Oversight and Description of Director and NEO Compensation

The Company does not have a formal compensation program. The Board relies on the experience of its members as officers or directors of other junior exploration companies to ensure that total compensation paid to the Company's NEOs and directors is fair and reasonable. The Board meets periodically to discuss and determine such compensation, without reference to formal objectives, criteria or analysis.

The general philosophy of the Company's compensation strategy is to: (a) encourage management to achieve a high level of performance and results with a view to increasing long-term shareholder value; (b) align management's interests with the long-term interest of shareholders; (c) provide a compensation package that is commensurate with other mineral exploration companies in order to attract and retain highly qualified executives and directors; and (d) ensure that total compensation paid takes into account the Company's overall financial position.

Compensation of the Company's NEOs is comprised primarily of cash salaries and/or incentive stock options. The compensation to the Company's NEOs for the fiscal year ended December 31, 2021 consisted of cash salaries and stock options. Stock options were previously granted to NEOs and/or directors during the 2016 and 2019 fiscal years, and most recently, stock options were granted to NEOs and directors on March 2, 2021. The Company may in the future grant additional stock options to its NEOs and directors.

In establishing levels of cash or share compensation and the granting of stock options, the individual's performance, level of expertise, and responsibilities are considered. Stock options are generally granted at the time of the individual's appointment and periodically thereafter. Previous grants of options are taken into account by the Board when it considers the granting of new stock options.

Incentive stock options are granted pursuant to the Option Plan which is designed to encourage share ownership on the part of the Company's management, directors, employees, and consultants. The Board believes that the stock option plan aligns the interests of the Company's personnel with shareholders by linking compensation to the longer term performance of the Company's shares. The granting of incentive stock options is an important component of executive compensation as it allows the Company to reward an individual's efforts to increase shareholder value without requiring the use of the Company's cash reserves.
