TNR GOLD CORP.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited - Expressed in Canadian Dollars)

FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021

1. NATURE AND CONTINUANCE OF OPERATIONS

TNR Gold Corp. (the “Company”) was incorporated on January 14, 1988 under the laws of the Province of British Columbia. The Company’s head office address is Suite 1120 – 789 Pender Street, Vancouver, British Columbia, Canada, V6C 1H2. The registered and records office address is Suite 400 – 725 Granville Street, Vancouver B.C. V7Y 1G5. The Company is listed on the TSX Venture Exchange and trades under the stock symbol “TNR”.

The Company is in the business of acquiring and owning royalties which will pay out in future but only if the related properties go into production. These royalties are currently receivable from companies with copper, gold, silver and lithium operations in Argentina. The Company is also in the business of acquiring and exploring its mineral properties located in the United States.

These condensed interim consolidated financial statements of the Company have been prepared using accounting policies applicable to a going concern, which contemplate the realization of assets and settlement of liabilities in the normal course of business as they fall due for the foreseeable future. The Company has not generated revenue from operations and has a working capital deficit of \$193,282 (December 31, 2021: \$291,110) and an accumulated deficit of \$50,006,965 at September 30, 2022 (December 31, 2021: \$49,774,851). These circumstances indicate the existence of a material uncertainty which may cast significant doubt as to the ability of the Company to meet its obligations as they fall due and, accordingly, the ultimate appropriateness of the use of accounting principles applicable to a going concern.

The Company will continue to pursue opportunities to raise additional capital through equity markets and/or debt to fund its exploration and operating activities; however, there is no assurance of the success or sufficiency of these initiatives. The Company’s ability to continue as a going concern is dependent upon it securing the necessary working capital and exploration requirements and eventually to generate positive cash flows either from operations or additional financing. These condensed interim consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary if the going concern assumption were inappropriate, and these adjustments could be material.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company’s business or ability to raise funds. Management continues to monitor the situation.

2. BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards (“IFRS”) and International Accounting Standards (“IAS”) 34 “Interim Financial Reporting” as issued by the International Accounting Standards Board (“IASB”).

This condensed interim financial report does not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual audited consolidated financial statements of the Company for the year ended December 31, 2021. The accounting policies applied in preparation of these condensed interim consolidated financial statements are consistent with those applied and disclosed in the Company’s audited consolidated financial statements for the year ended December 31, 2021.

TNR GOLD CORP.**NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

(Unaudited - Expressed in Canadian Dollars)

FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021**2. BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (cont'd)****Basis of Presentation**

The condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments classified as financial instruments at fair value through profit or loss, which are stated at fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The condensed interim consolidated financial statements of the Company are presented in Canadian dollars, which is the functional currency of the parent company and its subsidiaries.

Principles of consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its subsidiaries. All inter-company transactions and accounts have been eliminated upon consolidation. The Company's subsidiaries are as follows:

	Country of Incorporation	Principal Activity	Effective Interest
0828073 BC Ltd.	Canada	Holding company	90%
Ameri Gold Corp.	Canada	Holding company	100%
Bristol Exploration Co. Inc. ("Bristol")	USA	Holding company	90%
Compania Minera Solitario de Argentina S.A. ("Solitario")	Argentina	Mining company	100%
TNR Gold Investment Corp.	British Virgin Islands	Holding company	100%
TNR Gold Holdings Corp.	British Virgin Islands	Holding company	100%

Significant accounting judgments and estimates

The preparation of these condensed interim consolidated financial statements requires management to make judgments and estimates and form assumptions that affect the reported amounts of assets and liabilities at the date of the condensed interim consolidated financial statements and reported amounts of expenses during the reporting period. On an ongoing basis, management evaluates its judgments and estimates in relation to assets, liabilities and expenses. Management uses historical experience and various other factors it believes to be reasonable under the given circumstances as the basis for its judgments and estimates. Actual outcomes may differ from these estimates.

The most significant estimates relate to the calculation of share-based payments, valuation of marketable securities, valuation of deferred income tax amounts, and applicable discount rates used. Share-based payments, as measured with respect to stock options granted, are estimated by reference to the Black-Scholes option pricing model; a detailed discussion of management's estimates with respect to the pricing model is found in Note 6. The value of marketable securities is based on the closing share price on the date of the condensed interim consolidated statement of financial position and may be influenced by trading volume activities. The value of deferred tax assets is evaluated based on the probability of realization; the Company has assessed that it is improbable that such assets will be realized and has accordingly not recognized a value for deferred tax assets. Management also uses estimates to determine an appropriate discount rate used to calculate the present value of future cash flows associated with long-term liabilities and lease liabilities.

The most significant judgments relate to the determination of functional currency of the Company and its subsidiaries, the determination of whether an amendment to the terms of an existing loan is a substantial modification, and the use of the going concern assumption.

TNR GOLD CORP.**NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

(Unaudited - Expressed in Canadian Dollars)

FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021**3. MARKETABLE SECURITIES**

	Number of Common Shares Held		Fair Value	
	September 30, 2022	December 31, 2021	September 30, 2022	December 31, 2021
Major Precious Metals Corp. (formerly Eastern Zinc Corp.)	39,000	39,000	\$ 1,170	\$ 5,343
International Lithium Corp. ("ILC")	5,290	5,290	370	635
Total			\$ 1,540	\$ 5,978

The adjustment to fair value resulted in an unrealized loss of \$1,612 and \$4,437 for the three and nine months ended September 30, 2022, respectively (2021 – loss of \$310 and gain of \$1,524, respectively).

4. EXPLORATION AND EVALUATION ASSETS**Title to Mineral Property Interests**

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral claims. The Company relies on the confirmation of its ownership for mining claims from the appropriate government agencies when paying rental payments for such mining claims requested by these agencies. There could be a risk in the future of the changing internal policies of such government agencies or risk related to third parties challenging in the future the ownership of such mining claims. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its interests are in good standing. However, this should not be construed as a guarantee of title. The concessions may be subject to prior claims, agreements or transfers and rights of ownership may be affected by undetected defects.

Shotgun Gold Project (Alaska)

The Company, through its 90% controlled subsidiary Bristol Exploration Co. Inc., owns 100% of certain unpatented mineral claims located in the Kuskokwim and Bristol Bay district, Alaska. NovaGold Resources Alaska Inc. retains a 2% net smelter returns royalty ("NSR Royalty") which can be purchased by the Company for US\$5,000,000 any time prior to a production decision being made. A portion of the claims is subject to a 5% net proceeds royalty.

Los Azules Copper Project (Argentina)

The Company has an NSR Royalty on the Los Azules Copper Project of 0.4% and holds 0.04% on behalf of a shareholder. The porphyry copper project is owned and operated by McEwen Mining Inc.

Mariana Lithium Project (Argentina)

TNR retains a 1.8% NSR Royalty on the Mariana Lithium Project in Argentina and holds a 0.2% NSR on behalf of a shareholder. The project is currently being advanced by Ganfeng Lithium International Co. Ltd. ("Ganfeng"). Ganfeng's subsidiary, Litio Minera Argentina, has a right to repurchase 1.0% of the NSR Royalty on the Mariana Project, of which 0.9% relates to the Company's NSR Royalty interest. The Company would receive \$900,000 on the completion of the repurchase.

FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021

4. EXPLORATION AND EVALUATION ASSETS (cont'd)

Mariana Lithium Project (Argentina) (cont'd)

On July 22, 2022, the Company entered into a royalty purchase agreement with an arms' length party Lithium Royalty Corp ("LRC") for the sale of a portion of its net smelter returns royalty ("NSR") involving the Mariana Lithium Project ("Mariana"). LRC has agreed to purchase from TNR, 0.5% NSR royalty for USD\$9,000,000, including 0.05% NSR royalty being sold by TNR on behalf of its shareholder. This represents one-quarter of the NSR royalty held by the Company. The Company received an initial advance of USD\$350,000 from LRC under the terms of the royalty purchase agreement. As a result of this transaction, the Company recognized a gain on disposition of NSR interest of \$449,820 during the nine months ended September 30, 2022. After the closing of transaction with LRC, TNR will hold a 1.5% NSR royalty, including a 0.15% NSR royalty held on behalf of a shareholder.

Batidero I and II Properties, Josemaria Copper Project (Argentina)

TNR holds a 7% net profits royalty ("NPR") holding on the Batidero I and II properties of the Josemaria Project, which is being developed by Lundin Mining Inc.

5. LOAN PAYABLE

During the year ended December 31, 2012, the Company entered into a loan agreement with an unrelated party for a principal amount of \$3,500,000. The loan agreement was amended during the year ended December 31, 2015. Pursuant to the amended terms, the maturity date of the loan was deferred from May 31, 2015 to January 31, 2019 and the Company granted the following financing benefits to the lender:

- a) A 0.04% NSR Royalty on the Los Azules copper project in Argentina (Note 4).
- b) A 0.2% NSR Royalty on the Mariana property in Argentina (Note 4).
- c) 10% equity interest in the shares of Bristol Exploration Co., Inc. that holds the Shotgun property (Note 4).

During the year ended December 31, 2019, the Company entered into an amending agreement with the lender (the "2019 Amendment"). The terms of the 2019 Amendment deferred the maturity date to January 31, 2022. No other terms were revised.

The Company has entered into an amending agreement effective January 31, 2022, with the lender (the "2022 Amendment"). The terms of the 2022 Amendment defer the maturity date to July 31, 2023 and deem the outstanding principal and interest balance to be the new principal balance. No other terms were revised.

The loan accrues interest at a rate of 10% per annum.

The loan and accrued interest are secured by a promissory note and general security agreement. The Company is permitted to, without the Lender's consent, sell assets having a value up to \$500,000 per calendar year, to enable the Company to maintain its operations and keep its mineral exploration assets in good standing. Any sale of assets having a value in excess of \$500,000 of combined value within one calendar year requires the Lender's consent. Any sale, in whole or in part, of the Company's NSR Royalty on the Los Azules Project, NSR Royalty on the Mariana Property and/or the Shotgun Property requires the Lender's consent.

For accounting purposes, the restructuring was treated as a loan extinguishment and re-issuance as there were deemed to be substantial modifications to the existing terms under the 2022 Amendment. The financing benefit, resulting from the recognition of a discount on the inception of the new loan, has been valued at \$893,413 and recorded through the consolidated statement of comprehensive loss as a gain on extinguishment of debt during the nine months ended September 30, 2022. In order to calculate the present value of the loan as at the modification date, the Company applied a discount rate of 20% which was similar to comparable borrowing arrangements in the marketplace and arrangements previously achieved by the Company.

Accounts payable and accrued liabilities include amounts due to directors, officers and former directors and officers and a company related by common directors and officer of the Company at September 30, 2022 of \$87,912 (December 31, 2021 - \$138,179). With the exception of the short-term promissory note described below, all amounts are non-interest bearing and have no formal terms of repayment.

Included in accounts payable and accrued liabilities as at September 30, 2022 and December 31, 2021 is a short-term promissory note payable to a director of the Company's subsidiary. The promissory note has a principal balance of US\$25,000 which accrues interest at a rate of 12% per annum. The promissory note was granted with respect to the termination of a formal compensation arrangement with the Director. At September 30, 2022, the carrying amount of the principal and accrued interest is \$76,290 (US\$ 55,658) (December 31, 2021: \$67,718 or US\$ 53,414).

Commitments - Bonus

In the event the Company completes the sale of its subsidiary, Compania Minera Solitario de Argentina S.A. ("Solitario"), or its NSR Royalty on the Los Azules Project, a bonus of up to US\$200,000 is payable to a Director of Solitario. The bonus is calculated as 0.5% of net proceeds received by the Company in the aforementioned transaction.

Commitments - Consulting agreements

The Company has entered into consulting agreements with an officer of the Company for the provision of consulting services at a current cost of \$180,000 per annum. The agreement renews annually at the discretion of the Company's compensation committee. If the agreement is terminated without cause, the Company is required to pay a lump sum equal to the greater of (a) the equivalent of one month of fees for each year the consultant has acted on behalf of the Company and (b) the equivalent of 12 months of fees. Should the Company be subject to a change in control and the consultant terminated without cause, the Company must pay an amount equal to three times the prior 12 months of gross pay.

8. CAPITAL MANAGEMENT

The Company's capital structure consists of shareholders' deficiency. The Company's objective when managing capital is to maintain adequate levels of funding to support the development of its businesses and maintain the necessary corporate and administrative functions to facilitate these activities. This is done primarily through equity financing, selling assets, and incurring debt. Future financings are dependent on market conditions and there can be no assurance the Company will be able to raise funds in the future. There were no changes to the Company's approach to capital management during the year. The Company is not subject to externally imposed capital requirements other than as disclosed in Note 5. The Company does not have adequate sources of capital to complete its exploration plan, current obligations and ultimately the development of its business over the long term and will need to raise adequate capital by obtaining equity financing, selling assets and/or incurring debt. The Company may raise additional debt or equity financing in the near future to meet its current obligations.

9. RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

Financial instruments

Financial assets and liabilities are classified in the fair value hierarchy according to the lowest level of input that is significant to the fair value measurement. Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect placement within the fair value hierarchy levels. The hierarchy is as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quotes prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The carrying value of cash, and accounts payable approximates fair value due to the short-term nature of the financial instruments. Cash and marketable securities are classified as FVTPL and measured at fair value using level 1 inputs.

Fair value of long-term debt is estimated using discounted cash flow analysis based on the borrowing rate for similar borrowing arrangements.

Risk management

The Company is exposed to various financial instrument risks and assesses the impact and likelihood of this exposure. These risks include, credit risk, currency risk, interest rate risk and liquidity risk. Where material, these risks are reviewed and monitored by the Board of Directors.

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets consisting of cash. The Company limits its exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions.

9. RISK MANAGEMENT AND FINANCIAL INSTRUMENTS (cont'd)**Risk management (cont'd)***Currency risk*

The Company's operations are in Argentina, Canada and the United States. The international nature of the Company's operations results in foreign exchange risk as transactions are denominated in foreign currency.

The Company's operating expenses are incurred primarily in Canadian dollars, and its liabilities are denominated primarily in Canadian dollars, or US dollars. Consequently, the Company's exploration programs in the US are subject to currency fluctuations. The fluctuation of the Canadian dollar will, consequently, have an impact upon the reported profitability of the Company and may also affect the value of the Company's assets and liabilities.

The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks at this time.

Interest rate risk

The Company's exposure to interest rate risk arises from the interest rate impact on cash. The Company's practice has been to invest cash at floating rates of interest, in order to maintain liquidity, while achieving a satisfactory return for shareholders. There is minimal risk.

The Company has debt instruments and is therefore exposed to risk in the event of interest rate fluctuations. The Company has not entered into any interest rate swaps or other financial arrangements that mitigate the exposure to interest rate fluctuations.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities. The Company has historically relied upon equity financings, short-term debt and the optioning of its mineral properties to other mining entities to satisfy its capital requirements and will continue to depend heavily upon these financing activities. All of the Company's accounts payable and accrued liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms. The loan matures July 31, 2023. The Company is exposed to risk that it will encounter difficulty in satisfying liabilities on maturity. The loan is secured by a promissory note and general security agreement.

There can be no assurance the Company will be able to obtain required financing in the future on acceptable terms. The Company will need additional capital in the future to finance ongoing exploration of its properties, such capital to be derived from the exercise of outstanding stock options, the completion of other equity financings and or optioning its mineral property to other mining entities. The Company has limited financial resources, has no source of operating income and has no assurance that additional funding will be available to it for future exploration and development of its projects, although the Company has been successful in the past in financing its activities through the previously mentioned financing activities. The ability of the Company to arrange additional financing in the future will depend, in part, on the prevailing capital market conditions, its success in bringing royalty agreements to fruition, and exploration success. In recent years, the securities markets have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur. Any quoted market for the common shares may be subject to market trends generally, notwithstanding any potential success of the Company in creating revenue, cash flows or earnings. See Note 1.

FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021

9. RISK MANAGEMENT AND FINANCIAL INSTRUMENTS (cont'd)**Risk management (cont'd)**

The Company may benefit from royalty arrangements once certain major copper and lithium projects come to production. These projects have not yet reached development. There is a risk that planned projects could be delayed or not yield as much as expected, and if so this will affect the Company's anticipated cash flows, requiring the shortfall to be financed. In addition, the Company has the ability to sell assets of up to \$500,000 without consultation with its lender of the loan payable.

Price Risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors the commodity prices of precious metals, individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

The Company's marketable securities amounting to \$1,540 are subject to fair value fluctuations. As at September 30, 2022, if the fair value of the Company's marketable securities had decreased/increased by 10% with all other variables held constant, loss and comprehensive loss for the period would have been approximately \$154 higher/lower.

10. SUBSEQUENT EVENTS

On November 16, 2022, 7,200,000 warrants with an exercise price of \$0.05 expired unexercised.

On November 16, 2022, the Company received a second advance of USD\$350,000 from LRC under the terms of the royalty purchase agreement involving Mariana Lithium Project. In November 2022, the Company and LRC agreed to extend the closing of the royalty purchase agreement to February 1, 2023.
