## Notes to Condensed Interim Financial Statements

### September 30, 2019

(expressed in Canadian dollars)  
(unaudited)

#### 1. Nature of operations

United Hunter Oil & Gas Corp. (the "Company") is a public company engaged in the exploration and development of oil and gas properties.

The Company was incorporated under the Business Corporations Act of Ontario on February 22, 2008 and its registered office is located at 77 King Street West, Suite 400, Toronto, Ontario, M5K 0A1.

#### 2. Going-concern

These condensed interim financial statements have been prepared on a going concern basis that presumes the realization of assets and discharge of liabilities in the normal course of business.

The Company is in the exploration stage and has no revenue. During the 9 months ended September 30, 2019, the Company recorded a loss of \$238,336 (2018 - \$508,491) and as at that date, the Company had accumulated deficit of \$12,757,983 (December 31, 2018 - \$12,519,647), working capital deficit of \$246,513 (December 31, 2018 - \$32,245) and cash flow deficit from operations of \$116,018 (2018 - \$373,371). The losses, accumulated deficit and cash flow deficit from operations limit the Company's ability to fund its operations and the acquisition, exploration and development of oil and gas properties. As a result, there is significant doubt about the Company's ability to continue as a going concern.

The continued operation of the Company is dependent upon the support of its creditors and its ability to secure financing to fund its operations and finance the acquisition, exploration and development of oil and properties. The Company is actively seeking to raise the necessary financing, however, there can be no assurance that additional financing will be available.

These condensed interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

#### 3. Basis of presentation

##### Statement of compliance

These condensed interim financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting*, using accounting policies consistent with International Financial Reporting Standards and its interpretations adopted by the International Accounting Standards Board.

The accounting policies used in these condensed interim financial statements are consistent with those disclosed in the Company's audited financial statements for the year ended December 31, 2018.

These condensed interim financial statements do not include certain information and disclosures normally included in annual financial statements prepared in accordance with IFRS and should be read in conjunction with the Company's annual financial statements for the year ended December 31, 2018.

These condensed interim financial statements were approved and authorized for issue by the Board of Directors on November 26, 2019.

##### Changes in accounting standards

On January 1, 2019, the Company adopted the following amendment to standards:

##### *IFRS 16, Leases ("IFRS 16")*

This standard will replace *IAS 17, Leases*. IFRS 16 provides an updated definition of a lease contract, including guidance on the combination and separation of contracts. The standard requires lessees to recognize a right-of-use asset and a lease liability for substantially all lease contracts. The accounting for lessors is substantially unchanged from IAS 17.

As the Company is not a party to any leases, the adoption of this accounting standard had no impact on these financial statements.

#### 4. Loan payable

Loan payable, which is unsecured and due on demand, consists of principal of \$5,000 plus interest of \$29 accrued at the rate of 10% per annum.

#### 5. Share capital

##### Authorized

Unlimited number of common shares without par value.

Unlimited number of preference shares, issuable in series.

##### Stock options

The Company may grant stock options to directors, officers, employees and consultants for up to 10% of the issued and outstanding common shares. At September 30, 2019, the Company may grant up to 1,748,037 stock options (December 31, 2018 - 1,748,037). The exercise price for stock options will not be less than the market price of the common shares on the date of the grant, less any discount permissible under the rules of the TSX Venture Exchange. The maximum term for stock options will be 5 years and the options will be subject to vesting limitations imposed by the board of directors of the Company.

A summary of the Company's stock options outstanding and exercisable at September 30, 2019 is presented below:

	Weighted- average exercise price \$	Number of stock options
Balance, December 31, 2018 and September 30, 2019	0.25	1,400,000

  

Exercise price	Expiry date	Number of stock options outstanding	Number of stock options exercisable
\$0.25	August 20, 2023	1,400,000	1,150,000

#### 6. Determination of fair values

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

##### *Accounts payable and accrued liabilities*

The fair value of accounts payable and accrued liabilities approximates their carrying value due to their short term to maturity.

##### *Classification of fair value of financial instruments*

The Company classified the fair value of its financial instruments measured at fair value according to the following hierarchy based on the amount of observable inputs used to value the instrument:

- Level 1 - quoted prices in active markets for identical assets and liabilities;
- Level 2 - inputs, other than the quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly;
- Level 3 - inputs for the asset or liability that are not based on observable market data

The Company does not have any financial instruments measured at fair value.

#### 7. Financial risk management

The Company's activities expose it to a variety of financial risks that arise as a result of its exploration, development, production and financing activities, including credit risk, liquidity risk and market risk.

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements.

The Board of Directors oversees management's establishment and execution of the Company's risk management framework. Management has implemented and monitors compliance with risk management policies. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities.

***Credit risk***

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. Credit risk arises from the Company's cash and receivables. The maximum exposure to credit risk is equal to the carrying amount of cash and receivables. The Company's limits its exposure to credit risk on its cash by holding its cash in deposits with high credit quality Canadian chartered banks.

***Liquidity risk***

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial liabilities that are settled in cash or other financial assets. The Company intends to meet its current obligations in the following year with funds to be raised through private placements, shares for debt settlements and related party loans. The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities as they come due. The amounts for accounts payable and accrued liabilities are subject to normal trade terms. The Company's operation of the Company is dependent upon the Company's ability to secure equity financing to meet its existing obligation and finance the acquisition, exploration and development of oil and gas properties.

***Market risk***

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Company's income or the value of its financial instruments.

***Foreign exchange risk***

Foreign exchange risk is the risk of financial loss to the Company due to a change in foreign exchange rates. The majority of the Company's cash is held in Canadian dollars. Foreign exchange risk arises as the Company makes expenditures denominated in US dollars and has cash of US\$4,552 (December 31, 2018 - US\$14,065) and accounts payable of US\$85,155 (December 31, 2018 - US\$15,094).

The Company does not use derivative instruments to hedge exposure to foreign exchange rate risk. However, management of the Company believes there is no significant exposure to foreign currency fluctuations due to the limited number of transactions conducted in US dollars.

***Interest rate risk***

Interest rate risk is the risk of financial loss to the Company due to a change in interest rates. The Company's exposure to interest rate risk is limited due to the short-term nature of its financial instruments. In addition, loans payable bore interest at fixed rates of interest.

***Capital management***

Capital of the Company consists of share capital, contributed surplus and deficit. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern so that it can acquire, explore and develop mineral resource properties for the benefit of its shareholders. The Company manages its capital structure and makes adjustments based on the funds available to the Company in light of changes in economic conditions. The Board of Directors has not established quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain the future development of the Company. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that consider various factors, including successful capital deployment and general industry conditions. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company's principal source of capital is from the issue of common shares and loans payable. In order to achieve its objectives, the Company intends to raise additional funds as required.

The Company is not subject to externally imposed capital requirements and there were no changes to the Company's approach to capital management during the year.

## 8. Related party transactions

### Compensation of key management personnel

The Company considers its directors and officers to be key management personnel. Transactions with key management personnel are set out as follows:
