise funds to develop its properties may be challenging in light of current metal prices and market conditions for financing junior exploration companies. However, International Financial Reporting Standards require that development costs related to mineral properties be written down for impairment unless there is persuasive evidence that impairment has not occurred.

The Company advises that the previous litigation it was involved in no longer impacts the levels of performance or achievements.

The Company's management remains committed to the advancement of the Company's Highland Valley mineral claims, subject to a positive feasibility study, production permitting and financing.

Related Party Transactions

Except as disclosed in this report there were no related party transactions. During the nine months ending September 30, 2017, Cinnamon Jang Willoughby, a professional accounting firm to which director and CFO Donald Willoughby is associated, billed the Company \$10,521 (2016- \$12,576) in accounting fees related to tax filings, quarterly report review and other professional accounting related matters. For the nine months ending September 30, 2017, the Company was billed, \$4,500 (2016 - \$4,500) office rent to Deborah Resources Ltd. During the nine months ending September 30, 2017 the Company incurred \$40,389 (2016 - \$Nil) interest on a \$900,000 debenture (see note 12 of the September 30, 2017 Financial Statements. Accrued Interest on Indemnity - \$Nil (2016 - \$16,423) which was paid out in November 2016 with funds from the Debenture (See note 10 of the September 30, 2017 Financial Statements). During the nine months ending September 30, 2017 the Company incurred \$2,158 (2016 - Nil) interest on loan payable to a company controlled by a director.

Outstanding share data

As of October 15, 2017 there were 108,427,205 common shares outstanding.

Changes in accounting policy

Accounting changes:

International Financial Reporting Standards ("IFRS"):

The Company adopted International Financial Reporting Standards ("IFRS") on January 1, 2011, with a transition date of January 1, 2010. These condensed financial statements, including comparatives, have been prepared using accounting

GETTY COPPER INC.
MANAGEMENT DISCUSSION & ANALYSIS
SEPTEMBER 30, 2017

policies consistent with IFRS and in accordance with International Accounting Standards ("IAS") 34 - and IFRS 1 – First-time Adoption of IFRS.

Summary and Outlook

The Company is a British Columbia company engaged in the business of mineral exploration in the Highland Valley of British Columbia. The Company does not have any properties that are in production or that contain a proven reserve.

The Company's main focus is to concentrate on seeking exploration funding or a joint venture partner to advance the status of the Getty North and Getty South deposits.

Additional Information

Additional information relating to the company, its activities and operations is available on SEDAR at www.sedar.com.
