(Unaudited – Expressed in US Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Electric Metals (USA) Limited (“EML” or the “Company”) was incorporated under the Canada Business Corporations Act on March 1, 2018. On October 2, 2025, the Company completed its continuation into British Columbia. The Company’s head office and registered offices are located at 2600 - 1066 West Hastings Street, Vancouver, BC V6E 3X1. The Company’s common shares are listed on the TSX Venture Exchange (the “TSXV”) under the symbol “EML” and the OTCQB under the ticker symbol “EMUSF”.

These condensed interim consolidated financial statements have been prepared assuming the Company will continue as a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. At September 30, 2025, the Company had accumulated losses of \$18,361,467 since its inception and expects to incur further losses in the development of its business. The continuation of the Company is dependent upon obtaining necessary financing to meet its ongoing operational levels of exploration and corporate overhead. There can be no assurance that the Company will not be impacted by adverse consequences that may be brought about on its business, results of operations, financial position and cash flows in the future. These conditions indicate a material uncertainty that may cast significant doubt upon the Company’s ability to continue as a going concern.

Additional funds will be required to enable the Company to continue its operations and there can be no assurance that financing will be available on terms which are acceptable to the Company. These condensed interim consolidated financial statements do not give effect to any adjustments to the amounts and classifications of assets and liabilities which might be necessary should the Company be unable to continue its operations as a going concern.

2. BASIS OF PRESENTATION

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard (“IAS”) 34, Interim Financial Reporting. They do not include all the information required for complete annual financial statements in accordance with IFRS Accounting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and therefore should be read together with the audited financial statements for the year ended December 31, 2024, which have been prepared in accordance with IFRS.

The accounting policies applied in these condensed interim consolidated financial statements are consistent with those applied in the preparation of the Company’s annual consolidated financial statements for the year ended December 31, 2024.

4. EXPLORATION AND EVALUATION ASSETS

North Star Manganese Project

The Company’s principal focus is on the exploration and development of the North Star Manganese Project, previously referred to as the Emily Manganese Project. The North Star Manganese Project is a 100% domestic U.S. project, comprising a manganese mine in Emily, Minnesota, and a high-purity manganese sulfate monohydrate (HPMSM) chemical plant in the U.S. NSM has a 100% ownership and management interest in the Emily Manganese Deposit established through a series of agreements with Cooperative Mineral

Resources, LLC (“CMR”), People’s Security Company, Inc. (“PSC”), and two private landowners. The CMR and PSC agreements establish two general arrangements related to the use of lands owned by CMR and PSC:

1. a contract mining and sales arrangement between NSM and CMR for the extraction of manganese ores from the property whereby NSM has the exclusive right to mine and purchase the manganese ore; and
2. separate property leases and a manganese processing agreement between NSM, CMR and PSC, where CMR and PSC will receive as rent for their properties a portion of NSM’s net distributed profits from downstream sale of processed advanced materials from any ores mined by NSM from the Area of Interest.

NSM also has an option to purchase all of CMR’s and PSC’s mineral and surface assets, including all rights and obligations, for \$30,250,000, prior to the initiation of commercial operations, less any net distributable profits paid by NSM.

In January and February 2023, NSM signed lease and purchase option agreements with two private landowners in Emily, Minnesota on two adjacent blocks of land covering approximately 77 acres of surface and mineral rights. Pursuant to the lease and purchase option agreements, NSM will pay each of the private landowners an annual fee of \$6,000 due on closing and on each anniversary date of the agreement. NSM can purchase each of the optioned properties at any time for a mutually agreed market price or a professional appraisal price plus 15%. Each property is subject to a 2.5% net smelter return (“NSR”) that can be repurchased for \$500,000 for each 1.25%, at any time.

Corcoran Canyon Silver Project (“Corcoran”)

Corcoran is a silver-gold project located northeast of Tonopah, in central Nevada, USA. EML owns 100% of NAS, which owns 100% of CM, resulting in EML’s 100% indirect ownership of Corcoran.. Corcoran comprises 27 core and 166 adjacent unpatented mineral claims, which are currently subject to an NSR royalty ranging from 0.4% to 3%. CM is staking new and restaking certain historical claims in potential exploration ground and intends to maintain these claims in good standing through payment of the required annual holding fees.

Reclamation bonds of \$82,660, associated with CM’s exploration, have been paid towards Corcoran. The termination of liability under the bonds will be permitted only after it is determined there is no outstanding reclamation liability at which time the bonds will be refunded, or until satisfactory replacement bond coverage is furnished.

Belmont Silver Project (“Belmont”)

Belmont is a silver-gold project located northeast of Tonopah, in central Nevada, USA. EML owns 100% of NAS, which owns 100% of CM, resulting in EML’s 100% indirect ownership of Belmont.. Belmont is a historic silver mining district (late-1800s), and the project consists of multiple leases of patented mining claims (246 hectares) and 88 unpatented mineral claims that surround or cover the majority of old silver workings of the Belmont silver mining camp. CM intends to maintain these claims and leases in good standing through payment of the required annual holding fees.
