

WHITEMUD RESOURCES INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS – ANNUAL HIGHLIGHTS
YEAR ENDED DECEMBER 31, 2022

The following Annual Management's Discussion and Analysis ("MD&A") of the financial condition and results of operations of Whitemud Resources Inc. ("Whitemud" or the "Company") has been prepared by management of Whitemud and should be read in conjunction with the Company's audited statements for the year ended December 31, 2022 (the "Financial Statements"). The Company has prepared this MD&A in accordance with the provisions of Item 1 of Part 2 of Form 51-102F1 - *Management's Discussion and Analysis*.

The Financial Statements and accompanying notes of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") and require management to make estimates and assumptions that affect amounts reported and disclosed in the Financial Statements and related notes.

The Board of Directors, on recommendation of the Audit Committee, approved the contents of this MD&A on April 26, 2023. Disclosure contained in this document is current to this date, unless otherwise stated. Some of the statements made herein contain "forward-looking information". Please see "*Cautionary Notes Regarding Forward-Looking Statements*". Additional information on Whitemud is available on the Company's profile through the System for Electronic Document Analysis and Retrieval ("SEDAR") at www.sedar.com.

GENERAL BUSINESS DESCRIPTION

The Company developed kaolin resources in the Wood Mountain area of southern Saskatchewan for the production and marketing of metakaolin. Metakaolin is a high performance supplementary cementing material used as a performance enhancing additive to concrete. Metakaolin can replace up to 10% of the cement used to make concrete while enhancing performance and reducing cost.

Midstream Energy Partners division of Whitemud was formed with the intention of diversifying the Company's revenue streams through the marketing of liquefied petroleum gas ("LPG") commodities in addition to its kaolin and metakaolin products. Commodity marketing contracts are subject to a bidding process with contracts usually entered into for terms of one year.

COMPANY OUTLOOK AND GOING CONCERN

The Financial Statements were prepared by management in accordance with IFRS applicable to a going concern entity, which assumes that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. The uncertainty in the use of the going concern assumption is impacted by the factors described below. The Financial Statements do not reflect any adjustments relating to the recoverability and classification of recorded assets or liabilities that may be necessary should the Company be unable to continue as a going concern.

For the fiscal year ended December 31, 2022, the Company generated a net loss of \$36,352 and an operating cash flow deficit of \$525,441. In order for the Company to continue operations for the longer term, including generating sufficient cash flows and ultimately attaining profitable operations, additional financing will be required.

On December 23, 2022 the Company announced that Kasten Energy Inc. ("Kasten") has called for repayment, by December 30, 2022, of a loan in the amount of \$1,139,561. On January 11, 2023 Kasten commenced an action against Whitemud in the Court of King's Bench of Alberta, seeking judgment in the amount of \$1,139,561, interest, costs and damages in the amount of \$113,000. On January 27, 2023 the Company filed a Statement of Defence which among other things pleads the *Limitations Act*, RSA 2000, c.L-12 (the "Act"), and says that it is immune from liability with respect to the Plaintiff's claim due to expiry of the limitation period. No further steps have yet been taken in the litigation.

On December 15, 2020 the Company entered into a set-off agreement with Petrogas Energy Corp. ("Petrogas") whereby the parties agreed to set-off amounts owing to Whitemud by Petrogas, against the amounts owing by Whitemud to Petrogas and its affiliates. Petrogas agreed to forgive the remaining outstanding amount under the loan. SAM Holdings Ltd. replaced a \$1,000,000 Letter of Credit provided to the Province of Saskatchewan which previously was provided by Petrogas.

As a condition of the set-off and loan forgiveness Whitemud entered into a non-competition agreement in favour of Petrogas whereby it agreed not to participate in any business or other activity competitive with Petrogas and its affiliates in Canada or the United States until after September 30, 2022, provided that such restrictions will not affect Whitemud's ability, through Midstream Energy Partners (the commodity marketing division), to maintain its ongoing operations and continue its historical level of LPG business activities. During the non-competition period and subsequently the LPG business volumes have been nominal and materially below the thresholds established in the now expired agreement.

In the fourth quarter of 2019, the Company prepared a Filing Statement to reclassify Whitemud from a Mining Issuer to a Tier 2 Industrial Issuer as a result of the growth of the Company's LPG business through its Midstream Energy Partners division. The division was created in an effort to diversify its business.

For the year ended December 31, 2022, the Company had a net loss of \$36,352 (2021: \$2,133,979) and negative operating cashflow of \$525,441 (2021: \$1,308,074) with a resulting accumulated deficit of \$83,914,182 (2021: \$83,877,830). Operating cashflow for the quarter ended December 31, 2022 was (\$102,137) compared to operating cashflow of (\$175,044) for the quarter ended December 31, 2021.

To achieve profitability from future metakaolin operations management believes that the Company must continue to gain market acceptance for the Company's products and to increase sales and revenues. This will require significant capital expenditures.

The Company has sold down its inventory and is currently in the process of evaluating its ability to develop methods to produce metakaolin more cost effectively. A small scale prototype calciner capable of producing 1 – 1.5 tonnes per day of metakaolin has been built for this evaluation. It is expected that testing of this small scale prototype will commence approximately May 1, 2023. Whitemud and its marketing team are diligently working to secure offtake agreements to meet minimum volume hurdles to support a capital program for facility upgrades at the Wood Mountain plant and a potential restart of plant operations in Q3, 2023. The upgrades and restart will be required for Whitemud to provide the necessary supply commitments to potential customers. In addition to achieving the minimum volume hurdle, Whitemud will need to obtain the necessary financing for a capital program in order to scale up to a commercially sized calciner.

Metakaolin sales improved to \$78,744 in the quarter ended December 31, 2022, compared to \$72,806 for the quarter ended December 31, 2021. While improved these revenues remain insufficient to cover Company costs.

As a result of the going concern circumstances described above and in notes 1 and 6 of the annual audited financial statements, the metakaolin buildings and equipment assets are being carried at NIL as a result of depreciation and impairment charges. The Company estimated internally generated future cash flows discounted to their present value using a risk adjusted interest rate of 14.20%. The cash flows did not support the carrying amount of the assets. In determining fair value, the Company considered current costs, the long term view of the uses for its products and recent sales volumes. The Company continues to carry its land at its original cost.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to a revised estimate of its recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized.

The LPG marketing business is dependent upon commodity price, access to and cost of transportation, risks associated with product supply, risks of customer demand, weather related demand conditions and the ability of customers to pay for LPG's delivered to them. There is no assurance that contracts may be obtained, extended or re-negotiated under commercially acceptable terms. See "Risks and Uncertainties".

In summary and without limiting the foregoing, the ability of the Company to continue as a going concern and realize the carrying value of its assets and discharge its liabilities when due, is dependent on the Company's ability to generate improved market acceptance for the Company's metakaolin resource, increase sales, develop methods to produce metakaolin more cost effectively, and secure financing in order to recommence metakaolin production and sales. There is no certainty that these or any other strategies that may be identified by management will be sufficient to permit the Company to continue beyond the immediate future as such strategies are contingent upon improved industry conditions and market acceptance for the Company's products. For additional risks and uncertainties relating to the Company see "Risks and Uncertainties".

ENVIRONMENTAL, SOCIAL AND CORPORATE GOVERNANCE

During the third quarter of 2021, Whitemud commenced a review of its assets and efficiency upgrades in order to bring the Wood Mountain plant back into production with a lower carbon footprint.

Within the last few years, greater attention has been the focus for all industries to operate with a lower carbon footprint and to reduce CO2 and greenhouse gas emissions. With the heightened awareness for corporate Environmental, Social and Corporate Governance (ESG), management believes Whitemud's MK could have a significant role to play in helping to reduce the carbon footprint for the cement industry.

RESULTS OF OPERATIONS

For the year ended December 31, 2022, the Company generated a net loss of \$36,352 (\$0.0001 per share loss) compared to a net loss of \$2,133,979 (\$0.0006 per share loss) for the year ended December 31, 2021. Metakaolin sales revenue and margins improved but remained insufficient to cover the operating costs of the Company. Net income for the quarter ended December 31, 2022 was \$389,833 compared to a net loss of \$1,971,255 for the quarter ended December 31, 2021. In both periods the largest factor driving the results was the year end revaluation of the asset retirement obligation ("ARO"). In the fourth quarter of 2022 the impact of the ARO revaluation was a positive contribution of \$321,074 while in the fourth quarter of 2021 the revaluation resulted in increasing the net loss for the period by \$1,539,956. Operating cash flow for the quarter ended December 31, 2022 was (\$102,137) compared to operating cashflow of (\$175,044) for the quarter ended December 31, 2021. Improved results in the fourth quarter of 2022 were driven by higher metakaolin revenues along with LPG earnings from the Midstream Energy Partners division. Note 15 of the annual audited financial statements and the management prepared quarterly financial statements provides a breakdown of operations by division.

Metakaolin Division

Revenue

Revenue from the sale of metakaolin was \$249,951 for year ended December 31, 2022, compared to \$171,078 for the same period in 2021. The sales revenue increase is the result of 33% higher sales volumes and improved margins driven in part by sales of higher priced special formulations. The customer base expanded again in 2022 and customers which have historically bought metakaolin showed higher demand for the product in 2022.

The net loss for year ended December 31, 2022 was \$867,939 compared to a net loss of \$2,534,220 for the year ended December 31, 2021. These figures include a gain of \$321,074 in 2022 and a loss of \$1,539,956 in 2021 specific to ARO changes. Excluding these non-cash adjustments, the loss in 2022 widened due to higher general and administration expenses attributable to the Metakaolin division.

At December 31, 2022, there were 100 tonnes (2021 – 1,262) of finished metakaolin in bulk inventory available for sale. Management is developing a plan to produce more inventory available for sale, the results of which are not known at this time.

Operating Expenses

Company operating expenses for the year ended December 31, 2022 were \$878,202 (2021 - \$816,833), with generally all of the increase attributable to higher metakaolin cost of sales.

General and administration expenses for the year ended December 31, 2022 were \$608,379 (2021 - \$350,172), up \$258,207 due to higher professional fees and public filing expenses. These increased expenses include higher legal fees related to TSXV filings and defense costs and consulting fees paid to various vendors supporting several corporate developments and objectives, including but not limited to:

- Market development expenses to expand the metakaolin customer base, including new potential markets
- Trademark development and registration
- Process design improvements at the Wood Mountain facility
- Product development including potential product blends
- Launch of the updated and improved company website, www.whitemudresources.com

Finance charges for the nine months ended December 31, 2022 were \$14,133 (2021: \$12,285)

Depreciation expense for the year ended December 31, 2022 was \$5,463 (2021: \$13,362). Capital assets have now been written down and fully depreciated during 2022.

Asset Retirement Obligations

At December 31, 2022 the asset retirement obligations of the company were updated and reassessed to reflect current market conditions, inflation and interest rates and managements assessment of the number of years until retirement of the plant. This resulted in a decrease to the asset retirement obligation of \$321,074 as detailed in Note 8 of the annual audited statements.

At December 31, 2021 the asset retirement obligations of the company were updated and reassessed to reflect current market conditions, inflation and interest rates. This resulted in an updated retirement obligation of \$2.04 million (previously \$1 million) and an increase to the asset retirement obligation of \$1,539,956 as detailed in Note 8 of the annual audited statements.

Midstream Energy Partners Division

For the year ended December 31, 2022 Midstream Energy Partners division recorded revenue in the first and the fourth quarter. For the twelve months ended December 31, 2022 revenue from LPG sales and LPG trading totaled \$399,999 in quarter one and \$471,587 in quarter four respectively. General and administration expenses for the division increased to \$40,000.

For the year ended December 31, 2022 the division generated net income of \$831,586 compared to \$400,241 of net income for the year ended December 31, 2021.

There have been no exploration expenditures, research and development expenses or other material costs that would need to be disclosed that have not been reflected in the audited financial statements or this document.

LIQUIDITY

The Financial Statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards, which assumes Whitemud will realize its assets and discharge its liabilities and commitments in the normal course of business. The application of the going concern concept is dependent upon the ability of the Company to market its metakaolin products and its midstream LPG business. Pursuant to a set-off and loan forgiveness agreement Petrogas Energy Corp. has agreed to forgive its notes payable. As described above however, Kasten has not forgiven its loan to the Company but instead has demanded its payment. The Company takes the position that it is immune from Kasten's claim under the Act. Operations have been funded through loan facilities provided by the Creditors as described below under "Capital Resources – Current Loan Facilities". The Company does not have the ability to fund development or operating costs from operations and requires the ongoing support of the Creditors.

CAPITAL RESOURCES

Current Loan Facilities

On December 15, 2020 the Company entered into a set-off agreement with Petrogas Energy Corp. ("Petrogas") whereby the parties agreed to set-off amounts owing such that all amounts owing between the parties were satisfied in full.

It was a condition of the set-off and loan forgiveness that Whitemud enter into a non-competition agreement in favour of Petrogas whereby it agreed not to participate in any business or other activity competitive with Petrogas and its affiliates in Canada or the United States until September 30, 2022, provided that such restrictions will not affect Whitemud's ability, through Midstream Energy Partners (the commodity marketing division), to maintain its ongoing operations and preserve LPG business opportunities consistent with its historical volumes.

The Company has a loan of \$1,139,561 from Kasten which the Company believes is statute barred under the Act and which is in litigation as described above.

Capital Expenditures

There were NIL expenditures capitalized in 2022 (2021 - NIL).

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements at the time of this management discussion and analysis.

FINANCIAL AND OTHER INSTRUMENTS

The Company's cash and cash equivalents and restricted cash are measured at fair value through profit or loss. The Company does not have a hedge or other risk control strategy in place.

OUTSTANDING COMMON SHARES

The Company is authorized to issue an unlimited number of Class A voting and an unlimited number of Class B non-voting common shares. The Company has issued 34,026,300 Class A common shares and 326,499,700 Class B non-voting common shares as at December 31, 2022.

TRANSACTIONS BETWEEN RELATED PARTIES

As and if required a related party provides marketing, logistical and administrative services to the Company for a fee equal to 15% of the net profits that Whitemud realized through performance by the related party. Please see Note 14 of the annual financial statements for further details.

RECENT AND FUTURE ACCOUNTING PRONOUNCEMENTS

The Financial Statements, including comparatives, are presented in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committees ("IFRIC").

The following are standards or amendments to existing standards as well as future accounting pronouncements that are relevant to the Company's financial statements:

- IFRS 16 - Leases

The Company has adopted these standards. The adoption of these standards had no impact on the amounts recorded in the Company's Financial Statements.

CRITICAL ACCOUNTING ESTIMATES

Whitemud prepares its financial statements in accordance with International Financial Reporting Standards, as issued by the International Accounting Standards Board ("IASB"). In doing so, management is required to make various estimates and judgments in determining the reported amounts of assets and liabilities, revenues and expenses for each year presented and in the disclosure of commitments and contingencies. Management bases its estimates and judgments on its own experience, guidelines established by the Canadian Institute of Mining, Metallurgy and Petroleum and various other factors believed to be reasonable under the circumstances. In reference to the Company's significant accounting policies as described in note 3 to the Financial Statements, management believes the following critical accounting policies reflect its more significant estimates and judgments used in the preparation of the Financial Statements.

Inventories are valued at the lower of weighted average production cost and net realizable value, while consumable supplies and spares are valued at the lower of weighted-average cost and replacement cost. Determination of realizable value or replacement costs requires estimates to be made for costs to complete and sell inventory. Management periodically makes estimates regarding whether an allowance is necessary for slow moving or obsolete consumable supplies and spares inventories.

In 2016, the Company changed the rate of depreciation to better reflect the useful lives of the processing plant and equipment. Under IFRS, this change is considered a change in accounting estimate and accounted for prospectively by amortizing the cumulative changes over the remaining useful life of the related assets. Mobile equipment and other administrative-type assets are depreciated according to the declining balance or straight-line method, based on an estimate of their useful lives.

Significant decommissioning and reclamation activities are often not undertaken until substantial completion of the useful lives of productive assets. Regulatory requirements and alternatives with respect to these activities are subject to change over time. A significant change to either the estimated costs or recoverable reserves would result in a material change in the amount charged to earnings.

If it is determined that carrying values of property, plant and equipment cannot be recovered, then the asset is written down to its recoverable amount. Any excess of book value over recoverable amount is charged to income in the period in which the impairment is determined. Recoverability and fair value assessments are dependent upon assumptions and judgments regarding future prices, costs of production, sustaining capital requirements and economically recoverable reserves and resources. A material change in assumptions may significantly impact the potential impairment of these assets.

The Company uses the liability method of accounting for deferred income taxes. Under this method, current income taxes are recognized for the estimated income taxes payable for the current year. Deferred income tax assets and liabilities are recognized for temporary differences between the tax and accounting bases of assets and liabilities, calculated using the currently enacted or substantively enacted tax rates anticipated to apply in the period that the temporary differences are expected to reverse. Deferred income tax inflows and outflows are subject to estimation in terms of both timing and amount of future taxable earnings. Should these estimates change the carrying value of income tax assets or liabilities may change.

Grants under Whitemud's stock-based compensation plans are accounted for in accordance with the fair-value-based method of accounting. For stock-based compensation plans that will settle through the issuance of equity such as stock options, the fair value of stock options is estimated using the Black-Scholes option pricing model. These valuation models require the input of certain assumptions including expected share price volatility.

RISKS AND UNCERTAINTIES

The continued operation, development and exploitation of the Company's kaolin resources and operation of its processing plant involve a high degree of financial risk. The risk factors which should be taken into account in assessing the Company's activities include, but are not limited to, those set out below and described under "*Cautionary Note Regarding Forward Looking Statements*". These risks are not presented in any order of priority. Any one or more of these risks could have a material effect on the operations and financial condition of the Company and should be taken into account in assessing the Company's activities.

The Company may not be able to continue as a going concern.

The Financial Statements have been prepared on a going concern basis in accordance with IFRS, which assume Whitemud will be able to realize its assets and discharge its liabilities and commitments in the normal course of business. The application of the going concern concept is dependent upon the ability of the Company to raise additional capital to support ongoing activities, receive continued support of its creditors, and achieve profitable operations. To date, the Company's main source of cash resources has been through the issuance of equity and debt. This dependence on the private and public market to fund cash flow needs of the Company has resulted in management including a "Nature of the Organization and Future Operations" note in the Financial Statements.

The Company is subject to risks of commodity marketing and distribution

Commodity marketing contracts are subject to a bidding process with contracts usually entered into for terms of one year. The LPG marketing business is dependent upon commodity price, access to and cost of transportation, risks associated with product supply, risks of customer demand, weather related demand conditions and the ability of customers to pay for LPG's delivered to them. There is no assurance that contracts may be obtained, extended or re-negotiated under commercially acceptable terms.

The Company's revenue does not cover its expenses.

To date, the Company has not earned significant revenues and is developing markets for metakaolin. Whitemud does not have formal sales contracts and the Company has not produced product year round on a commercial scale. The Company is currently generating a loss from its metakaolin operations and inventories of finished product are at historically low levels. As a result, additional capital investment is required to bring the facilities up to sustainable commercial production.

The Company depends on the support of the Creditors to continue operations

As described above, during 2022 there has been a demand made and an action commenced for repayment of the loan made by Kasten but that demand has been resisted, and the action defended, on the basis that the loan is statute barred under the Act. Additionally, SAM Holdings Ltd., a major shareholder of the Company, has provided a Letter of Credit to the Government of Saskatchewan as represented by the Minister of the Environment to secure the Company's reclamation obligations in relation to its mining operations.

Should financing for the Company not be readily available in the future or support from Creditors including SAM Holdings Ltd. not be maintained, then the Company will face a severe lack of liquidity that could lead to a further cessation of operations.

The Company facilities are subject to operating risks.

Construction of the Company's processing facility and mine is complete and the Company has completed commissioning and testing of the plant. Risks include, without limitation, equipment failures, labour disputes, work stoppages and equipment delivery delays, all of which may have an adverse effect on the Company's ongoing operations and financial condition. Additionally, the Company must enhance the efficiency of its operations to produce competitively priced product.

The Company operates in a competitive market and is not a market leader.

The cement products industry is competitive and prospective customers in the markets that the Company is targeting are frequently using lower priced products in many instances to produce concrete. As a result, the Company may not secure the sufficient metakaolin sales volumes to improve its financial condition.

The conditions in the oil and gas industry affect the Company.

The oil and gas industry is an industry that the Company targets for the sale of its kaolin and metakaolin products. Should industry conditions deteriorate this may challenge the Company's ability to expand its customer base and achieve its sales objectives or improve its financial condition.

Mining and production of metakaolin is subject to numerous risks.

Mining involves a high degree of risk and the Company has a limited history of metakaolin operations. The Company currently depends on a single property with a kaolin resource. The Company's operations are subject to environmental risks and the actual costs of reclamation for the property are subject to regulatory body guidelines. Changes in government regulations could impact Whitemud's future financial performance.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some of the statements made herein contain "forward-looking information" which may include, but is not limited to, statements with respect to the future financial or operating performance of the Company, government approvals, the costs and timing of the development and commissioning of the project and the Company's liquidity and capital resources. Without limiting the generality of the foregoing, the Company has made materially forward-looking statements: (i) under the heading "General Business Description" with regard to the replacement of up to 10% of the cement used and ability to negotiate commercially acceptable commodity marketing contracts; (ii) "Liquidity and Capital Resources", regarding the ability of the Company to market its metakaolin products and its midstream LPG business, the sufficiency of working capital and the necessity for support from creditors; (iii) under the heading "Company Outlook and Going Concern" with regard to the improvement of operational efficiency and enhanced production process; and (iv) under the heading "Company Outlook and Going Concern", the assumption that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business, the uncertainty about the appropriateness of the going concern assumptions, the anticipated requirement for additional financing, generate improved market acceptance for the Company's product. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "believes", or variations (including negative variations) of such words and phrases, or state that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Material risk factors that could cause results to differ materially from any future results include the following risk factors: "Whitemud has no material operating revenue, history of Metakaolin or Kaolin project development or operations," is applicable to the forward-looking statements identified in (i) through (iv) above; "The Metakaolin market Whitemud is targeting is underdeveloped," is applicable to the forward-looking statements identified in (i) and (iv) above; "Whitemud may not achieve sales volumes and sales prices for products," is applicable to the forward-looking statements identified in (i) through (iv) above; "Whitemud does not have formal sales contracts," is applicable to the forward-looking statements identified in (i) through (iv) above; "the Company is not producing product consistently has not exhibited consistent quality of product on a commercial scale" is applicable to the forward looking statements identified in (i) through (iv) above; "the process has not been proven at the large production levels projected," is applicable to the forward-looking statements identified in (i) and (iv) above; "Mining/quarrying operations are subject to a high degree

of risk,” is applicable to forward-looking statements made in (i) through (iv) above; “Government regulation may adversely affect Whitemud,” is applicable to forward-looking statements made in (iv) above; and “Whitemud’s distribution and sales of its products face uncertainty,” is applicable to forward-looking statements made in (i) and (iii) above. “No assurance that new business ventures will develop on a profitable and sustained basis or that the Company will have the necessary contractual commitments, resources, and working capital to continue with the new business ventures” is applicable to forward-looking statements made in (iii). The forgoing list of risk factors is not exhaustive. Additional information on risk factors is included under the heading “Risks and Uncertainties” in this MD&A, as well as general business, economic, competitive, political and social uncertainties; the actual results of exploration activities; actual results of reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of metakaolin and kaolin; possible variations of kaolinized ore deposit composition and qualities; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; delays in obtaining government approvals or in obtaining sufficient debt or equity financing if required, or in the completion of development or construction activities, including the potential expansion of the plant. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in the forward-looking statements, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. In making its forward-looking statements, the Company used, among others, the following material factors or assumptions to develop forward-looking information enumerated above: the target market for Whitemud will accept Whitemud’s metakaolin for its stated purpose, use of metakaolin remains economic, government regulations governing Whitemud’s title to mineral properties, its permits and plant operations will not change, the economic conditions continue to improve to an extent where demand for concrete products in the concrete industry will improve to and beyond levels experienced prior to the economic downturn and that the various independent reviews conducted on the Company’s products and resources are accurate. Forward-looking statements contained herein are made as of the date hereof subject to the requirements of applicable securities legislation and except as otherwise required by law, the Company assumes no obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, the reader is cautioned not to place undue reliance on forward-looking statements.

OTHER INFORMATION

Additional information related to the Company is available for viewing on SEDAR at www.sedar.com and at the Company’s website at www.whitemudresources.com.
