

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

#### **GENERAL INFORMATION**

Management's Discussion and Analysis ("MD&A") of the financial position and of the results of operations is the responsibility of management and has been reviewed and approved by the Board of Directors of Manganese X Energy Corp. ("Manganese", "MN" or the "Company") on November 25, 2022.

Manganese X Energy Corp. was incorporated as a private company by Certificate of Incorporation issued pursuant to the provisions of the British Columbia Business Corporation Act on December 4, 2007. On December 3, 2010, the Company changed its name from Numine to Sunset Cove Mining Inc. On December 1, 2016, the Company changed its name from Sunset Cove Mining Inc. to Manganese X Energy Corp. The principal activities of Manganese and its subsidiaries are to acquire and advance high potential mining prospects located in North America with the intent of supplying value-added materials to the lithium ion battery and other alternative energy industries.

**The Company's principal project is its Battery Hill manganese project described more fully below. Having advanced this project by a significant recent drilling program, the Company commissioned Wood Canada Limited to provide a Preliminary Economic Assessment ("PEA"). The PEA has been recently completed with very positive results and was filed on the Company's SEDAR profile on June 27, 2022, with an effective date of May 12, 2022, as a technical report in compliance with National Instrument 43-101 (Standards of Disclosure for Mineral Projects). The prospect of becoming a viable resource for the "domestic" North American production of manganese suitable for the rapidly expanding battery market is an extremely exciting one. Opportunities for the Company appear to have been further enhanced by recent announcements of multi-billion dollar battery manufacturing facilities to be constructed in Canada. The future looks bright.**

On April 30, 2020, Manganese X Energy Corp. acquired a U.S. HVAC (heating, ventilation and air conditioning), patent for an air purification and disinfection process through its 100% owned subsidiary Disruptive Battery Corp. (DBC). On November 16, 2020, DBC executed a Definitive Agreement acquiring a 50-per-cent Joint Venture (JV) equity stake in PureBiotics, an air quality control company. Together they formed a Joint Venture, PureBiotic Air Corp., for the purpose of providing a safe and effective air purification process by controlling air and surface contamination, thereby resulting in healthier homes and buildings. This air purification process incorporates the company's U.S. patented HVAC distribution system, designed to circulate Air Disinfection Agents (ADAs) through a building's HVAC system, as well as PureBiotics Air Mist Solutions, proven, safe and effective proprietary biological solutions for the purification of air and surfaces. In 2021, DBC and PureBiotic Air Corp. progressively worked with Virginia State University (VSU) researchers on the deconstruction of biofilm, calculated by the Centers for Disease Control (CDC) to be a factor in 80 per cent of all infections, including SARS-CoV-2, the cause of the COVID-19 pandemic. Advances were also being made in 2022 in the certification and regulatory registrations of its products despite the delays caused by COVID-19 interruptions and restrictions.

The Company's shares are listed under the symbol MN on the TSX Venture Exchange (the "Exchange"). The registered office of the Company is located at 145 Graveline, Saint-Laurent, Quebec, Canada and it maintains a place of business at 120 Carlton St. Suite 219 in Toronto, Ontario, Canada.

The following discussion and analysis should be read in conjunction with the consolidated financial statements for the period ended September 30, 2022 and with the related notes attached thereto. These consolidated financial statements have been prepared in accordance with international accounting standards for financial reporting.

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

The MD&A is provided to enable the reader to assess material changes in financial position and results of operations for the quarter ended September 30, 2022, in comparison to the corresponding period the year before.

The MD&A is prepared in conformity with NI 51-102F1 and unless expressly stated otherwise, all references to dollar amounts are in Canadian dollars, the functional currency of the Company.

The Company has now completed the divinding out to its shareholders of the shares of its former subsidiary Graphano Energy Limited ("GEL") which is now trading separately on the Exchange under the trading symbol GEL.

#### **FORWARD-LOOKING STATEMENTS AND GOING CONCERN CAUTION**

This MD&A for the quarter ended September 30, 2022 may contain or refer to certain forward-looking statements relating, but not limited to, the Company's expectations, intentions, plans and beliefs. Forward-looking information can often be identified by forward-looking words such as "anticipate", "believe", "expect", "goal", "intend", "estimate", "may", and "will" or similar words suggesting future outcomes, or other expectations, beliefs, plans, objectives, assumptions, intentions or statements about future events or performance.

Any forward-looking information that may be presented in this MD&A is identified as such. Statements regarding the adequacy of cash resources to carry out our exploration and development programs or the need for future financing are forward-looking statements. Any forward-looking information is based on current expectations that involve a number of business risks and uncertainties. Forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from expected results. Current shareholders and prospective investors should be aware that these statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from those suggested forward-looking statements.

Shareholders are cautioned not to place undue reliance on forward-looking information. By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and various future events will not occur.

#### **GOING CONCERN DISCLOSURE**

The ability of the Company to continue as a going concern is uncertain and is dependent upon its ability to fund its working capital and other requirements, complete the development of its explorations, and eventually to generate positive cash flows from operations and/or raise the capital necessary to undertake new projects. Management plans to explore alternatives possible, including joint ventures, debt and equity financings, and merger opportunities.

The business of mining exploration involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of exploration properties and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability to raise alternative financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values. Although the Company has taken steps to verify title to the

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

properties on which it is conducting exploration and has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title.

Property title may be subject to unregistered prior agreements, aboriginal claims and non-compliance with regulatory requirements.

Several adverse conditions and events cast substantial doubt upon the validity of this assumption. Manganese is not currently generating any revenue from its operations. For the six-month period ended September 30, 2022, the Company recorded a net comprehensive loss of \$1,296,105 (September 30, 2021 – \$1,445,834) and had an accumulated deficit of \$23,603,835 (March 31, 2022 - \$22,307,730) but at that date had a positive shareholders' equity of \$3,364,838 and cash of \$2,904,278. While the "Going concern uncertainty" may still be justified in the longer term, management is of the opinion the Company presently is in sound financial condition to maintain its operations for the next 12 months and beyond.

These consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption inappropriate, and such adjustments, if necessary, could be material.

#### **CORPORATE OVERVIEW**

The following individuals are currently members of the Company's board of directors: Martin Kepman, Roger Dahn, James Richardson, Robert Tjandra and Luisa Moreno. James Richardson is the Company's Chief Financial Officer.

Wasserman Ramsay, Chartered Professional Accountants, are currently the Company's auditors, and Janet Francis of Keystone Corporate Services Inc. is the Company's Corporate Secretary.

The principal activities of Manganese and its subsidiaries are to acquire and advance high potential mining prospects located in North America with the intent of supplying value-added materials to the lithium ion battery and other alternative energy industries. The Company's recent venture into the HVAC business is an opportunistic endeavour in an unrelated business area which has been prompted by the worldwide Covid crisis with its need for significantly improved air quality systems, a need which is expected to continue indefinitely into the future.

**MN intends to provide a secure ethically sourced manganese supply by developing its manganese rich deposit near Woodstock New Brunswick, the Battery Hill Project.**

#### ***Battery Hill/Houlton Woodstock Manganese Property***

On June 28, 2016, the Company announced that it would be entering into an option agreement with Globex Mining Enterprises (GMX). The Company, having met certain conditions of a previously concluded agreement, announced the conclusion of an option agreement for a manganese property in the province of New Brunswick. Pursuant to the agreement, it agreed to issue up to 4 million shares of its share capital and pay up to \$200,000 in order to acquire a 100% interest in the property, details as follows:

Pay \$200,000 in cash to the vendor as follows: \$100,000 on or before the 5th day after TSX-Venture Exchange acceptance of the Option agreement and \$100,000 on or before the date that is 12 months from the Effective date of the option agreement. The cash payments were a firm obligation and were made and required even in the event the Company chose not to complete the option agreement and have been completely satisfied.

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

Issue 4,000,000 common shares as follows: 1,000,000 shares on or before the 5th day after TSX-Venture Exchange acceptance of the Option agreement; a further 1,000,000 shares on or before the 1st anniversary of the Effective date of the option agreement (these first two share issuances were firm commitments); and a further 2,000,000 shares on or before the 2nd anniversary of the Effective date of the option agreement. All these shares have now been Issued as below.

Spend \$1,000,000 in exploration expenditures on the property as follows: \$500,000 on or before the 1st anniversary of the Effective date of the option agreement and an additional \$500,000 on or before the 2nd anniversary of the Effective date of the option agreement. This commitment has been satisfied.

The Company made the first cash payment deposit of \$100,000 on April 28, 2016 and a final cash payment of \$100,000 on February 3, 2017. As at March 31, 2018, a total of 2,400,000 shares were issued as per the option agreement including 400,000 shares as finder's fees common shares. The Company made the first share payment of 1 million shares on December 4<sup>th</sup> 2016 and an additional second share payment of 1 million shares on April 22, 2017. On November 30, 2018 the Company issued the final tranche of shares required under the option agreed by issuing 2,000,000 common shares at a value of \$0.12 each for a total value of \$240,000 (see note 11 of the interim condensed consolidated financial statements) and now owns 100% of the claims subject to a 3% Gross Metals Royalty.

Subsequent to March 31, 2022, the company released a Preliminary Economic Assessment ("PEA") for its wholly owned Battery Hill project. The PEA was prepared by Wood Canada Ltd., an independent engineering services group with extensive experience in mining and mineral processing.

A Preliminary Economic Assessment ("PEA") (the most important first stage in assessing the feasibility of a new mining project) tries to answer the question, "How best can this deposit be exploited to maximize its economic returns?". A PEA can use "inferred" mineral resources (as well as those measured and indicated) for its operational and financial modeling. A PEA doesn't usually form the basis for a production decision because of the higher degree of unknown risks and costs and timelines (as compared to a Feasibility Study ("FS") or Pre-Feasibility Study ("PFS") . The PEA is preliminary in nature, it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the PEA will be realized. The Company is undertaking the additional drilling program required to upgrade the quality of the resources and permit a PFS to be undertaken.

Manganese X's PEA on the Battery Hill Property with impressive results was filed on the Company's SEDAR profile on June 27, 2022 with an effective date of May 12, 2022.

#### ***Peter Lake Copper-Nickel-Cobalt Property***

On August 23, 2018, the Company signed a Property Option Agreement (the "Agreement") with a group of Vendors in Québec (the "Vendors"). Pursuant to the terms of the Agreement, the Company has acquired a 40% interest in the Property. A net smelter royalty ("NSR") of 2% shall be payable to the Vendors on all metals produced from the Property with a right at any time to buy back one percent (1%) of the NSR from the Vendors for one million dollars (\$1,000,000)).

The Company made two cash payments totalling \$25,000 during the year ended March 31, 2019 and issued a total of 833,333 common shares and 500,000 warrants exercisable for a two year period at \$0.25 per share and valued at \$34,000 (now expired unexercised) as per the option agreement at a stated price of \$0.15 each for a total value \$125,000. Further expenditures are not contemplated at this time.

# Manganese X Energy Corp.

## Management's Discussion and Analysis

### For the six month period ending September 30, 2022

#### *Lac Aux Bouleaux Property*

The Company acquired 100% interest in the Lac Aux Bouleaux Graphite ("LAB") Property under an agreement signed July 18, 2019, by paying \$10,000 cash and issuing 307,000 common shares of the Company valued at \$.12 per share. The Property consists of 14 mineral claims in one contiguous block totalling 738.12 hectares near the town of Mont-Laurier, in southern Québec. The Company has completed an updated NI 43-101 technical report which describes historical exploration work on the property and is available on SEDAR and on the Company's website.

The LAB Property has been spun-out out to MN's shareholders through a former subsidiary of the Company known as Graphano Energy Ltd. ("Graphano"). Graphano's shares have been distributed to MN's shareholders as a dividend pursuant to the terms of a Scheme of Arrangement by which the Company distributed 15,559,049 common shares of Graphano ("Graphano Shares") to shareholders of record of Manganese X common shares ("Manganese X Shares") as of August 24, 2021 (the "Record Date"), on the basis of one Graphano Share for every eight shares of Manganese X held on the Record Date. The sale of the LAB property to Graphano Energy Limited and dividend distribution are booked at the carrying value in MN's books which has been a nominal value of \$1. GEL's shares are now listed for trading on the Exchange and began trading on September 30, 2021 under the trading symbol "GEL". Three members of MN's management and Board of Directors are presently three of the five members of Graphano's Board of Directors and management.

#### **QUALIFIED PERSON AND QA/QC**

Roger Dahn, B.Sc., P.Geo (New Brunswick), Manganese X Energy's Chair, is designated as the Qualified Person in compliance with National Instrument 43-101 as well as Perry MacKinnon, P.Geo, the Company's VP Exploration, who is also a Qualified Person regarding the Company's Houlton Woodstock Battery Hill manganese property located in Carleton County, New Brunswick.

#### **FINANCIAL POSITION AND LIQUIDITY**

The financial position of Manganese at September 30, 2022 is:

	<b>Sep 30, 2022</b>	March 31, 2022	Sep 30, 2021
	<b>\$</b>	\$	\$
Current assets	<b>3,283,556</b>	3,934,563	4,868,178
Non-current assets	<b>112,500</b>	120,000	127,500
Total assets	<b>3,396,056</b>	4,054,563	4,995,678
Current liabilities	<b>31,218</b>	128,432	162,029
Shareholder's Equity	<b>3,364,838</b>	3,926,131	4,833,649
Total liabilities and Equity	<b>3,396,056</b>	4,054,563	4,995,678
Working capital	<b>3,252,338</b>	3,806,131	4,706,149

Cash at September 30, 2022 was \$2,904,278 (including \$Nil in restricted flow-through funds) compared to \$3,511,198 (including \$Nil in restricted flow-through funds) at March 31, 2022. The Company is very gratified that it has been so successful in raising the working capital necessary to fund all of its projects for at least the next 12 months.

As of September 30, 2022, Manganese had working capital of \$3,252,338 compared to \$3,806,131 at March 31, 2022 and \$4,706,149 at September 30, 2021. This significant working capital is attributable to warrant and

# Manganese X Energy Corp.

## Management's Discussion and Analysis

### For the six month period ending September 30, 2022

share Option exercises and the above noted success in its recent share offerings in anticipation of further exploration and development work on its Battery Hill Project.

The Company continues to focus on advancing the Battery Hill Project and DBC's Joint Venture but will continue to be watchful for potential opportunities for raising additional funds.

Cash flows used in operating activities, for the six-month period ended September 30, 2022, were -\$1,224,420 compared to \$1,091,163 used in the same period ended September 30, 2021. The net loss for the period was \$1,296,105 in 2022 compared to a net loss of \$1,445,834 in 2021 for the comparative same period, primarily reflecting unusually large non-cash costs associated with the stock-based compensation costs identified in detail in the accompanying financial statements as well as increasing exploration and other operating expenses.

Cash flows into investing activities for the six-month period ended September 30, 2022 and September 30, 2021, were \$Nil for both.

Cash flows from financing activities for the six-month period ended September 30, 2022, were \$617,500 compared to \$42,675 for the same period ended September 30, 2021, again arising from the Company's warrant and option exercises.

Other current assets (excluding cash) at September 30, 2022 were \$379,278 compared to \$423,365 at March 31, 2022. Other current assets are prepaid expenses and Canadian sales tax receivable which is expected to be received in cash in the next months as usual.

The Company's interest in Mountain Spring Oil and Gas Limited ("MSOG") a private company incorporated to invest in operating Oil and Gas properties in the province of Alberta has now been fully written off and the Company continues to take under advisement the possibility of further legal action for recovery of its losses arising from this investment.

On April 30, 2020, the Company acquired by way of a definitive agreement, a US patent for a system and method for air quality disinfection, sterilization and deodorization. Further testing has been encouraging and more detailed testing is now being undergone. The acquisition of this patent will add new technology to our Disruptive Battery Corp. ("DBC") subsidiary. It is intended that Disruptive Battery Corp. will work in partnership with universities, chemical labs and global HVAC companies and experts in the field of environmental science, especially the University of Virginia with whom the Company now has an agreement for work to be conducted via its 50% owned joint venture subsidiary. The terms of the acquisition were 1.5 million shares at a value of \$0.10 each (\$150,000) plus a 2% royalty on future sales by DBC deriving from the patent. DBC has the option to repurchase 1/2 of the royalty for the sum of \$250,000. Amortization is being provided at the rate of ten years straight line/10% per year, as below

	<b>Opening</b>	<b>Additions</b>	<b>Amortization</b>	<b>Net</b>
Patent	\$ 116,250	\$ -	\$ 3,750	\$ 112,500

Accounts payable and accrued liabilities were \$31,218 at September 30, 2022 compared to \$128,432 at March 31, 2022. Included in the accounts payable and accrued liabilities for this period is an amount of \$6,821 (March 31, 2022 - \$1,150) due to related parties of the Company (See Related Party Transactions for additional information). This is attributable to the greater operating activity levels of the Company.

**Manganese X Energy Corp.**  
**Management's Discussion and Analysis**  
**For the six month period ending September 30, 2022**

Shareholders' Equity was positive \$3,364,838 at September 30, 2022 compared to \$3,926,131 at March 31, 2022 and \$4,833,649 at September 30, 2021. The detail of the Shareholders' Equity is:

	<b>Sep 30, 2022</b>	March 31, 2022	Sep 30, 2021
	\$	\$	\$
Share capital	<b>18,157,670</b>	17,347,795	17,343,669
Reserves	<b>8,811,003</b>	8,886,066	6,969,132
	<b>26,968,673</b>	26,233,861	24,312,801
Deficit	<b>(23,603,835)</b>	(22,307,730)	(19,479,152)
<b>Total shareholders' equity</b>	<b>3,364,838</b>	3,926,131	4,833,649

The Company has no ongoing revenue streams (nor does it expect to develop any in the immediate future) and relies primarily on equity financing (but could include loans) to meet its obligations and advance its projects. The accumulated deficits continue to rise in the context of the Company's expanding activities and its routine and expected absence of revenues.

**CAPITAL RESOURCES**

***Common shares***

The Company has detailed its share issuances in its annual financial statement as well as the previous quarterly financial statements.

A total of 2,050,000 warrants were exercised during the six-month period ended September 30, 2022, the Company issued 2,050,000 common shares for warrants exercised and \$597,500 was received.

There were 126,707,907 common shares issued and outstanding as at September 30, 2022 compared to 124,557,907 as at March 31, 2022.

***Share purchase warrants***

As at September 30, 2022, the movement in the number of warrants outstanding and their weighted average exercise prices are as follows:

**Manganese X Energy Corp.**  
**Management's Discussion and Analysis**  
**For the six month period ending September 30, 2022**

	Warrants #	Weighted average exercise price \$
<b>Balance - March 31, 2020</b>	<b>4,650,000</b>	<b>0.16</b>
Issued	24,999,145	0.15

\$0.440	89,340	0.37	Feb 2023
<b>Balance -Sep 30, 2022</b>	<b>22,250,492</b>	<b>0.59</b>	

**Stock options**

The Company has a stock option plan under which it is authorized to grant options to executive officers and directors, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common stock of the Company. Under the plan, the exercise price of each option equals the market price of the Company's stock, not less than the previous day's Closing Price, as calculated on the date of grant. The options can be granted for a maximum term of 5 years and vest at the discretion of the board of directors. The option activity, under the share option plan and information concerning outstanding and exercisable options is as follows:

**Manganese X Energy Corp.**  
**Management's Discussion and Analysis**  
**For the six month period ending September 30, 2022**

	No. of Options Vested	Weighted Average Exercise Price (\$)
<b>Balance - March 31, 2020</b>	<b>2,650,000</b>	<b>0.11</b>
Options issued	300,000	0.12

	5,500,000	5,500,000	0.40	March 2027
<b>Balance -Sep 30, 2022</b>	<b>11,600,000</b>	<b>10,733,333</b>	<b>0.44</b>	

As at September 30, 2022 the share structure of the Company is as follows:

Outstanding Shares	Warrants	Options	Fully Diluted
126,707,907	22,250,492	11,600,000	160,558,399

# Manganese X Energy Corp.

## Management's Discussion and Analysis

### For the six month period ending September 30, 2022

As on date of filing of this MD&A the share structure of the Company is as follows:

Outstanding Shares	Warrants	Options	Fully Diluted
126,707,907	16,250,492	11,600,000	154,558,399

While the share structure has been increased, management believes this is very much to the benefit of the shareholders as it has provided significant additional capital and liquid financial resources by which to pursue its business objectives.

## RESULTS OF OPERATIONS

The Company has currently no operations generating sales and revenues. Detail for the periods ended September 30, 2022 are:

For the six months period ended September 30,	2022			September 30, 2021		
	\$ Manganese	\$ Disruptive	\$ Total	\$ Manganese	\$ Disruptive	\$ Total
<b>Revenues</b>	-	-	-	-	-	-
<b>Cash Expenses</b>						
Exploration expenses	547,835	-	547,835	308,907	-	308,907
Research cost	-	-	-	35,517	38,342	73,859
Other operating expenses	68,768	36	68,804	35,856	30	35,886
Management fees	141,226	-	141,226	119,545	-	119,545
Professional and consulting fees	301,850	-	301,850	107,589	-	107,589
Printing, Postage and mailing expense including re: Plan of Arrangement	4,220	-	4,220	171,539	-	171,539
Advertising and marketing	104,869	-	104,869	118,831	-	118,831
Foreign exchange loss	2,489	-	2,489	3,171	-	3,171
	1,171,257	36	1,171,293	900,956	38,372	939,328
<b>Non- cash Expenses</b>						
Stock-based compensation	117,312	-	117,312	499,008	-	499,008
Amortisation	7,500	-	7,500	7,500	-	7,500
Provision for loss on investment	-	-	-	-	-	-
Profit on sale of property (note 10)	-	-	-	(1)	-	(1)
	124,812	-	124,812	506,507	-	506,507
<b>Net loss and comprehensive loss</b>	<b>1,296,068</b>	<b>36</b>	<b>1,296,105</b>	<b>(1,407,462)</b>	<b>(38,372)</b>	<b>(1,445,834)</b>

Total expenses for the six-month period ended September 30, 2022 were \$1,296,105 compared to \$1,445,834 in 2021, down by \$149,729 (-10%) owing to reductions in research cost, printing, postage and mailing expenses and stock based compensation expense.

# Manganese X Energy Corp.

## Management's Discussion and Analysis

### For the six month period ending September 30, 2022

For the period ended,	Sep 30, 2022	Sep 30, 2021	Variance Increase (Decrease)	
	\$	\$	\$	%
<b>Revenues</b>	-	-	-	-
<b>Cash Expenses</b>				
Exploration expenses	547,835	308,907	238,928	77%
Research cost	-	73,859	(73,859)	-100%
Other operating expenses	68,804	35,886	32,918	92%
Management fees	141,226	119,545	21,681	18%
Professional and consulting fees	301,850	107,589	194,261	181%
Printing, Postage and mailing expense including re: Plan of Arrangement	4,220	171,539	(167,319)	-98%
Advertising and marketing	104,869	118,831	(13,962)	-12%
Foreign exchange loss	2,489	3,171	(682)	-22%
	<b>1,171,293</b>	939,328	231,965	
<b>Non-cash Expenses</b>				
Stock-based compensation- Non-cash	117,312	499,008	(381,696)	-76%
Amortisation	7,500	7,500	-	0%
Profit on sale of property	-	(1)	1	NA
	<b>124,812</b>	506,507	(381,695)	
<b>Net comprehensive loss</b>	<b>1,296,105</b>	1,445,834	(149,729)	-10%

The significant changes semester over semester in expenses are as noted below:

The stock-based compensation is \$117,312, down by \$381,696 (-76%) if compared to last year at \$499,008. Stock-based compensation expense is mostly a function of the number of options issued in a year and the stock's volatility and the grants of options which create this expense are undertaken only intermittently.

The printing and mailing expense incurred in 2021 to comply with Regulatory requirements of the Plan of Arrangement for spinning out the LAB property to Graphano was extraordinary and of such a magnitude because of the large size of the document required and the large number of shareholders which the company is pleased to have. This is not expected to be a recurring item as the Company expects to rely on "Notice and Access" provisions in future.

The Other operating expenses of 68,804, up by \$32,918 (92%) if compared to last year at \$35,886 reflect an increase in Company's activity levels.

The management fees of \$141,226, up by \$21,681 (18%) if compared to last year at \$119,545 mainly due to increased director fees.

The professional and consulting fees of 301,850 up by \$194,261 (181%) if compared to last year at \$107,589 reflects result of variations in activity levels throughout the Company's business.

For the six-month period ended September 30, 2022 the exploration expenses were \$547,835 (2021 - \$308,907), up by \$238,928 (77%). This is due to higher level of drilling services. This longer term increase has been necessary in the context of the Company's work supporting the completion of the Preliminary Economic Assessment. The Advertising and marketing expense increase results from the Company's desire to increase public awareness of the Company and its significant achievements, more recently decreased as a result of the change in emphasis from physical exploration activity to the commissioning of the PEA.

Shareholders should expect the Company's exploration expenses to continue at a significant level as it works towards the innovative metallurgical work that is being undertaken on behalf of the Company by Kemetco, the end result is intended to be a unique North American source of battery grade Manganese Sulphate of

# Manganese X Energy Corp.

## Management's Discussion and Analysis

### For the six month period ending September 30, 2022

extremely high purity. Further developments will be published by way of timely press releases as developments warrant.

Under IFRS, the Company has chosen to expense all costs related to mineral exploration incurred prior to the point of defining a NI 43-101 compliant resource, attaining economic feasibility, and the acquisition of a mining permit. While written off for financial statement purposes, the Company continues to track them separately by property and kind of expenditure. Mineral exploration and evaluation expenses on the properties may be subject to exploration and/or mining restrictions. At the date of this report, management is not aware of any restrictions to its exploration activities.

#### SUMMARY QUARTERLY INFORMATION

Selected quarterly information for the most recently completed quarters is presented below in Canadian Currency (\$):

Quarter ended	Consolidated			
	Revenues	Net loss and Net comprehensive loss for the period	Net loss per share	Number of shares
	\$	\$	\$	\$
<b>September 30,2022</b>	-	<b>(457,001)</b>	<b>(0.004)</b>	<b>126,707,907</b>
June 30, 2022	-	(839,104)	(0.007)	126,707,907
March 31,2022	-	(2,203,658)	(0.018)	124,557,907
December 31,2021	-	(624,919)	(0.005)	124,557,907
September 30,2021	-	(432,650)	(0.003)	124,534,907
June 30, 2021	-	(1,013,185)	(0.008)	124,534,907
March 31,2021	-	(2,057,887)	(0.017)	124,250,407
December 31,2020	-	(1,200,387)	(0.011)	106,731,490
September 30,2020	-	(1,144,036)	(0.011)	99,933,990
June 30, 2020	-	(478,519)	(0.007)	69,164,845

Since mid-2011, the junior mineral exploration industry in general had been struggling to access capital. The TSX-Venture exchange, which is heavily weighted towards the mining industry, had declined 58%, reflecting the malaise of the industry. While there have been some significant reversals of these trends owing primarily to a rebound in gold and other precious metal prices, but also to increased interest in what are broadly referred to as battery metals, including manganese and graphite, market fluctuations continue to be volatile and must be expected to continue to be as investor appetites change with changes in underlying technologies. Recently, the more positive tone of the previous months has been reversed and junior resource company share prices have experienced a further setback. In this environment, the Company's focus has been on taking advantage of the capital raising opportunities presented and deploying this additional capital in ways that may be beneficial to its shareholders. It believes it is now well positioned in a mineral resource sector of increasing strategic importance in North America and the world as a whole.

	<b>239,874</b>	677,897

# Manganese X Energy Corp.

## Management's Discussion and Analysis

### For the six month period ending September 30, 2022

Amounts payable to related parties included in the non-current liabilities and in the accounts payable and accrued liabilities were as follows:

Included in the accounts payable and accrued liabilities	Sep 30, 2022	Sep 30, 2021
	\$	\$
Consulting fees payable to companies controlled by officers and Directors	6,498	7,627
Exploration expenditures due to directors	-	1,423
Owing to a legal firm in which the corporate secretary is a partner	323	100,000
	<b>6,821</b>	<b>109,050</b>

#### SUBSEQUENT EVENTS

Subsequent to the quarter end, 6,000,000 share purchase warrants expired unexercised with corresponding significant reduction in potential dilution.

#### CURRENT AND FUTURE CHANGES IN ACCOUNTING POLICY

##### **Statement of compliance**

These interim condensed consolidated financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and effective as of September 30, 2022.

In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. These consolidated financial statements of the Company have been prepared using historical costs and fair values of certain items. Items measured at fair value include cash held in foreign currencies, warrants, and share based payments. Certain comparative figures have been reclassified to conform to the current year's presentation.

##### **Basis of consolidation**

During the current year the Company's former 100% owned subsidiary 7712898 Canada Inc. was continued in the Province of British Columbia under the new name 1296555 B.C. Ltd. Subsequently, on November 3, 2021, it was amalgamated with the Company under the name Manganese X Energy Corp. The subsidiaries are fully consolidated from the date of acquisition and continue to be consolidated until the date control over the subsidiary's ceases. The annual consolidated financial statements of the Company include the accounts of its 100% wholly owned subsidiaries Disruptive Battery Corp. and, until August 2021, Graphano Energy Ltd ("Graphano"), all located in Canada. All significant inter-company transactions and balances have been eliminated upon consolidation. Graphano was spun-out out to MN's shareholders (see Note 10) on August 24, 2021 and as such has been de-consolidated. The net investment in Graphano, pursuant to the Company's policy of writing off mining properties and related expenditures, was a nominal amount and therefore not disclosed separately.

##### **Investments subject to significant influence**

Investments over which the Company exercises significant influence are accounted for using the equity method. The equity method is a basis of accounting for investments whereby the investment is initially recorded at cost, the carrying value adjusted thereafter to include the investor's pro rata share of post-acquisition earnings of the investee, as computed by the consolidation method. Profit distributions receivable from an investee reduce the carrying value of the investment. There are no investments in this category presently.

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

#### **Foreign operations**

Assets and liabilities of foreign operations whose functional currency is other than the Canadian dollar are translated into Canadian dollars using exchange rates in effect at period-end. Revenues and expenses, as well as cash flows, are translated using the average exchange rates for the period. Translation gains or losses are recognized in other comprehensive income ("OCI"). This applies primarily to the DBC subsidiary and its joint venture.

#### **Functional and presentation currency**

These interim condensed consolidated financial statements are presented in Canadian dollars, which is Company's functional currency.

#### **FUTURE ACCOUNTING PRONOUNCEMENT**

Certain pronouncements have been issued by the IASB that are mandatory for accounting periods after September 30, 2022. There are currently no such pronouncements that are expected to have a significant impact on the Company's interim condensed consolidated financial statements upon adoption.

#### **SIGNIFICANT JUDGMENTS, ESTIMATES AND ASSUMPTIONS**

The preparation of the financial statements in conformity with IFRS requires management to make estimates and judgments that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continuously evaluated and are based on management's experience and other factors, including on historical experience and expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates and assumptions. The estimates and judgments that, in management's opinion, have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are discussed below.

##### **(i) Fair Value of Financial Instruments**

The estimated fair value of financial assets and liabilities, by their very nature, are subject to measurement uncertainty.

##### **(ii) Impairment of non-financial assets**

Exploration and evaluation properties, if capitalized, would be assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration property may exceed its recoverable amount. When facts and circumstances suggest that the carrying amount exceeds the recoverable amount, the Company measures, presents and discloses any resulting impairment loss in accordance with IFRS.

Impairment would be assessed by management using key impairment indicators of IFRS 6 - Exploration for and evaluation of mineral resources, such assessment is subject to uncertainty. The Company does not capitalize its exploration properties.

##### **(iii) Share-based payment transactions**

The Company measures the cost of share-based payment transactions with employees by reference to the fair value of the equity instruments. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining and making assumptions about the most appropriate inputs to the valuation model including the expected life, volatility and dividend yield of the share option. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 11 to the interim condensed consolidated financial statements.

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

#### **(iv) Taxes**

Provisions for taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Company reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made.

#### **(v) Restoration, rehabilitation and environmental obligations**

A legal or constructive obligation to incur restoration, rehabilitation and environmental costs may arise when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, and are provided for, as soon as the obligation to incur such costs arises. Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either a unit-of- production or the straight-line method as appropriate. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount or timing of the underlying cash flows needed to settle the obligation. Costs for restoration of subsequent site damage that is created on an ongoing basis during production are provided for at their net present values and charged against profits as extraction progresses.

The Company has no material restoration, rehabilitation and environmental costs as at September 30, 2022.

## **RISK AND UNCERTAINTIES**

MN's strategy emphasizes developing properties in order to leverage its intellectual property and drive the creation of shareholder value. This strategy has required, and continues to require, significant financings, and is subject to risks associated with mineral prices, mineral resources and operations as well as share price fluctuations. Due to the nature of the Company's business, the present stage of development of its mineral resource projects, and the constraints placed upon the Company's ability to move forward by its current liquidity situation, readers should carefully review and consider the financial, environmental and operational risk factors affecting the Company.

#### ***Need for Additional Financing***

The Company currently has no source of operating cash flow, and there is no assurance that additional funding will be available to the Company as and when needed for further exploration and development of its projects, or to fulfill its obligations to its existing creditors. Volatile markets may make it difficult or impossible for the Company to obtain adequate debt or equity financing in the future, or on terms acceptable to the Company. The failure to obtain additional financing could force the Company to liquidate its assets to satisfy creditor claims. The Company is gratified that its recent experience of availability to it of additional capital resources from the markets has been very positive.

#### ***No Production Revenues***

To date, the Company has not achieved revenue from mining operations. There can be no assurance that significant additional losses will not occur in the near future, or that the Company will be profitable in the future. The amounts and timing of expenditures will depend on the progress of ongoing exploration and development, the results of consultants' analyses and recommendations, and the rate at which operating losses are incurred, the execution of any joint venture agreements with strategic partners, the Company's acquisition of new properties and other factors, many of which are beyond the Company's control. In particular, the Company's operating expenses and capital expenditures may increase in subsequent years as consultants, personnel,

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

and equipment associated with advancing exploration, development and commercial production of its properties are added. The Company does not expect to receive revenues from mining operations in the foreseeable future. The Company expects to continue to incur losses until such time as its properties enter into commercial production and generate sufficient revenues to fund its continuing operations. There can be no assurance that the Company will generate any revenues or achieve profitability.

#### ***Dependence on Management***

The Company's business and operations are dependent on recruiting and retaining the services of a small number of key members of management and qualified personnel. The success of the operations and activities of the Company are dependent, to a significant extent, on the efforts and abilities of the management of the Company. Investors must be willing to rely, to a significant extent, on the discretion and judgment of the management of the Company. Furthermore, while the Company believes that it will be successful in attracting qualified personnel and retaining its current management team, there can be no assurance of such success. The Company does not maintain key employee insurance on any of its employees or contractors.

#### ***Competition***

The business of the Company is intensely competitive. The Company competes with other mining companies for the acquisition of mineral rich properties that can be developed economically, technical expertise and skilled labour in finding, developing and operating such properties and funding. The Company competes with other mining companies that have greater financial and technical resources and experience. Many competitors not only explore for and mine precious metals, but also conduct refining and marketing operations on a worldwide basis. Such competition may result in the Company being unable to acquire desired properties, to recruit or retain qualified employees, or to acquire the capital necessary to fund its operations and develop its properties. The inability of the Company to compete with other mining companies for these resources could have a material adverse effect on the Company's results of operations and business.

#### ***Title of Mineral Property Rights***

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed or impugned. Although the Company has investigated its title to the mineral properties for which it holds concessions, mineral leases, licenses, or which are the subject of joint ventures, there can be no assurance that the Company has valid title to such mineral properties or that its title thereto will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. The Company does not carry title insurance with respect to any of its mineral properties in which it currently holds an interest. A successful claim that the Company does not have title to a mineral property could cause the Company to lose its rights to explore or mine that property, likely without compensation for its prior expenditures relating to the property.

#### ***Risks and Hazard Relating to Mineral Exploration and Exploitation***

Mineral exploration and exploitation involve a high degree of risk. Few properties that are explored are ultimately developed into producing mines. Unusual or unexpected formations, formation pressures, fires, power outages, labour disruptions, flooding, explosions, tailings impoundment failures, cave-ins, landslides and the inability to obtain adequate machinery, equipment or labour are some of the risks involved in mineral exploration and exploitation activities.

The Company has relied on and may continue to rely on consultants and others for mineral exploration and exploitation expertise. Substantial expenditures are required to establish mineral reserves and resources through drilling, to develop metallurgical processes to extract the metal from the ore and, in the case of some properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining, or to upgrade existing infrastructure. There can be no assurance that the funds required to exploit any mineral reserves and resources discovered by the Company will be obtained on a timely basis or at all. The economics

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

of exploiting mineral reserves and resources discovered by the Company are affected by many factors, many outside the control of the Company, including the cost of operations, variations in the grade of ore mined and metals recovered, price fluctuations in the metal markets, costs of processing equipment, and other factors such as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals and environmental protection. There can be no assurance that the Company's mineral exploration and exploitation activities will be successful.

#### ***Risks Relating to Government Regulation***

The Company's operations and properties are subject to laws and regulations governing mineral concession acquisition, mine development and prospecting, mining, production, occupational health and safety, labour standards, employment, waste disposal, toxic substances, land use, environmental protection, use of water, exports, taxes, royalties and other matters. It is possible that the Company may not be able to comply with existing and future laws and regulations. In addition, future changes in applicable laws, regulations, agreements or changes in their enforcement or regulatory interpretation could result in changes to the terms of the Company's permits and agreements, which could have a material adverse impact on the Company's current operations and future development projects. The Company may experience increased costs and delays in production as a result of the need to comply with applicable laws, regulations and permits. Permits are subject to the discretion of government authorities and there is no assurance that the Company will be able to obtain all required permits on reasonable terms or on a timely basis.

Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in enforcement actions thereunder, including the loss of the Company's mining concessions, orders issued by regulatory or judicial authorities requiring operations to cease or be curtailed, fines, penalties or other liabilities. The Company may be required to compensate those suffering loss or damage by reason of its mining operations and may have civil or criminal fines or penalties imposed for violations of such laws, regulations and permits.

#### ***Regulations and Permits***

The Company will be required to obtain certain permits in order to carry on operations at its mineral properties. There is no guarantee that such permits, if and when required, will be granted or renewed on terms acceptable to the Company. Furthermore, the Company may be required to obtain additional licenses and permits from various governmental authorities to continue and expand its development and production activities. There can be no guarantee that the Company will be able to maintain or obtain all necessary licences, permits and approvals that may be required for future development, construction and operations.

The Company's activities are also subject to a wide variety of laws and regulations governing health and worker safety, employment standards, waste disposal, protection of the environment, protection of historic and archaeological sites, mine development and protection of endangered and protected species and other matters. The Company is required to have a wide variety of permits from governmental and regulatory authorities to carry out its activities. These permits relate to virtually every aspect of the Company's exploration and exploitation activities. Changes in these laws and regulations or changes in their enforcement or interpretation could result in changes in legal requirements or in the terms of the Company's permits that could have a significant adverse impact on the Company's existing or future operations or projects. Obtaining permits can be a complex, time-consuming process. There can be no assurance that the Company will be able to obtain the necessary permits on acceptable terms, in a timely manner or at all.

The costs and delays associated with obtaining permits and complying with these permits and applicable laws and regulations could stop or materially delay or restrict the Company from continuing or proceeding with existing or future operations or projects. Any failure to comply with permits and applicable laws and

# **Manganese X Energy Corp.**

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

regulations, even if inadvertent, could result in the interruption or closure of operations or material fines, penalties or other liabilities.

#### ***Dividends Unlikely for extended period of time***

The Company has not declared or paid any dividends since the date of its incorporation and does not currently anticipate that dividends will be declared in the short or medium term. Earnings, if any, would be retained to finance further development of the Company's business.

#### ***Uninsurable Risks***

Mineral exploration and exploitation activities involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences and political and social instability. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks as a result of high premiums or other reasons. Should such liabilities arise, they could negatively affect the Company's profitability and financial position and the value of the common shares of the Company. The Company does not maintain insurance against environmental risks.

#### ***Inability to Enforce Legal Rights in Certain Circumstances***

In the event a dispute arises in a foreign jurisdiction, the Company may be subject to the exclusive jurisdiction of foreign courts or may not be successful in subjecting foreign persons to the jurisdictions of courts in Canada. Similarly, to the extent that the Company's assets are governed or located outside of Canada, investors may have difficulty collecting from the Company any judgments obtained in the Canadian courts and predicated on the civil liability provisions of securities legislation. The Company's interests are primarily in Canada with a lesser amount in the United States whose rule of law is generally similar to our own, albeit at generally greater cost.

#### ***Exchange Rate Fluctuations***

Exchange rate fluctuations may adversely affect the Company's financial position and results. The Company incurs certain costs in U.S. dollars, Euros and British Pounds, while financial results are reported in Canadian dollars. Currency exchange fluctuations may materially adversely affect the Company's future cash flows, results of operations and financial condition. The Company does not currently engage in hedging or have a policy in place for managing or controlling foreign currency risks. Recent experience suggests that such risks have not resulted in material adverse effects for the Company.

#### ***Share Price Fluctuations***

In recent years, the securities markets in Canada have experienced a high level of price and volume volatility, and the market price of securities of many companies, particularly development stage companies, have experienced wide fluctuations in price that have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that such fluctuations in the Company's share price will not occur.

#### ***Battery Technology Risks***

The composition of batteries in a world that is being recognized as increasingly dependent on sophisticated energy storage mechanisms is an evolving area where the Company now appears to be well positioned as a result of the increasing recognition of the significance of manganese as a key constituent. Future developments may change this situation and the Company is vigilant with respect to new developments but today appears to be extremely well positioned.

## **Management's Discussion and Analysis**

### **For the six month period ending September 30, 2022**

---

#### ***Conflicts of Interest***

Certain of the Company's directors and officers may serve as directors or officers of other companies, companies providing services to the Company, or companies in whom they may have significant shareholdings. To the extent that such other companies may participate in ventures in which the Company may participate, the directors of the Company may have a conflict of interest in negotiating and concluding terms respecting the extent of such participation. In the event that such a conflict of interest arises at a meeting of the Company's directors, a director who has such a conflict will abstain from voting for or against the approval of such participation or such terms. Non-conflicted Directors will be especially vigilant in these circumstances and may consider the advisability of establishing an Independent Committee to review any such transactions.

In accordance with the laws of Canada, the directors of the Company are required to act honestly, in good faith and in the best interest of the Company. In determining whether or not the Company will participate in a particular program and the interest therein to be acquired by it, the directors will primarily consider the degree of risk to which the Company may be exposed and its financial position at the time.

#### ***Potential Dilution***

The issue of Common Shares of the Company upon the exercise of outstanding options and warrants will "dilute" the ownership interest of the Company's current Shareholders. The Company may also issue additional option and warrants or additional Common Shares from time to time in the future. If it does so, the ownership interest of the Company's then current shareholders could also be "diluted" but with a corresponding increase in liquid resources by which to pursue its business plans. Seen in this context, "dilution" is perhaps not an appropriate overall characterization.

#### ***Covid-19***

In early 2020, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self imposed and other quarantine periods and social and physical distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and periodic weakness. Governments and central banks have reacted with significant monetary and fiscal interventions (which may carry their own risks) designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company and its operating subsidiaries in future periods. The recent news on the development and rapid implementation of several vaccines which appear to have very good efficacy against the virus has generated considerable optimism that life will get to a more normal pace and practice during the course of 2022/3. This is clearly a continuously developing dynamic situation as various "waves" of the virus have varied significantly around the country and around the globe and caution as to its further development is still appropriate. While it is clear that the global pandemic is not over, it appears that investors and the general public are learning to live with the fact of the pandemic and its uncertainties.

#### ***Off Balance Sheet Arrangements***

The Company does not have any off-balance sheet arrangements.

Readers are encouraged to read and consider the risk factors, which are incorporated in this MD&A, and additional information regarding the Company available on the SEDAR website at [www.sedar.com](http://www.sedar.com) or the company's own website at [www.manganesexenergycorp.com](http://www.manganesexenergycorp.com).
