1. Nature of Operations

Antler Gold Inc. (“Antler” or the “Company”), formerly Northwest Arm Capital Inc., was incorporated under the Canada Business Corporations Act on March 23, 2016. The Company is classified as a Tier 2 Company as defined in the TSX Venture Exchange (the “Exchange”) Policies. The principal business of the Company is the exploration and development of mineral properties.

The Company’s corporate and registered office is located at 1969 Upper Water Street, Suite 2001, Halifax, Nova Scotia B3J 3R7.

The Company's common shares were listed for trading on the Exchange as a Capital Pool Company at the close of business on September 9, 2016 and on September 12, 2016, the Company completed its Initial Public Offering (“IPO”) of 4,500,000 common shares at \$0.067 per common share, qualified by the Company's prospectus dated August 19, 2016.

On November 8, 2016, the Company closed its qualifying transaction (“QT”) with the acquisition of an option to acquire a 100% interest in a gold exploration property in central Newfoundland known as the Wilding Lake project (the “Project”) from Altius Minerals Inc. (“Altius”). Under the terms of the QT Option Agreement, the Company issued 6,750,000 common shares of the Company to Altius and could exercise the option (the “QT Option”) provided the Company incurs \$500,000 in exploration expenses on the Project within one year of signing. The QT Option was exercised on May 25, 2017 and Altius and the Company finalized a 2% net smelter royalty (“NSR”) in favour of Altius over all mineral production from the Project. Concurrent with the closing of its QT, the Company completed a private placement financing, issuing 9,900,000 shares at a price of \$0.167 per share for gross proceeds of \$1,650,000.

On March 30, 2017, the Company entered into a Second Option Agreement with Altius for the acquisition of an option to acquire a 100% interest in 1,678 additional mineral claims representing six separate projects in central Newfoundland (the “Second Option”). To exercise the Second Option, the Company will have to issue 1,470,000 common shares to Altius, which was completed during the period ended September 30, 2017, and must incur exploration expenditures of at least \$300,000 on these claims within 12 months. Altius will retain a 2% NSR in the event the Second Option is exercised by the Company.

The Company is in the process of exploring its resource properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. To date, the Company has not earned significant revenues and is considered to be a development stage enterprise.

2. Significant Accounting Policies

Statement of compliance

The Company prepares its unaudited condensed interim financial statements in accordance with Canadian generally accepted accounting principles as set out in the Handbook of Chartered Professional Accountants of Canada – Part 1 (“CPA Canada Handbook”), which incorporates International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

These unaudited condensed interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting (“IAS 34”), as issued by the IASB. Accordingly, certain information normally included in annual financial statements prepared in accordance

(Expressed in Canadian dollars unless otherwise indicated)

with IFRS, as issued by the IASB, have been omitted or condensed. The unaudited condensed interim financial statements should be read in conjunction with the Company's annual audited financial statements for the period-ended December 31, 2016.

The policies applied in these unaudited condensed interim financial statements are based on the IFRS as of November 28, 2017, the date the Board of Directors approved the financial statements. Any subsequent changes to IFRS that are given effect in the Company's annual financial statements for the year-ended December 31, 2017 could result in the restatement of these unaudited condensed interim financial statements.

Basis of presentation

The condensed interim financial statements have been prepared on a historical cost basis except for any financial assets and liabilities classified as available for sale. The Company's functional currency is the Canadian dollar and these unaudited condensed interim financial statements are presented in Canadian dollars.

Significant accounting policies

These financial statements have been prepared using the same policies and methods of computation as the annual financial statements of the Company for the period-ended December 31, 2016. Refer to note 2, *Significant Accounting Policies*, of the Company's annual financial statements for the period-ended December 31, 2016 for information on the accounting policies as well as new accounting standards not yet effective.

a) Flow-through shares

The Company has financed a portion of its exploration activities through the issuance of flow-through shares. As permitted under the Income Tax Act (Canada), the tax attributes of eligible expenditures incurred with the proceeds of flow-through share issuances are renounced to the flow-through shareholders. At the time of share issuance, the proceeds are allocated between share capital and the obligation to deliver the tax deduction. The allocation is based on the estimated fair value of the tax deduction to the flow-through shareholders. The fair value is estimated using market data at the date of the flow-through share issuance.

In accordance with IFRS, deferred income taxes related to the temporary differences created by the renouncement of flow-through share tax benefits to subscribers are recorded on a pro-rata basis when the qualified expenditures are incurred. When the qualified expenditures are incurred, the tax value of the renunciation is recorded on a pro-rata basis as a deferred income tax liability with a corresponding charge to income tax expense in the statements of loss and comprehensive loss. Additionally, as qualified expenditures are incurred, the Company recognizes a pro-rata reduction of the flow-through premium liability as a recovery of deferred income taxes in the statements of loss and comprehensive loss.

b) Capital assets

Capital assets are recorded at cost less accumulated amortization. Amortization is calculated using the declining-balance method at the annual rate of 30% for exploration equipment and vehicles.

3. Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to continue as a going concern. The Company considers capital to be shareholders' equity. The Board of Directors does not establish quantitative return on capital criteria for management but rather relies on the expertise of the Company's management to sustain future development of the business.

As part of Haywood's IPO compensation, it was granted a right of first refusal to act as financial advisor, lead agent or lead underwriter with respect to a minimum 60% syndicate participation in any future financings by the Company until the earlier of the completion of the Company's QT and 24 months from the date of closing of the IPO (the "ROFR"). Subsequently, Haywood agreed to waive its ROFR with respect to the Financing. Antler Gold Inc.

Notes to Unaudited Condensed Interim Financial Statements For the periods ended September 30, 2017 and September 30, 2016 (Expressed in Canadian dollars unless otherwise indicated)

On March 7, 2017, the Company received proceeds of \$15,000 from the exercise of 225,000 warrants. The share price on the date the warrants were exercised was \$0.467.

On June 23, 2017, the Company issued 1,470,000 common shares, valued at \$441,000, to Altius pursuant to the closing of the Second Option (see note 5).

On July 5, 2017, the received proceeds of \$2,966 from the exercise of 44,494 warrants. The share price on the date the warrants were exercised was \$0.30.

On July 14, 2017, the Company completed a one and a half (1.5) for one share split of its common shares. All references to the number of common shares, stock options and warrants have been adjusted retrospectively to reflect the Company's share split for the periods ended September 30, 2017 and 2016 and December 31, 2016.

i) Stock options

The Company has a stock option plan (the "Plan") for directors, officers, employees and consultants. The Board of Directors have the authority to issue up to 10% of the issued and outstanding common shares of the Company. The options can have up to a ten-year life and the vesting period is set by the Board. Options are granted at a price no lower than the market price of the common shares.

On March 5, 2017, the Company granted 1,125,000 stock options to directors, officers, employees and consultants. The options are exercisable at a price of \$0.533 per share and expire on March 5, 2022. The options will vest at a rate of 50% of the total on each of the six and 12 month anniversaries of the grant date.

On June 23, 2017, the Company granted 262,500 stock options to employees and a director. The options are exercisable at a price of \$0.50 per share and expire on June 23, 2022. The options will vest at a rate of 50% of the total on each of the six and 12 month anniversaries of the grant date.

The estimated fair value of options recognized has been estimated at the grant date using the Black-Scholes option pricing model. Option pricing models require the input of highly subjective assumptions, including the expected volatility. Changes in the assumptions can materially affect the fair value estimate and, therefore, the existing models do not necessarily provide a reliable estimate of the fair value of the Company's stock options. Weighted-average assumptions used in the pricing model for the options issued during the nine-month period ended September 30, 2017 were as follows:

Risk-free interest rate	1%
Expected volatility	105%
Expected dividend yield	-
Expected life	5 years
Weighted average fair value per option	\$0.339

Based on the Black-Scholes option pricing model and the assumptions outlined above, the estimated fair value of the 1,125,000 options granted on March 5, 2017 is \$406,666, and the estimated fair value of the 262,500 options granted on June 23, 2017 is \$62,825.
