### **1. CORPORATE INFORMATION**

Rackla Metals Inc. (the “Company”) is pursuing opportunities related to exploration of mineral resource properties. The Company was incorporated in the Province of British Columbia on September 20, 2011, and its common shares are listed on the TSX Venture Exchange (“TSX-V”) under the symbol RAK.

The address of the Company’s corporate office and principal place of business is Suite 650, 200 Burrard Street, Vancouver, BC, Canada V6C 3L6.

### **2. BASIS OF PREPARATION**

These condensed interim financial statements are prepared in accordance with International Accounting Standard (“IAS”) 34 *Interim Financial Reporting* under IFRS Accounting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”). These condensed interim financial statements follow the same accounting policies and methods of application as the most recent annual financial statements of the Company. These condensed interim financial statements do not contain all of the information required for full annual financial statements. Accordingly, these condensed interim financial statements should be read in conjunction with the Company’s most recent annual financial statements, which were prepared in accordance with IFRS as issued by the IASB.

#### **Basis of Measurement**

These condensed interim financial statements have been prepared on the historical cost basis, except for certain financial instruments carried at fair value. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The presentation and functional currency of the Company is the Canadian dollar.

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company’s accounting policies. The areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the condensed interim financial statements are disclosed in Note 3.

#### **Ability to Continue as a Going Concern**

These condensed interim financial statements have been presented on the basis that the Company will continue as a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. Realization values may be substantially different from the carrying values shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material. At September 30, 2024, the Company has not yet achieved profitable operations, has an accumulated deficit of \$17,658,260 (December 31, 2023: \$14,944,630) since inception, and is expected to incur further losses in the development of its business, all of which raise significant doubt about its ability to continue as a going concern. The Company will periodically have to raise additional financing in order to acquire and conduct work programs on mineral properties and meet its ongoing levels of corporate overhead and discharge its liabilities as they come due. While the Company has been successful in securing financings in the past and subsequent to the period end (Note 17), there is no assurance that it will be able to do so in the future.

#### **3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS**

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in profit or loss in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

The key areas of judgment applied in the preparation of the condensed interim financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

- i) Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.
- ii) The application of the Company's accounting policy for exploration and evaluation expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company.

Assets or CGUs are evaluated at each reporting date to determine whether there are any indications of impairment. The Company considers both internal and external sources of information when making the assessment of whether there are indications of impairment for the Company's exploration and evaluation assets.

In respect of costs incurred for its investment in exploration and evaluation assets, management has determined the acquisition costs that have been capitalized may not be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefit, including access to financing to further exploration and development, geologic and metallurgic information, economics assessment/studies, accessible facilities, and existing permits.

- iii) Although the Company has taken steps to identify any decommissioning liabilities related to mineral properties in which it has an interest, there may be unidentified decommissioning liabilities present.
- iv) The Company applies judgment in determining whether a lease contract contains an identified asset, whether they have the right to control the asset, and the lease term. The lease term is based on considering facts and circumstances, both qualitative and quantitative, that can create an economic incentive to exercise renewal options. Management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not to exercise a termination option.
- v) The Company applies judgment in determining exploration costs that qualify as flow-through eligible Canadian exploration expenditures.
- vi) The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay for its operating expenditures, meet its liabilities for the subsequent year, and to fund planned contractual exploration programs, involves significant judgment based on historical experiences and other factors including expectation of future events that are believed to be reasonable under the circumstances.

The key estimate applied in the preparation of the condensed interim financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities is as follows:

- i) Option pricing models require the input of highly subjective assumptions, including the expected price volatility and options expected life. Changes in these assumptions can materially affect the fair value estimate and, therefore, the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

#### 4. CASH

Cash at banks is held in interest-bearing and non-interest-bearing accounts. As at September 30, 2024, the Company's cash in hand totaled \$2,661,388 (December 31, 2023: \$1,181,671), of which \$1,936,111 (December 31, 2023: \$628,004) is reserved for flow-through eligible activities during the 2024 and 2025 fiscal years (Note 10).

#### 5. EQUITY INVESTMENTS

As of September 30, 2024, equity investments consisted of 18,750 common shares of Bronco Resources Corp., formerly called Damara Gold Corp. ("Bronco"), a public company, and 200,000 common shares of Voyager Gold Corp. ("Voyager"), a private company with a common director. The private company shares were initially measured at fair value and subsequently written down to \$1.

During the period ended September 30, 2024, Bronco completed a one-for-four share consolidation thereby reducing the Company's holding in Bronco to 18,750 common shares.

As at September 30, 2024, the carrying amount for the equity investments was \$1,314 (December 31, 2023: \$1,501).

During the period ended September 30, 2024, there was a decrease in fair value of the Bronco shares by \$187 (2023: \$1,500). This amount was recorded as a fair value loss in other comprehensive loss.

#### **10. OTHER LIABILITY (cont'd)**

On June 11, 2024, the Company closed a flow-through private placement by issuing 11,830,611 common shares at a price of \$0.17 per share for gross flow-through proceeds of \$2,011,204. The flow-through shares were issued at a premium of \$236,612 over market value.

As at September 30, 2024, the Company had completed its commitments of \$1,580,706 for the September 2023 flow-through private placement and \$1,750,000 for the May 2024 flow-through private placement.

As at September 30, 2024, the Company had incurred \$75,093 of its commitment for the June 2024 flow-through private placement. To fulfill the remaining commitment, \$1,936,111 in exploration expenditures must be incurred by December 31, 2025.

If the Company does not spend its remaining flow-through funds in compliance with the Government of Canada flow-through regulations, it may be subject to indemnification or other claims by the flow-through subscribers.

#### **11. SHARE CAPITAL AND RESERVES**

##### **(a) Common Shares**

The Company is authorized to issue an unlimited number of common shares without par value.

During the period ended September 30, 2024 the following share capital activity occurred:

- i) The Company closed a flow-through private placement financing of 8,333,333 units at \$0.21 per unit for gross proceeds of \$1,750,000. Each unit consists of one common share and one share purchase warrant. Each warrant entitles the holder to purchase one additional common share exercisable for one year at a price of \$0.20. The gross proceeds for the flow-through shares were bifurcated with \$1,250,000 being allocated to share capital and \$500,000 being charged as other liability (Note 10).
- ii) The Company closed a flow-through private placement financing of 11,830,611 units at \$0.17 per unit for gross proceeds of \$2,011,204. Each unit consists of one common share and one share purchase warrant. Each warrant entitles the holder to purchase one additional common share exercisable for one year at a price of \$0.20. The gross proceeds for the flow-through shares were bifurcated with \$1,774,592 being allocated to share capital and \$236,612 being charged as other liability (Note 10).
- iii) The Company closed a private placement financing of 5,966,534 units at \$0.15 per unit for gross proceeds of \$894,980. Each unit consists of one common share and one share purchase warrant. Each warrant entitles the holder to purchase one additional common share exercisable for one year at a price of \$0.20. Share issuance costs associated with this financing totalled \$5,294.

In connection with these financings, the Company paid cash finders' fees totalling \$89,613, issued 545,247 share purchase warrants with the same terms as the private placement warrants, and incurred other cash costs totalling \$65,737. The fair value of the finders' fee warrants was \$37,731 and was recorded as share issuance costs and an offset to other equity reserve. The fair value of each finders' fee warrant has been estimated as of the date of the issuance using the Black-Scholes pricing model with the following assumptions: risk-free interest rate of 4.3%, dividend yield of 0%, volatility of 128% and expected life of one year.

#### 11. SHARE CAPITAL AND RESERVES (cont'd)

##### (a) Common Shares (cont'd)

During the period ended September 30, 2023, the following share capital activity occurred:

- i) The Company closed a brokered private placement financing consisting of 5,769,000 flow-through units at \$0.275 per unit for gross proceeds of \$1,586,475 and 4,800,000 non-flow-through units at \$0.25 per unit for gross proceeds of \$1,200,000. Each flow-through and non-flow-through unit consisted of one common share and one share purchase warrant entitling the holder to purchase an additional common share exercisable for two years at a price of \$0.40.

The gross proceeds for the flow-through shares were bifurcated with \$1,384,560 being allocated to share capital, \$144,225 to other liability, and \$57,690 to warrants using the residual value method.

The gross proceeds for the non-flow-through shares were bifurcated with \$1,152,000 being allocated to share capital and \$48,000 to warrants using the residual value method.

In connection with these financings, the Company paid an agents' fee of \$122,629 in cash and issued 456,140 compensation options. The fair value of the compensation options was \$94,421 and was recorded as a share issuance cost and an offset to other equity reserve. The fair value of each compensation option has been estimated as of the date of the issuance using Black-Scholes and Geske pricing models with the following assumptions: risk-free interest rate of 4.78%, dividend yield of 0%, volatility of 108% and expected life of two years. Other share issuance costs associated with these financings totalled \$242,992.

- ii) The Company issued 1,705,357 common shares with a fair value of \$382,000 pursuant to an exercised option to acquire the Astro East Project. Share issuance costs associated with this transaction totalled \$240.
- iii) A total of 5,000 share purchase options with an exercise price of \$0.10 per share were exercised for proceeds of \$500.

#### 12. SHARE-BASED PAYMENTS

##### Option Plan Details

The Company has in place a stock option plan (the "Plan") that allows the Board of Directors to grant incentive stock options to the Company's officers, directors, employees, and consultants. The exercise price of stock options granted is determined by the Board of Directors at the time of the grant in accordance with the terms of the Plan and the policies of the TSX-V. Options vest on the date of granting unless stated otherwise. Options granted to investor relations consultants vest in accordance with TSX-V regulation. The options are for a maximum term of ten years.

#### **12. SHARE-BASED PAYMENTS** *(cont'd)*

##### **Fair Value of Options Issued During the Period**

The weighted average fair value at grant date of options granted during the period ended September 30, 2024 was \$0.10 per option. The weighted average fair value at grant date of options granted during the period ended September 30, 2023 was \$0.32 per option.

The weighted average remaining contractual life of the options outstanding at September 30, 2024 is 7.26 years (December 31, 2023: 7.89 years).

##### *Options Issued to Employees*

The fair value at grant date is determined using a Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the share price at grant date, the expected price volatility of the underlying share, the expected dividend yield and the risk-free interest rate for the term of the option.

##### *Options Issued to Non-Employees*

Options issued to non-employees are measured based on the fair value of the goods or services received at the date of receiving those goods or services. If the fair value of the goods or services received cannot be estimated reliably, the options are measured by determining the fair value of the options granted using the Black-Scholes option pricing model.

The model inputs for options granted during the period ended September 30, 2024 included a risk-free interest rate of 3.34%, dividend yield of 0%, volatility of 100% and expected life of ten years.

The expected volatility is based on the historical volatility (based on the remaining life of the options), adjusted for any expected changes to future volatility due to publicly available information. The risk-free rate of return is the yield on a zero-coupon Canadian Treasury Bill of a term consistent with the assumed option life. The expected average option term is the average expected period to exercise, based on the historical activity patterns for each individually vesting tranche.

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in these assumptions can materially affect the fair value estimate.

##### **Expenses Arising from Share-based Payments Transactions**

Total expenses arising from the share-based payment transactions related to the granting of stock options and recognized as part of share-based payments expense during the period ended September 30, 2024 was \$13,691 (2023: \$806,319).

As of September 30, 2024, there were no unrecognized costs related to share-based payment awards not yet exercisable.

#### 14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company is exposed to the following financial risks:

- Market Risk
- Credit Risk
- Liquidity Risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these condensed interim financial statements.

##### General Objectives, Policies and Processes

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to the Company's management. The Board of Directors receives periodic reports through which it reviews the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets.

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below.

#### **14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd)**

##### **(a) Market Risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market prices affecting the Company are comprised of the following types of risk: interest rate risk and equity price risk. The Company is not exposed to the risk related to the fluctuation of foreign currency rates.

##### *Interest Rate Risk*

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company does not have any borrowings. Interest rate risk is limited to potential decreases on the interest rate offered on cash held with chartered Canadian financial institutions. The Company considers this risk to not be significant.

##### *Equity Price Risk*

Equity price risk is the uncertainty associated with the valuation of assets arising from changes in equity markets. The Company's equity investments are exposed to equity price risk due to the potentially volatile and speculative nature of the businesses in which the equity investments are held. The common shares held in Bronco and Voyager are monitored by management with decisions on sale taken at Board level. A 10% change in fair value of the shares would result in a \$131 increase or decrease in comprehensive loss.

##### **(b) Credit Risk**

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and equity investments. The Company limits exposure to credit risk by maintaining its cash with chartered Canadian financial institutions. The Company does not have cash or equity investments that are invested in asset-based commercial paper.

##### **(c) Liquidity Risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due. The Company manages its liquidity risk by forecasting cash flows required by operations and anticipated investing and financing activities. At September 30, 2024, the Company had working capital of \$2,178,553 (December 31, 2023: \$1,136,087). All of the Company's financial liabilities, with the exception of flow-through liabilities (Note 10) and lease liability (Note 9), have contractual maturities of less than 45 days and are subject to normal trade terms.

##### **Determination of Fair value**

Fair values have been determined for measurement and/or disclosure purposes based on the following methods. All financial instruments at September 30, 2024 are carried at amortized cost, apart from the equity investment in a public company with shares in an active market of \$1,313 (December 31, 2023: \$1,500), which is carried at fair value. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The statement of financial position carrying amounts for cash, accounts payables and accrued liabilities, and due to related parties approximates fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

#### **14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd)**

##### **Determination of Fair value (cont'd)**

The statement of financial position carrying amounts for cash, accounts payables and accrued liabilities, and due to related parties approximates fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

##### **Fair Value Hierarchy**

Financial instruments that are measured subsequent to initial recognition at fair value are grouped in Levels 1 to 3 based on the degree to which the fair value is observable:

Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2	Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
Level 3	Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The equity investment in Bronco is based on a quoted price and is therefore considered to be Level 1.

The equity investment in Voyager was recorded at fair value when it was received and assessed for impairment as at September 30, 2024 and December 31, 2023. This investment is considered to be Level 3.

#### **15. CAPITAL MANAGEMENT**

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to advance its mineral properties. The Company defines its capital as all components of equity. In order to facilitate the management of its capital requirements, the Company prepares periodic budgets that are updated as necessary. The Company manages its capital structure and makes adjustments to it to effectively support the acquisition and exploration of mineral properties. The properties in which the Company currently has an interest are in the exploration stage; as such, the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for general administrative costs, the Company will spend its existing capital resources and aim to raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an on-going basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the period ended September 30, 2024. The Company's investment policy is to hold cash in interest-bearing bank accounts and/or highly liquid short-term interest-bearing investments with maturities of one year or less and which can be liquidated at any time without penalties. The Company currently is not subject to any externally imposed capital requirements. The Company expects its current capital resources as of September 30, 2024 to be sufficient to cover its existing flow-through expenditure commitment but not its corporate operating costs through the next twelve months. As such, the Company raised additional capital subsequent to the period end by way of an equity financing (Note 17). Actual funding requirements may vary from those planned due to a number of factors, including the level of exploration activity and possible property acquisition opportunities.
