

Annual Management Report of Fund Performance

For the Year Ended March 31, 2017

This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You may obtain a copy of the annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR website at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. Every effort has been made to ensure that the information contained in this report is accurate as of the dates indicated in the report; however, the Fund cannot guarantee the accuracy or the completeness of this material. For more information, please refer to the Fund's Simplified Prospectus, Annual Information Form and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.

For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

FIXED INCOME FUND

Management Discussion of Fund Performance

June 6, 2017

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended March 31, 2017, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Investment Objective and Strategies

The Fund seeks interest income with the potential for capital growth by investing primarily in fixed income securities issued by governments, corporations and international agencies anywhere in the world.

Risk

The risks of the Fund remain as discussed in the Fund's initial Simplified Prospectus.

The Fund is suitable for medium-term investors looking for a global fixed income fund to hold as part of their portfolio, who can handle the volatility of bond markets and who have a low to medium tolerance for risk.

The Fund is currently available for investment only by other Mackenzie funds.

Results of Operations

Investment Performance

During the year, the Fund's Series R securities returned -1.4% (after deducting fees and expenses paid by the series). This compares with the BofA Merrill Lynch Global Broad Market Index return of 0.6% . All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in the index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Although global bond markets rallied until shortly after the United Kingdom's vote in June to leave the European Union, prices fell and yields rose over the rest of the year. Initially, the sell-off was driven by a slight shift by key central banks away from strongly accommodative monetary policy. Bond prices declined further following the U.S. presidential election, in the expectation that policies fuelling economic growth, job creation and wages would result in higher inflation. At the same time, global economic prospects improved.

The Fund underperformed the index primarily because of its shorter duration position in certain U.K. government bonds, as well as holdings in Spanish and Italian government bonds. Security selection in federal bonds, an overweight exposure to industrial bonds and security selection in financial bonds benefited performance.

The Fund's strategy of not hedging its foreign currency exposure detracted from absolute performance as the euro and British pound depreciated.

Over the year, portfolio activity and market effect resulted in substantially increased exposure to corporate bonds, while exposure to federal bonds experienced a substantial decline. On a country level, exposure to France increased substantially, and exposure was introduced to Venezuela and Italy. Exposure to Japan experienced the greatest decline, while exposure decreased to the United States and Germany.

Net Assets

The Fund's NAV increased by 1352.8% to $\$77.0$ million at March 31, 2017, from $\$5.3$ million at March 31, 2016. This change was composed primarily of $\$3.0$ million in net losses (after including interest income) from investment performance, after deducting fees and expenses, and $\$75.3$ million in net sales.

Fees and Expenses

The management expense ratio ("MER") for Series R of 0.00% during the year ended March 31, 2017, was unchanged from the annualized MER for the period ended March 31, 2016. No management fee or administration fee, other than certain specific fund costs, is charged to Series R.

Recent Developments

The portfolio management team expects the macroeconomic environment and the underlying economic data to continue improving, with the recovery supported by expansionary fiscal policies in the United States and, to some extent, in Europe.

The team also expects inflation to move gradually higher due to global reflationary policies and a recovery in commodity prices, which should prompt the U.S. Federal Reserve to proceed with at least two additional rate increases in 2017. Reflationary trends support the Fund's short duration positioning and overweight allocation to corporate bonds.

However, some uncertainties remain, including the threat to trade relations arising from protectionist policies, populist movements in Europe in the run-up to general elections and the potential for disappointment from fiscal stimulus measures in the United States.

Related Party Transactions

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. At March 31, 2017, funds managed by Mackenzie owned 100.0% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

INTERNATIONAL BOND FUND (CLI)

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2017

FIXED INCOME FUND

Past Performance

The Fund's past performance information is presented in the following chart and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The chart and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

Year-by-Year Returns

The following bar chart presents the performance of Series R of the Fund for each of the fiscal periods shown. The chart shows, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2017. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all distributions are reinvested.

Percentage Return:	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception
Series R	-1.4	n/a	n/a	n/a	1.3
BofA Merrill Lynch Global Broad Market Index	0.6	n/a	n/a	n/a	1.6

The BofA Merrill Lynch Global Broad Market Index tracks the performance of investment grade debt publicly issued in the major domestic and eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. Qualifying bonds must be rated "BBB" or higher and have a remaining term to maturity of at least one year.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2017

FIXED INCOME FUND

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for each of the fiscal periods presented below. If during the period a fund or series was established or reinstated, "period" represents the period from inception or reinstatement to the end of that fiscal period. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

THE FUND'S NET ASSETS PER SECURITY (\$)¹

Series R	Mar. 31 2017	Mar. 31 2016
Net assets, beginning of period	10.27	10.00
Increase (decrease) from operations:		
Total revenue	0.16	0.05
Total expenses	—	—
Realized gains (losses) for the period	(0.16)	0.17
Unrealized gains (losses) for the period	(0.63)	0.09
Total increase (decrease) from operations²	(0.63)	0.31
Distributions:		
From net investment income (excluding dividends)	(0.15)	(0.04)
From dividends	—	—
From capital gains	—	—
Return of capital	—	—
Total annual distributions³		(0.04)
Net assets, end of period	9.99	10.27

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. Information for the fiscal periods ended after March 31, 2013, is derived from the Fund's audited annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS"). Information for any previous fiscal periods is derived from the Fund's audited annual financial statements prepared in accordance with Canadian generally accepted accounting principles as defined in Part V of the Chartered Professional Accountants Handbook ("Canadian GAAP"). The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

RATIOS AND SUPPLEMENTAL DATA

Series R	Mar. 31 2017	Mar. 31 2016
Total net asset value (\$000)¹,²	77,048	5,287
Securities outstanding (000)¹	7,716	515
Management expense ratio (%)³	—	—
Management expense ratio before waivers or absorptions (%)³	—	—
Trading expense ratio (%)⁴	0.00	0.02
Portfolio turnover rate (%)⁵	59.73	n/a
Net asset value per security (\$)²	9.99	10.27

(1) This information is provided as at the end of the fiscal period shown.

(2) The net asset value figures presented in this table are used for fund pricing and calculating returns by series. For any fiscal periods prior to the adoption of IFRS, the net asset values may differ from the figures in the annual financial statements, and the net asset value per security in this table may differ from the end of period figure in the Fund's Net Assets per Security table in this section. This difference is due to the requirements of Canadian GAAP. The adoption of IFRS for the fiscal periods ended after March 31, 2013 has eliminated the difference between the net asset value and net assets per security, in most cases.

(3) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie and Quadrus may waive or absorb operating expenses at their discretion and stop waiving or absorbing such expenses at any time without notice.

(4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(5) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The Fund pays no management fees on its Series R securities. Management fees from other Mackenzie funds that invest in the Fund were used to pay Canada Life Asset Management Ltd., an affiliate of Mackenzie, for providing investment advisory services, including managing the investment portfolio, providing investment analysis and recommendations, making investment decisions and making brokerage arrangements for the purchase and sale of the investment portfolio.
