### 1. Nature of operations and going concern

Cuspis Capital II Ltd. (the “Company” or “Cuspis-II”) was incorporated September 3, 2019 pursuant to the provisions of the Business Corporations Act (Ontario). The Company’s registered head office is located at 77 King Street West, Suite 700, Toronto, Ontario, Canada M5K 1G8 and its corporate and tax year-end is September 30. The Company’s shares are listed for trading on the TSX Venture Exchange under the symbol “CCII.P”.

The Company is carrying on business as a Capital Pool Corporation (“CPC”), as such term is defined in TSX Venture Exchange Inc. (the “Exchange”) Policy 2.4 – Capital Pool Companies (“CPC Policy 2.4”).

As at September 30, 2023, the Company had no business operations. The Company’s principal purpose is the identification, evaluation and acquisition of assets, properties or businesses or participation therein subject, in certain cases, to shareholder approval and acceptance by the Exchange, in its efforts to complete a Qualifying Transaction.

Where a Qualifying Transaction warrants, additional funding may be required. The ability of the Company to fund its potential future operations and commitments may be dependent upon the ability of the Company to obtain additional financing and complete a Qualifying Transaction.

#### Proposed Qualifying Transaction

On June 1, 2022, the Company entered into a Letter of Intent (“LOI”) with Peninsula Capital Corp. (“Peninsula”), a private company incorporated under the laws of the Province of Ontario. Trading in the common shares of the Company was halted pursuant to the policies of the Exchange. The deadline for completion of the transaction was extended to June 30, 2023.

On July 6, 2023, the Company and Peninsula agreed not to extend or renew the expired LOI. The Company continues to evaluate other opportunities and candidates for the completion of a Qualifying Transaction. The Company’s shares resumed trading on August 2, 2023.

#### Going concern

These financial statements were prepared on a going-concern basis of accounting, which assumes that the Company will continue operations for the foreseeable future and be able to realize the carrying value of its assets and discharge its liabilities and commitments in the normal course of business. The Company does not generate revenue from operations and incurred net income of \$4,625 for the three months ended September 30, 2023 (September 30, 2022 – loss of \$19,269). However, the Company believes that its working capital of \$1,605,661 as at September 30, 2023 will provide the Company with sufficient cash resources to meet its obligations for at least twelve months from the end of the reporting period. As the Company has no revenues, its ability to continue as a going concern is dependent on its ability to complete a Qualifying Transaction. These financial statements do not reflect adjustments that would be necessary if the going concern assumption was not appropriate. These adjustments could be material.

Subject to certain permitted exemptions, all securities of the Company held by principals of the resulting issuer will also be escrowed.

All common shares acquired on exercise of stock options granted to directors and officers prior to completion of a Qualifying Transaction must also be deposited and held in escrow pursuant to the requirements of the Exchange. All common shares of the Company acquired in the secondary market prior to the completion of a Qualifying Transaction by a Control Person, as defined in the policies of the Exchange, are required to be deposited and held in escrow.

The seed common shares are considered contingently issuable until the Company completes a Qualifying Transaction and, accordingly, they are not considered to be outstanding shares for purposes of loss per share calculations.

### 9. Related party transactions

Related parties include the Board of Directors, close family members and enterprises which are controlled by these individuals as well as certain persons performing similar functions.

Refer to Note 4 for details on seed shares issued and stock options granted to related parties.

### 10. Management of capital

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and ensure sufficient liquidity in order to remain a CPC and complete a Qualifying Transaction so that it can provide adequate returns for shareholders. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital as total shareholders' equity. The Company is not subject to any externally imposed capital requirements other than the cash restriction disclosed in Note 3. There were no significant changes in the Company's approach to capital management during the periods ended September 30, 2023 and June 30, 2023.

### 11. Financial instruments and risk management

The Company's activities may expose it to a variety of financial risks: fair values, credit risk, liquidity risk and market risk (including interest rate risk). The Board of Directors provides regular guidance for overall risk management.

#### Fair values

As at September 30, 2023, the Company's financial instruments consisted of cash, short-term investments, and accounts payable and accrued liabilities. The fair values of these financial instruments approximate their carrying values due to the relatively short-term maturity of these instruments.

The Company is exposed in varying degrees to a number of risks arising from financial instruments. Management's involvement in the operations allows for the identification of risks and variances from expectations. The Company does not participate in the use of financial instruments to mitigate these risks. The Board approves the risk management processes. The Board's main objectives for managing risks are to ensure liquidity, the fulfillment of obligations, the limitation of the Company's exposure to credit and market risks, and the Company's completion of a Qualifying Transaction.

#### Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its obligations. The Company is exposed to credit risk through its cash and short-term investment balances which were held at Canadian financial institutions as at September 30, 2023 and June 30, 2023. The Company believes its exposure to credit risk is not significant.

## 11. Financial instruments and risk management (continued)

### Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Management believes the Company had no significant exposure to interest rate risk through its financial instruments as at September 30, 2023 and June 30, 2023.

A 1% increase (decrease) in the interest rate on the short-term investments as at September 30, 2023 would result in an estimated increase (decrease) in net income (loss) of approximately \$16,200 (June 30, 2023 - \$16,400).

### Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with financial liabilities. The Company has a planning and budgeting process in place by which it anticipates and determines the funds required to support normal operation requirements. The Company coordinates this planning and budgeting process with its financing activities through the capital management process described in note 10, in normal circumstances. The Company's accounts payable and accrued liabilities have contractual maturities of less than 30 days and have normal trade terms.
